Context_of_Work	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...I'm a different level than the patrol guys. It's not that I'm better than them by any means. I have to answer same questions, how to do stuff. If I end up pulling a patrol chief, I'm lost. But as far as the detail in the type of reports. When you're typing a homicide report, and it's your initial report, you're typing 30-plus pages, where on patrol, I don't think I had anything more than 3. Maybe an ugly domestic is 4 pages. But you're craving in so much more detail. And you can't just put in. The old days, they're doing a DUI [inaudible] arrested same, they're gone. You got to spell it out. My DUI report as compared to somebody else's is twice as long. But it's because I've got the extra training, experience so I'm able to learn how to articulate it, so.
Context_of_Work	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	I am very blessed that my office is here. We're off site. I'm not at the main office... So most of our guys are based out of our sheriff's office. But then we have a couple that just lived in different spots. We have a couple substations. That serves the community better. But I get fuck all

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								done when I'm in Eagle at the sheriff's office. There's too many distractions. Like I said, I can handle homicides to hanging Christmas lights.
Context_of_Work	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	And they can be within hours. And I can be in the middle of typing a homicide report, and I have to go hang Christmas lights. The detectives there are seen as the Swiss Army knife because we can do everything.
Context_of_Work	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	So the front desk folks, if they need help, they have a question, they kick it back to us. And we get a lot of, "Hey, can you come here? I need you for five minutes." Well, five minutes, and five minutes, and five minutes, and five minutes. Then where our office is, it's kind of a-- so for you, it's an L-shaped corner. Our office, the detective office, is between the [Job title], [Job title], and the [Job title]. So everything filters into our-- and it's a corner office. So everything would filter into there, whether it's some command staff just coming in to BS, which is-- it's cool. "We're letting you know we're one of the boys." But they come in there. Or if they have a special project that needs done right away, they come in to us. "We need this done right away." And all you do is say, "Okay." Whatever I was working on, it wasn't the priority. Now, this is my priority. But what happens is they come back to you, "Why didn't you have that done for me?" "Well, it's because you told me to do these three other things." "That doesn't matter. Why isn't this done? I don't want to hear any excuses." So we're kind of a dumping ground of-- we get everything...
Context_of_Work	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...the other detectives that are down there hate me because I'm off-site... It seems to be out of jealousy. Because they'll go in. And they've got a bunch of paperwork to do. And then they don't type it. And then we shut our door, and then we're told we're anti-social. I'm like... But I got to get this done... So station life is-- life at the office is you avoid it as much as you can... Just because you know you are going to get more work done some place else...
Context_of_Work	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	But the more fun you have, the more you got to type. I'll put it that way [laughter]. I'm just trying to think. So last week I interviewed two people for some drug stuff. And it was maybe two hours, two and a half hours

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								interviews. It took me probably close to eight hours to type it all out... Six to eight hours because you type, type, type, and then just whatever happens, and proofreading. It took me almost a day and a half to get from point A to finished... A DUI will take me two hours to type.
Context_of_Work	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	Not so much right now in my current position. But yeah. You do. When I was handling general crimes and there's a fire, you go there and you check in with the IC, the command, and find out what's going on. And depending on who the [Italian?] chief is, is how much trash you can talk because they don't always know me, and I kind of just if it's here, it comes out. There's not much of a filter. So I'll start teasing them right off the back. "Hey, what time does lunch show up? We're hungry [laughter]." Just to let them know that you're not better than anybody else... I hurt a lot of feelings too...
Context_of_Work	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...it's getting to the point of there's so much stuff in the car. You're like Emerson, Lake & Palmer trying to go to a call. There's a computer here. And it's giving you dispatch updates. You've got siren controls. You've got a radio. You may have two or three radios. And then, what burns my ass is when dispatch tells to switch a channel. And you're like, "I'm doing 100... and I'm driving, and I'm dodging man, and machine, and [critters?], and everything. And then I don't blame dispatchers for this or people on the other end of the radio. They don't know what you're going through in the moment as you're trying to hurry up and get to call or hopefully save somebody. But there's tons of technology in the car...
Context_of_Work	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	The pain in the ass is the thing is clunky. It's got an old BlackBerry-style keyboard... I got big fingers, I got bad eyes, so little screen, and it's not user-friendly from the physical aspect of trying to look. And you're in a car. It's 2 o'clock in the morning. It's a well-known fact. People don't like cops, especially at 2:00 in the morning when you've pulled them over, and they've probably had a few pops in them. So you've got video in the car. You've got your radio. You've got your computer system, whatever the hell you want to call it. Hopefully, you've remembered to just turn your XM, or whatever the hell you got, Pandora down. You turn that

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								down. But you got to do all of this. You got all that going on in the car. You've got to keep track on your suspect, who's in his car, who knows he's going to county and may or may not want to fight you, and he may have something hidden under his seat. And you're trying to type an e-ticket...
Context_of_Work	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...the data that's available, information gathering. And I think it's a skill the newer guys have lost, or they don't have is go out and talk to somebody. That's like, "Oh, no, no, no. I can't do that." "Yeah. Go talk to them." And a lot of guys want to solve stuff from behind the keyboard. And you have to go out and talk to people. So there's good and bad. But just the technology, you have computers in the car. You've got the video systems in your car. You've got tasers. There's all kinds of stuff. And I think most of it it's for the better.
Context_of_Work	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	I think for the most part. I can't think of any technological advancement that is bad. Some of them aren't great but going from handwritten reports to dictated reports, to a crappy DOS-based report system, to now, where you can have a word processor, that's easy and the information sharing is great because through the various systems, we can communicate all over the world. If I need to email copy [Name] on something, he's going to get that email within 30 seconds of me hitting send. You can't just bounce jurisdiction to jurisdiction, state to state and get away with the same crimes.
Context_of_Work	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	But people don't like to talk and-- I say kids. Like I said, I've been in this 18 years now. People just getting new on the job don't have that ability to talk to people. They don't have the ability to sit down and be [inaudible] and sit down and wrap with people. Some do but others in the majority, they think there's going to be an app that's going to save their life, where they can send an emoji or a meme that's going to get them through a situation. There's not. Sometimes you just got to figure out how to talk to people...
Context_of_Work	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	Weight and everything. And working in human [State] summer's pretty [inaudible]. It was hot. I would literally have to go and change my shirt

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								halfway through your shift because you're just sweating so much. So there's those technologies. I like boots to get more lighter, that kind of stuff...
Context_of_Work	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...as far as cop works, some of the best cop work out there is no-tech. It's pen and it's paper. There's no other way around it. It's just getting away from the desk, and out there knocking on doors and talking to people.
Context_of_Work	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	I mean, on my personal life phone, I run the beta version of the newest iOS. I'm always out there like, "What's next. Give me more. Give me more. Give me more." And that's why I tend to be test-- for the county computers, I'm in test groups and all that stuff.
Context_of_Work	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	That's what my job is, and that's what they want me to do. No. I'm always about what's new. What can you give me to make my job easier? I'm intrinsically lazy. What can you make-- how can you make it easier for me? And I know that some of the-- like Dodge is coming out with kind of like the Tesla. They've got the iPad built into the dash. So all your computer, short of your keyboard, like controls and everything is going to be built right into your dash.
Context_of_Work	LE	U	Manager	46-55	31-40	Male	LE-U-020	Well, I'm in charge. We have 5 dispatch centers statewide, 6 including-- we have 1 at our capital ESU, but 5 regional and then 1 specific for the capital area. Have 140 employees in charge of all dispatch-related functions-- CAD, computers, in addition to purchasing mobile pac-set radios. And then working in conjunction with OIT with-- they do the actual installs in towers, and those type of things. So a little bit of everything.
Context_of_Work	LE	U	Manager	46-55	31-40	Male	LE-U-020	Yeah. Well, it depends. Currently, we're building a new dispatch center in [City]. Projects today that I was working on, we're actually moving another one of our dispatch centers. We're actually combining State Patrol dispatch centers into the traffic operation centers with the Department of Transportation. So those are two that we're actually actively working, and that's taking up a lot of the time that I have now. In

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								addition, I'm on the [State] FirstNet Authority Board, so working a lot with that specifically, the [State] Plan came out in June. We're doing evaluation in that. So that's a meeting I go to this afternoon.
Context_of_Work	LE	U	Manager	46-55	31-40	Male	LE-U-020	So that, in addition to personnel issues of hiring, firing, if I had to. In the process of doing a CAD upgrade. So my week started Sunday morning at 2:00 AM.
Context_of_Work	LE	U	Manager	46-55	31-40	Male	LE-U-020	I'm 24/7 on call... Yeah. And that's why they said, "Well, when are you going to retire?" I said, "Well, I'm still young," He says, "But nobody wants my job [laughter]" I said, "There has to be at least two of me to do the stuff that I've done." But I've done it for a long time, so I can do it.
Context_of_Work	LE	U	Manager	46-55	31-40	Male	LE-U-020	I'd say average, we're averaging 30s early... We get a lot of young people. And then we've got some people that are in their 40s and 50s that have been here. They're old-school people that are still bringing the average, but it's more of a younger generation that we're hiring right now. And typically, it's a younger person's job. It's all computerized. It's all typing. It's all those type of things. And the younger generation does better with that. I mean, I'm saying we do get people in their fifties that apply for us, and they have education, and they have the skill. They have a lot of things, but when it comes to actual multitasking and those type of things, it's not as good. And I said, "I wouldn't want to sit down at an advanced age either because it's not an easy job."
Context_of_Work	LE	U	Manager	46-55	31-40	Male	LE-U-020	[RE: text-to-911 Safe2Tell program] They do a lot of school-- I mean, they go out to the schools. They do a lot of education and training through the school districts and when they launched the app, they did kind of a marketing and in everybody's wildest dreams nobody even anticipated that type of increase.
Context_of_Work	LE	U	Manager	46-55	31-40	Male	LE-U-020	[RE: text-to-911 Safe2Tell program] And, I mean, the number of suicide attempts that we've actually stopped in the middle of happening, that if the program wasn't available-- I mean, we've had situations where we're either talking with the person or the friend and their last thing is goodbye. We send in law enforcement. They knock on the door and the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								parent says, "Oh, he's in his room." And they go to his room and he's hanging in his room... So without that type of intervention, that kid obviously has problems but there was-- we saved a life that day.
Context_of_Work	LE	U	Manager	46-55	31-40	Male	LE-U-020	They all know how to dispatch all of them, but they do rotate through different areas. I mean, so some will do law, and then tomorrow you come in and you're going to be responsible for the EMS, or fire, or those type of things. And they do rotate through each and every one of them because you can never predict on who's going to call in sick.
Context_of_Work	LE	U	Manager	46-55	31-40	Male	LE-U-020	Typically, the way in [State] is that we're responsible for all unincorporated areas... so outside of the city. So when you get to large metropolitan areas, unincorporated could still be very metro, very urban. They have a lot of cops around so it varies as well. So we're responsible for all of those, for anything that goes on in that. So even if it's a domestic going or anything from traffic accidents to motorist assist, breakdowns, those types of things. So we handle most of it...
Context_of_Work	LE	U	Manager	46-55	31-40	Male	LE-U-020	...There are some counties in the state that will cover traffic accidents. They actually have a traffic division. And they do accidents on the county roads. And we still monitor main state highways and major thoroughfares. But they handle their county roads unless it's something big and type of thing. But that's fewer and far between because, on the other side, they're taxed on resources as well. So the first thing that they want to give up is traffic because, well, traffic's the state patrol's problem [laughter]. Yeah. So we're getting some of those back. But we do very well in working with other agencies. We have a very good working relationship with the sheriffs and the local PDs.
Context_of_Work	LE	U	Manager	46-55	31-40	Male	LE-U-020	And one of the things we have in [State], we set up a-- it's Star CSP line which we use for road rage, and impaired drivers. And those calls are directed to State Patrol dispatch centers whether they're in a metro area or not, because we're not taking away from true 911, it's not a 911 call. But they did direct it to us and we typically are responsible for the highways. Those calls obviously go through the roof as well. One of the huge numbers that we have. So, again, it's a technology that we saw an

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								issue and said, "If there's a way we can get some of these calls direct to us, we'd get better information." So we worked with the carriers, all the major carriers, we met with them and set it up. And initially, when we did that, time on phones was an issue, people didn't want-- so we got it to be a toll-free call.
Context_of_Work	LE	U	Manager	46-55	31-40	Male	LE-U-020	...One of the things that we do for the State Patrol is the TIMS management system, the clearing traffic, clearing flow of traffic as soon as we can with accidents. If people are involved in a fender bender, we get them off the highway so the lookie-loos don't run into each other type of thing so--
Context_of_Work	LE	U	Manager	46-55	31-40	Male	LE-U-020	Well, it's pockets of local influence. And what I mean there is that in the rural areas, rural [State]-type areas, and [City] extends into [inaudible] then [City], but they extend into Southeastern [State], which is extremely rural. All of those entities work very well together. They know that they have to count on the State Patrols for backup. They know that we handle all the Hazmat responses for their areas. So we work very good and very cooperative type of thing because, one, they don't have the resources, they have their own, and they need the state. And the state is very well-liked, very well-received in our smaller areas. Our [City], is in one of our communications centers, we only have one troop there, but we dispatch for 20-plus agencies and they're all local.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	I'll start. I'm in charge of the electronic support section for the police department. We research and deploy all of the technology for the police department. And then we're also the designated liaison with the city IT department. Well, from the police side, we're responsible for the computer systems in the cars, the radio system, the license plate recognition, surveillance cameras, GPS trackers, fingerprint readers, just about anything that's technology-based.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	All right. I work in the electronic support section as an officer. And my primary responsibilities in that section are the body-worn cameras, the license plate readers, and drone technology, and assisting on most of the other software that we do too.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	I'm also an officer. I work in the same section, deal with the body cameras, mobile fingerprint readers. I think if I am, like he said, anything else, we're all Jack-of-all-trades. And we master a few of them, or we try to. I think if I had to describe my job to a child, I would say that I teach and train people how to use different technologies. And then we also test technologies, and we try and break things to make sure if they're going to hold up okay and figure out if they did break, can we still use it, and put it back together, and still apply it to what we do?
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	...our typical day starts with checking emails for overnight body camera problems. We manage 450 body cameras. So today is a good example of dealing with camera problems that we have to resolve immediately and then doing audits of the body cam system. If there are-- sometimes there are problems with our in-car video camera systems. We're also responsible for that. And then the interview rooms that are in the three district stations, if any problems arose with that-- so we're basically-- start our day with managing different technology issues or different technology-related issues that we have to fix and then figure out why whatever broke broke so that it doesn't continue to break. And then on some days, we're also responsible for all the training for officers that's related to technology. So there are some days where we're scheduling training...
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	there's times when we go for a period of time specifically focused on something due to an upgrade or a re-image of computers or something like that.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	we've put the little fires out, and we find them as they pop up throughout the day. Sometimes we'll get requests from people for information that they have access to, maybe they don't know how to get to it. So we'll also do ad hoc, get on the phone with somebody and walk them through a process and do some last-minute training on something. So that we try to do everything we can to make sure everybody can be self-reliant with the use of what we have. So they're not always-- because if we took care of every electronic need or every need for a video or something, we

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								wouldn't get nothing done at all.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	So overall, officers go through training, and then they're issued a body camera. And they wear them on a daily basis throughout their patrol shift. At the ends of their shift, they're required to have it on when they're dealing with a citizen. And then at the end of their shift, they dock the camera, the video, automatically offloads. We're one of the few departments in the country who have integrated with our computer-aided dispatch systems. So it'll automatically tag the video as belonging to Officer [Name] and Officer [Name] who's on a burglary call, so that's what this video corresponds to. That eliminates the officers having to manually enter metadata into the video. So that's kind of just overall how the system works...
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	...as far as our role in repair or diagnosing problems, typically, what happens is an officer will email-- we have email accounts set-up. It goes to all of us. Our team consists of seven people. It goes to all of us, and the officer will email us and say, "Hey, my camera fell or was knocked off in a fight and broke." Or, "My video isn't downloading," or whatever the problem is. And then we try to respond within a couple hours even on weekends and overnight if one of us sees the email. We'll respond, just tell them what they need to do until we can get the camera repaired. And then typically, first thing in the morning, we replace or repair the camera. So that's kind of how, in a nutshell, how it works.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	[RE: real-time solutions to technology issues] Not from the body camera perspective. But we also manage the surveillance cameras system in war. So if there's an active issue going on, then yeah, we will get on live feeds on the surveillance cameras and provide that information real-time to the officers that are responding.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	We're also several officer technicians for the SWAT team, so we're more on call or the SWAT call-outs and help them with their technology needs on their calls.
Context_of_Work	LE	S	IT	Not	Not	Male	LE-S-015	[RE: SWAT technology use] Up to this point, it's been almost all pole

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Specialist	specified	specified			cameras, being able to see through a window on a second story, one up. That's mostly cameras that you can put into a business or a residence, see what's going on, introduce that way, and then they run that back wirelessly to the command post so the commanders inside the command post can see what's going on real-time. What's going on outside, and if possible inside where the target is...
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	...we're just now getting into drone deployment, and I'm sure that's going to escalate and be a big deal in the future. We haven't done too much of that yet... Right now we only have three pilots who are-- can do this, and we've been doing a little bit of training. We have one drone for the department. Hopefully we'll get a budget for a little bit of more stuff, but we are able to do some crime-scene mapping. We haven't done that yet. On certain types of SWAT calls, we're allowed to go out and assist on that part around the outside of whatever the target area is, and we have on one instance deployed a small drone inside of a residence to try and get an idea where the target person was.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	...The body cams, that video is transmitted just simply by-- it's not a live feed, so the officer gets done with their shift, they dock it, and then it uploads to the cloud... they don't have to manually transmit anything.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	[RE: manual data transmission] They can though. If they want to add notes to any videos, they can get into the back office of the systems, and they can add case numbers notes and that sort of stuff. If they see an error in the way it was tagged, or if they just want to add additional information.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	we do have MDCs in the cars, and those are connected through Verizon, so it's just a data-cell connection. We don't transmit video that way because we were afraid it would just bog down the system. But they can basically tether their body cam to the MDC by USB, and add things. They can wirelessly connect with their smart phone to their body cam, and add data that way, or they can, at a PC, they can sit down and do it.
Context_of_Work	LE	S	IT	Not	Not	Male	LE-S-015	If the officer gets in and logs into the program for the LPRs, license plate

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Specialist	specified	specified			readers, then whenever a plate that's red trips an alert for whatever alert it's set for, then that pretty instantly pops up on the screen in a way that it's set to override anything else on the screen. And that's the one thing that you get is a picture of that license plate in the direction, location, base and description on what it's wanted for.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	If they're going to open up the license plate reader program, once they fire up the MDC in the car at the beginning of the shift, they'll open up that program and log in to it. And not everybody uses it. Just based on where the LPRs are located. If somebody's working on a different part of the city, there's no need for that to have it on because they're 15 miles away. [inaudible] you're going to drive up for a car that'll be long gone by then. So not everybody uses it all the time.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	[RE: training] Or somebody's coming out of a special assignment, non-patrol assignment. Somebody's coming out of narcotics, the most common one where we'll spin them up on the cameras. Get their cameras [in tune?], spin them up on the license plate reader stuff, sit down, do a refresher with them on the report-writing program, and the dispatch program, and MDCs because they enter reports differently, like a detective would, as a vice or as patrol officer, where you do it from the programs on the MDC. Then, it's got to go through an approval process, so how they do it is different. So, yes, so [name]'s spinning someone up on something in training them.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	SME S2: I guess I can speak to it a bit. So different units within the police department have different technology needs. So, for example, we have a fugitive apprehension team that they just go after real bad guys - fugitives that are on the loose, and their needs are much different than our community resource people's needs. So for example the fugitive apprehension team will contact us for surveillance cameras, GPS trackers, license plate readers, that kind of thing, because they're trying to track somebody down. The community resource people, we call them PAR people, they may just contact us because they have a question about security cameras, and they want to talk to a neighborhood group

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								about how to look for a security camera for your house, that kind of thing. So there are really, really disparate needs among the agency, as far as what-- SME S3: The detective might want to know whether one of our [miss?] cameras can view this particular location, and we might have footage of it or had a research a license plate to see where it's been, or something like that.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	... the MDC is the mobile digital computers inside the car. I can't think of anything an officer uses more during the course of their shift other than-- they write their reports on there. They have maps on the computer-aided dispatch thing they used to get to their calls. They see the notes from their calls. They add notes to their calls that way. So everything's on there. They research people. Do everything on there.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	[RE: heavy MDC use] They do. We'll help troubleshoot things, but as far as the actual working on the laptops, the MDCs, that is handled by IT. So we send them over to what we call the radio shops and those computer technicians-- I mean, we're not computer technicians, so they actually will fix things when things are broken or sometimes, it's just like the guys mentioned earlier, user error. So a lot of times we can diagnose, "Okay, this one's just user error. Let's get this handled."
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	overall, I'm just about the newest-- by a month, I'm almost the newest guy to the unit last year. And I still work the road a lot because I'm workaholic. And I think overall, the computers were pretty reliable
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	I've obviously seen officers using their cell phones to navigate to a call. I've seen that map on the computer.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	[RE: CAD] Especially going out even a block outside the city, I'll pull out my phone, look at it, see where I'm going because it's quicker and easier.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	Some officers are given a choice of a stipend for their cell phone or a department-issued cell phone. There are other officers working in covert units that are going to need to use their cell phone for that type of operation. So those are city cell phones that they're given to the officer.
Context_of_Work	LE	S	IT	Not	Not	Male	LE-S-015	[RE: responding to incidents] SME S4: Yeah, I sell my soul several times

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Specialist	specified	specified			a month to a DUI overtime shift, and it just kind of needs worked out, that I've worked the last five Fridays. So yeah, so I'm out there at least a couple of times a month SME S3: And I'm not nearly so greedy, I don't [laughter] currently go out and work the road, although we are allowed to go out and work the road, and actually encouraged to go out and work the road. Yeah, but I am 2 years removed from working the road after 35 years of being on the road, so. SME S2: And in my position managing the section, I'm never on the road, and it's been, what, probably eight, nine years since I've been on the street.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	...we live and die on our MDCs. There's been times we've had [CAD allergies?] in dispatch, and the programs go down, and you got to jot stuff on pen and paper again as to where you're going, what the call is, to catch it up later and people just-- [they pull on getting?] more. They don't know anything different.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	[RE: MDTs] Yeah, any time that goes down, you get officers, they have to be on the radio and ask two or three times for the address because they didn't write it down.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	from my perspective what's happened over the last probably five years is that there've been so many advances in technology that's related to law enforcement that it's, I guess, I don't know if overwhelmed is the proper term, but it's overwhelmed some officers that worked for years with really the only real technology they had was the laptop in the car, the MDC, but really nothing else, and now with the advent of the body cams, the surveillance cameras, the license plate readers, we have our motorcycle enforcement team has hand-held e-citation devices. Or exploring now, putting printers in all of the patrol cars, so we can do more electronically and print in the cars...
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	...So I think particularly a lot of the younger officers that don't have that history of doing a lot of the paper, it's probably not affecting them as much as the officers who have been around for at least 10 years, and they're getting hit from all sides of okay this is all being changed now, and we're making things-- this technology is going to make things easier

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								for you, and really, it's not. From their perspective, it's, "Gosh now I've got to make sure all my video from all day long is tagged correctly."
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	I was the first one to start writing reports in the car on our computers as the guinea pig, and I started teaching at the academy when everybody started doing it, teaching how to do that, and I have ever since taught out there as to how to do that, and the difference in officers from when we first started doing that as far as how adapted to technology they are and now, it's just night and day. It's completely different. So everybody is much more computer savvy now.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	[RE: mobility of laptops] ...I used to when I was on patrol. If I had a burglary, I know it's going to be in there for a while, put in a bunch of the information, you have to [inaudible] safe. Get the computer, come back in, "Can we sit down?" Okay, give me all the information. SO yeah. And hopefully more and more if we make that change to more of a tablet style. Hopefully, that will help.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	Yeah. And there's been times I've heard people from the fire department get on to our channel because they see something going on or they need something. "Hey, I've got this going on right here. Do you have somebody that can come respond?" So usually, they'll tend to do that more at the captain or chief level.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	[RE: social media] The investigators and the detectives use a lot.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	[RE: mobile fingerprint readers] ...People like them. They've been very helpful when they've used them. Overall, unless there's something wrong at a state level where the system's down, they work super fast. And actually a few times we've used them, two or three times in the last 12 months to identify cadavers. Dead people, no ID on them, they've done that, and once the coroner gets there, you get the coroner blessing. They check the fingerprints. They'd be able to get reads off of a bodies before, so.
Context_of_Work	LE	S	IT	Not	Not	Male	LE-S-015	[RE: mobile fingerprint readers] If you don't have good ID on the person

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Specialist	specified	specified			that you're talking to, and you're concerned that they may not be giving you the right information, then that'll be a good time to ask them for their fingerprint that you can retrieve in the system.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	[RE: mobile fingerprint readers] It definitely helps. You have to understand it's not just, "Oh, you don't have ID. I want your fingerprints." We look at what's going on. How's the person acting? Or you say you're [Joe Blow?]. [Joe Blow?] doesn't exist. Or you say you're [Name]. Well, [Name] doesn't exist. Are they nervous? So you look at everything before you go, "Yeah. Okay. Come on. Step out of the car. Let's talk." And you call for the fingerprint reader and tell you what, "Let's clear this up." They do the prints. They read and go from there. So they're definitely beneficial.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	[RE: mobile fingerprint readers] it's voluntary. They don't have to submit, but if they don't, you then have a decision to make and then you proceed from there.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	[RE: SOP for mobile fingerprint readers] I guess it really depends on what's going on. Why are they talking to that person in the first places? Why was the person not being truthful? Does it turn out the person has a bunch of warrants? Are they wanted for something? Do they just not like us? Didn't want to give us their name? It really depends what the reason is for the initial contact in the first place. Where do they go from there?
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	An officer is not going to write a ticket to somebody they're not sure they've identified correctly and send them on their way. If they're going to charge them, they're going to put them in jail to charge them. But if they have that information, this is definitely who this is, I can tell now. Clear them, they don't have any warrants. They can send them on their way.
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	[RE: new technology] ...by policy, everything has to flow through our section, and then [Name] who was here-- he's my liaison with IT, so [Name] and I then coordinate, research, and determine whether or not it's even worth looking at. And then our next question is, okay, where's

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								the funding source? Because we're not going to do a whole bunch of research and everything if okay, we do all this and then there's no money for it. So that's kind of how that workflow goes that somebody comes up with an idea. They contact me. We make a determination whether or not it's worth looking at, or maybe, we've already looked at it, so that's kind of how that works....
Context_of_Work	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	[RE: body cameras] Swipe your hand down over the switch to push the switch down to turn the camera and start it recording.
Context_of_Work	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	My primary job is traffic enforcement. Accident reconstruction. So I go out every day and make traffic stops, contact people. Whenever there's a large collision, it's my job to go out and figure out what happened. If it's a new crash, get there first, and then get all the resources necessary, medical attention, whatever. And then after that do the full investigation as to figuring out-- try to calculate what happened, and put it all back together to present in court. I'm also a crime scene investigator. So when we have large scenes, such as officer involved shootings, that type of stuff, I respond out, and I use our equipment and help document those scenes as well. But while my primary assignment is traffic, I still respond on patrol calls or anything else that's going on when necessary.
Context_of_Work	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	We use cell phones quite a bit too. We try not to use them too much when we're on scenes because it's not recorded. But a lot of times, once the scene's stable, we'll be using our cell phones back and forth to get the stuff we need instead of using up the air time because we're limited. Only one person can talk at a time, and some stuff is more important, some stuff isn't, so there's a lot more cell phone usage..
Context_of_Work	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	When I get here, I get in my assigned car, just log myself onto the CAD system using our computer. And then get a go-out, or usually, it's catch up on the other stuff I do. And then once I go out on the street, I start doing traffic enforcement. Even though I have access to-- I can directly input into CAD from my car, put myself on calls and stuff like that, our agency does not do that. So everything we do is over the radio. So every traffic stop I call out is done over the radio. Every call we get dispatched

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								to is done over the radio. It also comes through the computer as well, but in some ways, we're still antiquated and require that somebody has to hear it...
Context_of_Work	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	...so back on car traffic stops, do all that. I can do the computer dispatching a little bit if I'm not-- I can assign a case number or if I'm going on something where there's not going to be any public contact. So if I'm vehicle maintenance or if I'm going on a follow up or a meeting, meetings contact, then I can do it on the computer that way. Now, our animal control people, they can put themselves on dispatch calls. They're going to the same houses and their not armed, so a little confusing as to why they don't have to do it on the radio either, but it's how that works.
Context_of_Work	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	Well, the computer has the ability that I can see every call that's on the screen. I can click on it, and I can technically hit the button to assign me that call, and I would pop up, and it would be assigned to me. But patrol's not allowed to use that. Our animal control officers, they can look at it, and they can hit the button and self-dispatch...
Context_of_Work	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	...one of the deputies was in our city, actually ended up firing shots at a suspect. We got the call from another party in the house, and we were already responding had units on scene, before we got relayed that it was a [county] deputy involved, and then we've got the scene shut down. We're taking care of it when the Sheriff's Department and all their resources start rolling into the scene, and we're immediately screaming at them, "Stay in your car! Stay here! We've got this." We don't want any blue-on-blue stuff because you don't know where we're at. We don't know where you're going. Because in order to switch everybody to a channel, it takes time. You would think that they could hit a button and do it, but it doesn't work and so... We just shut them down, we handled it, and then it was all face-to-face conversation, and it went through that way. And it got taken care of...
Context_of_Work	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	...there are times where we work with other agencies. I've gone to [city] and [city] to help them with crime scenes. And [city], even though we

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								have the same radio system and we bounce off of each other towers, I cannot talk directly to them, because we don't actually share the channels [laughter], so. And then up in [city], they're on something completely different, and so we don't have access to that at all...
Context_of_Work	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	That's pretty much it. I make traffic stops. I make, I don't know, 20, 30 stops a day, and handle wrecks, and do all the reports associated with that. And whether that be-- because of the way our systems are set up, most of those reports have to be done-- are done back here. We have access to various things that we could do in the field, but we don't, honestly. I could do my crash report in the car, but it's not very comfortable. I could technically take my tablet out of the car and do a report there, but again, it's not as feasible as they had thought it was going to be...
Context_of_Work	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	...Our traffic unit, we have citations, so I have a handheld Android device to write tickets. I can actually do an accident report on there and exchange the information. But, again, with our systems, I still have to come back here and then cut and paste from that application into our native RMS system. So even though technically, I've got the accident report done in 15 minutes, I still got to come back here and spend another 15 or 20 minutes to transfer it into the system that they want.
Context_of_Work	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	[RE: e-citations] I cut and paste because it'll put-- it's [inaudible] technology, it'll put it in a PDF-- fills out this data accident report. But because systems don't talk as well as our records department would like together. It's click, click [laughter]. But for me, it's faster than our other traffic guys. We're using our phones, and we're taking pictures of license, registration, insurance information, and then we come back, and they're either pulling it up on their phone or using a generated PDF on the phone of that data, and put in the next-- split the screen and then manually typing it in. So that's another thing we use our phones for. Take a lot of pictures for that type of stuff.
Context_of_Work	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	[RE: MDTs] ...now the car's a hotspot, you can take your tablet out, and you can go in and do a report. Easier said than done [laughter]... Nobody

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								does it.
Context_of_Work	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	We have Bluetooth printers. It's a little portable Bluetooth. I can actually, from the suspect car, I can hit print. And within about 20 feet, by the time I get back to my patrol car, it's printed out. Technically, our printers are not mounted in the car. So I got a little belt clip. If I wanted, I could carry it on my belt... it's not very comfortable. It's cumbersome. So I can usually take my hand held up, complete the stop, hit print, walk back to the car, just lean in the door, rip the ticket off, and walk it back up.
Context_of_Work	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	[RE: running a person's information during a traffic stop] We have the option to do that. Either through the radio or through the computer, we can hit the [state database], NCIC databases. And so, sometimes we do, sometimes we don't. Traffic, very seldom do we actually run people because I don't care. I don't want the warrant because if I get the warrant, then I have to have somebody from patrol come over and take them because I don't have a cage in my car. Motorcycles don't have cages. Our job is to go out and impact traffic and run with that. So it's very seldom that we run people unless they don't have an ID. And so, we have the ability to do it in the car and if I'm going to do it, I do it in the car. I do it through the computer. I don't have to radio...
Context_of_Work	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	If they don't have ID, if they can verbally ID who they are, and we can find a computer rec that matches, we'll give them their ticket and send them on their way. If they don't have a license or something like that, then they'll still usually just get the ticket, and then we'll impound their car. We'll put the cars in jail instead of them in jail. It's easier and less space [laughter].
Context_of_Work	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	We'll call through the radio to ask for the tow to respond, and our dispatch center will then call our contract tow company and send somebody out. Sometimes if they're really busy, and I can tell dispatch is busy, I will use my phone and call the tow company direct and say, "Hey, I need a tow out here." But that's pretty much it.
Context_of_Work	LE	S	Field	36-45	21-30	Male	LE-S-016	[RE: relationship with dispatch] I think it's pretty good. I think we have--

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					again, we have people who think that dispatchers should be doing more than I think dispatchers should be doing. Where we have officers asking for so much stuff that I can do myself. And that's just me, I guess. If I can do it myself, I'm going to do it myself. I'm not going to use somebody else to do what I can do... And I think that's, again, a mindset that, if I can do it myself then I'm going to do it myself. If I'm in the building, I'm going to do it on the computers compared to keying up the radio. From the back of the holding cell, I'm not going to call dispatch on my radio to get them to run a query for me. If I can't do it myself, I might call them on the phone, just the landline phone back there. But I'm not going to use the radio up to do that.
Context_of_Work	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	... we'll have the officer who will spend all this time on the radio, okay, asking dispatch, "Okay, can you go and can you check this other database and see if you can find this person, find a phone number?" and all this stuff. He's got a computer in his car. He could do it himself. But now he's having the dispatchers do it, who are then also still answering phones and dispatching calls. And so then they get upset when I don't get my responses back real quick. It's like well, that's not their job, they're communications and dispatch. They are not to do your follow up for you...
Context_of_Work	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	...I have a app on there for drug recognition, as far as when we find pills. It's like, what kind of pill is it, and if it's scheduled. And for our traffic guys, we have a Google Drive where we're keeping all the resources and copies of all of our forms and stuff. So if they get to a hospital and they don't have a-- and they forgot a form, they can pull it up in their Google Drive, email it to the desk clerk, and have a copy printed out. If we can do it electronically, I'm going to do it electronically. I hate the paper idea anymore. I think that's the main ones. And then so we've got the email, using that all the time, and then I've got the little app on there where I can scan licenses and photographs, and it converts it to a PDF, and then uploads to my Google Drive.
Context_of_Work	LE	R	Field	26-35	11-20	Male	LE-R-018	So detective is a little bit different from patrol because, on patrol, you're

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					responsible for every single call that comes in you have to handle. You don't necessarily get a lot of time to deal with each call, but you're also not necessarily expected to devote an inordinate amount of time to each call. As a detective, it's kind of the opposite. Your responsibilities are to look at certain specific cases much more in depth to determine if there's any follow-up that's needed, if there's appropriate charges, if there's any warrants or affidavits that need written. We also handle all the evidence at our department, do background checks for new employees, that sort of thing.
Context_of_Work	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	So I've worked for three different dispatch agencies. Two of them have been county-wide combined, so law, fire, and EMS. One of them was just a [Job title], so it was fire, EMS, and law, but it was only for one city. So you're taking phone calls. That can be anything from nonemergency calls, people looking for information, directions, that sort of thing to full-blown 911, "My child's not breathing," and that sort of thing. 24/7, 365 you're working the radios so you're dispatching fire and EMS to calls. You're sending police to calls. You're getting other resources. If it's victims' advocates, coordinating with the jail, coordinating with the hospital, that sort of thing as needed. Running NCIC...
Context_of_Work	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	... I know at our dispatch center here, they've got cameras in town that the dispatch monitors. They monitor the holding cells. They've got alarm systems that they monitor. All sorts of stuff like that. So dispatch has a very, very wide breadth of responsibilities.
Context_of_Work	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	Generally, start by checking emails. If there's new cases that come in, review cases. See what's been done, what needs to be done. When it comes to evidence, all the patrol officers will package their evidences and then submit it to us. We have to review it and make sure that it's packaged correctly. All the T's are crossed and I's dotted. And then we'll put it in the evidence vault with our tracking system so that we know which pieces go where, what cases they're associated to, when the statute limitations is up that we can dispose of them, that sort of thing...
Context_of_Work	LE	R	Field	26-35	11-20	Male	LE-R-018	...as far as caseload goes, it's usually most of what we do is follow-up

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					phone calls, following up with witnesses or trying to obtain video, writing warrants, affidavits, search warrants, and reviewing stuff like that.
Context_of_Work	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	Generally, we're at the police station. Again, since we're small, sometimes we get tasked to cover the road, so we'll put on our uniform and pretend to be real cops for a day, but most of what we do is at the office.
Context_of_Work	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	... If we're out doing something, and we don't really want to be known that we're in the polices, we usually text each other via the phone, so we're not using radios. If it's people that just have questions, usually we'll just come back to our office and we'll talk about it face-to-face. Other times, if it's someone that's not working or if it's for everybody, we'll do email- excuse me. Or, like I said, we do a lot of follow up on the phone too, so a lot of phone calls.
Context_of_Work	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	I know we went to [County] two weeks ago, and they don't have 800 radios, so our radio channels were incompatible. But it wasn't... So I was working on a wildfire up there, so I was just helping man a checkpoint, so I was with a guy from [County]. So I just didn't really worry about the radio. That was his issue. So usually cell phones will work or, yeah, just call dispatch and get patched through.
Context_of_Work	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	... being a detective, we're on call usually every other week. But instead of having to sit by my phone at the house, or call and say, "Hey, I'm going to this restaurant if you need me," or "I'm going this movie theater," I can just have my cell phone. And I can kind of go, and be, and do as I please as long as I've got cell service. So that makes that a little easier.
Context_of_Work	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	So specifically for medical calls, there's something called the National Academy of Emergency Dispatchers, and they will certify people to be [Job title], which is doing the CPR over the phone, giving those instructions, or giving instructions for childbirth. But they have a specific set protocol for 30 to 40 different medical emergency classifications that pretty much every medical call will fall into...
Context_of_Work	LE	R	Field	26-35	11-20	Male	LE-R-018	[RE: dispatch CAD system] ...So if you get a call and its cardiac arrest, or

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					abdominal pain, or a poisoning, or something like that, usually-- when I started it was you had to flip open a card, and find it, and open it up. Now, it's just integrated into the CAD system, and it will just bring up exactly the questions that you need to ask...
Context_of_Work	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	[RE: dispatch CAD system] ...based on those questions, it will code what response it thinks the ambulance needs to go to, whether it needs to run lights and sirens, or if it's just a pretty benign sort of thing. So once you get through the coding, then it will pass it off to the dispatcher who's actually going to tone the fire department to send them out. And they'll say this is-- like our system right now, it's Alpha through Echo. So Alpha is, I have a paper cut and I need a Band-Aid. Echo is not breathing, not conscious. So on that sliding scale. Then, once we know exactly what the issue is, it's been coded. This is how you're going to respond. Then, it kind of forays into, this is what we're going to do about it. Whether it's instructions for CPR, instructions for choking, instructions to try and ward off shock, this, that, or the other. And having that on the computer is very helpful because you don't have to, under stress, flip through, find the card, code it yourself like we used to have, and then do all that stuff...
Context_of_Work	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	[RE: dispatch question protocols] I believe they have that for fire and law as well. I don't know that we do that up here, but, at least back when I was there, there was a procedure manual, and when you're going through training, you'd go through it call type by call type. If this sort of thing, this is what you're going to ask. A lot of those are very similar. If it's a law call, whether it's an assault, a shoplifting, this, that, or the other, you want to know what the suspect's wearing, if they're still there, if they're armed, which way did they go, for pretty much everything.
Context_of_Work	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	[RE: using Word for report writing] That's exactly what it's made for. It's easier to use, it's easier to read, and I can save everything that I've done. So from the time that I started being a patrol officer, my first call that I ever went to, I have all those reports saved on my file. Which is nice because when the report-writing software goes down, as it has before court, I can just go back and print the Word document out.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	[RE: body worn cameras] So it's held locally on the camera until it's put in the dock to charge and download at the office, the system that we have. I know [City] PD just down the road has a different manufacturer, and they can pull up the-- they have an app on their phone. They can pull it up, tag it, do whatever they need to do, and it's done. So they can sit in the car and do that, or be wherever and do that. We have to physically go back to the office, put it in the cradle, and wait for it to download and cycle and all that stuff.
Context_of_Work	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	[RE: recording via body worn cameras] If it's anything more than "Hi. How are you doing?", pretty much. We have a very-- we have a very good relationship with our public up here. And, for example, an open container of alcohol is against town ordinance. 9 times out of 10, if I'm on patrol, I can walk up to someone and say, "Hey, that's against the rules. Can you go throw that out please?" And they'll say, "Okay."
Context_of_Work	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	[RE: policy for manual operation of in-car cameras] I'm certain we do. I don't know what it is [laughter]. Because usually, turn the overhead lights on, that fixes it. But, yeah, obviously there's occasions where that, for whatever reason, if you don't have all the overhead lights on, if you just have the back lights on, that doesn't trip it. So that sort of thing.
Context_of_Work	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	one of the other things that is our responsibility is if let's say, there's a DUI crash and there's injuries, so we have to write a search warrant to get blood draws. I don't necessarily need to drive 30 or 40 minutes into the office to write that if I have the tablet, and I can just type it up on that just as if I'm at my office. So taking that home while I'm on call, it's a huge time saver. It saves me an hour, at least, of drive time. It saves the department an hour of paying me drive time. And I don't have to leave. I can do that in my pajamas [laughter]... That's a huge, huge piece that we just got this year, probably within the last eight months.
Context_of_Work	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	...I love having the cameras. I've got almost exactly the same voice recorder from before we had the body-worn cameras, and it's very handy. The e-ticketing machine is a good idea, but the implementation is just not quite there. I think there's way better ways to do it. So I would

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								consider that one getting in the way because it still takes me longer to do that than hand-write something... And probably, in all fairness, if I was on patrol and I used it on a daily basis, I would be much better at it than I am.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	I started off as everyone else, the traditional out there in uniform, responding to calls. Did that for about three or four years, and then I transitioned into the training section of the office, who was in charge of all of our new hire training. From there, I realized being in charge of the training that we had some tools, particularly the computer system, that nobody knew how to use. So I figured out how to use the computer system, which then went back to rewriting the training manuals for more efficient work flow and using the database and other tools. And these computers were pretty new. And at that time, it was a DOS-based system. I remember when we got our first PC, which everyone thought was kind of funny. So seeing the evolution and staying involved in that, which transitioned into more technical stuff and true computer work...
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...So as I tell people, everyone starts off getting into law enforcement and you're the street cop out there answering calls, but then there are other career opportunities. And that kind of moved into the tech world. I started going down that path and decided I didn't want to support computers my whole life so I pulled back and stayed more on the training and application side, dealing with the new stuff that came through for law enforcement. And then the mobile data computers started coming in so I got put into that...
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...I remember when we first got digital cameras, and those got tossed to me, and I had to figure out that protocol. I mean, for a while, people in the state would call me-- I don't know if we were one of the first people to buy them. That was from an interesting process and even being able to show kids, take a picture, as they did tours, and then print out their picture for them. So seeing a lot of those technologies come through that people starting off today just-- I don't say they take for granted, but they've just always been there, so they never knew life without them.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: new technology] ...so you start to see there's more of a support need but then there's still the work flow tieback. So as you talked about, sometimes new stuff gets introduced and the sales guys or the tech guys may say this but it doesn't transfer the work flow. So I like to see myself now as sort of that bridge. So I'll still go out occasionally and work a shift to try and remember what it's like [crosstalk] just to, basically, take a call and then come back and follow it all the way through. From the initial call takers with dispatch flowing through to the car computers, then to the records management side, and then all the way down to the jail. And now, of course, we'll be incorporating in the body cameras, all the videos we're taking, all the new audio formats...
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	So the state passed a law where it charged the [Job title] Offices, state-wide, with creating a system so that every law enforcement agency in the state submits records to them electronically. And they engaged a vendor who did that, and that vendor wrote the interfaces with whatever records management systems we have. But it's a separate system you log on to. It's a manual data transfer now, where you go pull the case and it populates the fields. And then they have to go through and do the attachments and you can label what each of the attachments are. The additional step that all the records folks have is they have to print out the narrative. So the report that I wrote, they print it out, create an electronic copy of it, and reattach it...
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: electronic evidence discovery] We certainly from the district attorney's office, probably their efficiencies have gone up huge. And from the defense attorney's side, being able to provide that discovery is big. It does provide electronic tracking. So as soon as we send it, it's stamped and they get it. So there's no questions on, "Ready for trial?" "Well, you never provided this photo to us." "Oh, yes, we did."
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: evidence discovery process] Today, if they [district attorney's office] were to call us up, we'd just make a new copy of whatever and take it to them, which we probably already gave them a copy and whether it got lost, got misplaced. So there are a few safeguards built in and a few

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								potentially helpful things as these systems come up. And that's sort of the tracking, the data integrity, all the other stuff that people think that any system should have when you're talking about data and data transfer.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: evidence system] it's not a lookup system. You're logging on to upload your data that you've already logged on and looked at and used. So it doesn't have the highest level of security. I don't know how it is on the district attorney's side. But only a few people within the department need to get into that. So there's not very many people that even have access to it. But it doesn't give me any ability to go look at another agency's records. So as we talk about those levels of security and if it's really a low-level program, how much security? Do you have to have two-factor and change a password? Sometimes yes. I think it needs to be looked at on a program-by-program and what's it really doing and what's the exposure risk.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	I guess, sort of fortunately, I don't have a daily routine because I've got kind of the patrol deputy side of the sheriff's office. But then when I'm working with the in-car computers, that's more connected to the dispatch center. So it actually bills out separately, even though I'm an employee under one agency, all the work I do on the mobile data computers gets billed to the dispatch center, so it's kind of a hybrid...
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...For a while, I was in a contract position so I went full-time, was fortunate enough when my children at the age that it was important to be there. And as I say, the impressionable, age I was able to pull back and go part-time and then maintain things on a contract basis. And as they got older, I was able to step my work back up, do some contract work, and then roll it back into a full-time position with putting together a couple of contract positions.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	So it's weird. So sometimes I would be doing just the computer work one day I'm at the dispatch center and not even going to the sheriff's office. Sometimes it'll be all the sheriff's office stuff and something pops up. Last month, we had an issue at the high school with the threat that

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								was made. So I was at the high school a whole week in uniform doing patrols there and walking around... Just general threats of-- the shoot up the school, don't come to school this day. And so going back to that basic level of being a cop and restoring the sense of security and trying to find the bad guys... So being able to revert back to that.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...I'll pop on the emails. A lot of people know if they want it immediately they're going to text me. A few people who, I guess, are kind of what I would say my frontline main users, when there's an issue. I got a text today of the [state crime database] system for running people and plates, wasn't saying connected for them. He thought it was related to an update we pushed out to the computer which-- I said we made an update to this part of the program and it shouldn't affect that part of the program but we'll see. But that is something they've come to rely on and so that's an immediacy thing, that they want to know what's going on. So I think, currently, that cellphone is probably the most immediate way to get ahold of people.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	The department issued cellphones. Well, now, a lot of people communicate primarily through text. So if you're trying talk to a suspect and you have a cellphone number and they just wanted to text with you or they're using just an app that doesn't even have cellular service, whether, it be a WhatsApp or any of those, those are creating issues in guys out in the streets doing their jobs. So finally, the department bought smartphones...
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: app for situational awareness] It did work pretty well. In the command center, I could see it. I was able to take pictures. We were able to monitor crowd size. So from the field, I would take pictures within the app and then it would tie it into the app. It would show up in the command center. Then they would relay it to the public relations people. So I'd watch how long it would take when I'd say, "Stands are half full." And then that would go to the command center, they would pass it on to the PIO group who was putting out, on the public side, the notifications. And it's usually about a minute or two and then it would come through,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								"Stands are half full." And then the people in command could actually see the pictures, so if something did come up they could have gone back to those pictures at the time that I took them...
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: LE paired up] So from a security standpoint, I could stare at the device and not worry because I know another guy was with me doing situational awareness if something were to happen. And so we recognize that in that environment. I think we also came out of that environment recognizing that's a potential pitfall. You can't give people more stuff [crosstalk]-- on my radio, I can talk on my radio and watch and see everything that's going on. We all practice and train for that. Now, you give me something I have to hold and I have to data input. You can't maintain both of those. So that was one of the things that came out of is recognizing you're deploying more and more of these devices that give you the security and personnel. And if it's truly a tough environment, you need to pair people up just for that purpose. Kind of go back to have one person who's running all the devices in communications and someone else who's making sure you're safe.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	that's kind of my work office where I have all of the computers that I can work on. And all of the issue of I still need to get rid of all those old computers that are no longer functioning and sort of make sure they are disposed of properly and sign-off the degust four times or drill through, whatever the standards are, to make sure of that. I can't just get rid of them.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: station life] ...usually, at some point, it's going to involve leaving and doing some field work, whether it's coming up to a meeting to discuss radio procedures or going out to someone's site because they're having issues with their in-car computer. Or this time of year is when we get all our new cars that are coming in so there's been a lot of driving to [City] to pick up the new cars as they're getting outfitted at the electronic shop.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	The duties that someone has to do and you can pull guys in for overtime, but they can get burnt out on that. You don't want a shorter

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								shift so a lot of the time it'll come to me to say, "Am I open to go do it?" Quite often I end up going down to do that and getting the car from the jail. Can you pick up an inmate on the way back who's sitting in [county]? So you always kind of have that in the back of your mind of being prepared to do those things and bringing the stuff with you, whether it's an extra pair of shackles or letting them know, "No, I'm not in a vehicle with a cage." So that's sort of the part I think most people get into being a first responder is that you're never really sure. I think I'm just going to [city] to swap out a car and I'm going to come back with two inmates, but I didn't know that at the time.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: vehicle swap / inmate transfer] Sort of think about it or I know the other day I had one and they wanted me to pick somebody up and I said, "The weather is not looking good. Let me get back through this mountain pass before I tell you yes because I maybe two hours getting back through this pass and I don't want to commit if they actually need to be here to be back in court the next day and I'm not going to be able to get them." So that's the nice part of that...
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: helicopters from military training site] ...I remember, one night we were looking for a suspect and they had [flee?] on their helicopter and I think they had wanted to come out and play with so we're all out there searching on the ground and, of course, they did have one light on flash but you would just hear the helicopter but not necessarily see him as they were looking for stuff. So we're able to use him as a resource around here...
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	... we stood up an 800 MHz system within our county. So we all had each other's talk groups but everyone was still afraid to change the channel on the radio or talk in somebody else's talk group because they just didn't do that before. So that took a while to convince people that we have new response protocols. And if multiple agencies are responding to a scene, we're going to move off the various dispatch talk groups and go to one response talk group. It took law enforcement a long time, and they're still not really there, that they're going to go off their channel to

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								go to that response channel because their thought is they're always waiting for the bigger and better deal to come along and go do something that is more fun than directing traffic on an accident scene. So they always listen to their talk group. So we try and do that from a resource utilization standpoint, from an information sharing standpoint. If we're all driving up and down the interstate and no one's found the accident, it's nice to know that...
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: decrease radio time by using computer] "And then when you get on query, you say--" and let them know you already did it on the computer. So it's MDT traffic stop. Then everyone who doesn't have a computer knows you built a traffic stop somewhere. So that was a process of working through. I'll say it was a little letting go of control from the dispatchers. They disagreed with a lot of this. I think, as a field user, we said, "We don't care. This isn't your decision. We love you guys. We appreciate what you do. The person most responsible for my safety is me. And so if I need to build it on the computer, don't try and give me a policy that says you shall not. It's not going to work. Highly discourage. Make it as strong a language as you want. It's going to happen."
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	Everyone carries the radio and whether they have a shoulder mic, whether they have a microphone just on their purse and somewhere else because they're a little more covert. And then we're all issued new helmets and vests for active shooter type situations. Well, soon as you put this additional layer of body armor on, it covers all the stuff up. And everyone's like, "How do I talk? How do I rearrange my stuff now?" And as I'm trying to say, you should always have an earpiece...
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...I know a lot of studies have come out. I went to a thing on the [local mass] shooting and that was a big thing of if a guy in your department doesn't have an earpiece, tell me they need to wear an earpiece. Because you go into a true situation, you can't hear a radio on your hip...
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: earpieces] ...I haven't tried to use the radio with my life jacket on... But that would introduce the same thing. But even telling some of the guys, going, "You really should have an earpiece in. I know you don't

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								want to, and you never had before, and it hasn't been an issue, but it's going to be at some point." ...
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	something that doesn't get in the way of them doing their basic job. Technology's great but I don't think we've come up with instinct in technology. Technology doesn't turn on the valve and point the fire hose and run it 100 feet down the line. It can do some of those but not the whole process. So the technology part's great but don't forget the basic underlyings of what the job is, and what that intuition is, and that smell of smoke far away. Sure, an ion sensor can detect there's particulates in the air but I can turn and see where that smell is coming from, and say, "Look, the fire's that direction!" And it doesn't matter where I go, I bring all that with me.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...I mean, if you sit there and listen to radio on probably anywhere, and you hear the calls that gets dispatched out, you would probably sit there and go, "Okay." If you wrote down every call type, and realized, "Well, what is it the police officer's been given all these calls has to know?" Pretty much everything. And I understand when the citizens call in and they don't know where else to go. Maybe we don't have enough 211 services, 611 services, but I listen to some of these calls going, "How are we supposed to know that?" But we're going to answer the phone and they're going to expect something, and we don't want to look like fools.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	I talk about when I used to deal with runaways, and people were telling me to counsel them and their kid. And I'm going, "I don't have kids. How is this my job? It was never a part of my training to bring all these things in." And so I don't mean it in a negative way when people talk to me about it. I said we need to understand what is being expected, and just because the law enforcement guys are there, and they're getting all these calls, it's a lot. And if you screw up any of them, then you're not doing your job and it's going to come back and impact you. Not that people don't screw up their jobs intentionally or in ways they should have known better. There just seems to be so much more coming in, and then the backlash within the country these days...

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: difficult to read driver's license format] ...they're trying to use more security in their driver licenses. The REAL ID Act necessitated that, so responding to the federal stuff. I know some states have now the actual enhanced driver's license. I think there's two or three of them. We're not one of those yet but that may come along, so there's going to be more and more stuff going into the driver's license to get a chip. Yeah, so things to think about if somebody actually has to read this still while talking on the radio and watching ahead of them and that eye focusing thing. I mean, I want to look down at my license to read it but I'm still keeping an eye on the car I got pulled over, so now as I know my eyes are taking a little longer to focus from close to far away, how do I change my work practices?
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...If you don't have Bluetooth in your car, going back to technologies, the sheriff doesn't want us driving and talking on a cellphone. Public perception, it looks bad. Okay. Cars can pair up with only so many devices. So if it's a pool car, someone's got to go through and clear out that list and unpair everything so the next guy that uses it could pair his phone to the car... And some people are going to get in but who's going to do it for me? If you come in and say, "I don't know how to do it." What are you going to say? You told me I can't hold it up to my ear. I don't know how to pair it to my car. I got a cheap old car and I don't do that in my own life. That's legitimate. As supervisors, you can roll your eyes and complain the guy's a fool, but that's a legitimate concern.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...You can't always pull over... Sometimes you actually are responding to a scene and getting information. I mean, that's what we tell guys. Have dispatch tell a person to hold on, you'll call them back. Pull over to a safe place and then take the call... There may not be shoulder you can pull up...
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: dispatch] ...they may be giving you information as you're responding to a scene that that issue has come up. Do you have the dispatch center continue to talk to the person and relay information? A lot of guys would rather talk to the person who is calling in themselves. So do you really

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								want to do that when you're driving, especially if it's a hazardous situation? When you get there, we expect you're going to hang up, and then you've lost that person? That's probably not what you want to do. Again, going back to the radio and dispatch training, they're not going to tell you how to do your job, but just think about that, not just transfer the RP to me. It is something you think you are pretty sure you're going to respond to. It may not be the best decision.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: typical calls] As I mentioned, there are a lot of those, "I have a problem and I don't know who's going to solve it."
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	Anyway, so people dial that for whatever their problem is and then they expect it to come out. You know, traffic-wise, certainly the fair amount of DUI's, resort community, people are here vacation. Probably the usual if you take out sort of the shootings. The usuals of the theft, the shopliftings, domestic violence cases. We get all the same gamut of that...
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...We do get a few shootings. I guess I would say not what we would expect in a big city in terms of numbers because maybe it's a sad comment that we just expect shootings are part of big cities. But it seems to be the number seems to hold true for that. But we do. And when it snows you're going to get car accidents. They kind of go hand in hand...
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...In the spring, you're going to get rafts that flipped over and river rescues. In the summer, you're going to get lost hikers, injured hikers. You're going to have to coordinate search and rescue activities to go get those people out. In the fall, you're going to have hunters who get stranded when the snow storm comes in too soon and they weren't prepared for it and they can't get their trucks out because they didn't read the weather report. So some of it you kind of know what's going to happen based on the seasons.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...We do get complaints every now and then. Every drone that's up in the air is spying on me. Right? If I'm sitting in my bedroom or in my house

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								and I see a drone, I'm pretty sure the camera's on me. In my own neighborhood, we've had that. And the one guy says, "I'm just flying my drone. I'm not looking in anyone's windows." All these complaints people have on our neighborhood Facebook page. He goes, "I'm in the public park flying a drone." That's it.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	You talk about other parts of your job. Patrolling the mountain and talking with the protesters. And all the names they made up for themselves. It was kind of an interesting time.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: FirstNet] At this point, I guess everyone just has the expectation that it's going to work and that it will someday replace the radio system and do all these things that we hope it's going to do, and I think we're too soon in the planning stages. I guess I think more of we're in the-- well, when it's actually deployed, what are all the things that we expect it to be able to do? But we'll get to the specific applications and what benefits that are going to be there. Remember, it still won't put out the fire. It still won't determine who the bad guy is.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: FirstNet] It can help with those things. So how is it going to come in and enhance and not get in the way of doing that so I go to another scene and this doesn't work any better than the last radio system that didn't work either?
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	So I started off as a police officer. And then I've had specialized training. So I have about 800 hours of crime scene investigation in terms of blood stain pattern analysis, shooting reconstruction, accident scenes, just death investigations. So that, essentially, I show up on a scene and I try to gather as much of the evidence that I can in order to solve a crime. So physical evidence or through interviews as well. So we're considered a detective here, but we're full-time crime scene investigations.
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	So we were using those primarily for diagramming rooms just to get basic measurements. We also use Nikon D90 cameras. We also have our cell phones that we can use for camera purposes. And then we go up to a total station and now the FARO 360 also. So we use the FARO

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								360 to diagram any crime scenes that we come in contact with. We've used them from traffic accident scenes to murder scenes to bank robberies to burglaries, anything along the lines, then gives us an accurate diagram within millimeters so that we can create a rendering again and then take it to court...
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	...I've actually been deemed an expert twice in the use of FARO that we've been able to in crime scene reconstruction. We've gotten FARO into court and actually used it as a diagram, actually walking through a scene on the stand. We've done that twice. In both of my cases, one was a shooting where somebody just fired a round at someone else. And then the other one was actually a child death. So it was more of documenting where things were in the scene. So it helped us to understand the layout out of the unit. Both of those cases are the first ones in [state] that we know of to be able to actually get it into court.
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	...We use our MDCs in order to get us to the scenes. We use Google Maps for pulling up to do either an accident diagram or for our crime scenes, to rebuild them. Let's see, what else do we use? So those are our main ones. Video recordings. And then, of course, we use digital recorders, too. So we use video recording for interviews but we use the digital recorders...
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	Yeah, our radio. The earpieces that we use, we have a few different types that you can choose from, but they all have the basic tubing. The problem with the tubing is it gets clogged. So it will actually get air bubbles inside the tubing and it blocks off. So what it sounds like, it sounds like you're in a tunnel and you can't hear. So we frequently have to disconnect this, take one of those cans of spray air, blow it out. And then you can only do that so many times with a tube before it just gets faulty and it doesn't work anymore. And then you just have to get a new tube...
Context_of_Work	LE	S	Other Public Safety	26-35	6-10	Male	LE-S-021	Well, it's a taser, so it is a form of technology because it's downloadable. And we don't have the cameras, but we do have the technology where you can plug in the taser and then download it and get all the data as to

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Personnel					how long each tase went, how much electricity went through it, and how many times you cycled it, that sort of thing.
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	[RE: information sharing software] So what it does is it-- you log in and then after you log in, it asks you for verification, so previous indicators that I've put in here, so I gave them an email address and I gave them a phone number. It will then text me a pincode. I put that pincode in here and then I can log in. So most users have [information sharing software] desktop which is just a desktop version, easier to see on a big screen, or [information sharing software] Mobile. I have CJIS. We'll go into that in a minute but that's a little bit more-- but this is something that they just came out with which is an even easier template search engine. So they have it by person, vehicle, or location. You can go in person. You can just type in their names.
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	[RE: person of interest information lookup] before, what we were having to do is I would have to contact dispatch on my radio and I'd say-- tell the type, DMV, and request from them for a DMV photo. And then they would email DMV and say give me a DMV photo and then you have to wait for a person at DMV to go to a computer, type in that person's photo, download that photo, email it back to our dispatch, then our dispatch emails it to us. Then we have to log in to our computer in our car and then get the photo and then you-- meanwhile, you're sitting on the side of the road with this guy
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	[RE: person of interest information lookup via information sharing software] ... this has sped that up tremendously. Because now, if I don't know who you are and I suspect you're lying to me, now I can prove it within seconds. So I just log in at the beginning of my shift, I stay logged in all day, and then it's very helpful...
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	... So anyone that has a [information sharing software] login, they can now view our photos from our crime scenes, from our booking photos, anything else, surveillance videos from bank robberies, anything like that. We don't have to now try to find an encrypted way of sending it, they can just log in and view it. We're the only agency that stores it like

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								that so nobody else has that capability. But if you go to the desktop versions, you will now also be able to read any agency's reports from any of their systems. So while you don't get the media, you still get the reports, so it's all great sharing.
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	... So we just had a bank robbery today. So I am on my way driving down the roadway and they air it out on the radio-- well, so here's the problem. So on channel one, we have a incident of somebody trying to kill themselves. So they hold the air, so they give us-- all the traffic that's on that channel is specifically for this call, so everybody else needs to move from channel one to channel two. So now on channel two, we get the bank robbery. So now all the traffic is isolated to that channel. But the problem is you're having scanning covering, so we're getting channel one covering channel two even if you take off your scanning functions. Sometimes it happens, sometimes it still covers it. So right when the bank robbery was giving out the information, the dispatcher was giving out the information, channel one relayed up something and it covered over channel two, so I missed the description of the person going out as we're rolling up to the bank. So we get up to the bank and then we continue to follow.
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	[RE: bank robbery incident] Well, technology was great because we had a tracking device that the bank teller had given the suspect. So we're trying to track through that but here's your problem, is you have the Feds that are doing their Safe Street program for the bank robberies, they have the tracking device. We also have a tracking device here or a tracking system here, [county] has one, I don't know if [city] does or not, but all of them are looking at their systems. They're then all calling up to our dispatch, so our dispatchers who are already handling two channels are now handling three different people calling into them to give them information instead of that source coming straight to the officers on patrol. So if they could just air up with us and then give us the information straight, that would be great...
Context_of_Work	LE	S	Other	26-35	6-10	Male	LE-S-021	[RE: bank robbery incident] ...there's the relay to the dispatch and then

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Public Safety Personnel					our dispatch has to relay to us while they're trying to maintain the channels and then also provide the information that we're giving to them to other people. So then they have to run a third channel, [urban city channel], so they're relaying out all of our information to the rest of the metro area. So our channels are encrypted so no one can listen to our channels. But they take it to [urban city channel] and now they're telling all the information, so now everybody else is-- if you're scanning the [urban city channel] ... you're hearing that we're tracking someone. So if the suspect is listening to that, they now know to get rid of the pack, which they did. Okay? So if we can-- I don't know how it can happen because you have to share encryption across everybody. So I don't know if it's a monopoly then if everybody has to have the same system or same-- plus, then, if the encryption code gets out, then now you have to deal with all of those issues. But if there's a way--
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	[RE: bank robbery incident] ...throughout today, I'm following, trying to catch up to this car, and I'm already two steps behind because the tracker's so slow. And now I'm another step behind because of the information getting relayed... And then I have to wait to get on the air, and by the time we find out that the tracker has stopped, we now block off the roadway, but by then, the person is already long gone. We don't realize that because we think it's immediate information, which it's not...
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	we're constantly, all day, just twisting our knob back and forth. So dispatch is loud, MCs are loud, everybody else is quiet, so you're just back and forth, back and forth, until you can get a balance. Then with the earpieces again, so you turn it up and then your earpiece goes dead... you clean it out, and now you're deaf. You're deaf because you can't hear...
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	[RE: department-issued phone] You have to do the 13 to get it to power on, and then fingerprint to maintain it. So, yeah, I think that's basically it. But our officers are authorized to use these for recording audio, video, pictures, any of that. And then they can bring it to us or email them to us in order to upload them into [information sharing software]. So we've

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								looked into the technology of being able to allow them to plug in their own phones and download it themselves. But there are some issues of, "Well, will they delete or will they upload them properly?" So at this point, it's just easiest to have them either bring in their phone, we plug it in and download it ourselves, excuse me, or if they're technologically-inclined, they can just download them and email them to us. So we discourage it for major crime scenes...
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	I've seen some amazing cell phone photos of you walk onto an accident scene and immediately start taking pictures with your cell phone before you can grab a big camera because everything on the scene is going to change. We've had situations where people just get scooped up and put in an ambulance, or run away before you can grab a camera. Or today's, the bank robber. Somebody at the bank pulled out their cell phone and took a picture immediately.
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	... since I'm in the lab, I'm constantly collecting surveillance, too. So I have to go out and with thumb drives, and collect surveillance that way, and back it up over here...
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	[RE: vehicle dashboard with built-in tablet] ... once they put in the tablets, and then people started saying, "Look, number one, I can't brighten my screen anymore." Before, with the old rotation ones, if the sun's coming in one direction, I can rotate it and block the sun. Now, I have to sit here and do this [crosstalk] to try to see on the screen. Or I turn my brightness way up and then it starts making the dash real hot and everything else.
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	So I'm part of a CIR team, so it's a Critical Incident Response team. So anywhere in [county], if a shooting happens or an officer-involved incident of any sort, we can respond. So we get called out for that. So we won't just work in our agency, we work in other agencies. So now when we go over there, we kind of have to buddy up with another agency member and say, "Okay, you listen to your radio, I'll listen to mine, and I'll tell you what I hear and you tell me what you hear." That's the only way

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								that we can communicate...
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	[RE: critical incident response team] ...say, for instance, State Patrol comes into our agency because we have all these highways that surround us, and they're working an accident scene and somebody runs from that, they get onto their radio, they call their agency, their agency then communicates on [urban city radio channel] to ours and says, "Hey, we need you to come help." We then come over here and okay, now we need to get somebody to that [state police] officer so that we can do the buddy system again unless we can get to a toggle station that's active. But the problem with that toggle station is we don't have enough dispatchers to cover that additional jurisdiction station.
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	So if we could just-- so one great thing that we've done here is our fire department has the same channels that we do now. So when they go to an incident to help us out, they pull up on scene or they get dispatched to it, they flip to our channel, they answer up on our radio, and we know that they're hearing us and all we have to say is, "You're good to come in," and they can come in. Whereas before, we call our radio, our dispatch, they call their dispatch, they send them, and actually, we're sitting next to each other-- So that's been beneficial, but if we could expand it to include other agencies, which, I know, again, it brings in a can of worms.
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	[RE: thumb drives] so we go out and buy them with department cash. We used to have four thumb drives. We would go out, we'd collect surveillance, we'd bring it back, upload it to [information sharing software], and then now we use the thumb drive again...
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	So we use Cellebrite to download cell phones, to download computer data, to-- I mean, cell phones are just so massive with their storage capacity now, so we do not attempt to upload those up to [information sharing software] at this point. So most of the time, we buy a 64 gig thumb drive, save it on that, and then that goes into evidence. So we are now currently going through about 30 thumb drives every month of cell phones, computers, whatever else because they do a lot with child porn,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								online child porn...
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	... right now we use the FARO for our accident scenes, right? If we have one that's three blocks long, we can get all those scans from the ground. But right now, we're limited vertically. We have to get into the back of a firetruck, climb up on the ladder, and sit there while it's rocking and shaking, and try to get a still photo. And if we can-- the one drone that we're looking has the capability and the software with a 4K and a FLIR that you can go up there, it can create its own point cloud, and then that point cloud is actually connectable to the FARO SCENE program. So we'll be able to get the overhead views of everything. So it's endless possibilities for that...
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	... everybody has a watch. Everybody carries one in order to know the times on their calls. I mean, we carry cell phones now, too...
Context_of_Work	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	[RE: radio channels] ...But our dispatchers should only monitor one, two, and three of those, but they monitor four, which is fine because then they pick up on what we're talking about. But it's hard because we're shorthanded on dispatch too, so then we're trying to do the communication with that, so--
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	[RE: job description] I guess we provide a service for the community that stabilizes our society, kind of just enforces laws and social norms, essentially.
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	So I work swings shift, which is from approximately-- starts at 2:30. That's when our briefing starts. So I arrive around 2:00 to get ready, just get dressed, get all my equipment together, get my car ready, stuff like that. Then we have briefing, which just discusses whatever is occurring in the city or any specific areas that we're supposed to focus on during our patrol. And then after briefing, we just hit the streets. If there's stuff pending, then we take those calls. Otherwise, we're trying to be proactive and make stops or whatever we can find. I mean, that's basically--

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								there's no typical day necessarily, so it's kind of hard to standardize in that manner. And then we're done around 12:30-ish. So within that time frame, a million different things could happen, so.
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	And I'm in investigations right now, but when I switch this next week, I'll go up to [County], which is way out west. But when I was assigned to [County], typically that's the area that I will generally stay within unless we're short or if it's a high profile situation or something like that.
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	Yeah. So I'm in light duty or on light duty right now. I had a hand injury... So I'm recovered from it. I'm just waiting for the last little bit of paperwork, so I get to go back to patrol next week... [laughter]. Too much paperwork and stuff. I mean, it's been beneficial and enjoyable, but I like being out on the streets.
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	[RE: investigations work] So I'm assisting the detectives who do kind of a lot of behind-the-scenes stuff, more-- obviously, investigations, so they're going above and beyond what patrol will do. So we're the first responders. We deal with the initial investigations, that type of stuff. And then they follow up on any cases that are a little beyond, that take more time, so crimes against children, sex offences, homicides, assaults, things like that, so.
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	[RE: typical communication] In patrol, I mean, it's a combination of things. We have our personal phone, so if our sergeant needs to get hold of us, that's typically how they'll contact us. Or if there's a longer conversation that needs to be held regarding a specific situation or whatever, then officers will contact each other via telephone. But most of our conversations-- our [inaudible] or whatever occurs via our handholds or the radios on our vehicles. And then, obviously, email's a big portion.
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	I mean, it's not good for you, so if at all possible, I try to take it out. So when I'm in my vehicle, I'll turn it off, I'll turn it or-- I'll unplug it, just listen on my radio. So basically, that's what it is. If I'm in the vehicle, I listen to that radio. If I'm outside the vehicle, I have my ear piece plugged in.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	[RE: comms with FF, EMS] I don't directly, but when EMS or fire's dispatched to a call that we're on, they occasionally will be on our channel so that we know that they're either staging or in route. I have never personally contacted them. So that's the extent that I've been contacted via the radio.
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	[RE: comms with FF, EMS] Yeah, if they need to switch over to our channel or anything like that, they're available.
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	[RE: e-ticketers] Yeah, we do have those. They're typically used by our motor units, our traffic officers, so those are pretty convenient. I am technically trained on them, but I'm kind of lazy in regards to technology, so I'd rather just fill out paper tickets than enter it into a little [crosstalk] computer--
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	Yeah, so at the beginning of shift you have to log in to your computer so that it's assigned to you specifically based on the vehicle, your ID, your password, so they can monitor who's using what, where they're at, and then within that you have to log into-- certain officers pull up different programs. It just depends on what you want to do because we can run stuff through dispatch if we want to, but I like to run people if I can just on my own so I don't have to call dispatch, wait for them to do it and then call me back, as opposed to me just typing it in and it coming directly back to me. But you have to log in to those, so they're different programs...
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	... There's potentially four things that I would log into given specific days, so the computer itself, or I/LEADS, which is where we submit reports and document what we're engaged in for that day or whatever. And then [information sharing software], which kind of a localized database of criminals, criminal activity, locations, things like that. And then Messenger which provides us with D and B clearances, vehicle registration, warrants, those types of things.
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	[RE: different technology systems] Usually you have the same user name for all of them. But then the password is whatever you want. But some

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								of them change every 90 days or so, and some of them don't... It's pretty irritating.
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	Yeah, so as a [Name] unit-- so we're all assigned our own identification, so I was [ID]. And that's what we refer to ourselves as. So if I call out on a traffic stop or something, it's [ID], and then they respond to me as [ID]... Yeah, so my sector partners would be a [ID] or [ID], and those are the people that I'm with in my sector that I'm trying to back up or just know where they are at all times and make sure that I'm just aware of any situation that they might need help in or something.
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	... Today was ridiculous. They had all kinds of high profile calls, so I was kind of [crosstalk]. Yeah, so and that kind of drains our resources, patrol-wise because you have people coming from all different sectors and responding to that. And we had two tone calls-- so we had a robbery and a domestic at the same time, so we had two Baker-- our two Baker units at one location, and then within the Baker sector, that robbery came out, so two Adam units had to come from up north to respond to the unit, or to this call, and then the Charlie units came down. And we had our traffic units respond and sergeants and investigations and stuff. So.
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	... When you go through the academy, there's just certain things you can't replicate until you're actually on the streets and working. So you have to really focus on a million things at once. And if you're not good at communicating and you're not listening to what other people are doing, then you're going to be lost...
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	... So I think it's cool to just sit there because I'm here in light duty and I'm not able to get involved, but it's cool to hear other people communicate. And then the way that the commanders or sergeants or whoever's on-scene, how they delegate and kind of orchestrate this whole chaos into something that's manageable. So I mean, communication is huge. And if it's not there, then nothing functions properly.
Context_of_Work	LE	S	Field	26-35	5 or less	Male	LE-S-022	[RE: apps] ... we also have our cheat sheets and stuff... A lot of traffic

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					stuff. So when you write a ticket for-- whatever speed over the speed limit, it's a different fine, or CC, or-- so things like that that which I don't want to ever memorize because it's just ridiculous.
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	[RE: various traffic fines] ...I'm sure those traffic guys probably know those by heart, but I don't ever want to take the time to learn that stuff. So it's nice to just be able to reference something and have it at your-- available to you, but not something that you have to dedicate a lot of time to memorize...
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	so our cheat sheets, if they're on our phones, it's because somebody took the time to scan theirs and then email it around. That's how I got mine, as well. Another officer took the binding off and actually sent it through the scanner... But our municipal code, you can search for stuff, which is pretty convenient. Because otherwise, [statutes], the revised statute, state law, we have to go through this gigantic book to find stuff, and it's not always the most convenient thing to-- or time efficient thing to just sit there and peruse... I mean, it's fairly user-friendly for the most part.
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	I think, in general if there's ever information that's not provided to us prior to arrival, it falls upon the reporting party or their inability to communicate effectively through dispatch. People are in states of panic or whatever, so it's very hard to communicate. And so dispatch has to do the best that they can and provide us with the most succinct and direct response to what they're being provided. So yeah, a lot of the time we show up, and it could be a suspicious incident or something, and it's actually an active domestic. So you get on scene and it's, "Okay, well, I wasn't provided this information," but it's not necessarily their responsibility to tell us everything that we need to accomplish our end goal...
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	we had, just early this week, a deputy-involved shooting where he just went to the door, and the guy was holding a gun in his hand. And he was just going to serve papers, so I mean, he didn't have any knowledge of what that individual was going to do or what was involved necessarily,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								so he had to respond appropriately and deal with the situation... So I mean, information is beneficial but if you don't have it, you don't have it.
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	[RE: communication issues] I mean, the technology aspect is hard. I don't know how you would solve it. I've heard other people discuss, we need better radios and stuff like that. I don't know any different, so I use what I have and that's about all I can-- and you hear the older guys, "Oh, back in the day we didn't have anything." And a few months ago, the line got cut to Xcel, so we didn't have any Internet connection to our vehicles, and so it was like reverting back to 1950. And so you kind of get a perspective. It was like, all right, well, you do have a lot to work with, and these tools are very valuable, so complaining about them isn't making anything better. It's just utilizing what you have and making the most of it...
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	[RE: MDT lost internet connection] So getting dispatched somewhere, it was basically-- I had a pen-- one of the other officers kind of rigged this system up with rubber bands across-- I think it was on his steering wheel actually, with a notepad so he could just jot stuff down in front of him. I just had mine in my lap, so when they dispatch me to something, I had to take a second and pull over or whatever, write down the address, and kind of a basic description, names, whatever. So it took me a little bit longer, but it wasn't that inconvenient. On a Code 3 run or something like that, it'd be kind of-- because you're higher stress, you're driving faster, you have lights and sirens on, so that makes it more intense. I don't have the time to pull over and write that down, so you just have to function at a higher level, I guess, than you're normally used to.
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	[RE: code 3 run] Those are essentially if human life is in danger. So one of the most common ones that we have is an unknown injury traffic accident. So say, just over here on [inaudible], we get dispatched, unknown injury traffic accident. It's been reported, and we know at least two cars or whatever have been involved, but we don't know if that person's laying on the ground bleeding out or something, so we have to respond as quickly as possible but still being safe and regarding traffic

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								laws and stuff like that, but. So we're going lights and sirens, and that's when traffic is supposed to get out of the way, and we're able to kind of-- not blow red lights, but kind of not adhering to those, necessarily.
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	So a Code 0 would be the situation or-- there's a robbery, or anything like that. So when they call out on it, there's a tone, so all units be ready for a tone, or however they word it, and it's just a siren over the radio, so that means that channel 1 is specifically dedicated to whoever is being dispatched to that call or any other units that are associated with that call. Nobody else can talk on that channel. All other traffic goes to 2 or whatever else...
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	... So there's Code 0, Code 3, Code 7's our lunch break. Code 9's if you can't hear somebody. Code 6 is if we have-- if somebody has a warrant or something like that. So a lot of departments have different ways of communicating. We use plain speak, I think is what it's called, so we talk very directly. We don't have a lot of Code 10-4, 10-20, 10-82, stuff like that. So it just kind of depends.
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	I think what they're doing with [information sharing software] is going to be very beneficial because right now, it's kind of located within our city and the surrounding areas. So if somebody's been arrested here, then I can pull up their information and stuff, but if it's in [City] or [City], it's not necessarily going to come up. But they're trying to combine us with [City], [inaudible], [City], [City]. And so just having that general database of individuals and their associates, their vehicles, their locations, their phone numbers, that's invaluable to investigating and figuring out how you can pursue people and charge people with stuff...
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	it's kind of in the way that I compare to my daughter. She'll get upset if her mom's phone is out of battery and she can't watch a video or something. I'm like, "Well when I was your age, we didn't have TVs in the car." It just didn't exist, unless it was one that you plugged into the thing. It's all perspective, I think, to a certain degree. If they could do the job in the '50s without all this stuff, why can't we-- I mean, running people and finding warrants in databases and stuff like that, that's definitely

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								something that we need as law enforcement, but whistles and gizmos and stuff like that are not necessarily things that I find particularly necessary.
Context_of_Work	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	We can access [state criminal database] and NCIC, which are the [state] criminal database and the national. So if somebody has a warrant, if there's a stolen vehicle with stolen tags, we can run gun clearances, things like that, just from our vehicle. So I mean, that's very important. I think that's definitely way more important than anything else.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2]Kind of like the army. My position is just like we see on TV with the stars and stripes. You're in charge of a group of officers and you're supposed to lead, train, and supervise.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] Just like every other city, it depends on what the needs of the city is. That also includes district. We're downtown. We have foot beat officers. Sergeant [Name] right here is in charge of the foot beats. We have officers that are walking up and down [Street]. People want to see cops walking around. We have officers on bikes, and they're riding around on the bikes. And then we have officers in cars, who are actually going from call to call to call to call. We also have officers that just deal with homelessness, and so they're getting all their resources for all the homelessness, which is not in the job description, but they're actually picking up mattresses for lice, garbage in the street, and putting it into a police pick-up truck because the Department of Public Health is short their staffing, too. So these cops are doing a little bit of everything. They're not going-- they're in uniform, but they're not out making arrests. They're going out, engaging with that homeless person. They're engaging with Department of Public Health trying to get the people to clean up the needles. They're also picking up-- they're kind of like the problem solvers for the captain for each district. And then we have a pickup truck with police lights on it, and they actually put garbage in the police-- because people leave stuff everywhere, and you just don't have time and wait around for people calling 911 going, "There's garbage on the sidewalk. The sidewalk's blocked, and I've called everybody else," so

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								who are they going to call next? Call the police department. So we actually have cops that come out. And every once in a while, even at 2:00 at night we'll get cops to actually fill up the truck, and when the officers get here in the morning, they'll go dump it to the dump. So we do a little bit of everything.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] What are you going to print with? Right? And then the whole idea was a sergeant would look at the report and then use the mouse and try to sit there at the same time, but then you've got an officer safety issue too. Where are you looking at? You're looking at your computer. You're not looking at your surroundings. So it's easy [inaudible] they can come up and boom and what was the officer doing? He's sitting in his car. You hear all of these horror stories all the time. It's actually easier just to come back here, write the report. We have an inbox, we have a stack of reports to read, like he's doing right now, and then as we come in we make little corrections and then tell the officer, "Okay, it's good," and then he can go home or he goes back on service. Most of the time they write the report as fast as they can and then they run back out on the street. So, for instance, those officers right here? Some of them are eating. If a call came out right now, shots fired or a gun, everybody would go right out of the station. So you could be in the [middle of finishing a report?] and the papers are flying, everybody ran out of the station. And then you have to come back eventually.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[s2] Well, most the time, we're on 10-hour shifts. So we come in and we go through our line up. And just like you see on TV where we're standing with the hats and stuff, and we have a sergeant or lieutenant will address line up. We also go through all the bulletins, all the wanted bulletins. Sometimes we get information from other counties, like, "Michael Jackson is not dead. He's seen robbing banks." All right here he is, right? And here's the picture, this is what he looks like now. Okay, he's had a couple of surgeries, but this is what he looks like now. He's not alive. The getaway driver was Elvis. "Okay, cool." Right? And then we also have it on email, so every officer has email now. We just got it in the last

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								three years. [inaudible] had it for years. So all the officers have emails. So officers can go through their department phones and go through the emails they have. And then they have access at home, so we have cops that will check their emails, department emails, from home. And they remember, "Oh, that guy was wanted in a robbery." And then they come to work and-- I've had cops that actually made arrests on the way to work. Because they go, "Hey, that's they guys with the--" and they'll call in, "Hey, so and so is here. Come on, we'll go grab him right now." It happens all the time.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] They're also preventing crime. You're out there, and the bad guy sees a cop there, because you're out in the field, then nothing's going to happen there, because you're there.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] Yeah. They're protesting here and they're throwing red paint on our police cars and stuff and are all upset, and we've got officers that are walking with them. With the bike one, that was a good one, the bicycle coalition. They were every last Friday of the month.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] ...." Well now you just spent an hour and a half, an officer wrote a report that this guy was shooting up I mean illegally, all right? So what do you tell that brand new officer? Right? What do you tell the person who called 911 who is pushing their kid, going, "Hey, I'm sorry. We're trying to clean this up." The big thing is displacement. See, I do have that officer in that corner. And he just kicked out that whole block of people there who were shooting up. Where did they go? They have to go somewhere.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] ... And a good footbeat officer will see someone and says, "I don't recognize him. I'm going to stop and make contact with him." I'm not saying the person did anything wrong. And I'll go, "Hey. I don't know you. What is your name?" "All right, [inaudible]. I don't have to tell you my name." "You don't. But I don't recognize you, and I'm going to keep on standing right by you and standing right by you until I know who you are." "My name's so-and-so." "Okay. Where are you from?" "I'm from the United States." "All right. Okay. Where are you from?" "I'm from [City]." Okay. So

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								these guys over here are from [City] and [City]. Well I know that some guys from [City] and [City] don't get along. Hmm. Did I prevent maybe a shooting by him that he knows that I know that he's down here? All right? But this is what deters that brand new officer is when people start putting up phones and going well, "You're harassing me." "I'm not harassing you. I don't know who you are. And this is the area that I cover. It's the area that I patrol." But that normally doesn't make the news. What makes the news is that officer harassed this person of color and said-- and he's irate and it's all on film. So what happens, we get the tendency of officers go, "I'll just go wait for that person to call 911 and just go handle the call," right? "Because I can't get in trouble that way. But I can get in trouble, accused of racism or something like that, for just making contact with somebody."
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] It can be really chaotic in here because we bring prisoners in here. I mean they're screaming, they're hollering, they're yelling, "Eff the police, you stopped we because I'm black." They're throwing up in here. I mean it sometimes it can get-- especially if we get, let's say we get a big robbery, and it's a crew of four or five. Similar to the [bar?] incident when they had a bunch of people in the [bar?] [inaudible] I grabbed all eight suspects. They have to come in here. They all have to be separated. Sometimes we just don't have the room in here to separate them. Because if I put them together, they're all going to talk, right, so you have to separate them, everybody. "Oh, so you're a juvenile. You have to be separated from the adult." So as a supervisor, that's something that we have to try to manage, but we also have a senior officer here that's in charge of the station. He gets all the reports, make sure we have paper. He makes sure the prisoners [are breeding?]. He has to go through all of that. He's kind of like the charge of the station. He's just an officer. But yeah. And so if I'm out in the field and something happens in here, he's in charge. It's usually [the one with the most timing?].
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] You know? For us, we have to do a lot of talking because right now we don't have tasers but we have all the time in the world.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	But there's a certain point where I gotta go hands on and most of the time when I go hands on, somebody's going to get hurt, and it's usually the cop that gets hurt.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] Right. So because we have lethal, and there are less lethal options. It's like the little bean bags like your kids use for tic tac toe on the backyard. That's pretty much what kind of-- and the way the drugs are right now, if you hit these guys with a little bean bag, there's no effect. And so now, after my five shots of this bean bag, the guy's still there. What do you do now?
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] These guys, they would know on the street, because some of these guys have been tased before from other cities, and then they're coming down here and yeah. That's not going to work with the guy that's done PCP or meth. You sat there and said, "Hey, you want to go to Disneyland?" He didn't even hear it. Whatever I tell him, he's not listening anyway. So what the other option, what you do? We can wait him out. But now he's frantically having a knife and he's swinging and now people are filming it. Oh, the cops aren't doing anything. Look at that. I have all the time in the world. I can sit there and wait to Tuesday for all I care. Sit there surrounded, just right? Now I still have an obligation for the other public safety, the people who are calling, "Where's all the cops? They are watching this guy who is sitting there on the corner. He's half naked." So sometimes, we just have to go hands-on. And usually it takes more. Last night an ambulance crew picked a person off the ground who took something. They did an [R-cam?] in the nose. He got up and started punching the ambulance crew. It took us eight cops to get this guy on the ground. So that's eight, that's a lot of weight. You figure each cop at least weighs over 100 pounds. He was still lifting the cops off the ground. What do you do? You can't shoot him right, so you can't even use the carotid anymore, where you constrict the airway, where they pass out. They put handcuffs on them, and they wake up. We can't even do that any more, so what do you do? So they say that we could use our crisis intervention training, which is on the news, but we also have body

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								cameras. So I guess if I throw my body camera at him--
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] So I was with officers for the airplane crash. Okay? So I was on scene there. So I drove the police command van, because I designed it so we could use that as a command post. So I drove it from here, out to the airport. Dispatch told officers to revert over to the officer from [City] because we got to go down there, kind of not really [a mutual aid?], because a part of [City] but the officer from [City]. We had to send like four or five from each station down to the airport.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] --when I have to go-- when I need additional sources. As a supervisor I won't send more than-- if there's a call in there-- say we've been getting a lot of juveniles going in there and 15 at a time and acting stupid. I don't send two cops in there by themselves. I order the cops, "You stay outside and wait for two more officers." So at least I have four together, than just two. This is an officer safety issue because now I've got this huge mall.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] You can walk down the street butt-naked in [City] and nothing would happen to you here. You got to [County], and you'd be arrested. However, if you go butt-naked and you sit down on a bench, and you don't put a piece of paper down to cover your stuff, I'm supposed to cite that person [laughter].
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] Or I can come back to the station and do it at the station. Normally if I don't want to come all the way back to station, I would do it right-- I just take four minutes or so and pull over to the side, and I'll tag it, and I know it's done. Instead of coming back here and trying to figure out later all the 15 entries that I have on my camera, and now I have to tag each one of them, and then you have to pull the CAD of your history for the dates, and it's kind of a pain in the butt.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] The cop is in the middle of a pursuit, and he's chasing somebody on foot. He's not going to take two seconds, because now he has to try to find that switch to go over. It would be a lot easier if the dispatcher just hits the button and it patches it through to the BART dispatcher, but that

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								takes money, the technology is there, it just costs so much.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] ... And then it's because they're going by their script. "He's having a seizure." Once he has the seizure, it's already done. But [inaudible] response, [are they?] bringing the police over there. Once he wakes up, he's going to be disoriented, so these that you have are the little script you go by. The cops get frustrated, I think, every once in a while. "We need an ambulance here now!" "What's the reason?" "Get an ambulance here now, he's not breathing!" "What's going on?" And the cop's doing [crosstalk], so. So that's, you know.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] "Excuse me?" "I want him arrested. This is not good weed. You cannot arrest me for weed. This is legal. I bought weed from him, and this is not good weed. I want him arrested. I want my money back." "Oh, really?" Or "911, hey, this guy with the green hat has a gun." So I come out of the car. I go down there. Pull him out at gun point. Put him on the ground. Now I have to come back to the station, write a report that [inaudible] gun and the person who called 911 is now anonymous, and there is no call back number.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] ..."Oh his name's So-and-so. It shows that last time we got the key from the manager, the resident manager. Oh, the manager's room is room 12. I don't have to kick in this door, I just go get the key from the resident manager." Once I kick in that door, now I've got to do a report and notify a supervisor, because we kicked in a door to check on So-and-so who had been doing drugs all night and he needs to go 5150 or he needs to be medically treated
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] --maybe I'll find the manager, say to the manager, "Hey," and let that supervisor know, "Hey, we're only--" and I like to have that civilian there with me so if the guy goes and just, "Cops came in and took a million dollars from me." So I just say, "Hey, this is what we do." Look a lot of civilians are like, "You have a warrant?" I'm not arresting him, I want to make sure he's okay, and then what I do, is I do a 360 on it, "That's fine, if he dies, it's on you. What's your name?" And then you usually backup and say, "Hey, if you had family and you're calling, you would want me to

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								do the same thing, right?" "Yeah." So I don't really care. This is [City] if my people go to jail here I just want to make sure that person is breathing or not. Even if I went in there and I saw a bunch of illegal stuff I can't arrest him on it because I need PC to go in there because now I have to freeze it, get a judge for a warrant and go through all of it. No cop's going to go through that.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] [The community means a lot?]. And this first time the community has talked to the cops in months. And they're still doing this thing. The Captain says, "You got any issues, you email me." I'm looking at him like [laughter], "Why?" If that was the fact, why are we having a community meeting? We just do a mass email. How about that? Let's just video tape it. We'll video tape it in here. Everybody logs on and you video tape so you don't have to talk to anybody in person anymore. But that's what society has turned to now. And that's where technology is hampering, I think law enforcement, is they're not getting out and not talking to you.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] And you talked to everybody, Miss [Name], Miss [Name]. It wasn't baggy pants walking down the street. It wasn't the disrespect. There are just so many calls with the disrespect. We go to people's houses and the kids [claim?] "Eff you, Mom. This and that." I'm going, "Would you like me to pin him down for you?"
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] You better say that-- what, something happens, what do we do? Cops will run into places, everybody's running out. So it's a very good-- say you're a firefighter, that building's on fire, well you run in. Put it out and run out. You go get the bad guy, who has the gun and is shooting everybody, and we run out. That's just weird. Now you get technology in the way, and then people are like, "Oh, but." They're hesitant. They don't know how to talk.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] Exactly. What do I tell that new cop? Say, "Sorry that's the way things are, but go out there and keep on doing that good work. You got 30 more years to do." Right? Or the burnout that they get some of the cops that they're on video, part of it and so departments have a jerk reaction. Pull that cop off the street. Get him off the-- the cop thinks he did something

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								wrong. He didn't do anything wrong. He's just in that part of the video, and by the time the investigation is done, six, seven months then they go and tell that cop, "Oh, go back there, you did everything fine, go back out and do the police work you used to do." You just ruin-- he's done
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] The people that do the child porn and stuff. How they could do that, you know? And then they're done, they're just like-- they quit, usually, they quit early, and we do have advantage where you can go to other stations, you can put a transfer request in to go to other stations. Specialize [usually on the horses?] but it's like a waiting list to get on stuff like that.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] Yeah. And that's pretty much you feel-- you do 30 years doing that same thing. Unless you decide, you know what, I get burnt out doing radios. I did that year at the [inaudible] and I didn't want to touch another radio.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] Yeah. But they don't do that. We even have homicide inspectors, are great with homicides, and they know everybody on the street. And then they move them to fraud. Why would you move a person that has all the knowledge of homicides and those gangs and stuff, and now you're using-- he's doing frauds. But the police department, we're famous for doing stuff like that. It's mind-boggling. But I mean, it goes in cycles.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	[S2] It's a lot more paperwork now. And that has a lot with the district attorney. They demand more paperwork. We're supposed to be the paperless world. I'm killing trees left and right in here with all the paperwork that we're going through. I don't know. I don't know how to fix it. Technology
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	I work at the discrepancies between dispatchers, dispatch management, and the patrol officers. They are supporting on the field. I try to initiate training on both sides, so they're operating on the same page. I think my best role here in the building is to allow the dispatchers to vent [laughter], and that makes 95% of the problems go away.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	I was assigned. I had a role in high tech crime investigations when I was a sergeant. I did license plate recognition systems, cell phone tracking,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								GPS investigations. I kind of started our own little unit within the department, and then I moved on from that, and then promoted and was minding my own business when I got a phone call saying I am the new liaison to the Department of Emergency Management.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	Yeah. I mean, I've been with the city with the police department in one form or fashion for 33 years. I've only been a police officer for 22 and change. I was a mechanic, auto service worker, mechanic, fleet manager. Then I became a police officer. Did that. I was an officer here in this community for about 10 years and promoted, worked different, then promoted again
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	The call takers received a call for their 911 or non-emergency. They do a quick triage of the call, depending. And then they send it up to the channels. Depending, there's some computer programs at play in the background that kind of dictate the priority of the ride if there's a medical component to it, whether or not dispatch should send EMS along with fire or police.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	...The majority of the runs now were complex in nature, not that they're different, but they just require more, either documentation, more follow-up. Your standard domestic violence call used to be family fight. And then it was, "Okay, stop it. Go away." But as time has come on, there are certain things now you must do. That call, which would've been 5 or 10 minutes dealing with, now it can take hour, an hour and a half depending on notifications and whatnot.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	Oh, yeah. Oh, yeah. It's very regimented in that aspect. Say, it's 6:00 AM lineup. You meet with the lieutenant and the sergeants, and they call the roll and go over any issues for the day, hand out the assignments. Everyone roll out and hop in their cars and rush to get a cup of coffee before the dispatchers realize that they're available. And then the game begins.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	Yeah. So as far as fighting crime in [City] and for talking to my peers around the country has become secondary to spit and polish.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	Right now, I'm trying to work on an MOU. CHB is trying to get an MOU through their state quagmire that they can present to us that my boss can sign-- the chief of police can sign.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	Yeah. What do you do if all of the sudden, dispatch goes off the air? You're going to drive to dispatch to see if anyone is home. Right now, that's what your average cop would say. They drive over here and see what's going on.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	Radio. And you might get some of it-- now the driver is going to be depending on the urgency of the run and the response. You're not going to be able to spend a lot of time reading along texts on your screen and safely operate the car. So your passenger is going to be your comms guy, communicating with dispatch and reading the CAD. And whether they need assistance or they want backup units, all that is going out over the air.
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	So the guy working station duty will run the local number, pull up his photo, take a picture of it. Boom. There you go. About 90 seconds, if that. I can't type in the password to get to the Cal photo to come up, "Why are you doing it?"
Context_of_Work	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	No. Name, race, sex, date of birth. You get a first set of returns. You look at those returns, and you run other queries. There's no why I can't take your picture and know pretty quickly whether you're in my database. I mean, if you're not in my database, good for you [laughter].
Context_of_Work	LE	U	Field Responder	56-65	31-40	Male	LE-U-012	We make it so officers can communicate among each other out in the field. The transfer of information, whether it be by a cell phone, whether it be by using a computer, to make it so you can communicate. Police radios are involved also.
Context_of_Work	LE	U	Field Responder	56-65	31-40	Male	LE-U-012	Let's see. When you arrive at the station, you go to lineup. When you're in lineup, the lieutenant or sergeant explains to you what's happening that day. Just in case you have any critical incidents or things that were happening prior to you coming onto shift, because there's different shifts that you work. And then depending on either your seniority, if you

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								have a sector vehicle, or if you're walking a foot beat, you'll get in your car and you'll start doing your patrol, your patrol functions. You have your gun. You have all your equipment that's issued to you. Now they have cell phones. Now they have body cameras. So everything is turned on. So when you leave the station to start your shift, you're ready to go. You tell dispatch you're in service, and if there's a call within the area that you're supposed to patrol, they will let you know. And then you start handling calls for service or pending calls that were maybe backed up because they were too busy, and you didn't have enough officers working. Then you would tell clear, not only you but whoever came along on your shift, clear the pending board for dispatch calls for service.
Context_of_Work	LE	U	Field Responder	56-65	31-40	Male	LE-U-012	If you have a designated police sector car, yes you do. But you can go outside of your sector within the boundaries of your station, because every station is basically given a boundary to patrol. Yeah. [City], we have like 10 or 11 districts. They call them district stations. So within each district, you have up to five or six cars that patrol a different designated area.
Context_of_Work	LE	U	Field Responder	56-65	31-40	Male	LE-U-012	...One guy's driving; one guy's looking at the information prior to going to the scene itself. The only times that you would use, I would say, your phone is if you're doing the investigations, usually after the fact. The primary is when you arrive at the scene, depending on what you're responding to, you have to render the situation. Is it safe? So last thing you're going to be doing is taking out a cell phone. Talk to the victim. Talk to the reportee. What's happening. What you have here: the who, what, when, where, why. The standard procedure stuff that you have to go through.
Context_of_Work	LE	U	Field Responder	56-65	31-40	Male	LE-U-012	Well, if you request the fire department, if there's a fire, of course, then you would stay there. But you would stay back and they would take charge if it's a fire. You would take care of the perimeter.
Context_of_Work	LE	U	Field Responder	56-65	31-40	Male	LE-U-012	I would say you have to have both. You have to have a base. Dispatch gives you the base. You want to be in communications to know where they are, so you're not walking into something blindly, especially, if this is

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								a repeated offender. He's known to have weapons. So you're out by yourself or with two people, you still have to mentally prepare yourself on the approach on how you're going to confront the individual. If you're a one-man car and there's nobody else, everyone else is out on something, you have to handle it. So you have to make your assessment kind of cautiously prior to getting there. And if you need help, you'll have to call for help, and dispatch will see if they can get another unit from maybe another district to come in to help you if you're not too far away. Yeah. Doesn't pay to be a hero [laughter]. Doesn't pay to be a hero.
Context_of_Work	LE	U	Field Responder	56-65	31-40	Male	LE-U-012	It's usually home because it's in the evening hours. So they'll pick up their phone, "Can I help you?" They speak a little bit English. "I need you help me translate in Tagalog or Arabic," or whatever language, right? "Okay. What do you have?" And you passed him on and then it gets transposed. But that would be something very useful. Again, like you're in the car, right? I mean, it's just what is this [laughter]? To help you out and help you out there. It saves time. The whole thing is time. I call it time management, just shaving the time off. Having more information in front of you where it's not overloaded, but it makes you safer too because everything is right here. You don't have to take your eyes off looking at the screen. If you're giving a ticket to someone, it's transparent anyway. You can see the car in front of you. You're taught officer safety. Your eyes are looking in front all the way around you.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Male	LE-U-013	So with our department, we have our line up in the morning. It's like roll call, I guess in other departments. They give us information. If we're looking for someone or if there's someone that's wanted, they'll show us a BOLO or a be on the look out for. Information that's passed down through the captain or command staff, if someone is ill or if there's a birthday in our station, we kind of relay information. So we have that in the morning, and then we have what's called secondary line up, which means a few of us will go grab coffee somewhere else and just catch up on the week, especially if it's our Monday.
Context_of_Work	LE	U	Field	36-45	11-20	Male	LE-U-013	Yeah, you should. You should know your district. Because if I'm calling

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					for help, and you don't know where I'm at, and the radio's not really working like they do in our department, then you can't really go on your phone to Google Maps to find this small alley you've never heard of. It's hard to find people if you don't know the area. And I'm an FTO, field training officer, so I stress district orientation to the recruits. Because there are times when you can't get on your phone, so you should know where you're at.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Male	LE-U-013	Our district is busy. We're one of the busier districts. Us and Tenderloin Station are very busy. And we patrol [Street], which is one of the largest streets in [City].
Context_of_Work	LE	U	Field Responder	36-45	11-20	Male	LE-U-013	It's vital. It's vital. I know what I'm going in to. It's hard to drive, and listen to the radio, and look at the computer screen, and watch traffic and the bicycling. It's hard to everything.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Male	LE-U-013	It's a mix. So you have your area where you're assigned. And then, you have calls in your area, like an auto break-in, or a cold burglary, or a stolen car. So a lot of what we do now is paperwork. We do a lot of report taking. A lot of our-- our hands have been tied a lot in the past couple of years in regards to doing proactive police work because of the lawsuits, and people saying that we're discriminatory against this person, that person.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Male	LE-U-013	And then, some bosses get mad when you're at the station early, but you're there doing paperwork or information.
Context_of_Work	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	...Kind of being the sounding board for a lot of issues and then responding when other people can't figure out what they should do in a situation. Or people have decided what they want to do, and they decided the wrong answer. That's what I would respond. So I would put it in that kind of description.
Context_of_Work	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	So in my current position, my current position is I'm on the captain's staff, so I deal with most of the events in the South Market areas, all the large events. So I'm dealing with different community groups, different promoters, and these different protest groups. So on a daily is

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								communicating with them trying to figure out what their agenda is for an event, getting parameters on that event, figuring out what the police response will be at those events, our concern for the public safety, for the event itself, coordinating with every other agency in the city as far as for Department of Health, and the parking and traffic, for our DPW, public works, to coordinate the other perimeter or infrastructure for these events and coordinating with the promoters. On top of that, my patrol responsibilities, as far as supervising the officers in my office, and then once it would fall under me on the street, so depending on what calls for service they're responding to. So it's got many hats, but my primary role is on the staff right now with the captain staff, which is dealing with all these communities and all these different events, so manage those, coordinate those, and facilitate those.
Context_of_Work	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	...So the routine with that is that they would be checking on, get ready for the lineup, get their gear and everything else, respond to the lineup, meet with the platoon commander for the day, get the brief time activities that are going on, things that need to be done, or any bulletins, or any warnings, or anything else that come up. They get those notifications. They get their assignments, their sector assignments, and then any other information for the day, whatever has to be passed down, if there's roll call training or something that would be given at that time. So at the lineup, once they've done that, they would have all their equipment. They'd secured their equipment into the vehicles, and then they'd go out to the street and patrolling, and the people that are ahead of them would be happy because they'd be getting off
Context_of_Work	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	...But in addition to our own district, we would be drawing from the Field Operations Bureau. So they would be assigning additional personnel to come down. As we're dealing with that, either we share a channel or we get another channel. And we try to coordinate that, meet with the spokesman or whoever is in charge of the demonstration, coordinate with them on what their plan is, and then coordinate our response to that.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	So the PD, in [City], you have the patrol. So they'll patrol the sector cars and manage the different response to call for service and needs in the particular sector in the district.
Context_of_Work	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	Yeah, so that's a different animal. So that's contained in the AT&T. I mean, we've got the Giant's games that go on over there. We have the larger concerts that will come there, but they're contained. So we have a system in place within that venue, as far as how to respond, what the coordination is. And we have a pretty good relationship with the Giants as far as addressing security concerns, and then security plans for that, and that footprint. And since it's pretty consistent every time, we usually get the same kind of closures. We have an initial plan. And if there's something different, depending on the venue, they can adjust for that and then make the necessary personnel changes.
Context_of_Work	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	We have what's called Traffic Company, which is our motorcycle officers. We have some that are assigned to each district station, but we also have the unit as a whole that responds and conducts their own traffic enforcement operations... There's parking control officers that are out there all the time doing enforcement and traffic control for different new street configurations.
Context_of_Work	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	... So we staff that in the district. They address some of the traffic control stuff. There's a lot of construction that goes on in the districts, and those companies often hire either parking patrol officers to assist with the traffic control, or they hire some off-duty officers to respond, and they'll assist with traffic control in addition to the flagmen that are at the construction sites. But there's many layers to the onion at all times that are out there working to facilitate the traffic stuff. I think the biggest part of keeping it flowing is the parking control officers because they're able to manage the flow, see the flow, adjust the timings on the streetlights, and that kind of thing.
Context_of_Work	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	So usually, for the officers that are assigned to the particular event, and they all know they're on a particular channel, and they'll monitor that channel. Each squad has a sergeant squad leader that's assigned that

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								will typically monitor that radio for any communication coming out and then designate what personnel would respond to a particular call. We know where officers are posted within the venue. So they'll have a call sign for a particular quadrant within the venue. So at the command post, we know particular officers that are in these locations. So when we contact them, we'll go officer to officer, just unit-to-unit kind of communications. And if there's an issue there, then we'll dovetail in dispatch, and then we'll ask dispatch to raise that unit. Sometimes, I don't know, maybe they're just luckier than us, but I don't know if they have a better broadband or broadcast ability, or if the officer had maybe changed channels, or whatever it is, but oftentimes, we'll utilize them to communicate with those officers if we don't get a direct, but often that's not an issue as much because we'll have direct communication with them.
Context_of_Work	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	...So depending on the day, you'll get these thermal meters of crank density towards the afternoons or towards the late nights or whatever, but then you've got all these different calls for service in the middle. And whether officers are on viewing in a process, either with driving violations or street times, or even just some other need for the community that they're getting wagged down for, flagged down for.
Context_of_Work	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	... So staying fluid to that and addressing those concerns and questions, whether it's coming from either the military, or the public, or the private sector and them speaking for their employees, it's a daily juggling act. But the officers in the district have it down to a science to where when I go back to what I was talking about with the consistency, they can be working in the one car and then move to the four car and you're getting different calls for service, but the response is going to be the same. They're going to go there, they're going to assess it, and they're going to respond and try to deal with whatever the situation is. And that's not even taking into account what you see on the news, what the current trends of chatter is wherever.
Context_of_Work	LE	U	Field	46-55	11-20	Male	LE-U-014	So the end routine, the officers would patrol the district all day and

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					handle the calls for service in their district, respond, to assist, whatever other units need assistance in the district. And as their shift is coming towards an end, we'll have an overlap of another shift coming on. That next watch coming on will get the same similar briefings, whatever information needs to get passed forward to them. And they would go out in the street. So the shift that's already on the street would then have that opportunity to come back in, start getting some of the administrative stuff done. Either they've gotten police reports during the day or they've got some other sort of a follow-up, that's their opportunity to kind of come in and get some of that paperwork done. So they'll have that interaction with the guys that are going off. And they'll see that, and they'll be writing the reports, and that's on a daily. So they don't want to catch too many reports and have that sitting towards the end of the day. So you may see a unit come in periodically through the day to knock out a report just to be done with it because they don't have that ability in the field.
Context_of_Work	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	Depending on what the issue is. I wouldn't say it's a problem, but it's a hurdle or a workaround that we'd do. So if it's a medical call for service, we have a pretty standard format that we'll give dispatch. It's the location of the incident that we need, the particular observation of whatever the injury is, the age and sex of the person, and whether they're conscious or unconscious. And we'll push that to fire.
Context_of_Work	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	...The department cell phones, not just the fact that we have the cell phones, but on those cell phones, we have access to our crime data warehouse. We can run the mug shot system from our cell phones and actually look those up. CalPhoto from the phones, we can actually look and see and try to get a little bit more information from somebody.
Context_of_Work	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	... So we communicate closely with our DEM folks, their emergency medical guys. Because we can kind of see what their plan is, where they're going to be situated but also try to work out a better plan for our communication between them and us and whatever else is going on at the event.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	So the Google Maps, we use that. We'll go to the websites. We'll use that for checking those out. Obviously, we were using our Word docs, our templates for when we're creating our operations orders and those type of things, depending on what the event is. Sometimes we'll write one... The personnel that they hire are pretty specific into their field of security and safety for their company and for their venue, so it's a little different dynamic. So we work with them and whatever they provide us, and then our different units. So if there's particular concerns at a venue, we'll coordinate with our special investigations units to query if there's any threats or concerns for a particular venue. Or if we hear something, we push it up to them and they do their own research and dig out a little bit more to figure out if there's something else.
Context_of_Work	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	We do a lot of language translations. So I know that this exists in other places, but the ability to Skype with a particular victim or witness or whoever in a different language and is automatic, so you're speaking in your language, and it automatically is translating to their language so that they're able to see it or read it. Having that, I think that's a huge technology because in [City], we have-- I don't think there's a country that's probably not represented in [City].
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: police officer] Answering people's calls for service, whether it's an emergency or a simple need and they need a solution to it and going to help them solve that problem.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: lieutenant] I supervise the officers that are on the street, making sure everyone responds to their calls like they're supposed to and monitoring that everyone handles proper procedures. Doing staffing and checking to make sure that we have enough people working or watching-- when people have court times, so it's more administrative than street time these days.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	Being on days, come in in the morning, go through roll call. We're usually given information about what's happened since the last time our shift has gotten off. Go through. It tends to be a little slower in the morning, so we have time to maybe drive the beat, see if anyone's out. It's

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								typically pretty quiet. And then kind of wait for calls to roll in and if you're feeling proactive, pull cars over and stuff like that.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	For me, usually I come in to see who has court, check the sheets to see who's working, then we'll do roll call or we'll address the troops. A lot of times we'll get the information from our SDSC room that anything that happened or from the previous lieutenant that was working just to let officers who we're looking for, if there's been a crime pattern or something that has recently occurred. Afterwards, when I review arrest reports and then anything that the desk sergeant can't do, I've got to take care of. But in most part, the desk sergeant kind of runs the station and their assistant is the next level. And then if there's any use of force, we have to review and approve the TR-- they're called TRRs, Technical Response Supports. So if officer is using a type of force to document it, we have to make sure it was proper, and necessary, and reasonable.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: comms with dispatch] Mostly on the radio. Sometimes on the computer if they ask for it to not be put over the air, but they're doing a lot. So if they're in the middle of something, like they have a-- somebody has a pretty good scene, if I send them a message, they're not going to get to it right away. So for the most part, it's easier to talk to dispatch over the air.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: picture of person/vehicle of interest] It is because you get to see who-- what kind of a car it is or if there's any distinguishing marks. It's a lot easier to-- I think, give the picture description as opposed to just describing the person by words. Because, gray sweater, blue jeans might mean dark gray to me and acid-washed jeans, whereas opposed the other person-- everybody takes the description differently. So I think that the picture is probably the best thing, especially when there's people that are wanted now with everyone having-- a lot of them have video in their houses and stuff. So I mean, if they have a picture of the actual person that did burglary or that tried to break in, it's better to shoot that out because then you can see who you're looking for and you can reference back to it...

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	Some calls tend to have a little more information and it's as much as good as it is to have, sometimes going to a call and trying to read and drive at the same time. If It's a big block of text and you're trying to fish out the information you need, it can be a little difficult, especially if, for example, if they run a plate and they put all the plate information in, really all I'm concerned about is the plate number, the year and the make and that's about it. But then I have all this other stuff that I don't necessarily need at that moment.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: after roll call] We split off and I would say it's a pre-natural flow in and out whether it's to eat, use the washroom, maybe you need something on the computer, your computer's not working, or you can just-- you waited for the boss to come in, you need to talk to him. It's a pretty good flow, depending on how far that person's beat is from the station. So if somebody's beat is next to the station or in the-- it's easier for those particular individuals to go in, whereas if you're working the total opposite corner, it's not totally worth your time to make that drive.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: getting call info] It's radio and they'll throw it-- you'll get it on the computer pretty much simultaneously. If you don't have a computer, usually I ask them to repeat it, and you write it down on a piece of paper.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	...We have everything from the crimes that you see on TV, to the burglaries where someone's doors getting kicked in the back when they come home from work. So not only the people we serve diverse, but I think the crime that we have is also diverse compared to other districts.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	Like today, I thought I'd have a little bit slower of a day, pretty much right off the bat, we had a call that had me do a report. So right off the bat, I go to the call and I have to go type a report that puts me down for about 25 minutes. And it's after the interaction that we've had with the individual. So normally in the morning, especially since I am on days and that's our slow time in the day, that's when I go up and down the blocks and did somebody's car get hit overnight, is somebody passed out on the front lawn, that's my chance to look for stuff like that. And starting out early like today, it doesn't really give me the chance to go talk to the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								guy in the corner that's cleaning up his yard or something like that.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	The phones have the ability to pretty much do what you can do on the PCAD. I mean, if you want to pull up people's names, it's just-- the difficult part is you're staring at the phone like this trying to type information and there's multitude of lines, and you have to put your PC password each time you do the search. So it's kind of redundant in a way that it takes a lot of time. Even in the station, if I'm trying to run reports, if I run somebody's name and I've decided I'm looking at a different name, I have to again put in my PC password and fill in all the boxes. Some of them stay constant, but your password, you always have to enter.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: passwords] And there's ways of cheating. I cut and paste it, and I just paste it in each time but it's kind of-- you'd think that once you log in to the system, that would allow you to run anything as opposed to constantly having to enter it. And we have different systems. Like if you want to pull a case report, you have to go into the Clear system. If you want to look at people's names, you have to go to Data Warehouse. If you want to run somebody's name through like the Hot Desk or to see if they're clear or have a warrant, you have to go into a different screen, and again, log in, and run that... It can be the same login you have for everything but you have to log in to things separately.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	So you log in to the computer. If you want to get your email, you have to log in to your email. And then if you're going to do an arrest, to do anything, you have to log in to the Clear system. So a lot of repetitive things that would seem like they should be easier. With the way things are, you'd log in to one thing and as long as you log in to this program and says you're there, you should be able to do whatever you want.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	...you're just driving around your neighborhood waiting for somebody to tell you to go someplace. I try to stay moving. I prefer to not stay stationary for too long unless I'm having a snack. But I'm literally just-- I drive around and I run plates for the bulk of my day.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	I'll just snack every so often or usually, I'll go to the firehouse if I need to use the washroom. There's a handful of other businesses that I would go to in the district. But other than that, I'm usually on the move just pretty much waiting for calls. Or there's a handful of spots I do prefer to run traffic at. And if I have that beat or that sector that day, then I'll use those spots that I like to sit at.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: comms with other LE jurisdictions] ...My old department, I had my own radio and then I had three more radios in the car. So it was something-- [city] was on one, our fire department was on the other. And the other one was whatever we chose we wanted to listen into that night. So it was always an option for us to listen to [city] to know what was coming our way if it was going to come our way. But I think it's interesting that we don't really work with state even though state functions here.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: cell phone use] I use them mostly just-- I sign into the apps for ShotSpotter. I'll see if there's any shootings in the last 24 hours and where. Other than that, The [website], it's kind of like our homepage. We have access to it, but there's certain aspects that we can sign into and then there's other stuff that we can't sign into. So like I said, sometimes the station's the best place because everything's fair game there. Everything's going to work in there.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	If it's a longer report, I'll go into the station to write it. If it's something shorter, I'll usually go park at a park or something like that and write it there.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: report writing] It can be a little buggy sometimes. You'll have a signal and then it'll drop out. So you might be in the middle of a report, you go to update it or go to the next page and there goes your whole report [laughter]...And I already found that if you start it in the field and you save it and you go to open it in the station, it's not what you saved [laughter]. So I usually try-- if I'm going to do it in the station or the car, I do it 100% and then save.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: body cameras] I think they're not-- I'm newer to the district. Did they get them last year? So I've had it since about March. I think it's more of a-- it's not too conscious yet to say, "Okay, now I got to turn this on." Because you're used to hit the lights, "Okay, where am I going? What hundred block is that?" And sometimes you're figuring out your route and you're doing a lot of other things in your head and you get to the call and you're like, "Oh, I forgot." So I think it's still-- it'll eventually be in most officers just your natural thing to, "Oh, I'm going to a call, I turned it on." But it still has to be-- it has to get to that point. Time will fix that, but it's you push a button, it's really not that hard to use.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	When you turn your lights on to go to a call, the lights and sirens, your in-car camera automatically kicks on. So that's not even something you need to take care of, it just happens as you go to a call on its own. So, like I said, the body camera's a little bit more of a-- you have to physically remember that you have to turn it on.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: a single integrated device] It would be less equipment for the officers to sign out, to worry about, and if everything's-- because at this point, I mean, they're signing out [laughter] a radio, they're signing out-- a phone, a taser, their car keys, and then everything else that's on your vest. It makes it that 10 pounds of equipment is now 15 pounds and you have to make sure you don't lose anything because if you do, it's on you.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	I think, partially my generation, but definitely, the generation that's coming after me, we're more apt to text than make phone calls. And so I think we're not as good of communicators because of that. We're used to being able to plan out what we're saying before we send it and stuff like that. So that phone calls, sometimes you-- when I first came to the department, we had to start making notifications. I'm like, "Oh my God, I hate talking on the phone this much." It was just, it was something to even get used to, to be on the phone regularly.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	I'm more of an audio learner. So, even when I do read-- if I'm going to a call and something's on the PCAD, I tend to read it out loud to myself. Or if I do have a partner, somebody does read it out loud. Usually, the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								person not driving [laughter]... But I would say audio works better for me and of course, it's nice to reference though, "Were those pants black?" And you can look and of course, it's easy to look at the PCAD and read it.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	You know what, I think sometimes the shortfall is what the caller gives us. So, part one of the puzzle is the 911 call and if that starts very poorly, then it's that bad game of telephone just totally degrades by the time it gets to us in the car... Sometimes we'll get good descriptions right off the bat and that's way more helpful, but that's part of the equation that we cannot control. I think for the most part, people get updated, you can see who's on the scene, the dispatchers will update the tickets with information as it's given out. So I would say on our end, it gets updated and it's used very well.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[To the?] aspect like the radio communications that there's something going on. "Shots fired." Like, "We have an officer shot." Everybody tries to get on the radio at the same time. Sometimes the dispatcher just-- they have a hard time controlling the entire situation. The officers have a hard time not cutting each other out. So, like we had one officer that was shot while the other officer didn't know she was shot because they work in a pair. He took off chasing the guys. So, she's trying to come over the air saying she's shot while he's coming over the air saying he's chasing this person. Then people would step in, that, "I'm going. I'm going." Where then that person doesn't need to-- you just go. So some way of better controlling the airways when there is a critical incident.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	I came from a department and we had different technology on the computer. And we were a smaller department so it wasn't we didn't really need to worry about walking on each other, but if he got a call and I wanted to go on his call, I could put it in the computer-- we used 10 codes there. I would just put like 76 to blah-blah-blah's call. So I never had to go over the air to dispatch or [inaudible]. At least it was on the computer, which I think some people may be a little old school or worried about, "What if I get in a crash. I never said I was on the way to the 10-1, then I'm gonna be in trouble."

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	I think technology-wise, because you could really only say you're en route or on the scene, to call that the dispatcher has to physically put you on. I don't know if that's control they don't wanna give us or we can just go to any call on the board and say yeah, we're going, or we're not going. Or we're there or we're not there.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	I could look up the whole district but I can only say I'm going to or on scene for the call that I'm personally assigned to. If I want to jump onto a call, I have to go on the air and say, "I'm going to the call with this person." It's not something I could do on the computer.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	On the street, I preferred the radio as opposed to PDT just because you can hear it and you're still paying attention. If you're trying to read it off the screen, you're distracted, you're whatnot and-- if you have a partner, then you have no problem. But when you're alone, it'd be nice if the-- if you got a job and you could hit a button and it-- have the computer read whatever to you, like talk to text almost where it would just say, "Hey." That, I think, would be ideal for some officers especially-- even when you get older, it's harder to take the glasses off sometimes.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: CAD] I mean, the Troopers do take their Toughbooks out if they were to come into the station and process an arrest. We just leave it in there and would function off of a computer in the station.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	I do know just talking to firemen-- they might get a firehouse call. But if they get an update from us saying, "Yes, this is a bonafide fire," then they start rolling out more trucks. But initially, their response is slower until they know for sure that it's a fire. But then, it's usually too late, especially with the rate that houses burn these days.
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: FF] they can't navigate traffic as usually as we can. So we beat them there for the most part or we could see the smoke coming up to the call. But I think they do tend to wait for us to say, "Okay, this is what we have for sure."
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: calls stacking up] Well, if they stack you, they will. When you do multiple jobs. That will happen sometimes through afternoons and

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								midnights when there's a higher level of call for service. But the officers in their cars, at least before it was, they can't see what's pending or what's waiting. Only the dispatcher can and the supervisors can. So from the station, I can run and see how many calls for service we have waiting. Around the 4th of July, you get 3,000 calls of disturbances with fireworks. And we'll tell the dispatchers [not to?] call them unless there's a caller that wants to be seen because, literally, you can't handle-- you're going to be in a back log all day if you're--
Context_of_Work	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: integration of state criminal databases] Yeah. We're chasing information a lot as opposed to just having it laid out which would help make the day a lot easier.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	...I'm a sergeant over the FTOs, which means I am also a sergeant over the field training officers who train the probationary police officers that come out. I was an FTO before I was a sergeant, so that's how I wound up with that. And then a sergeant on the watch.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	I help others. I mentor other police officers. I mentor other people. For instance, yesterday, I was part of [local program]. So that was myself and maybe five other officers. There was kids from not just where we work, but from other locations, other districts, all the way from the south side, they were with us. Every week, we play games. We let them ask us questions. We ask them questions. They get to know us so that they can see that the police are people, too, and they don't have to be scared of us. And in the same way, they feel like they're heard because they tell us of their experiences. Yesterday was the last day. Pizza party. They ran around with our vests and played. So we did that...
Context_of_Work	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	...I arrest people who break the law. I enforce traffic violations. I help officers learn their job, learn exactly what it is they're supposed to do. I am like a teacher. I proofread reports. Proofread lots of reports, make sure that in the reports, that there is enough information-- that the information in the report is the same with the UCR code, which is the uniform crime report, to make sure everything matches. I make sure their arrests have probable cause to go with the arrest. I make sure the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								case report and the arrest report all tell the same story. So we're also like storytellers.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	when the ShotSpotter goes off, we go over the areas that spotter detects the shots. And we call it out. And then we see if there's somebody shot, and we dispatch officers there immediately. I have HunchLab. So with that, I help deploy. I assign our overtime cars from the Violence Reduction Initiative. So we determine where we need the extra resources, where our regular beat cars in the district don't-- aren't able to always cover. So where there's a high propensity for violence. So we will put the extra overtime cars there. So I do that when I get to work also...
Context_of_Work	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	...We also have a meeting, and it consists of the commander and all the other bosses. And we go over any violence, any shootings, any robberies from the night before to make sure everybody has the same information. There's a PowerPoint slide. We send it out to all of the officers on the watch on all three watches, the TAG team, any other outside unit who needs it. We do that. I make sure that the probationary police officers feel comfortable with their FTOs. If they have any questions, they can come and talk to me. They can come ask me questions when they're not with their FTO. If they're scared to ask their FTO or if they have any comments, cares, concerns, they can come to me just like anybody else on the watch. So there's probably some other stuff but I can't remember.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	I get to work approximately a quarter to 1:00, maybe 12:30. I get there and we go over what is called a daily brief. And I get ready for the meeting that we have with the commander, other bosses, other sergeants, other units. Take notes during that meeting. And then anything that needs to be updated gets updated on the PowerPoint slide. Any new information gets disseminated. And then at 2 o'clock we may address roll call. If there's any new information, if there's any officer safety alerts, we will go down there and do that. We will print out the HunchLab map for that day. It changes at 2 o'clock. We'll print it out...
Context_of_Work	LE	U	Field	36-45	11-20	Female	LE-U-026	...I will then go to the VRI office, which is the Violent Reduction Initiative,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					and will ask them how many cars are detailed to the [district name]. They will tell me how many cars. I will go upstairs myself if the [special information officer], if he is there. We will place the cars strategically where we're expecting violence. And then I will type out all of the HunchLab boxes that they are going to be into. And then I will mail it to everybody that needs to be mailed. And then I will go and bring it- bring the maps downstairs. They don't have a color printer. We do. So I have to go down there and go give it to him. I will go over it with him, see if there's any questions they have, and then I will go back upstairs...
Context_of_Work	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	...From there, I will then approve and look over all of the daily observation reports that all of the FTOs do for all of their PPOs. Meanwhile, while all of this is going on, if there is a person shot I will have to do the report for that. I will have to find out who was shot, where they're shot, the location. I will have to make some notifications. I will then have to find if there is a gang conflict, who they're in conflict with, and then send that report out to my commander and everybody above him. And then every other task that would come out...
Context_of_Work	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	...We will do [surveillance camera] missions. So we will watch the [surveillance camera] Devices. And if we have any arrests I have to create missions for all of this. We do at least two a day. And I'll assist the officers with the arrest if they've never done a [surveillance camera] arrest before. And pretty much if anybody has any information then they will come in...
Context_of_Work	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	[RE: patrol officers] They have work cell phones. The work cell phone, they check in and out with their radio and car keys every day.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	[RE: patrol officers] They get calls for everything. They get calls for, "I no longer want my child anymore." "My child is misbehaving." "My neighbor's watering the grass." "There's a person shot." "There's--"
Context_of_Work	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	[RE: dispatch via radio and PDT] Well, we need both. It comes over the air, so then if another unit is nearby they can go and assist you. Other units listen to the radio. But it's nice to see it in case there's a lot of radio

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								traffic. I can read what the dispatcher said, so you don't have to ask them to repeat it. Another unit is calling for help or they're chasing somebody, it's on your PDT so you can read the information.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	[RE: patrol officers] Lots of information comes through the PDT. They can look up criminal history. They can read the daily bulletin. They can read stuff on the wire. They can inventory things from the car.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	[RE: patrol officers] They can write their report in their car. Everything that's on the computer in the district is on that computer if they have a new computer. If they have an older one, they don't.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	[RE: station life] There's the desk officers. So there's the desk, people come in, people need reports, people need help, people complain. At the same time the desk sergeant is there, he's approving case reports, he's approving arrest reports, he's approving inventories, he's going to lockup to check on the prisoners, he's sending out emails if there's a person shot, and anything else the lieutenant might need him to do. I'm off to the side. I'm in this information center and I'm in there with two other officers.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	I know a lot of people in the community. I'm just a text message away from some of them... I was a patrolman and, yeah, that's how I met them. Some people would meet me in the back of an alley to give me keys to an apartment building so I could catch drug dealers. Some people will email me and tell me what's going on. They still call and text.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	Well, I can go in a squad car and leave and go outside if I needed to. Like yesterday, I was outside for a little bit. I work overtime a few times a month. So I just go outside, and they'll see me. The bad guys will see me. Some of the bad guys I have known for a while. So they'll address me as [alias]. The bad guys will even say things like, "Oh, you're outside today." They're like, "Nobody cares about us anymore. Nobody tells us to get off the corner." And they'll snitch on their rival gang members, and I appreciate it.
Context_of_Work	LE	U	Field	36-45	11-20	Female	LE-U-026	[RE: mobile fingerprinting] Well, we don't use that. The evidence

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					technicians can fingerprint them, and then you take the prints down to Ident. So if mobile is we're moving the memory card with, yes [laughter].
Context_of_Work	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	[RE: calls] Oh, they can queue up. We even have a-- it's called a RAP, Radio Assignments Pending. So the entire district will be in a RAP on occasion because there will be so many calls for service... Supervisors can see all of the calls waiting. There is a way to look on the computer. Regular patrolmen cannot see this the way that sergeants see this. However, there is a way to look on the computer to see it. Not all of them know how. It's not easy. It's almost like an Easter egg on the iPhone, sort of like you might sort of kind of know how to do it.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	[RE: patrol officers] They'll see that call and any other calls that they were assigned. They will not see any calls that are waiting to be dispatched... So they can have a dead body waiting at the hospital. They can have a domestic. They could have a noise disturbance and a kid bit by a dog. They can have all of that waiting because it's assigned to them, but they may not see that there was, let's say, a call on the next block or that just hasn't been assigned yet.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	We actually went, in my office, on my watch, went and wrote down every vacant lot that was in the [district] that was owned by the [city] and sent that out to all of the officers so that they would know that that was a city lot. It took many days, many lots. That is information that they wanted, that they needed, but we only did it for the vacant lots that the city owns.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	[RE: work cell phones] I don't think they've made a whole lot of difference. I mean, they have HunchLab on them so that makes it easier for the officers. If we could get that on the PDT, they wouldn't need one more thing to take out. ShotSpotter is on the PDT. So I think it would depend if you had a PDT in your car or not. Because if you have the cell phone, event numbers, stuff shows up on there. It would work very well for, let's say-- some things work well for bike officers. Like if you could get the phone to run a name on there, if you had access to leads on the phone, that would be great for people who are on the bicycle. Because they don't have a PDT, they have to run everything over the air. So some

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								things could be used for-- they're a great technology, but if you have a PDT some of it is the same technology.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	Well, with us having the SDSC room they have a place to give us their information. Somebody said, "Hey, I have all these lots. I don't know who owns them." They won't have time during their shift to figure all of this out. So they're able to just to send it to me and then that's stuff I can do in the room for them, other places without this or without a sergeant or without somebody for them to go to to help them get this information.
Context_of_Work	LE	U	Field Responder	26-35	6-10	Male	LE-U-023	We enforce the laws of the land in order to maintain peace and order. That's a very simple--
Context_of_Work	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	Well, that's a tough one because it incorporates so many different aspects. You go from helping people with calls for service to arresting people, doing clerical work. It incorporates a lot of different job titles. I would say when kids think about it and like, "Do you shoot anybody or anything like that [laughter]?" it's not always it. But it's like on a typical day, you could go from handling a man with a gun down call the street to go on to a school for a child that hurt themselves, to seeing kids playing on the park, and you go out there toss the ball around or anything like that. There's so much you could say.
Context_of_Work	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	That's what I like about the job. I have had other jobs in the past and I sat in an office once, I didn't like. I like being out and about. I like not having the same thing to do day by day. So that's the thing with being a police officer. You never know really what to expect the day that you go to work. It can be a slow day with really nothing going on, or it can be a busy day where it's just out of control. That's what I like about it.
Context_of_Work	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	Yeah. Just in case you come across it. But the lieutenant can tell you something, and as soon as he hits the streets, it might be in one ear, out the other, which happens quite a bit especially-- our district is pretty violent. We're on the--
Context_of_Work	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	Well, yeah. It's the lieutenant standing at the podium with the-- they call it the-- I can't even think what it's called. We call it the book, but the roll call

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								book. And the roll call book, it's a giant binder from any type of information brought from the commander's office, and they post it in the book to be read at roll call, like you've got restrictive time due, if there's openings in other districts, if there's-- I don't want to say important stuff, but stuff that maybe the average officer who's not computer literate, who doesn't go every day, check their emails, doesn't log on to a computer just to see what's happening in the district, that's more or less the old school way of doing things.
Context_of_Work	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	Yeah, I think so. Because even with your personal phone, and I'm not going to lie, every police officer uses their personal phones. But a lot of the times it's where you going to park and access this information. I would say that the station is more controlled and you're safe there, whereas being out on the streets-- you see, everybody sees the squad car. Okay. You can't see everybody looking at you. I think that's a big thing in every police officers mind is, "Who's looking at me?" Well, they're not, they're just, "Oh, this guy's on his phone all day." That's the prime example. You're here looking at them and they're all on their phone or they don't do nothing. Is that good for community relations, always looking down? But that's the thing. For me, no, I don't have a problem accessing that information. Okay. But I could see other officers, yeah that's a big issue.
Context_of_Work	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	Well, it all depends. What do you feel like doing? I mean, there's problem areas that you could drive by, see what's out there if you want to take protective steps to stopping people. That's always a good thing. But if you're doing that you basically got to call your co-worker and say, "I'm going to try to put a stop on these guys." Or at least let the dispatcher know what you're going to do. I mean, they give you a set of keys and say, "What do you want to do today?" But I see the trend now. I think police are getting more and more restrictive on what they can and can't do. I think what their stopping first, policy and with the contact card, I guess are they call them now, that I think a lot of officers are like-- I said, it's more paper work to do something like that. Back in the day, you see

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								some guy standing in the car, you know he's got drugs. You know he's selling drugs. You'd stop him or you'd run this and that. Now I think police officers are-- myself included, are more hesitant to want to stop that guy, just because of the policies coming down on you such as why'd you need to act on it now? That's the keyword, an act on furtherance. What's your justification for stopping that person now? I mean, I think it's still the same thing. I think now, you just have to justify it on paper. I think that's what a lot of police officers have that issue. Like you said, more work, more work. So why do I want to do more work and more paper work just to do the same thing I've been doing?
Context_of_Work	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	Yeah. So if you have an irate mental who needs to really go to the hospital, chances are the ambulance is really coming whether or not you tell them, "Yeah. This guy's really acting up. Let the ambulance know." And vice versa, telling the hospital we're coming in with a mental or whatever. I think that's the biggest thing with us and the fire department is people with mental problems because that's when somebody could get hurt. So usually anytime there's a call for service for that, they're usually requesting police presence. And so we already know what's going to happen. So they're all pretty good. I think they're a little bit more-- I don't want to say archaic, but you've got to remind the ambulance and remind CFD, in general, "Hey. We've got body cameras now. Watch and say what you do." I think that brings a little bit more integrity to everybody.
Context_of_Work	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	I would describe it as an administrative police function. Basically I'm in charge of operations of a Sheriff's department. So my job is primarily administrative and the operation on a day to day basis of a small law enforcement agency.
Context_of_Work	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	As the [Job title] I oversee a team of three and so we're also a small department and my responsibilities include everything from security to procurement to design and implementation and overseeing subsets of all of those systems
Context_of_Work	LE	R	Not	46-55	Not	Male	LE-R-042	It kind of depends on the week but generally speaking it's management

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			specified		specified			of our staff and supervision. I do spend a lot of time in kind of a day to day personnel issues. I certainly have a daily budget type topics as far as managing and overseeing a budget. There's a lot of day to day functions with operation of our jail. I'm trying to think of some more specifically it seems like it is putting out a lot of fires all day but I think primarily the supervision of employees, the operation of a jail and a patrol function. We also have a civil process for me up staff that process all of our civil processes within the county. I'm trying to think what else. A lot of other things but those are kind of the main ones.
Context_of_Work	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	Yeah that's what's interesting about it is yeah it's kind of different from day to day. There are a lot of tasks that you perform daily as well.
Context_of_Work	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	On a day to day basis managing customer requests helping fulfill those, monitoring and managing different systems within our networks. We're also looking at new technology, monitoring where things are moving and whether or not they benefit us to at least look at implementing those or how we might integrate those into our current systems and departmental management and claims and policy management and just the various aspects as well as managing staff and helping them be successful.
Context_of_Work	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	Well I think one of the big things not necessarily with me routinely but you know we obviously have a 700 megahertz radio system. That's certainly part of my daily routine as monitoring the radio. Certainly speak on the telephone a lot, cell phone and land line fielding citizen's requests or complaints via telephone and email primarily. We do have a fairly good social media presence with our Facebook page which I'm one of the administrators on. We do have a staff member that primarily handles the social media but and certainly communications in person daily with our staff and that's about it.
Context_of_Work	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	So I'm communicating primarily with customers and a lot of those customers are departmental heads or elective officials and so a lot of the requests that I receive are high level. The majority of my requests are going to come in via email whether that's through a ticketing system

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								or direct communications. I spend a fair amount of time on telephones as well both land and cell lines and other than that's about it you know.
Context_of_Work	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	[RE: video data storage quota] We are challenged and the retention period that we would like to have is not currently what we have and so that's always a challenge to make sure that that information is being archived correctly and deleted on a basis that is not rolling off the back. But allow that information to roll there's someone in the building here that's tasked with managing that, archiving everything that is of value that gets tasked by the individual officer's valuable, individual officer takes that information whether it's from the detention center, the recording systems down in the investigative interview rooms or from the officer's body cams or vehicles so the individuals are tasked with making sure that information gets moved into records management and then there's an overarching position that manages the retention and the archiving and the deletion of that information that is in someone's garage for 6 hours in the middle of the night when their camera didn't shut off.
Context_of_Work	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	Well we have a body worn camera and we have an in car camera system so the in car system is mounted in the vehicle permanently when the officers so they do have to activate their body cameras. I think the in car cameras can be operated manually or when they turn on their lights they'll automatically come on and I think there's a Wi-Fi type network so when they do pull back into the office they'll automatically download onto the server or to the storage device. I think they can also manually upload or download the information to the server but so far it's been very positive. It's something that we saw it as a trend nationally. In order to protect the citizens and our deputies I think it's a very positive thing...
Context_of_Work	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	They are. Yeah they're tightly integrated so when an officer calls in and needs something to tag that to call for service that number is generated within records management system and so that number that CFS will follow that incident throughout the life of it whether it ends up at Supreme Court or not. It's all tied directly into and starts with the records

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								management system so when the dispatcher issues that it comes out of records management and creates that and starts it once it comes back into the office and they login to RMS it's there and they can start adding notes, entering evidence and do whatever they need to do.
Context_of_Work	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	[RE: RMS access from MDT] They can access the RMS yeah. It's mostly a text driven system or they're inputting various pieces of information whether it's referencing photos that they've taken or recordings that they've handheld, voice recorders that they've used so all of that is difficult to do in a vehicle and I think most of their time is spent rolling as opposed to sitting staffing information so they can access it via the VPN technology that we have in the mobiles but it's of limited use. I think mostly your supervisory staff is accessing those records so that when they have a 15 minute break they can go they can review other officer's notes, approve those and keep the process flowing.
Context_of_Work	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	I do know some officers not just in this agency but other agencies you utilize an app that can tie to a limited degree into the CAD system and so they can get some notifications not via text it's the flat file and they're receiving limited information there and so it's not something that I utilize but I do know some officers and some first responders have that app...
Context_of_Work	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	...There's a couple of them and I can't remember which one they decided was the most useful. As far as my cell phone goes very little of what I do on a day to day basis happens on here. I'm monitoring emails, my calendar is a big deal on here so when you need to go talk to somebody about something but I don't have any specific apps. I do have VPN technology available here but I find it challenging with such a small screen to manage or serve effectively without accidentally rebooting it or changing something. So I'm very limited this is mostly notification (00:31:31) device for me to monitor. I don't even like sending emails from me because they're terse and quick and to the point and so I prefer to keep this device most of the time.
Context_of_Work	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	I think too one of the other apps I know there's an app like GIS so I know some of our officers use it for mapping. I have it but I have not figured

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								out how to use it but I have seen like the fire department and a couple of our deputies like if they're looking for an address and they're confused on like which house is it they'll go to their app and it ties into the GIS mapping through the county and I've seen it be pretty handy I just haven't figured out how to use it yet.
Context_of_Work	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	Yeah I think for our average employee that's out in the field they're constantly seeking information certainly through the communication center and the communication center gets it from the CAD and RMS and other data bases and eyelets and the blogger.
Context_of_Work	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	The blogger is a running tabulation of not just calls for service but also contacts and things of interest so that when officers move to a new shift they can look back at that blogger they can see it from both the vehicle and from desktops with this facility and so one of the things that I see as a constant float information back and forth mostly between supervisor and command staff is the checks and balances built into the records management system and even the crash investigation software...
Context_of_Work	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	...So the officers are entering information the supervisor is looking at that information and approving it, that information is going to the RMS administrator, she's viewing that information and approving that, that information is going back to the officer for final approval and getting pushed up to the feds. So there's constant electronic communication back and forth as far as checks and balances and making sure the information is accurate and it all flows very well and I'm always impressed at how much information is back and forth and not just via email but via these systems that the officers are using to maintain data.
Context_of_Work	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	I mean I think that on a daily basis. I mean that not only just with technology I mean certainly the state operates the eyelet system which is a law enforcement database for criminal histories and driving records and vehicle registrations you know all types of vehicle registrations boats, planes and so I think that's a constant daily hourly thing. I think I can't think of you know there's probably tons of other things. You

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								mentioned like the fingerprint system and like anytime someone's booked in the jail their fingerprints are transmitted electronically to the state. There's tons more.
Context_of_Work	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	I know the probation department has systems and they work directly with the juvenile offenders, the correctional institutions, the prosecutors are constantly working with different agencies throughout the state. We're tied into hub and spoke network with the [State] Supreme Court and so there's a centralized brand new system in the State of [State] where the Supreme Court has servers both at each county and also centrally located and so there's constant communication, probation prosecutors, public defenders and defense attorneys are all tied into that system as well. And so that information is funneling from law enforcement to the prosecutor's office to the courts to probation and it all ties in seamlessly...
Context_of_Work	LE	R	Other Public Safety Personnel	36-45	6-10	Male	LE-R-043	Well I have basically a few jobs right? So the first half of the job the GIS I just tell people I make maps which is very simplistic but that's just kind of the easiest way to describe what I do rather than get into the weeds and then their eyes glaze over. The other part when people ask me I just tell them I'm an [Job title] and so you know I a lot of times I use the description just say you know they'll be like what does that person do and I'll just say well I coordinate you know the different emergency services during a disaster.
Context_of_Work	LE	R	Other Public Safety Personnel	36-45	6-10	Male	LE-R-043	... There's a lot of I mean the other part about my job I would explain is that I'm finding out more because I've only been in that part of that position for about 6 months now is that there's a lot of just planning. Like emergency managers do a lot of planning and then you know when disaster does occur then they finally go out there and coordinate if need be. But hopefully you planned well enough that you don't need to do much. So it's more you train as an emergency manager you're trying to do much of it beforehand.
Context_of_Work	LE	R	Other Public	36-45	6-10	Male	LE-R-043	Yes exactly. So yeah and then like I said yeah with the GIS stuff obviously if I really wanted to get technical with it kind of like I do with

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Safety Personnel					the disaster services part of it is you know I maintain the geographic information data for the county's 911 system. So I update parcels, I update roads, address points, landmarks, hydrants any geographical database that we can use within different web apps and within the CAD system.
Context_of_Work	LE	R	Other Public Safety Personnel	36-45	6-10	Male	LE-R-043	<p>You know it just varies from day to day. I mean obviously I guess you'd come in and you check your emails see if there's anything you missed over the course of the night that any kind of situations you need to deal with and then you kind of take starting doing what you left off with the day before whether it's you know maybe I was updating much parcels. I'm starting the day off with small parcels.</p> <p>You kind of what's the word I'm looking for continual list of to do's and so depending on what those to do's are and how active they are and how high priority they are you do those different activities so at any give point you know I'm going to a meeting to discuss planning for the next disaster or next event or discussing like recently you know going to talk about grant applications that we're going to be doing or talk about you know like this summer just talking about updates on the flooding that we had or the updates on the planning that we did for the eclipse to the commissioners and then once again more of the GIS so updating some GIS stuff whatever comes in and needs to be updated so it's kind of hard I mean it's there's not a lot of days that are similar.</p> <p>How's that? Because you know some days it's a lot, somedays it's all meetings, someday like you know you're off doing training for whatever especially since I just started the position I've been doing a lot of training with the emergency management side or even you know webinars for the GIS for the technology you know for that stuff so software updates and things so yeah I don't know. Webinars, updating data, updating plans, going to meetings, eating lunch.</p>
Context_of_Work	LE	R	Other Public	36-45	6-10	Male	LE-R-043	Yeah so I monitor I have a multiband radio and so I monitor the various frequencies throughout the county and then I have the smartphone and

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Safety Personnel					yeah a computer and that's about it.
Context_of_Work	LE	R	Other Public Safety Personnel	36-45	6-10	Male	LE-R-043	Right. I mean I guess so I used to be the [Job title] also. I recently relinquished that role to somebody else so I mean I don't know you just need to know what needs to be updated right so you need to know what's not working and what needs to be changed, you need to know what people are requesting so yeah I mean communicating their needs and desires and that's what I get from when people call, email or whatever and just say I need this fixed, I need this done, I need this plan and then you make that plan, make that change, make that edit and off you go.
Context_of_Work	LE	R	Other Public Safety Personnel	36-45	6-10	Male	LE-R-043	I don't know. It's the same. It's database management right? Like if you want to really get to the base of what I do it's database management right? I'm a data analyst, I'm data entry, data analyst. Not even analyst more just data entry so it's the same thing it's just rather than creating an x, y coordinate for it you're just creating a table you know it just doesn't have an x, y associated with a unit or an officer or a resource you're just updating a database.
Context_of_Work	LE	R	Other Public Safety Personnel	36-45	6-10	Male	LE-R-043	So it's just more work right? So I guess I don't miss it because now I have less work to do but I got more work actually yeah right. I gave up that in exchange for being the [Job title] and of course then we had all these disasters and other things so I created myself a lot of more work. Yeah it was a lot easier being just the [Job title] as far as the level of work but I also got bored let's face it so this has been a lot more interesting.
Context_of_Work	LE	R	Other Public Safety Personnel	36-45	6-10	Male	LE-R-043	I don't know. I don't know if there's anything that's really the one thing that I would state I guess is that anything that occurs here, any problems that are here, any good things that are here are not anything unusual that you don't see anywhere else. I don't think our problems or our successes are unique and that might really bother some people because they might think that we have unique problems but you know we really don't. You know technology is pretty endemic in everything we

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								do everywhere with everybody which are Amish and even they have technology. It may not be electronic but they still have technology. I mean you know the Egyptians would think the Amish people are pretty advanced.
Context_of_Work	LE	R	Other Public Safety Personnel	36-45	6-10	Male	LE-R-043	Well I'm doing it poorly so I probably won't give you the right answers and I know there's no right answers but anyways you know I'm talking mostly amongst the first responders here, the county commissioners and the State of [State] and so I'm more of a liaison between the State of [State] and the local responders as we go through this. My work with the local responders would be more the you know the emergency operation plan, the EOP they call it in developing that, developing your all hazard mitigation plan.
Context_of_Work	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	I am a [Job title].
Context_of_Work	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	You know it varies. We do a lot of grant work so it's generally around 40 to 60 hours a month depending on the needs.
Context_of_Work	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	So we begin with our pre-vehicle inspections it's the first thing we do because that's obviously our kind of our lifeline that's how I look at it with the first thing I do is walk around the vehicle and check it out and make sure tires are aired up, I'll kick my emergency lights on and make sure everything is working in case I need them you know and then we just do a general safety check of inside the vehicle and make sure I have my patrol rights and my shotgun, make sure all my duty gear is good to go, make sure my radios are charged and I'll do an internal check of the vehicle, make sure my modem's kicking on, we have MDT's, make sure my laptop or my MDT is working properly and then from there I login and then I'm ready to start accepting calls for service at that point and from there you never know what you're going to get.
Context_of_Work	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	It can be slow we've have not very often we have shifts where literally for and our shifts are ten hours where we have not a single call for service at all and then we have shifts that it's just back to back to back and

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								we're overrun so it really just depends so we carry a wide array of products and technology and tools in our vehicles because we don't really know what we're going to get into.
Context_of_Work	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	So the way that we work is we have groups of people assigned to vehicles so I'm not the only person that uses it but I'm assigned to the vehicle and I lose custody of it when I'm done so I turn it back in when I'm done and therefore when I start the shift I have to go through everything such as checking the backseat to see if anybody that was arrested left any dope or anything behind in the vehicle so I kind of have to re-I don't want to say certify but I have to go through it in my own mind each time and make sure that it's good to go. Some of our guys are assigned the same vehicle and they don't go through that procedure every time as far as the extensive internal check because it's there vehicle and they're the only ones in and out of it.
Context_of_Work	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	The primary function of the office we call it the office so the way that our office is set up is we don't have a separate office for just patrol or anything like that so the entire Sheriff's office is housed out of one location. It's also the courthouse and the jail and the DMV and you know our commissioner's office and all that. We have our own areas but all of the county services are in one location, a centralized location now that happens to be within the city. And I work for the county so we drive into the city and we have a large area that we patrol so when we get to the office sometimes during the day during what we call admin hours or administrative the DMV is open and stuff like that it can be kind of chaotic and our patrol room is a room similar to this maybe a little bit bigger and it's got several work stations where we'll go and type reports and stuff like that.
Context_of_Work	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	On an average day I probably spend 60 to 75% of the time in the field and as little time as possible in the office. It's really just an admin function if we need supplies or ticket books or forms or something like that we kind of go restock there but we really spend a lot of our time if not most of our time in our vehicles. The exception to that rule is

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								because we also serve civil papers in our county and because of that we have to go to the office and check the civil paper box to see if there's stuff that we need to go serve.
Context_of_Work	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	... All of our reports get typed but then we there's no electronic admission process so we type the report and then we print out copies, copies, copies, copies. One goes to the prosecutor and one goes to the detective, one goes here so we eat up a lot of paper.
Context_of_Work	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	...It's a civil matter so that kind of information on past events will help us solve the issue quicker and especially where they're trying to manipulate law enforcement on civil issues to see who they can get. Maybe they can get the new guy who doesn't necessarily know and they'll get him to actually write it and give it to the prosecutor. That kind of stuff is helpful. The other thing that plays against us that I wish I knew more is and it's hard to do some of it but criminal history before we're dealing with people so knowing a little bit more I mentioned the vehicle walk up to the vehicle and know if the vehicle is stolen. Knowing just a little bit about the vehicle before I get there and then the same thing with the people. A lot of times you got to do a lot of digging to get to incidents even in our system, our local database you know you kind of know who the players are in the valley but there's always new guys coming and going and that information across state lines that we have locally in our database does not go anywhere except for local.
Context_of_Work	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S2] Well the street crimes unit is a newly developed unit. There's only four of us in the department. What we do we're more directly involved with the community. We go off tips I'm sorry tips off tips basically anonymous tips, we work closely with [abbreviation] and other groups inside of [town] and if there's a specific problem they need dealt with they call us so we'll go out we'll do surveillance, we'll try and hit a certain neighborhood really in order to detour the crime from happening there.
Context_of_Work	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S3] Well I'm part of the uniform services in [town] which we take our basic calls from domestics to animals running at large to everything for this. Like I said for the most part our SWAT team which special weapons

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								and tactics. You know we get called to serve high rescue warrant such as people with firearms or drug warrants and stuff like that but outside of that I don't have as much interaction with the community as he does because they talk to a lot more people whereas we get sent to calls you know between 9 p.m. and 7 a.m.
Context_of_Work	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S3] It's never the same call. You know you can go on four or five domestic calls a night and they're all going to be different you know one can just be yeah we drank a little bit, we argued a little bit that's it. You know the next you go on it could be running lights and sirens doing a hundred miles an hour you know kicking in a door and walk in and seeing someone physically assaulting their wife or husband and it gets to the point where it can be pretty wrecked. There's so many different situations that we walk into that a lot of people don't see and they also don't know how to see that through our eyes because they've never dealt with that. There's so many different situations.
Context_of_Work	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S3] ...We're there as mediators more or less, we diffuse situations and then we just try and get everybody's side of things and we make our decision based on the evidence that we've been able to gather. If the evidence isn't there and we make a decision that somebody doesn't like they're going to go all over social media and just dog us or absolutely nothing for just going off of what we have. Investigations for the most part are ongoing. It's not just an open and close case. Sometimes they can take a week, sometimes 2 weeks, sometimes they take towards a year. It's just people want we have to look for everybody that's possibly seen something so without that kind of without knowing what we're seeing and looking through our eyes they're developing these blind perceptions and making their opinion based off of that.
Context_of_Work	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S2] I used to on in the [Job Title]. I would have my we have certain zones that we have to patrol so whenever you're given that certain assigned zone and a lot of officers like to be put in the same zone that way they establish a rapport with that particular part of the neighborhood. That way his presence is known they know okay he's on

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								duty we kind of need to calm down and we developed on our own little routes that we like to take, there are certain houses that we like to make sure we pass, we also have to go based on our watch list and make sure that we go by those areas that people have requested additional patrols for certain reasons. Other than that like Officer (INAUDIBLE 00:08:34) no call is the same so it's really hard to get into a routine. The only routine you can get into is your traffic patterns while you're doing your self-initiated stuff.
Context_of_Work	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S3] ...We work with the narcotics division, we work with the detective's division, we work with uniformed services, anything or anyone they need us to track down, we also work with community groups so anything that we're asked to do we put that in a priority as far as if it's a felony warrant for like \$500,000 bond for bad crimes such as homicide, rape stuff like that priority one then we'll go into drug activity, warrant services stuff like that and then go from there.
Context_of_Work	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S2] We have to store them. Our IT department they're responsible for the storage and upkeep basically the officer will have to make sure that their camera is on and before they go home they upload it to the computer, they have to classify it based on if there's a call for service what kind of call it was things like that very basic stuff but it can add quite a bit of time because for the most part the upload time is the real time. It's like minute for minute type thing almost maybe 50% or 40% faster so if you have I think the longest recording I have was probably about 3 hours which it breaks it up into thirty minute intervals but it took almost 2 ½ or 3 hours for that one video to upload then I had 10 other ones that I had to upload so the upload speed is absolutely horrible and then our IT department makes sure that that's I think don't quote me on it but I'm pretty sure it has its own server just for the body cam because there's so many and they're so big because I think based on the resolution I think your average video is going to be almost probably 10 megabytes? Ten to twenty per video?
Context_of_Work	LE	R	Field	26-35	6-10	Female	LE-R-046	We spend a lot of time in our cars so it's a lot of alone time I guess I'd

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					say. I'd say it's rewarding in that people generally support us not everybody we get our bad comments too but generally I think people support us and we've got a good rapport with the community and so yeah there's it's not real busy, it's not real we don't have a whole lot of crime here but we do need to try our best to keep people safe given everything they do.
Context_of_Work	LE	R	Field Responder	26-35	6-10	Female	LE-R-046	We start out the shift and we're talking to the folks who are coming off shift. We're seeing what was going on. We'll generally have at least a little bit of time in the department in the station there and go out we check our car, we check our equipment then we're out on the road and most of us we've got our kind of patterns where we go when we're out there but and then we're just patrolling until we get a call and if we get a call then we'll go someplace specific yeah and but otherwise we're just driving around trying to make sure people are feeling safe and feeling okay about what they're doing. So that's generally what we're doing when we're out there.
Context_of_Work	LE	R	Field Responder	26-35	6-10	Female	LE-R-046	... We start the morning there we end the afternoon there. It's fine. If dispatch is there we usually come in. We're joking with them usually. We'll run over what happened during the day, we'll talk about maybe what didn't get done, if something didn't get done for some reason so the evening shift can look at that take that on you know but not much. If we've had something going on during the day we might have to be writing a report or finishing something up but that's really pretty rare really.
Context_of_Work	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	You basically your job is to make sure that there's a safe environment in the community for others to grow up in and that's you do that through crime prevention, education, making connections with the community and you create an environment. A lot of times in the past people see law enforcement as something that is a cause and effect. You have a crime, you have a punishment. One thing I do is I try to get ahead of that with technology. I actually use Facebook a lot. I put out when we're doing road checks. I'll put out when we're doing speed enforcement in certain

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								areas and people ask why we do that you're not going to check them. We're not checking them because they're not doing it. The whole point is prevent the crime not catch the crime and so to me a lot of it is basically you're looking out for the welfare of your community and everything that that entails. It's not just about criminals this is preventing people from becoming criminals and that's through education and kids and things like that and also when you do have crimes and stuff make sure you take care of that, make sure you have people who are professional, respectful and love the community and you're basically a shepherd for this community.
Context_of_Work	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	I'll go out and write tickets. This last weekend I wrote 29 tickets this weekend myself personally as [Job title] and all my guys work you know if you have a badge and a gun you ain't no better than anybody else everybody can work but the other thing is how you do it and we'll use (INAUDIBLE 00:03:20) patrols to really raise awareness and put something on Facebook saying hey you know we had one place it was next to an elderly community and people were having trouble getting out in the road because people were speeding.
Context_of_Work	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	If you have people doing 80 miles an hour and there's a lot of agricultural people down that road you have a cattle trailer that's 40 feet pull out into a road that's a 4 lane and somebody comes down a hill at 80 miles an hour that's going to be a bad day so people need to slow down through there because there is this issue that you see here. It's not the fact that you can drive straight down the road it's the other stuff that interferes with your path and people don't think about that. They go I never thought about that. You explain it to people they get it so I forgot what the question was now.
Context_of_Work	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	... When we start looking at the areas where we have a lot of thefts we'll start pulling people on that area and just keep our eyes open and see who is moving around and a lot of times people won't bother to call and telling you but when they get stopped for a traffic infraction they want to help you out and tell you who is doing what so we got a lot of great

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								information off that but overall we have some really good people here, really good school systems.
Context_of_Work	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	They do. I don't so much because I work all the time. It's not unusual for me to go 3 or 4 weeks and not have a day off. You know I might not I'll come in some days and stay 4 hours, I'll come in some days and be here 16 hours you know what it needs. They'll just come in we have our civil papers back here, they get civil papers and make sure and serve those or any subpoenas and each one decides one each shift to serve those. Each deputy has their own routine I guess before they go in. Have a few places to eat, most of them like to eat at a certain place, we actually encourage people to if you have kids we let them bring the kids to school in cars and stuff.
Context_of_Work	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	We have kids that come in after school. If the deputy doesn't have anybody at home we have some single parents and stuff their kids can come here and we'll put them on the computer and let them do homework and let them hang out here after school so we try to be really, really inclusive a family environment here. On any given day looking at the numbers for our call volume if you look at call volume with the proper relief schedule we should have eighteen deputies. We're only slated for 12. We actually right now only have eight so we're kind of running. These deputies come and run, run, run.
Context_of_Work	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	That's the way I put it to them but you can't really get into a routine here because you don't know what that's kind of the excitement of being in law enforcement. You know you don't have a routine. I think if anybody it's the detectives probably have more routine than anybody because they come in, they look at the case load, they look at what they want to do today, they set it up, they are more able to proactively setup their schedule for the day. Whereas the [Job title] is you know I might go out here and plan on doing this but also I have this, this and this jump off and now and we're trying to do some other things right now with that too where the costs are so rural we're trying to get all the deputies and first responders certified. The previous administration's philosophy was if

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								somebody was hurt don't touch them which I don't agree with you know.
Context_of_Work	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	They truly are. So most of the time they talk by radio and then you have sometimes they say such stuff they really shouldn't say but you let it slide you know it's like the other day we got in a chase and this guy was doing over 120 miles an hour in a Mustang convertible and [name] gets on the radio and says [county]. I don't know what he got up under that hood but it must be something good you know and it's like and coming from where I come from it's like that's not really professional but in the context of here it's kind of funny. So you let it slide and then folks are talking about did you hear what he said about you know what I'm saying but you want to keep it reigned in and not get too out of control about with it but I mean it was funny you know.
Context_of_Work	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	Part of the issue is here we have a DSL connection which is 14, 15 megabytes a second. I have contracted out to get a 100 megabyte connection. That was supposed to be in August however that did not happen so now it should be in first of December so once that 100 megabyte connection goes in it's going to help speed things up. I actually have a very good signal here from [company]. We have a 65 to 70 megabyte a second Verizon connection here and what I was trying to do is I was trying to hook our network up to the Verizon connection at 65 to 70 megabytes a second and with the unlimited connector I've got with the I forgot what it's called I can show it to you.
Context_of_Work	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	You know I give you a badge and a gun drive right you know that's the biggest thing. I have people call and complain well this person sped by the house their blue lights and siren going. I said yeah they're going somewhere you know and I back my guys up and they appreciate that and one woman don't be driving in here like this and I said listen somebody just broke into your house, you're hiding in the closet how fast do you want the folks to get to you? And just think about that when you call and complain on somebody else. These guys are doing a good job down here understand that you know.
Context_of_Work	LE	R	Supervising	36-45	21-30	Male	LE-R-048	There's emotional based thinkers and logical based thinkers and in

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Field Responder					general what you'll find in women tend to be emotional based thinkers and men to be logical based thinkers and when I go talk to the kids in high school and stuff I'll tell them I'll say listen girls, I'm going to explain something to you. Guys don't get it. You need to cut them some slack you know. You don't care, you don't want them to solve your problems, you want to be heard . They don't get that, they're problem solvers because they're logic based. You're emotional based you want to be heard, they want to fix it so cut them a little slack you know and you also have to understand you're a little more emotionally mature.
Context_of_Work	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	... That's the big problem and it goes the same thing with deputies and stuff and you got to talk to them and say hey you know you're not the guy who brings emotion to the party... You need to make sure they're on a good balance keel you know when they come to work their mind is where it should be, if there's any issues make sure that you get it talked out before they hit the road. If they can't talk it out don't put them on the road. I mean it's that simple.
Context_of_Work	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	You have different guys different ways and sometimes you're not you're trying to impress upon them your vision of law enforcement and not their vision of law enforcement and a lot of people get in law enforcement and they think that to be very stern and very you know they don't get that being strong is also being nice you know and I tell them you know I've never asked for anything I can't take. If I ask for something from you I can take it and that's what I tell citizens. Listen if you go up to somebody's car and it smells like weed or you see drugs or you see a gun or something you can take action on legally. Don't take action, ask. Hey man, you mind if I look in your car? If they say no that's fine you can still do what you're going to do but you were nice first. It should always be a surprise when the cuffs go on. When you talk to them you know you minimize and there's certain other things you use to keep them off guard because when you start raising their emotional level they might do something very unlogical and really hurt you so what you try to do is you keep them kind of off-centered a

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								<p>little bit and say hey man you know yeah it's not a big deal. I know you hit her man but this happens all the time. You know I see this a lot you don't say you're right you just mitigate it and minimize it and then you come back and say listen man I'm going to have to take you to jail. I'm sorry this is just the way it is. The law requires us to do this and I don't think you're a bad person and that's the biggest thing you got to teach them is never put people down.</p> <p>Always bring people up and try to make them think they're more than they are because a lot of the times these people are never heard good stuff. They're raised in environments and families where they're always put down or you're the reason I had this or you're the reason you ruined my life. I've heard that a lot. You're ruining my life. I had a great life until you were born and now these kids grow up to be adults and they're scarred you know they truly are and they don't have the coping skills and they don't well in society so sometimes your voice might be the voice of positivity that changes their life and you need to go say listen man you know it ain't got to be this way, you can choose to be different that's up to you but this drinking and drugs ain't going to get it. You need to do different but that's your choice.</p> <p>It's within your power to change this and it's leaving with a positive thought because when you pat them down they're already getting arrested and you're kicking them that doesn't help anybody you know and in a day if you do say something positive they still live in their community. That's what I try to explain to these guys. You put them in jail there's a door out of it and goes right back in our community and you're going to see them again and a lot of times if you deal people fairly and they like the way you talk to them they will help you do your job because they respect you.</p> <p>And that's the biggest thing is teaching these people how to be respected. I pull people over as a sheriff I write people tickets. A lot of sheriffs don't write tickets because they're scared of the political fallout. I think if you're consistent and you're fair and you treat everybody the same you're fine. When you start treating people differently according to</p>

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								who they are that's a slippery slope and that's how you get into corruption. That's not the road you want to go down. Just treat everybody the same.
Context_of_Work	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	We're improving. Before they didn't communicate with anybody. They truly didn't. Some of the fire guys they had one guy in particular that was very difficult. He wanted to be in charge and he didn't want to do stuff. He wanted to make me do what he wanted me to do and I'm not that guy. I'm like listen I'm respectful of you be respectful to me. He refused to come out to a call one night because I hadn't called him back yet and he called out here and cussed out my dispatchers and then he got in court and was ugly so I said that's fine so I went through and documented everything. At the fire association meeting I said hey this guy is making you look bad. This is your business you deal with it but I'm not going to call him back...The [Organization] is a really good program. Put a yellow dot on your tag on the back of your car and have an envelope in your dash. If you come on a car crash or something or have somebody in the car you know you have a yellow dot EMS knows to look in the dash, get their information and see what medications they take, who the doctor is and all that kind of stuff. Really low tech nothing fancy but something that we're going to roll out here soon and we're going to do it together you know proactively do it. I will go with them to the retirement center and help with that but also talk to the doctor's offices and stuff and put stuff there and let folks know how to do the program. My wife is a Type 1 diabetic.
Context_of_Work	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	We'll have one in our car so it works out well. But this year we're having our Christmas party together. Never done that you know. Probably have fun. I think you should enjoy your time. You shouldn't be too stiff. So we're buying the hams, they're buying the turkeys, everybody's bringing their own potluck and I'm buying the plaques for my guys. I'll recognize my people's service within our public safety community Officer of the Year, Employee of the Year all that kind of stuff Dispatch of the Year. Also got an ugly sweater plaque. Whoever wins the ugly sweater plaque

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								we'll give that out you know. We'll let them bring beer and wine. Can't have it in bottles or cans. Have to have cups so if anybody takes pictures but anybody needs a ride home you ride home.
Context_of_Work	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	It started through dispatch and then actually we seen some of them had the other cell phone stuff but most of us still let [Name] know so and so and so and so.
Context_of_Work	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	<p>You come and drop your camera. What we did in [county] if you have a major incident like a are you from around here? We had a shooting up there one of my guys shot a guy and he came out of a pantry, the guy had some liquor, my philosophy has always been see something say something don't ignore it because when you ignore something you're supporting it.</p> <p>So you give them a warning just let them know you saw it and so he was just going to tell the guy to pull the liquor out you know sitting in the back of a car outside the pantry. He's going to get a Mountain Dew from [store] and he looks over and sees the guy in the car pouring some liquor and he's like you can't do that come on man so he goes to that guy and he gets out of car he tells him to get out of the car, he's got a gun in his pocket right here and he says get your hands up don't go for the gun. The guy goes he grabs the gun and starts pulling the gun out and he shoots him shoots him right here in the point of the chin and the bullet goes down the jaw and comes out in front of the ear and it actually stays on the outside of his jawbone and he gets in a foot chase with him and chases him, tries to tase him only one prong hits on the taser.</p> <p>The guy goes back to where he dropped the gun and started to pick the gun up again he goes you do and I'll shoot you and then finally ran it out again and everybody got on the scene. He has a body camera. The body cameras we have record continuously and then when you hit the button it'll actually stop at 30 seconds and go. Well he actually hits his button after he shot the guy so actually backed up and showed the whole thing and the chief there is very much in the same thought process as I have is about video. If video is good put it out there. People have the right to</p>

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								<p>see it.            People will make their own narrative up. If they don't have any facts they're going to make their own facts up. If it's a bad shoot it's not going to get better. People are already mad. Put it out they'll be mad once because what happens is you saw throughout the country as you have these things where people think a certain way and then they put the video out and then they get mad all over again. When they start with it would be done you know and that's what you do with this stuff but it works out to our advantage with that you know.            I have some people they'll say stuff on Facebook I'll say listen bud you say the deputy did this and this if you don't mind I'll post the video on here and let everybody make their own mind up and you don't hear anything else out of them. You know this one guy was talking about he has faults about the arrest of a deputy and he was trying to sick the dog on him and stuff and he had his taser out saying sick that dog on me I'm going to shoot you with this taser you know and we have three tasers. We actually get some more from [state] Tech Patrol they're changing out to some other ones so we're actually going to get 20 tasers but they're like \$1500 a piece.            They're cost inhibited for us you know and another thing about tasers is they recommend you get recertified every two years. We're not going to do that. The state requires you get certified once, you can get certified once. The reason why we're not going to get recertified is just for our small agency it's about \$2,000 per recertification because each one of those little cartridges are about \$25 a piece and you have to have two cartridges per recertification and you multiply that by 20 something or 30 something people it's a ton of money. Yeah I understand why taser wants you to recertify every two years now. Make a little money off of it you know.</p>
Context_of_Work	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	<p>No I don't think so. I mean I truly don't. I mean I think it's one of these things where if you play golf and you have a slice you play the slice you know. When you have somebody out here and you have people videoing your interactions with the public play the slice. You go to someone and</p>

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								say par for the legal fee to video. You're in my space right now, you're interfering in my investigation by being this close please just stand over here and then you got a nice, polite interaction with the public. Now if they start being a jerk about it if you need to take them to jail, take them to jail. If they're obstructing your come back in and another one I told you, you can't be this close you're within this and if they want to be an ass about it lock them up you know and then they use their video as evidence against them otherwise it'll judge.
Context_of_Work	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	Now if I get to the point where behavior changes to a point where we're not out here running and writing speeding tickets all the time and now I have time for that now but I don't see that being a possibility. We have over 10,000 cars a day that go through 78 by itself so and you're not going to change everybody. Locally when we started out we probably wrote 75 or 80% of the people tickets to people in [county]. This weekend I think we had over 200 something tickets this weekend you know we're talking about five people working and 200 something tickets. I think we had four from [county ].
Context_of_Work	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	...If he calls me today and needed some of my people to come help with something there they are there. We had a shooting down in [County] where they shot an officer involved shooting you know I was at dinner, called us I sent everybody I had over here to help.
Context_of_Work	LE	U	Other Public Safety Personnel	46-55	11-20	Male	LE-U-049	...I deal with all things related to video surveillance, intrusion detection, used to include access control. That piece has since been handed off to the buzz card office. They deal with access permissions and so we hand it off access control, card readers things along those lines to them. It helps to keep it more transparent to the end user. I also deal with all security assessments, threat vulnerability assessments, lighting assessments, general security assessments for our locations.
Context_of_Work	LE	U	Other Public Safety Personnel	46-55	11-20	Male	LE-U-049	...I have been given the somewhat dubious distinction of being air traffic control for [name] campus all things related to unmanned aircraft systems, drones. I tend to be that catch all for anything that isn't easily assigned to a particular division with the department.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								If it doesn't fit into patrol or if it doesn't fit into social media, if it doesn't fit into criminal investigations division or communications it will typically land with me and so I tend to be somewhat flexible in my job duties and description so that I can do my best to meet the needs of the department as a whole. Currently I oversee or I'm participating in a number of collaborative projects with either student [name] groups or with [name] Police Department/[name] Research Institute projects dealing with say vehicles and robotics and how [name] Police Department might leverage robotics for use in conducting patrols on campus. So anyway that we can leverage the police department's presence and gain better visibility into the on goings and happenings on campus I tend to be involved in.
Context_of_Work	LE	U	Other Public Safety Personnel	46-55	11-20	Male	LE-U-049	Yes I have. I was assigned to [name] so I was on motorcycle police officer. In that role assigned to what was then referred to as [name] or the [name] I focused my patrol efforts on the exterior perimeter of campus. We were trying to create that buffer in between some of the less desirable parts of town and our campus proper. Our students tend to reside in sort of that no man's land.
Context_of_Work	LE	U	Other Public Safety Personnel	46-55	11-20	Male	LE-U-049	I believe full time civilian support personnel and then we have probably 12 student part time employees that we have incorporated in our social media division as well as in the physical security division. They act or serve as student social media reporters for the social media division. We also employ them inside of our operation center as part time video analysts where they actually operationally work the cameras in order to provide situational awareness to our dispatchers and our officers on the street. The shifts are broken out or patrol we have our patrol division, we have a criminal investigations division, we have a crime suppression division, CSU which is comprised of under cover officers or plain clothes officers as well as the traffic enforcement unit, we have four explosive detection canines that fall under our special events division.
Context_of_Work	LE	U	Other Public	46-55	11-20	Male	LE-U-049	...Typically it's a first come first serve. If a call comes in first operator to take the call while the other is continuing to respond to officer's radio

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Safety Personnel					traffic they'll hand off calls. It's really somewhat informal as far as that functionality. We don't have designated call takers, designated dispatchers.
Context_of_Work	LE	U	Other Public Safety Personnel	46-55	11-20	Male	LE-U-049	...I teach a portion of the citizen's academy focusing on law enforcement technology where I give them a glimpse of where law enforcement started in the United States a little over 250, 260 years ago and how further long this time a period of almost 200 years where the only advancements made were really in the form of repeating firearms and how swiftly from the 40's up until now.
Context_of_Work	LE	U	Other Public Safety Personnel	46-55	11-20	Male	LE-U-049	We will also typically have one unit that will have the dedicated responsibility of monitoring zone five and zone one so that we're constantly listening to what [City]PD is up to because we do share boundaries and jurisdictions and then of course dispatch is constantly monitoring [City]PD's calls for service so that they can see if there's something that a call that [City]PD has that may overlap with us that may duplicate a call for service that we would receive or that could impact us especially from a traffic perspective, there's an accident that they're working that could impact traffic inbound or outbound from campus, etc.
Context_of_Work	LE	U	Other Public Safety Personnel	46-55	11-20	Male	LE-U-049	[S2] ... If I can't get a word in edge wise because there's an incident going on I can pick up my phone and I call into dispatch so there are work arounds that are there. If an officer isn't answering his radio I can typically put a phone call into him. The department has all of our phone numbers even if it's a personal phone. If I can't get you on radio I'll be burning up your cell phone trying to get a hold of you. If I can't do that then we're sending out the troops. We're going to scour to try to find an officer.
Context_of_Work	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	I'm the supervisor of the traffic unit assigned to special operations which consists of various units so me and him kind of oversee everything but I'm over traffic, I'm responsible for the scheduling of my officers, for their pay, for doing their payroll. I mean just in the sorbent of thing dealing with citizens who have complaints against officers, being

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								out on the street and making sure that officers are doing things properly or procedure per the law providing intelligence to the officers so they know what the objective is. That about sums it up I would say.
Context_of_Work	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S3] I am assigned the special operations unit, day to day investigate narcotics, vice violent crime also on the SWAT team. I apply for and execute search warrants, arrest warrants and a firearms instructor.
Context_of_Work	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S3] I supervise everything he does.
Context_of_Work	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S4] I am the lieutenant for the crime suppression unit and the SWAT team commander. I supervise the members on the SWAT team when we do warrant situations, barricaded suspects, active shooter type situations. Day to day we do crime suppression, we work off of crime trends and patterns so if there's a rise in burglaries than we address our crime suppression unit towards the burglaries arising, car thefts we go towards so whatever the crime trend is at that time we address that with our people so because we're not necessarily responsible for the 911 calls for service. We handle the higher profile crimes. Along with that we do narcotic investigations, prostitution investigations, vice, dignitary protection details when the president and vice president come to town we assist the secret service in doing that, security for high profile events.
Context_of_Work	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S3] Sure. I think to touch on the chaos thing it's methodical addressing all the different things. You got to base the priority whatever the priority is at the time if you know one minute you could be handling something but something else comes up you got to drop what you're doing and go handle you know if a high profile incident comes up a homicide and then you listen in that area basically we have to stop the burglary stuff and go to the homicide area.
Context_of_Work	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S2] We have a crime analyst who works in our office and that's her job is to find trends using social media finding offenders based on social media accounts and then we do that too. I mean she does that but we

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								that's kind we're kind of all in work intelligence nowadays you know.
Context_of_Work	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S4] I think the difference between our crime analyst she's looking at the names and numbers just in the system whereas we're out in the street, we're familiar with people who are doing these crimes and we can actually put you know their MO of the crime with hey we think it's possibly this person can we look into this person and we'll provide her with the names that we're aware of because we're out on the street and the guys that work in our unit both [Name] and I don't know if I'm allowed to say these names. It's alright. Detective 004 here and an unknown another detective in our office are very good with knowing our frequent offenders so we have detectives that can rattle off their names, date of births because they're so (00:06:44) familiar with them.
Context_of_Work	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S4] We have a crowd trend we go and we're going to try and attack this problem. At some point something else changes like he says then we're reactive to that and then try to be proactive to get ahead of it. At the same time in handling you know narcotics and vice and fighter crimes and we have all these different crowd trends so we have to hit the one that's happening right now or try to head it off and if this one starts up we'll just try to jump ahead of that one.
Context_of_Work	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S2] See with the amount of people we have we have 13 people in our unit here full time. The amount of people we have we're most effective if we could get everybody together to address that one priority problem. The problem is or this is the trend that usually happens is wind up taking four of those people and putting them on drugs handling the drug complaint and then I got three or four SWAT guys that are going over to help execute a warrant and then we've got three traffic guys going to address cars being stolen so it's very rare we could have our entire unit at one place at one time because like I said like detective [Number] said there's so many different things that come up and pop up with different parties.
Context_of_Work	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S2] In our unit no. It just depends on where the problem is. Now there are certain officers within our unit that are better in certain parts of town

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								okay they're very familiar like the other detective I was speaking about there's a neighborhood and a section that he's familiar with the gang activity over there and he's very familiar with that as compared to like this side of town where he doesn't hardly know anybody that's out here and the same goes for other people in the unit. They're better on this side and stuff like that.
Context_of_Work	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	Not to mention, typing. We use an app to communicate between our agency and with other agencies so we're also on they're typing to The [city] or whoever trying to deal with each other. We always got a number of things going at once.
Context_of_Work	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S4] Or if we're doing an investigation like you saw we had drama up here earlier. Say we were going to do a narcotics investigation we may spend two hours in here prepping for everything. Here's the intel we got, here's what's on the social media, here's a map of where everybody's going to be if we're going to pick off or something on a drug house we would just methodically put the whole plan together and just rally up and then take off so we may be here all day or maybe here a couple of hours.
Context_of_Work	LE	U	Field Responder	26-35	6-10	Male	LE-U-051	I'm a police sergeant.
Context_of_Work	LE	U	Field Responder	26-35	6-10	Male	LE-U-051	We attend a lot of community events both like just to engage so setup a table and have you know swag and engage the public and students help us with that but also informational type sessions so employee orientations, Q & A's about law enforcement, Q & A's about safety. We engage in any sort of interviews, any sort of like you know public inquiries of any variety would probably come through me. I'd have sort of the PIO duties in that I deal with. The student newspaper does a weekly crime meet so I'm the person that contacts them or they contact me and I tell them what's happened and give them the information they did for their reports and then on the training side of things my job is to schedule departmental training. If people are going outside the department for training my job's to schedule them for that, pay for it, it's maintaining all of our posts, police officers and standards, records,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								making sure that people get credit for the hours, making sure people have met their [name] standards. Every year you have to have 20 hours of training and there are certain mandates of what that training has to be so and then also I'm involved in background and recruiting. Right now we're doing recruitings, I'm calling people setting them up for ride alongs, I'm helping a couple of other supervisors in doing the preliminary screens on the new applicants there's a lot going on.
Context_of_Work	LE	U	Field Responder	26-35	6-10	Male	LE-U-051	Yeah. I mean certainly like we work 12 hour shifts in patrol and there are and we don't do formal roll calls because we're only putting a Sergeant and three or four officers out on the street here. At the other campuses it's only one or two so but you're going to come in you're going to have a chat with your supervisor kind of figure out what's going on for the day. We do a lot of we call them business checks but it would be a lot of walk through, building checks, location checks so sort of expected but throughout the day when you're not answering calls, you're not doing traffic, your job is to be visible whether that's riding through a parking deck, walking through a building that's a big part of what we do as an institutional police department... There's some little stuff like there's a park that we have where we unlock the gate every day and someone has to go and unlock the gate and someone has to lock the gate. I don't know if that's quite the routine but it's just one of those things where it's like you know most municipal police departments don't have to go unlock and lock the gate.
Context_of_Work	LE	U	Field Responder	26-35	6-10	Male	LE-U-051	We do building unlocks for people so for day watch it stays steady. At night it transitions into like I tell people we go from being 40 or 50,000 people to maybe 5,000 18 to 22 year olds at night so that becomes you're still dealing with the occasional wreck, you're dealing with the theft call or a fraud call or something but it's a lot of student person down drunk calls, loud music calls you know the occasional fight or something like that. It's a pretty safe campus and the students are we're fortunate that in recent years the students have been generally well behaved. I don't know how to account for that but you know that

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								occasion marijuana calls and that sort of stuff and so it's a big transition from day to night and so during the day the officers it's steady. They're out and about they're kind of doing things. At night you kind of have to there's more of an expectation that you're going to be checking buildings and checking parking lots and it used to be called fraternity row it's now called [name]. We have all of our fraternities and sororities on campus so they have a row of houses over on campus and that's a place obviously on the weekends it's fairly upbeat so you want to be seen there.
Context_of_Work	LE	U	Field Responder	26-35	6-10	Male	LE-U-051	No the way the law is written is jurisdictionally we have authority on any property we own or occupy and then we have it's a weird old law from the 60's and the 70's... Private institutions and counties with a population greater than 400,000 have that authority so when we're working in [county] and when we're working here our officers have jurisdiction within 500 yards just like they do and then we have ticket books and citation books and all that sort of stuff and we write tickets and take people to jail and all that sort of stuff.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-052	For our agency, I supervise approximately 14 [Job title] assigned to the Bravo shift. We're broke up into four shifts, lieutenant, supervisor in each shift. We control and maintain daily calls. Any call that's received to communications, our deputies or my shift will handle. We basically supervise manage. We read over the complaints it it's being put in, we prioritize which complaints we put towards priority, and the way that we're going to respond to the calls. And we also, sometime we'll send what deputy we choose because we know there's some--some are strong in some aspects of the job so we'll make sure we've got those aligned to that job.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-052	...But normally I'm so busy, I have 14 deputies but that doesn't mean there's a lot less than that or more because we have--we have motor officers come out during the day, you're watching over them, you have the canine officers, walk patrol, so you have a bunch of people moving about. So you're actually responsible for everything that's going on

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								during the daily function of the sheriff's office. So when you have about 18 or 20 people, and you start getting phone calls and you only have three supervisors, it starts to get a lot of phone calls. Because under me I have two sergeants that run also help the shift. But you start getting those phone calls.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-052	That's the uniqueness of our position at the sheriff's office. We do a wide variety of calls where most sheriffs' offices won't even answer those calls. Even our sister [County] is right next door us, like we still unlock vehicles. Any--we respond to any case or any call that comes into the radio room. If someone, like this morning for instance, a woman was mad because her grandmother posted a picture of her child on her Facebook account. So agencies, this to them would have been like, this is--we're not going out--we're not coming out for that. But here in the sheriff's office we respond to all--because at that moment, that is their emergency. So if that's what your emergency is at that moment, and there's--we have nothing else pending, there's not another emergency going on, we'll take the time of our life to answer that call and say, look, there's really nothing we can do about it, even though, but you educate them. You're also at the same time, you're answering their emergency. But the calls are unique for the deputies on the streets because we handle animal complaints also. We go onto domestics. We--your major call, it's homicides, suicides, so the deputy's from your day to day bin us, yeah, they all see our radio of complaints coming in. So it's no boredom, other than your early mornings but that's normally when they spend time writing most of their reports. They'll knock out as many reports as they can in the morning because they know come lunchtime when people start moving and getting up and about, were going to get hammered.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-052	Ninety percent of the calls, their assignments will come through communications. We may get a call-in where somebody just calls in to our supervisors, and says, hey look, this is what happened, what should I have done? And they'll say, look, I'll send a deputy out to you. So the captain will me, say, hey look, I assigned somebody go to this location,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								take this complaint. Or it may be somebody just walks up to you and it's like, hey look, somebody down the street, I was walking down the street, somebody just smacked me. So this is maybe something that's just stored on our lab and we have to notify them. But most of the stuff from their computers, they can--they're mobile devices, they can go ahead and pull, we can pull our own cases from our laptop and we can pull everything we need from that location.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-052	Easy, normally our laptops are with Xirgo Technology. Our portables, and then our phone. It's hard to prioritize which ones we use the most, because depending on the day it is. Some days I may spend all day on the phone, I may get 50 phone calls. Other days I'm actually doing my reports and approving reports on the computer, and other days we spend most of the time depending on what the call is, on the radio. So to say which one is the most priority, to me they're all three are unique and they work together. Without them, because if one fails you've got a second there.
Context_of_Work	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-053	Alright, so for the past 22 years I've been employed with the City Police Department here in [city, state]. My current job title is I'm a [Job title] which includes all of our canine, our SWAT, I've got dispatchers under me, all the communications under me, and all of our fleet for the entire police department, the fleet works under my command. So that's kind of what I do now.
Context_of_Work	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-053	...And then as the dispatcher's typing it in, as soon as they open up a call for service on the screen, the officer in his car is seeing that. He's seeing that live time. So, what they're typing he's actually seeing. In other words, if a burglar alarm activation comes in when the dispatcher is at the computer, and she pulls the dropdown box to pull up a 62-8 which is a burglar alarm, and she types in the location, the officer is seeing that on his screen. If I'm sitting at my desk, I'm seeing it live too. I'm seeing it live at my screen. In the meantime, the dispatcher is also dispatching the units by radio to the burglar alarm as well.
Context_of_Work	LE	R	Field	Over 65	11-20	Male	LE-R-054	Lieutenant over at Uniformed Patrol.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					
Context_of_Work	LE	R	Field Responder	Over 65	11-20	Male	LE-R-054	Okay, it's law enforcement, of course, Uniformed Patrol does traffic enforcement, they also respond to traffic accidents, they respond to any criminal activity, domestic violence, those types of things, just enforce the state, local, and federal laws.
Context_of_Work	LE	R	Field Responder	Over 65	11-20	Male	LE-R-054	In the position I'm in now as [Job title], yes. I come in, check reports, paperwork, make sure everything is like it should be as far as the reporting and what the deputies do and that type of thing, but then respond with the deputies in the field, provide backup for the deputies on calls that require more than one deputy or two deputies, and of course, during disasters or weather events or whatever, we patrol with the deputies, so it's kind of routine, non-routine. Anything can--a radio call can come out for us to respond to something or a phone call, and your whole day is changed.
Context_of_Work	LE	R	Field Responder	Over 65	11-20	Male	LE-R-054	A lot of times, they're doing their paperwork and so forth, because again, we don't have mobile data, so we don't have the terminals in the car. They had to come back to the station to input into our reporting system, which is an online reporting system, ADSI, so they spend a lot of time in the station doing paperwork.
Context_of_Work	LE	R	Field Responder	Over 65	11-20	Male	LE-R-054	...You're going to deal with that person or that incident first, and that's just kind of the way it is, and so sometimes, I think they've got a man alarm on their radio system, where after you don't answer them after so long, it buzzes and beeps and carries on, and also, they don't understand, sometimes, if you're going to clear a house, you know, you think you've got a burglar up in a house, you're in a house, a lot of our deputies, myself included, turn that radio off, because I don't want a tone going off, and I don't want somebody calling in a radio until I clear that house.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Male	LE-U-055	I'm the Assistant Chief in the absence of the Chief and I would, you know, perform his duties. My job is basically to ensure that the daily operations of the police department are functioning and held to

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								standard. So uniform patrol, communications, IT, criminal investigations, traffic division, they all report to me through the chain of command and I have to make sure that we're meeting our goals and expectations from the community and to keep the public safe.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Male	LE-U-055	We rotated through shifts and so each shift kind of had its own routine. There are certain things that our day shift officers have to do, there are certain things that our night shift officers have to do. And so you kind of--you had somewhat of a routine but as most law enforcement jobs it was never the same schedule or never the same... calls every day. Everything was just a little bit different but you kind of had--you know you come in and check in, you get your paperwork straight, you got your unit, you did your roll calls, so those things were routine until you got out of the office and were actually responding to calls for service.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Male	LE-U-055	I think it's kind of, in my view, it may be I'm a little more removed than maybe some of the other people that you'll talk to. Most of my interaction now is through email or text. I'm very little on the radio unless there's a major incident or we're working some large event. From the department side, hmm, we put a lot of emails but not... not critical information. Yeah, if we have a certain call or a certain thing that needs to be done then we're going to do that either via radio or pick up the phone and make a phone call. So I think it's maybe the shift is just mine and not necessarily the trends of what's going on in the department.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Male	LE-U-055	You know obviously we monitor it both from--we have a department Facebook page that we're pushing information out on and then you know if we have large events or events that may garner some negative attention then we're going to monitor social media to see what's out there and what's being posted on that. We use an app that we purchase and pay for it's a safety app that we push out to our students. It's kind of like an emergency call button but it has lots of other features with it. And then you know I mean there's, hmm...I think that's it from the app side that you would use from the phone. Now there are several software systems that we have for bait bike tracking because we have certain

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								things on campus we have to have monitoring stations and that sort of thing. But that's mostly geared for communications and patrol.
Context_of_Work	LE	U	Field Responder	26-35	6-10	Male	LE-U-056	Okay, Police Sergeant.
Context_of_Work	LE	U	Field Responder	26-35	6-10	Male	LE-U-056	I would say, on the lower end of a management position. I'm a supervisor, I have a small team assigned to me specifically, and I [inaudible] supervisor of the larger shift in absence of the other supervisors.
Context_of_Work	LE	U	Field Responder	26-35	6-10	Male	LE-U-056	So I guess lower management, I suppose.
Context_of_Work	LE	U	Field Responder	26-35	6-10	Male	LE-U-056	It's a public service. We are focused on investigation of crimes and general public safety needs and responded to those.
Context_of_Work	LE	U	Field Responder	26-35	6-10	Male	LE-U-056	As a sergeant, not quite. I've only been a sergeant for a little while. Before that, I was a traffic officer on a motorcycle. For me, it's--I try to wake up early enough to make sure I can get to work. I keep all my work stuff in the same place, so I know where it is. I usually have whatever uniform I'm going to wear set up the night before, come in, we have a shift briefing, pass on any information we have from last night or anything new that we need to pass on to our officers, then I usually go get some coffee, come back, and start writing reports.
Context_of_Work	LE	U	Field Responder	26-35	6-10	Male	LE-U-056	.... Patrol liked to wear an earpiece, or I liked to wear an earpiece, because we just haven't filled the last slot back in the motorcycle right now, I still have to come off to do escorts, I haven't been able to change up my radio yet. Once they know I've been able to do that, I'll turn this radio back in, I'll get one of the ones that Patrol has, where I can still wear an earpiece again.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Male	LE-U-057	I am a police captain.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Male	LE-U-057	Okay, so I'm a police captain, and I am assigned to investigations, detectives, I guess different terminology wherever you're at in the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								country. Criminal, CID it's called some places. I supervise our detectives who follow up on every criminal police report that we take. We take some reports that are non-criminal, some that are criminal. Everything that is deemed criminal, we will do a follow-up investigation on. We contact victims, we check out leads. I supervise those detectives that do that and make sure that reports are moving along smoothly, that we're getting to everybody's reports, that calls are being made to those victims. And then I grade all the reports for our police department also, so I say grade. I check for grammatical issues, make sure that the fields in our reporting system are completed, and such.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Male	LE-U-057	Obviously it changes depending on what the case loads are. But typically I'll come in, and I will check through emails 'cause usually I'll get emails from the night shifts of what's going on. Then I'll review the cases myself to see what's been entered into our reporting system. And then I will go into the folders in there to start grading reports. I use the term grading. I keep saying that, but it's not necessarily grading. It's more of just reviewing and making sure that they're completed correctly. And then once they are, I'll approve them, move them into the folders where they're stored at. And then towards the afternoon I'll meet with my detectives and see what they have going on, see if they have any questions or anything like that that I can help them with.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Male	LE-U-057	I kind of stay in my office most of the time unless I'm meeting with my guys. I have a lot of paperwork to do, so I don't really get out and talk to the officers too, too much. I kind of worry about my detectives and the people under my command, and I take care of my paperwork and the reports. So I would say I don't interact with everybody in the station as much as some of the ranks do here, other officers.
Context_of_Work	LE	U	Field Responder	36-45	11-20	Male	LE-U-057	We do not a lot. NCIC obviously, if we're entering property that's been stolen or wanted persons. Other than that, we don't interact with them that much. Sometimes we'll have them run packets on a suspect or something to see criminal history. But other than that, it's not a lot, not nearly as much as the average patrolman does.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work	LE	U	Field Responder	36-45	11-20	Male	LE-U-057	Our local fusion center and we have some people in our department. They will monitor searching for keywords around this area to see if anything hits on social media, and it will alert them. Just searching keywords for threats that might be against the community. We'll learn about a suspect, maybe group that they hang out with, friends, tendencies, likes, interests, where they've been, things like that. Also possibly we know one suspect, there may be others that are unidentified yet in the report. They may be friends with them on these social media sites, and they may communicate, so things like that.
Context_of_Work	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	Umm, primarily administrative functions, being budgetary, personnel, labor law, policy; all of things kind of fall under the umbrella of what the Chief of Police is responsible for.
Context_of_Work	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	Hiring and firing; you know, all those. Purchases for the department, technology upgrades for the department; all those things would fall under my responsibilities.
Context_of_Work	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	Oh, that's an interesting question. I have never really considered that. Hmm..I am not sure that there is really one or two that honestly encompasses everything; you know, certainly it is difficult, sometimes tedious, how do you wanna, gonna..
Context_of_Work	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	Yeah, I have never really considered it. It certainly, I would go rewarding, it's certainly something that I would do, would describe, again; you know sometimes, it encompasses a lot of different things. It's very rewarding at times but again, you know I use the word 'tedious' at times because it is so, I wanna - I guess I don't really know how to encompass everything in just a couple of words. It really runs the gamut from, all the way from rewarding to days that, you know, are dreadful, quite honestly.
Context_of_Work	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	You know, for us being successful in accomplishing our mission and that being, being able to help somebody in need, you know, having proper resolutions to criminal cases where people were victims of, getting that satisfaction for those people, if you will. Satisfying is a good word to utilize to describe the position; it can be very, very satisfying, but

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								then again, the flip side of that is sometimes it can be struggling, and like I say, sometimes very mundane, dealing with some of the personnel issues - it can be very, very difficult because it's like a family and you know as well as I do when you have to discipline somebody in your family, it's never an easy thing. So that is some of the things that I would describe as maybe tedious or, you know, certainly not desirable, those type of things, but you know, as far as day to day you know, it's a lot of paperwork and that is where maybe some of the mundane comes in.
Context_of_Work	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	Sure. I generally come in and address anything from the night before, whether it be phone calls that I need to return, emails that I need to return. Generally I sit down and I review what complaints from the previous shift, the night shift before, what type of runs that we responded to and had to deal with, see if there is anything that I need to direct our staff to follow up on or I feel that needs to be followed up on. After that, it is generally, you know, working through invoicing and budgetary issues after I come in and get the fires put out, if you will, then it becomes more the mundane, you know, type of things, the paperwork type of things, so after that it is generally, towards the afternoon we start looking at any type of, you know, we review our policies very, very often, so that is something that I generally try to do towards the afternoon even it is just five or ten minutes, taking a look at one of our policies and seeing if there is anything that we need to readjust or look towards, you know, revamping. Following the afternoon policy review, it could be some of those personnel related issues or maybe, you know, something that as far as looking at new technologies or something that we may implement. Now those things tend to change on a daily basis depending on what it is going on but generally, you know, like I say, I do have somewhat of a process throughout the day.
Context_of_Work	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	Oh absolutely. You know, generally, and that is still something that I try to be involved with, you know, being in a smaller department I still, I feel it is necessary that I be in touch with our officers and understand what our officers are doing out there on a daily basis, so there may be a day

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								that once I get that morning type stuff done, then I will jump in a patrol car and actually get back out there and see, but certainly there is a routine; I don't want to call it routine because nothing that we do is routine.
Context_of_Work	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	But you know, certainly we have processes that we follow and that being, you know, generally the guys will come in and they will brief amongst themselves as far as information that the previous shift dealt with again, you know, what type of incidents they dealt with the night before. They will brief the oncoming shift so they are aware of anything that may carry over into that oncoming shift. Once everything is done, we will go out, we will do our patrol car checks, make sure everything is good, jump in your office for the day, and then you know, go out on patrol. But, you know, as far as anything routine that we really do other than those briefings both at the end - excuse me- beginning and end of shift, that's really the true routine for patrol.
Context_of_Work	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	Everybody carries personal phones but they have been, there are a lot of different issues with utilization of personal phones. Our folks are - we still have more of the sense of being for the community and allowing the department to have access to those phone numbers and utilize their personal phones for business activities. A lot of other agencies are not quite as receptive to that; again, we still have a little more of a working relationship between the officers and the actual department in regards to that.
Context_of_Work	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	Again, you know, it is their personal cell phone, so they will be taking, you know, their personal phone calls but as far as department related, it may be of sensitive nature that we don't want to broadcast over the radio. Now, with the advent of the in-car computers, we do a lot more of that information via - that means versus cell phone any more, but again, there is a time delay there. So if there is critical information that we need to relay that is of a sensitive nature, right now you need this information, the cell phone will be, you know, the first priority.
Context_of_Work	LE	R	Supervising	46-55	21-30	Male	LE-R-059	Yeah, there is, and certainly that builds that camaraderie, you know,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Field Responder					because a lot of times, it's almost like a debrief, if you will, when they go out on a situation and just - a domestic situation, for example. Clearly have to write or document the incident in some fashion so there may be times where they have the opportunity to both come back into the office after dealing with that situation where they can talk about, okay, this person said this or did you see this, or, you know, something along those lines where they tend to debrief before they document that information and certainly that can be a very, very beneficial thing - [coughs].
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	Well, I mean most people have an idea of what a fire-fighter and police officer does. The problem is, it's very limited, so yes; we take bad guys to jail, alright? Or, we put out fires. But it's almost regardless of what I feel; I guess it's really transitioned into a lot more than what those traditional roles were. You know, for instance, you might get called; there might be a 911 call for just to go help an elderly lady put her batteries back in her phone. So it's become a little bit much more community service, nondenominational, if you will, level of service. Most people don't know what paramedics do, they know it is some sort of medical something or the other, but it entails quite a bit as far as, you know, understanding Cardiology and Pharmacology to the point where your interventions are pretty much mirrored to what they would do in the emergency room for those significant cardiac events; cardiac arrests, you know, heart attacks and so forth. Early detection as far as police work, all the traditional - take complaints, investigate crimes, make arrests, prepare for court, testify.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	Emotion. With people making decisions based on emotion outside of whether it is factually based or not.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	Okay; yeah, I mean, pretty much. We come in and usually get a briefing from the night crew and pretty head out on the road right away and a lot of the time its monitoring morning work traffic, work flows and obviously if there are calls for service in between, then we take care of those. Then the end of the day is kind of the same, you know. We will hit the hot spots for traffic and speed enforcement and kids and help them, you

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								know, cross roads and so forth, you know. It ends up the same by giving a brief to the next shift.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	No, I mean there are so many roads we very rarely get into, you know, some of the real smaller like - I dont know [unintelligible]. You know where that is at?
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	I mean, there are two houses there. It's, you know, we dont necessarily - we dont normally go there unless there is an issue, just because the nature is really nothing going on there so, but for the most part, we head everywhere.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	And I usually reserve those reports to these - the small ones that I can complete in a couple of paragraphs.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	Right. And for the most part, I mean, I will take phone calls, work-related phone calls all the time on my phone but as far as pictures and so forth, I carry my own camera now, so.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	And a lot of it is because we have allowed that to happen, and I think it's a good thing but you know, our core value and you know, other duties dont really infringe on us to be able to give them that extra level of customer service like some busier areas. You know, we do lock-outs and get the bad out of the house and you know, a lot of places dont have that luxury.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	Yeah, I would. I mean, I think they try their best, but if - you know, there is always what's lost is the nonverbal or you have let's say a dispute maybe that is domestic. While it is a domestic, depending on what the office is asking for, you know, domestic, if I hear that there is another officer at a domestic, that I am going to go help because I know volatile domestic situations can be and so forth and so on, but sometimes, the dispatcher might not know - okay, well, so and so on [town] is on a domestic, should I send another unit automatically or do I wait for them to ask for it? So, a lot of times, if we hear it, we might not even wait to get dispatched; we will just start and that way whatever.
Context_of_Work	LE	R	Field	46-55	21-30	Male	LE-R-060	So, for instance, this interview room, since we interview witnesses,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					suspects, arrestees, it would be nice to have a video camera here.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	Pretty much can't get out in any building. If you are on a porch or something, that is not a problem, but if you are inside the home, had a heroin overdozer snoring and couldn't really get out from the basement.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	Sign into everything, no. I have to sign in a special, you know, user name and password for everything.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	If we are going to go on the county to help or something and I dont know where it is at, we just generally use them to case, but I have used on occasion. Sometimes we use Google maps in preparing search warrants or what have you, just to get a visual of what - or actually the target area so we can describe it or we might attach it to the search warrant so they know it's accurate and we know what we are looking for; we dont go in the wrong house. Then I have some legal software. I have some drug identification software that I personally use.
Context_of_Work	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	You know, for instance, if I get called to do an accident investigation, I might get an initial phone call from Dispatch saying can you come in and do this accident? Then once I get en route, I will, on the radio, I get into a car that has MDT, usually I will use my cell phone on the way to kind of figure out, you know, what's going on and by calling the other accident investigators, figure out how close they are, do I need any equipment, so that stuff. Traditionally, I dont know how they would have passed that on, you know, before cell phones and stuff; I guess you could go through Dispatch but if they have already left their house and you dont have cell phones, so I think it is kind of streamlined, some stuff, but again, if it doesn't work..
Context_of_Work	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	Lieutenant.
Context_of_Work	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	It's very challenging because of the limited amount of experience we have in our department because it's younger. We have to constantly guide and change officers' behavior by how they do things because again with the FTO program, I have such a young department that now I

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								have got guys who have got 2 to 3 years on - these guys are my FTOs, and before when I started, they wouldn't even look at you until you started having 15 years on to start training people.
Context_of_Work	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	Well, yeah, well I have a daily routine as far as I kind of make sure whatever the Chief needs done, I make sure it is done. And then I read reports that the sergeants are sending to me that there are some issues on the shifts and then, you know, working detective bureau, whether it is doing inventory or potential grant work or you know, like right now I am working on sending out emails on applications.
Context_of_Work	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	Ideally, the routine is basically just performing whenever all the 3 jobs that I need to do at a time, it's kind of like a do-as-you-go thing, you know.
Context_of_Work	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	Yeah, there is. I mean, they go ahead and gear up and they will do their special-attention checks, they will do their patrols and then they will take calls as they come.
Context_of_Work	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	They do. Being such a small city, we try to keep them in zones, A and B zone, to kind of let them get used to the problems that are in that area, but they seem to venture out into the entire city because we are three square miles, so yeah, they kind of roam where they want.
Context_of_Work	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	Overall, it's a really good community. It's very diverse. You have a very large Arab population in [town] back here. We have a large group of Yemeni. We have a mosque in town now that deals with the large Arab community. I would venture to say 30% if not more of the population is Arab, and then you have every other culture between a white Mexican and African-Americans, so it's a pretty big melting pot here; it really is.
Context_of_Work	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	We use the Motorola 800 MHz system. Every downriver community has their own separate channel. There is a plus and a negative with that, the plus being you can be a little bit more informal on the radio on your own channel, but you kind of lose unless you are scanning them, you kind of lose the aspect of what is going on in the surrounding communities. If your dispatcher is not paying attention to an armed robbery or

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								something that happens in [town], potentially your officers could not even know that it is heading their way or it's happening or suspect vehicle, and for the most part we try to - the two of us working the desk tries to monitor all that stuff and let the officers know that there is something going on in the surrounding city but if they are not specifically scanning, the communication between the downriver departments is minimal.
Context_of_Work	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	Well, as a corporal, I spend most of my time on the road as a regular police officer. I do - generally I am in charge of any scenes we go to unless there is a sergeant there; that means he is the highest person out there. So a limited amount of supervision but mostly just answering calls, doing proactive patrol checks, neighborhood checks. I do a lot of traffic stops.
Context_of_Work	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	To an extent. We are not - some of the [unintelligible] are fairly micromanaged, we are not here, I mean, you come here; you would be here on time. We have kind of a daily roll call, other shifts will go over, you know if there is BOL for this or you know, stuff like that and then aside from your call that is kind of - they kind of leave it up to you to go out and - you know, if you wanna go do neighborhood checks, gonna stop by the businesses that day, if you feel like working in traffic enforcement, as long as you are doing something productive, they are kind of hands off unless there are certain things that need attention on, you will get a memo, you know, keep an eye on this intersection between this time of day or complaints over here, stuff like that.
Context_of_Work	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	Correct. We check our cars and equipment first thing in the morning, all the technology - computer, printer, camera, make sure the rifles are shined and are good to go and make sure that everything is stocked up and try and keep the cars clean. I take the same car every day so I turn it back in about once a week. It gets dirty very quickly.
Context_of_Work	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	It varies. Like today I am working on some special projects but generally I stop in to use the rest room, stop and eat lunch, stop in to print report and tickets and stuff for court, but I would say generally most days I

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								probably spend about 80% of my time on the road.
Context_of_Work	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	Today is the opposite because I am working on some paperwork things in here with the administrative lieutenant [name] you met earlier, so I am in here most of the day unless we get something that is needed done.
Context_of_Work	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	Me? All the time here. I am [unintelligible] all the time to it. I dont have a landline at home or anything but yeah, here I use it all the time. I do a lot of traffic detail and a lot of it involves like counterfeit insurance, fraudulent insurance, things of that nature, no insurance, and I place a lot of calls to insurance companies; and I would endeavor to say upwards of 50 times a month I call insurance companies to verify paperwork. Local sector [unintelligible] not very often because they just put you on hold and it is just as bad as going in person. But I use it to call the guys for -and that most of it is work related but then you know, even if you are going to lunch, like hey, what are you doing for lunch, stuff like that.
Context_of_Work	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	Yeah. I carry two extra magazines of ammo in my firearm, my pepper spray, taser - I don't have it on me now, it's in the car, but flashlight, I got my keys. I generally carry gloves with me, notepad and pen, extra handcuff key, and in my work bag in the car I got a lot of gear too, but as far as just one me, I try to limit it as much as I can because it's just so heavy.
Context_of_Work	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	They are really - Chief does not do much homework before - you know, I personally review everything before I buy it and I think we did no reviews, we just bought it and other departments that use the same ones don't care for them either from what I have heard and are switching. We would be a lot better off if we had a better brand of body camera. That makes it pretty current here. We upgraded our computers I think about a year and a half to two years ago, we got new computers in here. We kept the old monitors which were small. I wish we would have spent a little extra money to upgrade those, too, but -
Context_of_Work	LE	S	Field	26-35	6-10	Male	LE-S-063	I would say our primary function is public safety, life conservation,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					property conservation, court enforcement, arrests, issue citations, the whole gamut of public service assistance responsibilities and kind of a general catch-all, consular advisor, safety inspector, like a bunch of different hats, so -
Context_of_Work	LE	S	Field Responder	26-35	6-10	Male	LE-S-063	Yeah. Jack of all trades. Yes.
Context_of_Work	LE	S	Field Responder	26-35	6-10	Male	LE-S-063	Well, it can be wide; a wide range of exciting to boring to I guess kind of the whole spectrum of emotion between anger and sadness and joy and helping everybody out and I guess in my tenure as an officer, I have definitely had the whole gamut of experiences, so -
Context_of_Work	LE	S	Field Responder	26-35	6-10	Male	LE-S-063	Well, I am human, I have emotions and I have my own opinions on things and I am not like a robot and I can't just make - a lot of the time, it's not just a clear-cut yes or no, there are mitigating factors, so you are going to have to take that human scale and weigh that up as well, as far as what you have and what your options are and you try to resolve the situation in the best you are able to, with the information that you have and try and have a peaceable solution.
Context_of_Work	LE	S	Field Responder	26-35	6-10	Male	LE-S-063	Right. Yeah. Definitely. We do have, you know, situations where our discretion as an officer as far as citations or something like that, as far as we could issue, but yeah, a lot of the human to human communication I would say is - most people when they call us, they need to us to fulfil some sort of specific function for them, whether it is safety or they want to be validated in their argument or they are having trouble parenting, that stuff.
Context_of_Work	LE	S	Field Responder	26-35	6-10	Male	LE-S-063	You know, I come here and I get ready and then I do a vehicle inspection and go out on the road and drive around for a little bit maybe and try to - especially during the daylight hours before it gets dark, just make our officer presence known so.
Context_of_Work	LE	S	Field Responder	26-35	6-10	Male	LE-S-063	Yeah. Interact with the previous shift and if there was something significant or something like that that happened or we need a special attention in a specific area, that absolutely we would - like a form that

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								we have like a list of places to check and things like that, so if something didn't get resolved from the previous shift, then we can try to go and resolve that but, then we have our areas like that we have high traffic and individuals that we frequent so we kind of give them a little more attention, so..
Context_of_Work	LE	S	Field Responder	26-35	6-10	Male	LE-S-063	Yeah, I would say about in the 80-20; 80% probably face to face and then 20% that is probably going back and check the logs for the computers and scan documents or something like that or check previous calls to that area.
Context_of_Work	LE	S	Field Responder	26-35	6-10	Male	LE-S-063	So, part of my function is field training officer so right now I am currently in a double car legitimately, else we run single cars.
Context_of_Work	LE	S	Field Responder	26-35	6-10	Male	LE-S-063	Yeah. If we need to get another car or additional resources or something like that, like a rescue unit, I can key up and say, hey I need a rescue over here from whatever I need it for and they are generally pretty good about that.
Context_of_Work	LE	S	Field Responder	26-35	6-10	Male	LE-S-063	I perform a lot of IT function here at the station so - I am in charge of the LEAN network and the contact person for our validations for LEAN for the state and the WireScan administrator and deal with troubleshooting the body cameras and things like that and processing videos to be put onto disks or flash drives for evidentiary purposes and stuff like that, so I would say I am generally here a little bit more than some of the other officers but I - we eat here and we, have our bathrooms and our locker rooms and stuff like that, so - spare equipment that we have in the armoury or in a locker that we don't generally use a lot, we can come back and get that or if we have a specific question like for a supervisor or something with either on-shift work or scheduling or you know, the peer-to-peer conflict or something we need resolved, then we get to come back here and take care of that, but generally they like us to be out in the side streets and make our presence known and
Context_of_Work	LE	S	Field Responder	36-45	11-20	Male	LE-S-064	I would just say I answer police calls for service from citizens as far as traffic complaints, enforce traffic regulations, enforce local ordinances,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								pretty much that in a nutshell.
Context_of_Work	LE	S	Field Responder	36-45	11-20	Male	LE-S-064	Yeah. The rest of the time is just kinda driving around - it gets quite [unintelligible] especially in the evening.
Context_of_Work	LE	S	Field Responder	36-45	11-20	Male	LE-S-064	I have used Google maps before to find the location fast; I wasn't 100% sure where it was.
Context_of_Work	LE	S	Field Responder	36-45	11-20	Male	LE-S-064	Just the ability to have user friendly report writing functions and search functions and stuff like that, you know; when it is not user friendly, it becomes frustrating because it is time consuming and then if it doesn't work that's even more frustrating because then it eats up your time by trying to get around - it's easier if you could just write your reports in the car when it works, instead of having to come in here and do it. It is faster, it is easier. If the network is down, then that's impossible.
Context_of_Work	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	I think my job entails operations and planning and development for operations at the [County] Sheriff's Office.
Context_of_Work	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	He is a Captain and works in our special investigative unit but we are working at developing some apps that we can use for our citizens to use and [Name] is spearheading that. But he uses a lot of different apps. I mean, just Monday we were talking to a group at ORNL Credit Union in [City] about an app they can use to track bank robberies that are all across the country. So, that gives them a face and it gives them information on what's happened in other areas of bank robberies because many times if you have a prolific bank robber, he travels, you know [crosstalk].
Context_of_Work	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	So, every six to eight hours, we go to every hospital and drive to [inaudible] to drop the mentally ill off. And we've been doing that. We did 3400 trips last year or something like that. I mean, it's just incredible -- incredible what we are doing.
Context_of_Work	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	Yeah, incredible. And we do it all with, you know, we used our reserve unit, that are people that volunteer for our agency to work for free and to do the mental transports. We lost 21 reserves this year. I think a lot of it

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								<p>was -- some of it was attrition, some of it was, you know, I've done this long enough, I want to do something else and but I think some of it, you know, this isn't what I signed up for. You know, I am not Uber for, you know, the mentally ill, you know, and they are spending their volunteer time doing that instead of doing other things they could be doing. So, I think that was a big part of losing some of our reserves, but just can't continue to -- we were just talking in here already. We have not had any -- although our budget has increased but it is we picked up juvenile or because we picked up, you know, animal control or other things have been handed to us to do and it comes with that budget increase but as far as us getting law enforcement positions because we have more people, we need more policeman on the street, we haven't. We just went from five shifts to four shifts so we could put more officers on the street. These guys are working 12 hours a day now and we got to stop that.</p>
Context_of_Work	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	<p>... So, if you are running a 402 or 404 or 400 and you make an arrest. The technology, you can go to a 403, go to [town] and you can do -- you can scout downtown to a Magistrate, swear to your warrant, sign it, paddy wagon can meet you here. A paddy wagon takes your prisoner down here instead of here.</p>
Context_of_Work	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	<p>Prior to this you would drive downtown to the City County Building and see the [Job title], it's right outside the store over here and swear your warrant, sign your warrant and you may meet a paddy wagon here. If you could meet a paddy wagon here, you'd have to take your prisoner [inaudible].</p>
Context_of_Work	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	<p>We've got young guys. We've had a big turnover with retirements that we have had. We have a pension that's in place that's allowed people to retire with a defined benefit, you know, a percentage of their income. So, a lot of guys have taken advantage of that and that gave us an opportunity to be younger and younger agents. And when you get out of here and you are doing that work, I'm 53 okay. Some of my years were dog years, so I have lived 7 and 1 a few, but I am telling you, that's a</p>

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								young man's forte there. When you are out there in that patrol car and you are chasing bad guys, you ain't chasing a 53-year-old man.
Context_of_Work	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	No I mean, the other month I got called. A friend of mine was in [State] and his wife had called 911 and our officers were busy. Somebody trying to get into her house, so I was close. I went by and took two people into custody, detained the third and radioed on patrol to get here. So, I mean, sometimes.
Context_of_Work	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	I have got the mobile radio and, you know, I've got weapons in there and things that I might need, but yeah it is more like an office to me. Then you know, I don't use the mobile battle units or anything like or the terminals like that. I don't have -- if I need to use at all, I will call somebody, you know.
Context_of_Work	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	You know, these kids today -- they all play video games and that's about what it is. It is just a little joystick, I mean, it's a video game. Because you are looking at an iPad and you are looking to what the drone is doing on the iPad -- you are looking --
Context_of_Work	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	We did. Our aviation unit flew up there for them, took pictures and flew medical examiners office up there to get -- and where bodies were and stuff like that.
Context_of_Work	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	That they can order commissary, sick call, they can email, they can do visitation on them, and there is a cost associated with that, it is paid through their commissary accounts. But, that technology is bringing efficiencies to us so we don't have to lay hands on an inmate to bring them to a visitation booth, let their people visit, then take them back, you know. It cuts contrabands -- contraband from being brought into our facility and it cuts that office-inmate contact that drives confrontation. So, our inmates love it. Some people, there was 40 or 50 people that protested it because they were not getting face to face visits anymore and cost associated with it but you can go down to the jail and visit for free. It does not cost you anything. But if you want to set it at your house and visit, like a Skype --

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								you can do that.
Context_of_Work - Multitasking	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S5]: They are so public safety friendly. I mean, we depend on them from the start of the 911 call to get over their network on to [inaudible]. They also own [inaudible] and they also own FirstNet. So, they are so public safety friendly you can't dispute it. But you do know that us and nine other counties in [State] as well as whole bunch of counties across the country [inaudible]
Context_of_Work - Multitasking	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S3]: So it takes a special type of person to do this. It really does. Because there has been people -- I mean, over my span. You know I have trained people and there are some people that are just, they are good but they can't do the dispatch part of it. They, you know, they are great on the phones and then want to move over and things have changed from the way we do it now to back when I did, you know, a 100 years ago, because I have had people come from the call-processing side moving on to Dispatch, and tried to train them and it's not that they are untrainable, it is just, and it's a different type of beast. It's the hearing and being able to listen to four channels at one time and type the information and remember this officer wants this information and this officer needs this information, you kind of got to prioritize. You got to be able to work on the phone and prioritize who gets what information first, because it could determine what's going on, you know, for that officer.
Context_of_Work - Multitasking	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	Multitasking is the number one thing. Being able to truly multitask, not only in doing typing, but in hearing.
Context_of_Work - Multitasking	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	And you'll find out when we get in there. So you have one in your headset which is your primary channel, but then there's 12 more channels that come over your speaker at the same time. Well our fire dispatcher dispatches four different fire departments. So if each one of them has a major event going on, they can't do it. So our supervisor steps in, takes -- so when they have a fire they're supposed to stay on that fire and let everything, all the rest of the work load is supposed to go to the other people and that 99% of the time works, but we can have other major events like a hurricane or a tornado that's come through. It's just chaos.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Multitasking	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	The law dispatchers are a lot busier most of the time, and so the fire dispatchers are the call takers as well, and they work to back up their law dispatcher on running plates and parties and stuff like that. And then, when the gas line breaks and you have this huge input of stuff, then the law dispatchers kind of help back up the fire dispatchers. So they are talking to each other constantly.
Context_of_Work - Multitasking	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	You need to be able to listen and you need to be able to multitask. Multitask is probably the most important one. Attention to detail and the ability to remain calm and professional under stress.
Context_of_Work - Multitasking	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	... They say, as long as just one line's ringing at a time and they only have to do one thing they're okay. But if four lines light up, and then a [PB-teer?] comes in, and somebody comes to the window, they just want to get up and run. And they would tell you that they'd rather deal with a barricaded gunman than sit here and deal with all this nonsense.
Context_of_Work - Multitasking	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	Well we just come in to the office, you talk to the dispatcher who is going off, they tell you what happened over the course of their shift and maybe anything you need to pay attention to but generally no you just start your day, you're on the radio, filing paperwork or whatever needs to get done.
Context_of_Work - Multitasking	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	...You want to help and sometimes when you're not there physically you know I know we're helping, we're helping but you're not there and so yeah I would say that that's hard. Like I said it's complicated sometimes when you're on the phone with multiple people that can be hard but otherwise it's not a real stressful job. Maybe sometimes it's stressful to be bored so and to you know keep alert but that's about it.
Context_of_Work - Multitasking	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	Well sometimes but that's very, very rare here. Sometimes maybe but if we do if I'm on a call for example and I get another call you have to see what the nature of that call is. You do make a decision then about where you need to focus your energy first, you take care of that, you dispatch that then you go back to the other call so some of it is about prioritizing and understanding what needs to take priority in those kinds of

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								situations and so it's about figuring out who needs help the most and sending people there.
Context_of_Work - Multitasking	COMMS	S	Other Public Safety Personnel	36-45	11-20	Male	COMMS-S-001	[S3] So over the 40 hours of the weekend, it was a complex series of events that went on. So in [town name, we had the first incident which started out as a vegetation fire that spread to two apartment complexes, then to a commercial building and then back to vegetation. So it became a large complex fire. We had 15 families that were displaced. It was a four alarm fire, so a significant number of personnel on scene. In those types of events, we mobilize our mobile command and communications vehicles to facilitate interoperability amongst different agencies. As well as rehabbing radios and all those kinds of things. So that was the first one. They left that one to go to a second, new vegetation fire. While they were there, a third one was started. You know, this appears to be arson. While they were there at that second one, a larger third fire came about. So we had dozens of different fire agencies come in and we moved all of our assets from the first [town name] fire to this other complex, which we called the [name of] Complex. So it was three separate fires that we managed as one with all of our resource pools so.
Context_of_Work - Multitasking	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	... You run your traffic. But if we're if we're busy with the phones, and we're slow to giving you that information back, have some kind of understanding that okay, maybe they're busy on the phone, and they got tied up doing something else. If we say stand by on that, understand that it's just two of us, and we're both trying to fit all between other radio traffic and phones.
Context_of_Work - Multitasking	COMMS	R	Manager	36-45	11-20	Male	COMMS-R-011	... But unfortunately, we have to wear so many different hats. It's good because we get to meet more people. And I never thought, granted I have 12 years into the job, but I never thought I'd know as many people as I know from, not just across the state, but across the country.
Context_of_Work - Multitasking	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	So definitely being able to listen, but at the same time you have to be able to multi-task while you're listening because not only are you talking to somebody on the phone, but you have deputies asking you for information, calling out traffic stops, or you have a fire department

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								talking to you. Or you have to dispatch the fire department while you're on a call.
Context_of_Work - Multitasking	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	It takes someone that is very calm under pressure. And able to multitask all of those things that take place. But it also takes someone who really is part of the team because at the end of it all it takes whoever's in this, in communications, together to get through whatever's going on.
Context_of_Work - Multitasking	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	..... I wouldn't like say OCD but somebody that's particular and somebody that can do a whole bunch of different things at different--at one time. Somebody that can multitask.
Context_of_Work - Multitasking	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	Because you could be on the phone, the radio could be going, nobody cares that you're, you know, your radio is on, nobody cares that you're on the phone. EMS could be talking while police officers are talking, the fire department, 3 of them could be talking at one time so it's just like you have to kind of listen to a whole bunch of different stuff going on. But if you have like a lot of kids that's a good way [Laughing] so you could be a great dispatcher because if you can hear all of them that's kind of like how they are, like when they're on the road, it's almost like well these are our kids, we got to take care of them. You have to answer them. So it's like even if the phone is on or whatever like you kind of just got to grab stuff from different places.
Context_of_Work - Multitasking	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	[Sighs]. Busy. Many times overwhelmed with... with the amount of responsibilities that they have. They are expected to do so much with... with not just the technology but with learning new things, keeping up with multiple policies and procedures and being able to apply them in a situation that is very, very fluid. An emergency situation is not just, oh, it's the same old thing. Everyone has its different challenges.
Context_of_Work - Multitasking	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	Looking at multiple screens. Up to 5.
Context_of_Work - Multitasking	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	I mean, it can get hectic in here, it definitely can, but we usually--we handle it pretty well. We usually--the phone is ringing, and if we're both on something, I'll take over a call, or she'll take over a call, one of us will

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								answer the phones, and then we keep going, but it definitely--especially during football games, it definitely gets heavy volume, but we handle it pretty well.
Context_of_Work - Relationships	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	...And so I know who to call, internal, but then having contacts available to me out in the field that I've either met, or made throughout the years, or by policy, I can float a policy up real quick and get, okay, what did Lexipol say to do. And how do I get that information quickly to me because I'm standing in front of a burning building, of which, I need some help. Or I got a hazmat scene that I need help yesterday, who do I call
Context_of_Work - Relationships	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	... With [State], I mean, we do a lot of mutual aid with agencies, so a couple of our rigs are specifically mutual aid deployable to other parts of the state. So we always, about this time of year, get kind of the reminder of, "Hey, by the way, you got to drink water. You got to stay in the shade. You got to prep your body, rhabdomyolysis." We get all those warnings of, "Hey, look, this is dangerous. If you get too fatigued, you could end up in the hospital. Here are the warning signs." We've gotten way better.
Context_of_Work - Relationships	LE	S	Not specified	Not specified	Not specified	Male	PS-S-002	Yeah. So I always tell people, "5% of the time we deal with 95% of the public who loves us. 95% of the time we're dealing with the 5% of the public that hates us."
Context_of_Work - Relationships	LE	S	Not specified	Not specified	Not specified	Male	PS-S-002	... I think in other communities-- but, I mean, we have a 98 and a half percent satisfaction rating in our community. I mean, if we were Ferguson, Missouri--
Context_of_Work - Relationships	LE	S	Not specified	Not specified	Not specified	Male	PS-S-002	Oh yeah. No, we work with [City] on occasion. We work with [City], right next door. We don't typically work with [City]. I mean, it would have to be a pretty major event. We have gone to [City] recently. The nice thing about [City] is they are a part of the EBRCS system, which is [County] and [County] radio system. So there's interoperability there.
Context_of_Work - Relationships	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S2] Mmhmm. Yeah they [call takers and the other agencies] communicate with them every day. They work pretty closely with the other agencies assisting them basically with any criminal justice

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								information that might be needed or researching or getting them reports or phone numbers or whatever it is they happen to be requesting but they work closely with all of the responders.
Context_of_Work - Relationships	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S3] No you've moved to some software as a service. Solutions now are public notifications that we send out to citizens. Those are hosted in the Cloud. I think [name] is consistently looking at customers and trying to find pieces she mentioned that they're implementing a fire piece into their ProQA their query software so that they can better gain information from the customer. I think when I first got here you guys had foot cards exclusively that you were using now that's automated and so I've seen a lot of changes since I've been working.
Context_of_Work - Relationships	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	I think it's handled pretty well. Here it's all funneled through me, but I can always go to my Chief if I need some more brass or something. But we have a pretty good system. The fire chiefs meet regularly, and they decide if they want to have a policy they all have to agree. We don't do different things for different departments. And same thing for law. The chiefs meet. If somebody wants to propose a change, they all have to agree to it.
Context_of_Work - Relationships	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	So he got passionate about that because of a call that we had where a fellow died because he didn't know he could call 911 because he didn't speak English. So [Name]'s taken this to educate the Hispanic community that we can get translators really quickly. And so, he wanted to meet today. So I have that meeting. And then, my chief called me and wanted me to come down here.
Context_of_Work - Relationships	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	So, no, it's okay. It's great. I don't mind at all. But those kinds of things come up occasionally, but there's a fair amount of meeting with people.
Context_of_Work - Relationships	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	.... I don't really think we have a communication issue between me and my staff, anyway. And we're trying to iron it out. I'm trying to iron it out with all the agencies, as well, because they don't know me that well yet. And we've set up some quality-assurance channels where people can email into a-- kind of a blind email into what's going on with them and

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								what they need and what we're not getting done right, or maybe sometimes what we do well. So I don't think we have a communication problem internally.
Context_of_Work - Relationships	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	Well, we're lucky, and I think that-- my boss is that way as well. Very open, very honest, and he's empowering for people. And I'm a good example of that. I mean, who would-- I didn't interview for the job. I didn't apply for it. I didn't know that I wanted it when they sought me out to come and be the director. I thought that was crazy. I figured I would retire as a supervisor. But they saw something that my predecessors did, that he thought that I could do this, and so the chief goes along. That's the kind of an organization that it is. I don't know if everybody's that way in our county, but I know that the town of [City] is, definitely. So, yeah. It's a good place to work.
Context_of_Work - Relationships	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	Yeah. They are. And so their product from their research is hopefully going to be like a self-care kit for dispatchers. It's dispatch-specific. And I really wanted to get involved in that because I want that kit when it comes out. I think they look like they had about another a year ago for that. And I can't remember the lady's [name] or something. Dr. [name]. I wouldn't be able to spell it. She's Swedish.
Context_of_Work - Relationships	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	Yeah. So our take on that is to try to educate the Hispanic community that if they're going to text, they need to use an English keyboard and make it work for them because we can't seem to figure it out.
Context_of_Work - Relationships	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	... So what we've done in the past is we've gotten data from [county name] County, which the GIS department has sent it through to us and it's not the same, so we have to clean it. We have to make it match, and what we've decided this process that we're doing and everybody's on board with this again so far anyway, that 911 is going to live in the comm center on our own server, [town's name] got a server for us. We got an [inaudible] license or whatever, we need there. And we're going to send it out to all these other entities. And so it's our data, we own it. We store it. If it changes you need tell us, and we'll send out once a month or once every two months or whatever. Here's the new data set.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	It's going to be-- like I said, we've been working on it for months, so I think it's close now. The town of [town name] has been very proactive with the technologies. We have fiber everywhere, and we have cloud servers, so we have everything we need. They've taken care of that. So I don't think it's going to be that big of a project. We're hiring an outside company to do the initial set, and so, she'll provide us with that, "Okay here's is your base."
Context_of_Work - Relationships	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	We do as much as we can. Every public event that we go to, that's our goal. And we have a mobile communications truck that's got four consoles in it, the dispatcher consoles, but we can also put the satellite up and open up Internet. And so, we set all four of those consoles up with [name] for people to sign up on. And they come in and tour, and say, "Hey. How would you like to--?" And they can do it right there. Instead of having to give them a piece of paper or whatever. They can--we have, we'll have a dispatcher help them out or whatever. Old people like that, because somebody else does it for them.
Context_of_Work - Relationships	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	...We split the county into four; it's east and west basically but east law and east fire, and west law and west fire. And the fire dispatchers work with their law partner. The law dispatchers are a lot busier most of the time, and so the fire dispatchers are the call takers as well, and they work to back up their law dispatcher on running plates and parties and stuff like that. And then, when the gas line breaks and you have this huge input of stuff, then the law dispatchers kind of help back up the fire dispatchers. So they are talking to each other constantly.
Context_of_Work - Relationships	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	...And then as far as what we call mutual aid, when because we're on the border of [name], [name], [County], [County] and [County], so anytime we have a jurisdictional call that one of their units is closer, or when we need to go over into these other jurisdictions, we call either on the mutual aid radio channels or on our phone system, we call them directly and ask for mutual aid. And we have mutual aid agreements with everyone except for [City]. They're the only jurisdiction around here that doesn't play with anyone. They're their own little sandbox.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	They don't give help and we don't ask for help. They're just kind of their own thing. There have been a few rare occasions when they've had massive fires, that we've sent fire trucks down there. But that's every five to six years. Very rare. But for the most part, between [name], [name], [name], and [name], it's every day, about at least a dozen times a day, we're going there or they're coming here.
Context_of_Work - Relationships	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	--the local people that are trained. They have all the EMS equipment. They come in and they stabilize that patient and then when the transport unit shows up, they take her to the hospital.
Context_of_Work - Relationships	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	...So that's been a problem up here because of that, but there's been a lot of training and the good thing is the longer that some of these firefighters have been up here from the field, that's one of their transitional things they have to learn about, is understanding these people that work up here that are now on call takers aren't EMTs. They don't respond out in the field. They don't know what it's like to be in your shoes, as much as you don't know what it's like to be in their shoes. And once they kind of grasp that, they may not agree with the responses but at least they shut their mouths [laughter]. At least they're a little bit empathetic, of-- okay because I've been on both sides of that. I've taken phone calls where I've heard the person's last breath because they strangled themselves
Context_of_Work - Relationships	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	Generally. Out of the fire department, out of I think it is 1,200 employees, I think, there's only a handful of us that are qualified to work here. So we all work with each other quite a bit, whether it be on overtime, work substitutions, so I could work tomorrow and I know all those guys and gals, and they all know me. And so it's a fairly tight-knit group.
Context_of_Work - Relationships	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	Yeah, so I was talking to him about that. I'm generally the liaison from the duty operations chief. So if the duty operations chief has a question about something, how a call was handled, that falls under me. And of course, the police. We work side by side with the police, so I'm generally the liaison between the police and us.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	[name] and I used to be on the same shift together. He's a good guy, so be careful [laughter]. If you need anything, please just reach out via email.
Context_of_Work - Relationships	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	Right. They say, "Hey, is ambulance 841 available?" And they say, "Yep. They're available. Where do you need them?" So we'll give them the information. Then they'll dispatch their unit to come into our county. [name], [name], and [name], we generally use the north mutual aid radio channel for them. So we will call them on the north mutual aid radio channel and they'll call us, "[name] to [name], is Medic 115 available? Or Medic 715 available?". And they'll say, "Yeah. That's correct. They're available." And they'll give us the address right over the radio channel. Right. So we're typing the address in on our-- we call it an II form.
Context_of_Work - Relationships	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	Yeah. Under dire emergencies, they have called us for help and we've called them for help, but we don't have an official mutual aid agreement. But if they need help, of course, we'll send help.
Context_of_Work - Relationships	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	With that they also kind have grown accustomed to a higher standard of living and they also expect that in their public safety so a lot of the things that we deal with are usually maybe other agencies would not respond to but there's kind of something that's referred to as the [city name] Way and that's just kind of used within the government here to kind of refer to the kind of extra customer service that we provide that maybe other agencies do not. We respond to a lot of calls that other agencies would not respond to.
Context_of_Work - Relationships	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	... You know I had somebody what was it someone used a phrase the other day or like last week where they referred to it as like [parkway name] Parkway or something like that and I said it wasn't me it was actually a different dispatcher somebody else said like [parkway name] Parkway and I had and no one had any idea what they were talking about and we called park police where [parkway name] Parkway was. They had no idea. We called state police they had no idea what it was.
Context_of_Work -	COMMS	U	Comms	18-25	5 or less	Male	COMMS-	I'm starting to recognize the officer's voices and I know some of the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Personnel				U-006	officers you know now that I've worked here for a while because we do ride a long a lot, we work with them, we meet them in teletype and stuff like that and so I know them as people and if in addition to me being nervous for perhaps the person on the line because you do get invested in these people even though you don't know them you're still worried about them you care you know.
Context_of_Work - Relationships	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	... So I recently have had to replace four of those [name] phones. Thankfully I pillaged several from another jurisdiction in this area who is upgrading their system so we were able to switch them out because [name] who was recently bought out by [name] they have a very small supply of them left and they are no longer fixing those pieces.
Context_of_Work - Relationships	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	...So it's coordinating with them to kind of keep the system going and healthy as long as possible. I also am in the process with myself, our DTS, our PSIT which is our Public Safety IT Unit and [name] and those counterparts with purchasing a joint 911 telephony system.
Context_of_Work - Relationships	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	...So I'm fully involved in the purchasing of the new system and we have put together a group of stakeholders so our stakeholders are not only those of us here in the communication center but because we are joining our system into one system with [name] a we are also having to get involved the city council and the county board and even on the political aspect they all have to agree on us sharing because we have to have MOU's.
Context_of_Work - Relationships	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	So there are also some talks in the area of potentially building a geodiverse co-inhabitable backup center. So it's somewhere where multiple jurisdictions could go to and all of us would pay into this backup center. That's been in the talks for quite a few years and so we'll see what happens as we start sharing servers and start getting integrated CAD systems together and start buying stuff as a region.
Context_of_Work - Relationships	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	Have downloaded it and it's not cheap for the jurisdictions to pay for. So we do have citizens who are upset that we that [name] County is not purchasing it. [name] has it, [name] has it, [name] might get it and they're

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								like you're right in the middle of all of them why aren't you purchasing it?
Context_of_Work - Relationships	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	The full story of what it means for us to purchase something like that so there's technology out there that the citizens expect. The reason we have the interim text to 911 we have said absolutely not. We're not getting text to 911 until it is fully integrated into our phone system. The citizens demanded it. We ended up purchasing an interim text to 911 that is not integrated into our system.
Context_of_Work - Relationships	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	Under stressful conditions so it makes so you're short staffed, no one can get breaks, people are getting hungry, we're not getting caffeine, we're here for 12 hours, you don't like this person, you don't like that person, an officer or a firefighter is doing something that you know upsets you on the radio then you've got a structure fire, you've got someone who is being stabbed, it's just the culmination of a day or a shift or a night isn't just the calls that come in. So for us having the citizens expect one thing but not know what reality is like in the 911 center we're kind of just the forgotten public safety realm I would say.
Context_of_Work - Relationships	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	So the demographics here are we have a lot and then it's a large influx so during the day because we have things like the [name], we have the airport which do have their own police departments and the airport has their own fire. We assist the airport with fire department. With the airport with the [name] we are their fire department.
Context_of_Work - Relationships	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	We do yes and [name] which is a very small you know maybe 10, 12 square miles it's a really small little city we are their primary answering point as well and we're their fire department.
Context_of_Work - Relationships	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	They have their own fire department their own police department that we transfer to so we are answering calls for a lot of different places and yeah 9/11 we were the we were dispatching the police department because we assisted. [name] has a police department but they don't have enough police department to handle something like that so our police officers watched the plane fly in. Our fire department were the ones there day and night pulling people out and you know dealing with

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								everything from that and our 911 center is who handled all those calls including the influx of calls from the family members.
Context_of_Work - Relationships	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	...So we're working with our fire marshals, we're working with our building inspectors, with some of the tower infrastructure that we have built in this area or just outside in [name] to see what capabilities we have in a kind of tight metropolis area and how we would be able to expand that to really give us good in building pictures and location identification for police and fire.
Context_of_Work - Relationships	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	...But if we need someone if they're not available I still have a small contingency who can go and fill in at the EOC and our responsibility there is really that bridge of communication but we can also fill in in any of the positions that are needed because we do that stuff on a daily basis.
Context_of_Work - Relationships	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	So like I said it depends on what it is. A partial EOC standup could just be well we had a storm come through so I just need JS for mapping, parks and recreation, the ECC liaison you know get these people in a room so we can coordinate the efforts of getting these trees out of the roadway but we don't need all 18 or 19 ESF's to be there. If we do have something catastrophic we will it doesn't even have to be catastrophic it could be something that effects each department we'll call in a full activation of an EOC.
Context_of_Work - Relationships	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	You have to have the buy in from the folks who are using this on a day to day basis. Someone from my IT department may say hey, this CAD is awesome. It integrates with our technology this is what we want to do but that CAD is not good for my people out there.
Context_of_Work - Relationships	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	And that was it. It did not involve anyone from operations. So for me when we started the phones I had several stakeholders. We had the integrators, we had the technology folks, we had the operations folks, we had any kind of every bit of person who might touch or see or work with this system and said what do you want to see? What will work best for you?

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	Exactly. What do you want to see? What would you like to have changed and we didn't just grab one or two we had meetings in here and our stakeholder meetings for operations I had I think seven or eight operations folks from different levels. People that had been here for 15 years, people that had been here for two years, every aspect of the spectrum so that I could get as much information as possible so we could purchase the right product for them which actually is just the upgraded version of what we have which works perfect because it is one of the top of the line products
Context_of_Work - Relationships	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	We had to talk about water ways, there are two islands that are technically [name]. [name] is technically [name] but the only way to get to it is through a foot bridge in [name] so [name] fire department typically responds out for fire department because we can get one of our we can get we can't drive our engines or our medics there but we can take one of our battalion chief or EMS supervisors and we can drive that across the bridge across the foot bridge to assist people but anything in the water [name] County doesn't touch the water so we had to agree on lines and where things touch and there are houses in [name] that are in [name] and [name].
Context_of_Work - Relationships	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	It doesn't mean that they're not going to get the right police department or the right fire department, it doesn't mean that they're not going to get the same responses the same service we're just saying that this particular house should their 911 calls should reach this primary app so in this whole region we all got together in a room and put together all of our information and then once the information was together we meet on a quarterly basis. We all got together in a room and looked at computers and said yeah this line needs to go here, this one needs to go here, this one needs to go this way so there was a lot of collaboration because with the new next gen 911 with the ezenet it's all going to be Cloud based, IP based and that's how calls are going to be routed to us now.
Context_of_Work - Relationships	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	...It's not going to be based off of so we had to work with our jurisdictions throughout this area because of the ezenet and because of

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								those kinds of things that we're doing to really advance this area. So it's kind of a good working relationship for that kind of stuff and then with [name] I said we were sharing not only are we sharing we're purchasing one system one phone system with them and one server will live in [name] and the backup server or the other server whatever one is primary it doesn't really matter to us one lives in [name] and one lives in [name] and we have redundancy, dual redundancy built between our backup center, our primary center and our knock and their primary center and their backup center so there are five locations that are tier 2 and 3 redundant connections between all of them
Context_of_Work - Relationships	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	... We're staying separate but we're sharing the technology and we will have the capability of pulling on other jurisdictions so [name] City we'll be able to pull them on and they can share our servers. We can pull in [name] and they can share our servers and we can pull in different entities and we all work off of one system. We all upgrade together as one group and we're looking to do the same thing with our CAD.
Context_of_Work - Relationships	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	Yeah we haven't found it too much else in other places. They may work with each other or one entity may be like the governing body and everybody else gets that technology because this is the bigger guy and it gives the technology it decides the technology for everyone else but this is the first time that we've been able to find which two different jurisdictions joining versus there are states that are completely joined together but that was a state who said you're going to do this.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	I mean for me it's a little more exciting because you have your hand in more of it than you normally would. Because I've worked in another dispatch center where we were in a basement, and we had no contact with the public whatsoever. So here you're interacting with the public on a daily basis. Not only are you taking the calls, you've got all the people coming in. Whether it's a policeman, or someone's lost, or someone needs directions, or someone needs a ride, or someone's homeless, asking for help, or a victim of domestic violence. So you're interacting more with the public and then you're doing more-- like the paperwork.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								Because in the other dispatch centers, I mean, you're not submitting warrants and then getting them back and typing up subpoenas. I mean, I think you're more involved in it so you get a better taste of it.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	For here you have to be I would say, patient, somewhat tough or thick-skinned, just for what you deal with. You have to be willing to work with the public because you're dealing them on phone and in person. And you're dealing with-- I mean, for example, the sex offenders or the probationaries. I mean, sometimes those people are the utmost wonderful people of society, but you have to-- at least in my book, you still treat them with professionalism and kindness. I always treat other people as I would want to be treated no matter what the circumstances are. You have to be compassionate. You have people calling who may have just lost a loved one, or could have a loved one that it's not doing well and is on their way to the hospital and maybe not expecting to make it, or someone's calling in to say that their child's been raped.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	Right. I've been told that I'm the odd man out because after 27 years, I still have compassion. I mean I don't take things home, but I feel for people's pain. When they have a death or something tragic in their life, I try and comfort them. And when the sex offenders come to the window, I'm always nice to them. A lot of them come in here and say that they come here just because I'm kind to them. Same thing with the probationers. Even the chief has said it to me before, "I don't know how you do it after 27 years," because I haven't hardened yet. But it's a job not everybody can do. You have to be able to multitask and do several things at once. I mean you could have the phone's ringing, somebody's out in the-- there is somebody back there screaming for, "I need some paperwork." And then you got a probationary that comes in and says, "I got to get to work. I need to do my PPT." Sex offender walks in and says, "Well, I'm on my lunch break. I need to register." So you're [hustling?] around doing 10 things at once. But it is unique in the sense. And that could be any dispatcher. You have to be able to deal with whatever's thrown at you which sometimes is crazy.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	Our community is small, so it's not the big city. You get to know a lot of the people. And since I've been here 17 years, I know a lot of the business owners and a lot of citizens. So they'll call or they'll come in and then they all address you by your first name. So in that sense, it's a little more-- you get a better feel for it because you start to get to know people. Even when people call you [laughter], you get to learn their voices. You don't even have to ask their address or their business because as soon as they call you, you're like, "Oh, that's so-and-so," and you just start typing in the address, where on the big city, it's not like that. I mean everything's different. You've got so many different people calling. There's no personal level. Where here, I think, there's more a personal level because it is a smaller department. And you know all of your officers.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	.... If an officer's going to be on vacation, or an afternoon officer needs something done during the day, we'll organize to get over to the courthouse or make contact with the people during the day. But we kind of work together as a team. And, again, that goes with the small department. Where, in some of the big departments, you probably don't have-- I guess it's more like a family here versus just a workplace.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	The fire department, I mean we talk, and they'll stop by here, or they might come in to discuss a call that they just went on... Or even, if I get called calls outside the city for traffic, accidents, any of that stuff, I just put it in, and then I call over and say, "Hey, I just put one in for you." Just because it's just as easy, we all look at the same screen, and it's, to me, it's not right to make people repeat all their information, or it someone is in a panic mode, to say, "Hang up and call the sheriff's department," or, "Call 9-1-1." You just get their information and put it in there. And then it's done.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	It's funny, because a lot of people, sometimes you never meet them, but you know their voice, and you can go to a public function, and you'll hear someone's voice and you're like, "Hey, you're so-and-so from the fire department or the sheriff's department," because you hear them on the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								radio or you talk to them on the phone. And like I said, you might never meet them, and you might only see them once or twice, but you kind of get like a rapport going. And you kind of know, by the tone of someone's voice-- it's just kind of hard, I guess it comes with the dispatch thing, where you get to learn people's voices, because even with citizens that call, you can tell if something-- like this morning when our dispatcher called. I said, "Is everything okay?" and she just lost it. She said, "No, everything's not okay." Because I could tell by the tone of her voice that something was wrong.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	... I won't speak for the other shifts, but generally, on our shifts, we'll eat lunch together, if we can, if we're not too busy. Or yesterday, I brought in a bunch of soup, and some bread, and we all sat down and had soup and bread. Or if it's somebody's birthday we make a cake, or brownies, or cupcakes, and we bring it in. And you get to know-- the officers will stop by, they might be going to the park or something, and they stop by for a second, and you see their kids or their pets. So you kind of get to know everybody. We try and get together. We used to be really good about having Christmas parties and picnics, and everybody bringing their families, but sometimes it's hard with-- I don't usually see the other shift, because they come in after I leave and they're already home by the time I come in. So I might not be as close with that shift as the day shift, where you're together on a regular basis.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	...So I talk to those guys everyday, because I might be entering a car, entering a warrant, putting a conditional bond in, a no-contact order. So usually I'll just text somebody and say, "Hey, I got somebody here at the station, do you want me to send them to your station or do you want to come here?" ... . If they have an arrest and they need a full work up, we'll do what's called-- we do a file check, a criminal history, a driving history, depending on what they've been arrested for. So we're doing with them as well.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	Right, and I mean I would say that the majority of it is law enforcement related, whether they're turning themselves in, or they've been a victim of

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								a crime, but we still have the people that come in to get directions. or want to show their child the station. or we have people that come in for tours. The school groups will come in. I mean we still get all that stuff and we'll do presentations. But I guess I could easily say 80% of it is someone that's been either a victim of a crime, or was arrested and charged with a crime and needs to know what happens next, or to get their fingerprints, or stuff like that.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	And again, you get to know all these people. Even if they're here for a short time you know their voice as soon as they call, you already know where they live, you already know their address. And that's the beauty I guess of a small town. But we get a lot of unlocks, a lot a lot of private property crashes, a lot of crashes on the streets. But we get a ton of unlocks and I think we're still the only agency in [name] that does unlocks. We carry the tools in our car and that's a service that we provide for free, so we do get a lot of calls for unlock. I think I had two yesterday. You'd be surprised how many people lock their keys in their car.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	...we deal with the public when they're having problems and so that sometimes I'm going to say it's painful. That might not be the right word. I don't know what the right word is there but I think you know people call us when they are in their time of need. They call us when they have a problem and so that's hard I think to be able to respond appropriately and in a way that can calm them down and make them feel better even though you're not there and that's I think is another hard piece of all this but being a dispatcher especially is that you're not there. You're on the phone and so you're kind of once removed from the problem but you're still trying to help with the problem and I think that that's hard too so I would say that it's a hard job some days.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	Well I think you have got to be patience. You have to be patience with people yeah with people and you've got to be patient with well like I said sometimes it's boring and so you've got to be kind of okay with being there and keeping yourself busy and doing other things. Sometimes that

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								might be I don't know paperwork or whatever needs to be done and sometimes you know we do get the deputies will come in or the sheriff's there and we've got some banter and we got some chatting and that but I think you've also got to be a self-starter because again there's not always it's not like there's always something happening right and so then you got to figure out what you're going to do. You have to be a good communicator.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	That's the biggest thing really. You've got to be a really good communicator. You have to be good with people. We do have people sometimes coming into our offices so you know you've got that one on one and you have to be able to deal with people. Sometimes they're not happy, sometimes it's just you know have a chat. We have a lot of older folk in our community and sometimes they just like to stop in have a good old chat and then go on their way and so got to be good with that. You have to be able to follow a protocol right because when people call we have to be able to get the right information to give that information to the deputies so they can go out and do their job and actually help those people so communication skills, communication skills, communication skills you've got to have those.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	... We do have trouble getting dispatchers and keeping dispatchers so sometimes you know we might have to cover an evening shift or we might have to cover a weekend shift or you know somebody might ask you to take a shift for them but generally yes we're doing the same shifts all the time and that usually means we're communicating with the same deputies out there because they also they rotate maybe a little bit more than we do but not a lot and so we know each other. Again this is small enough to that there aren't that many of us so we do know each other and we come in and we can talk and I know who I'm talking to over on the radio.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	Well we've got the public certainly. Sometimes they come in here so sometimes they're in here and we're just talking but usually they're calling in and so they'll call if they got a problem. This time of year it's a

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								lot of we get a fair amount of accidents this time of year so generally the public. We do dispatch all the 911 calls in the county so usually we're talking to law enforcement, we're talking to the Sheriff's deputies but sometimes we might have to send a call out to fire and so each of these small communities have their own volunteer department but they'll all be notified when something's going on because often times they'll have to send trucks from different towns to help in the case of a fire and here we've got a lot of wild land fires, we've got a lot of brush fires and so often times it's bigger than just one town can handle so fire and we've got also got an EMS. That's a company we send out too so that all comes out of this office.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	Real good, real good I would say yeah. We all get a long here. Again we're a small county office and we all get along. Some you get along with better than others. That's always true but for the most part and most of us know a lot of the firefighters from these different small towns because we live here and we all support each other so I would say that's the biggest thing we all support each other.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	Well I've never thought about that but I think that yeah that could really. You know what they sound like, you know when they're having a good day, you know when something's wrong and so you can hear a lot in people's voices and so I would say yes I think that it helps that we do that.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	No not really no but sometimes the Sheriff might give you a task. You know if we've got we go do fundraisers or we go help out in different communities or sometimes it's organizing something like that maybe so you might need to make some phone calls and again that's where you need those communication skills right because you're talking with all different kinds of people so sometimes though the Sheriff might have to ask for you but that's about it.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	I think that has happened one time since I've been a dispatcher, yes and that was difficult but I think we got it back within 7 minutes 6 minutes something like that and so that's rare I think. It's not something that

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								happens often no. So but we work the sheriff was here luckily and called our cell phone, we got somebody here and it was minutes.
Context_of_Work - Relationships	COMMS	S	Other Public Safety Personnel	36-45	11-20	Male	COMMS-S-001	[S3] Yeah. So we're trying to wrangle a lot of things in our county, right now. They're all positive things. We're working together in getting things going. On the radio side, it would be awesome if we had future radios that were LT capable as well as private or private network capable. So that they could seamlessly roam.
Context_of_Work - Relationships	COMMS	S	Other Public Safety Personnel	36-45	11-20	Male	COMMS-S-001	[S3] --so they're working with different communities that speak different languages and that kind of stuff as well so, yeah. All that's going on right now.
Context_of_Work - Relationships	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	.... The challenge is when you get a call, a certain call, or we call them hot calls. And you have to handle that accordingly to make sure that that person that's on the other end that dialed in, get the help that they need, but also that officer that's responding or the firefighters that's responding have the knowledge and know just what they're walking into, so they can give that person the assistance that they need.
Context_of_Work - Relationships	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	It's very rural. We don't have a very high crime rate. But lately we've been experiencing more elevated [inaudible] burglaries, and we're not too much on the shootings. We do have them, and we have had issues where we would have those hot calls. And we have to make sure that we get all the pertinent information, such as how many weapons they have, is that person still armed, can you see him, are they irate? If they are, can you put yourself in a different area? That way you can give me the information that I need, and I can get you the help that you need, so we can we can neutralize this subject, make sure that if we can't subdue him easily, then it's just something that just had to happen that way. We have those calls.
Context_of_Work - Relationships	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	Hmm. Some of them are lower class. Well most of them, lower class. We have mid-class, not too many upper class. But mid and lower. So the lower class is sometimes difficult to work with, because they're at a high

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								demand. They want what they want, when they want it, and how they want it. And some people, you can't get them to understand I'm only the dispatcher. I take the message; I relay the message. Now when that officer or when that person that you need that help, that assistance from gets back to you, it's not my fault. So we take a lot of heat from the lower class. Mid-class, they're more understanding. They'll give a day. It'll be well, we called into to your dispatch center and reported this, and nobody never came out. Well sir, I'm sorry about that. I will relay that message again and get them as soon as possible. And they'll understand; they're more understanding. It's very understanding with the lower class being, some of the areas, speaking of like [inaudible] area. It's more of a higher crime rate, more the burglaries, more of the home invasions that happen around that area. So in certain areas, we know which, what to look for.
Context_of_Work - Relationships	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	...We have different alarm companies that the residents get for their businesses, their residents, that we interact with. And it's basically getting their information and getting the homeowner's information or the business owner information so we can get assistance out there to see if their business or their homes are okay. We also interact with the school systems, making sure everything, if we have to close down due to a hurricane or tornado, we get the superintendent in. What time will you want to do something? What do you want us to put out, because we put out that information.
Context_of_Work - Relationships	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	Mm-hmm. Sheriff, fire. We have the two police departments, which is [police department names]. We dispatch for both. For EMS, we transfer straight to their dispatcher. Now we do assist their dispatcher in getting that information. If they lose the call or if they couldn't hear the caller, and they call back, we already got that information, so we'll in return give it to them and make sure they have the assistance if they need any assistance going in. Then we assist them in doing that also.
Context_of_Work - Relationships	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	How we deal with it, when one of them is not busy, not on their busy days, or they have to go on light duty, you come and sit in with us. So

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								that way you can see how hectic it can get in less than five minutes. It doesn't take long. It doesn't take long at all. Another is some of the calls, those that you can't help, it's just like you just have to sit and try to be that calming voice until somebody gets there, or even if it's down to the last, that's the only thing you can do. Those are stressors.
Context_of_Work - Relationships	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	Each of the towns, yes. And mostly our [department], they are very good about coming out and handling the calls that their municipality gets. Sometimes with [department], we may not have an officer on certain days. He'll come out maybe the weekend and maybe two days out of the week. And our sheriff office has to handle the calls that they don't pick up, so...
Context_of_Work - Relationships	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	With state police, it's mostly on [Street] that we normally have to call them out for, or if we have an accident that happened on our highways, that it's multiple vehicles, and the deputies will say we're going to let state do this one because it's multiple vehicles. So normally getting in touch with state police is very, that one is very easy. We don't have any complications with them.
Context_of_Work - Relationships	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	In the event of our 911 system going down, if it ever, if it has to, normally the last time we ever had to do a rollover was during one of the hurricanes. And it hit a tower, one of the cell towers. We lost our capabilities to receive any calls coming through from AT&T and Boost Mobile, the different cell phone providers. It'll roll over to our neighboring, our sister stations as [City]. And what they'll do is they'll call us and give us that information, what they just got from that call, and we'll give it out like that. So we have a partnering system in the event of that. We have everything in place whereas, okay, we got a problem. Let's call [City], let's do this, and we have our plans.
Context_of_Work - Relationships	COMMS	R	Manager	36-45	11-20	Male	COMMS-R-011	Pretty smooth-going. I mean there's always hiccups with anything. There's always clash of personalities, but I think one that we're forgetting is being we're so heavy with petrochemicals, the Homeland Security side, and we have to deal with the plant managers or emergency responders from the different facilities, whether it be a

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								[inaudible] bulk storage to a fertilizer plant, I mean we have to interact with all those folks also... So we're almost the speed dial call of a lot of people because when's the roads going to open, when the bridges are going to reopen, that type of thing. So I mean it's, and they come to us for a lot of answers that sometimes may take us a little while to get back to them. It's quite interesting.
Context_of_Work - Relationships	COMMS	R	Manager	36-45	11-20	Male	COMMS-R-011	We have a unique bond here that we do not see in many other jurisdictions. And when I say that, it's the way the [State] Disaster Act is written, is that the emergency preparedness director is also the [Job title] of the [County]. We have always had the posture of it's law enforcement. There's a law enforcement side of it, and there is an emergency preparedness side of it or emergency response out of it. And we draw a line of demarcation, if you will, between those two facets. It's hard. But like I said, we have that that that bond that unique cohesiveness, if you will, between the law enforcement in Homeland Security/emergency preparedness side that you don't see anywhere else. And I think it's not so much of hometown, everyone knows everyone, as much as it is building those relationships prior to the emergency happening and gaining that respect and gaining that trust in everyone. When I was in the fire service and very active in the fire service probably 25 years ago I guess, the deputy chief at the time came from industry. And he'd always tell me, says you do not want to make you friends at 2:00 in the morning. You want to make it at 8:00 in the morning over a cup of coffee. And that's one thing I've always preached to my staff here, and make sure that I try to extend that olive branch to everyone ahead of time.
Context_of_Work - Relationships	COMMS	R	Manager	36-45	11-20	Male	COMMS-R-011	... We brought toward 289 residents to [County] to get them out of harm's way. They wasn't forced. It was a recommended evacuation of 289 people who wanted to go.
Context_of_Work - Relationships	COMMS	R	Manager	36-45	11-20	Male	COMMS-R-011	... But unfortunately, we have to wear so many different hats. It's good because we get to meet more people. And I never thought, granted I have 12 years into the job, but I never thought I'd know as many people

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								as I know from, not just across the state, but across the country. Never would I dream I'd have friends in [4 city names]. I just never, never thought that that would ever happen.
Context_of_Work - Relationships	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	The community here, everybody kind of treats everybody as family. I know that there is a lot of I guess issues with police officers right now. I haven't ever encountered that in this [County]. Like I've walked into a grocery store in uniform, and I get people, thank you for your service. I don't have anybody calling me derogatory names or anything, so definitely it feels like a family in this [County]
Context_of_Work - Relationships	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	It's definitely much bigger than our older office. Our older office is probably the size of this room and the room next to us. So it got a little crowded. And unfortunately when you're on top of each other like that, not everybody gets along, so you'd be surprised what a little room does [laughter], but yeah, this building is a complete shock.
Context_of_Work - Relationships	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	Well they were work the same shifts we do, so they get used to dealing with people, the public, and they have their typical, we call them frequent fliers, which is the people who call at least once a week. So we know them, we know where they live, we know basically, we can guess what they're calling about.
Context_of_Work - Relationships	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	No. Well I've been here long enough I know probably about 90% of the deputies on the road. But for the most part, I work with the same deputies.
Context_of_Work - Relationships	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	Correct, and after a while, when you start working, you listen to their personal problems, you create another family sense, I guess. You listen to their problems, you listen to their accomplishments, what they have going on, 'cause the end of the day, everybody's human. They're not just a dispatcher. So they have other things going on in their lives, and people like to talk about other things.
Context_of_Work - Relationships	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	For the most part they're good. I've spoken to dispatchers and upper administration. I'll still, I'll tell the same jokes. I don't like to treat people differently or special because I wouldn't want to be treated special just

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								because I have a rank, so when I speak to upper staff or upper, I guess would be upper management, I'll tell the same joke, or I'll pick on them too.
Context_of_Work - Relationships	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	Yeah, absolutely. Actually, see Monday nights. Well the Mondays I'm off, our rotation actually goes out for steaks. We go and we talk, we'll talk about I guess serious situations, stuff that deputies worry about, the dispatchers worry about, 'cause we don't always find out what happens once the deputy goes on scene or how they solved it. So we don't always talk, but sometimes we talk about football, or it's not always the same thing. But we definitely spend time together outside of work, and I think that helps the working relationship for sure.
Context_of_Work - Relationships	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	Okay. So you have one sibling that's calm and mellow, and then you have one sibling that tends be neurotic. Like everything has to be a certain thing down to the T. This agency is your mellow agency, and then some agencies we deal with are neurotic. You kind of wish your mom had adopted them out [laughter].
Context_of_Work - Relationships	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	Not that [inaudible] dislike them, but it I wish you were adopted.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	It takes someone that is very calm under pressure. And able to multitask all of those things that take place. But it also takes someone who really is part of the team because at the end of it all it takes whoever's in this, in communications, together to get through whatever's going on.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	Yes. I find it does. You tend to take them in as your children. You're the mom. They're the children. They've got to get home at the end of the shift. And you develop a friendship with them and I find that helps.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	I feel like we have a really good relationship with them. Dispatchers actually go to patrol shift meetings or at least the senior dispatcher supervisor on shift will attend those patrol shift meetings to keep that communication open. As far as the public, I mean we've... we've done several demos with the agency where we go out and we won't have communications, they won't be coming in here, but we'll have pictures or

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								a slideshow of it, information of different things or bring out—we have a training thing where you call, pick up one phone, it rings another phone, just to show them how it works. And we especially use it with kids at schools.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	I think sometimes the hours in itself gets to you. You know some people aren't cut out to do a 12-hour—it can get mundane at time even though you're not knowing what you're picking up on the next telephone call it can still be mundane in a way. And I think sometimes being cooped up in a building for 12 hours is enough, with 2, 3 or however many people you have on shift at the time and you just need to walk away from them. It's kind of like family every now and then you need a little break. Sometimes that's what needed [Laughing].
Context_of_Work - Relationships	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	We have a very good relationship with our fire department. Of course, we dispatch for 8 of the 9 of them in the [County], or no, 8 of the 10. There's 2 of them we don't dispatch for. I personally to go fire chief meetings every other month.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	So they physically see me and my major which is only two steps below the sheriff and sometimes the sheriff will actually come with us to that fire chiefs meetings to ask if there's anything that we need to address, if there's any issues or just sharing information back and forth basically. Besides that they are... very well aware and used to call me [Laughing] if they have a question or a concern. But I also do sometimes bring along a dispatcher randomly, just a random one that hasn't been, hasn't met them, especially the newer ones just so that way they can put a face to that voice that they're going to hear on the other side.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	So we have a very good relationship with them. Other agencies, they only police agency we don't dispatch in our [County] is [City] Police Department because they have their own dispatch center at their office but every other one we actually dispatch for. We have a very good relationship with them as well. State police, our local troop is actually just outside of our [County] in [Town] and we have very, very good relationships with them. We probably know all the troopers 'cause most

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								of them come from us so [Laughing].
Context_of_Work - Relationships	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	They actually talk on our radio channels if they want a warrant check they can come to our channel and ask our girls.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	Luckily we got into a company that was very small and it has grown to be very big now. So we got in when our sheriff spoke to the owner at his own little booth in a corner at a convention. So now he has a huge booth [phone ringing]... [Laughing].
Context_of_Work - Relationships	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	So day to day it's constantly... constantly improving in that records management system 'cause we think of one thing and we have--we have a person at our agency that specifically does that record management software. That's his job. Find ways to do this or fix this or make this better. So each day that we think of, well, can we do this? And we call him and he'll work out the backend of making sure it doesn't interfere with anything else or change anything on something else because we change this. And if that makes it simpler then that's where we're going. So.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	There have been a few incidences of... a grass man cutting the T-1 line. He wasn't supposed to do that. But we have a very good communication with our 911 center. Their lines are actually defaulted if their center goes down no matter what agency it should have went to, it's going to default to come to us and we turn into 911 for the [County]. And when that happens they send 2 or 3 of their 911 operators to come here and help answer telephones. It defaults to our 7-digit lines if any one of their 4 911 ports are active at the time then it will default to ring to our agency. So we can pick it up.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	Oh, yes, we are assigned partners. The only time we'll switch out is if somebody takes off or if you're working overtime and you work on another shift but, yeah, we have the same partners.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	Not as well as I think we should know each other. I don't know how to explain it or why but not really.
Context_of_Work -	COMMS	R	Comms	26-35	6-10	Female	COMMS-	My partner and I, our relationship is wonderful. She's like a sister to me.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Personnel				R-014	We've been working together for years now and like we talk about everything. Work, stuff outside of work our families, like it really--she really becomes a part of your family because we spend just as much time with her as you do your family.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	So yeah. And it makes working here and doing what we do a lot easier to deal with when you have someone that you can--you know, kind of destress with after something stressful happens. So.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	It's good. It someone who can relate to what you're doing through.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	Oh, your partner, well your relief comes in at about 5:15, 5:20 and you go over shift change, tell them everything that's happened, who all they have working for them, and just kind of make small talk and they make their coffee and you leave and that's it.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	Well with the patrol and EMS and fire, I think, you know, we should--I feel like if we knew each other better that that would help a lot. If we... even if it was just, you know, spend a little time with each other outside of work, just to like really get to know each other and understand each other and even have a class about communications that would help a lot. I feel like if we could even get some of them to come and sit in and see what we do it--that would help a lot. So.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	Okay. Basically on a, just a regular day, on most days, we just--our main focus is the public and so basically keep them happy and keep their needs met. So if it's something that they call in for, there could be a dog barking to somebody stole something from me last night. We have a lady that always calls us about... she thinks somebody came into her place which we know she doesn't but I mean basically just on a daily basis--we just take calls from people and... try to not be... I guess mean or have an attitude, things like that. Basically talking to the public is what we do all day. Then we'll talk to the officers and get them where they need to go. We do NCIC entries like putting in people and stolen property and things like that. We talk to EMS and the fire department every day.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	Huh. It's a--it's an okay place to live I think. Most of the times that--we don't say the Q word, but most of the time things stay pretty calm. Everybody kind of knows each other 'cause it's a small community. We... kind of... I don't know. I guess they're okay people [Laughing].
Context_of_Work - Relationships	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	My partner is fun [Laughing]. My partner is one of my dear friends now since we have started working together. So that helps also. I mean you can work with somebody that you--I mean you have to be here for 12 hours, like you're basically here just as much as you're at home. Like sometimes I feel like I'm here more than I'm at home [chuckling]. So it--that helps, too, being able to have a partner that's good and, you know, does her part as well and then you can talk to her and whatever after that.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	The public is fine [Laughing]. The public is the public. I mean they want what they want and that's fine, so you have to kind of put yourself in their shoes like it could seem like this is just the stupidest thing [Laughing] what you're calling about but if it's up there on your list an do you felt the need to call then let's work it out. The public is the public [Laughing]. But the other officers, for the most part, it's good working with them. Sometimes they get like, I guess 'cause it's predominantly male and we're females, they get like these little macho attitudes or whatever but if you just brush them off and don't entertain them they normally just calm down.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	Not really. We do change with the same set of people, like it's 2 of us and then there are 3 people permanently on our shift for the road. And so we hear the same voices but we don't know them like that. We don't know them like personally. We just hear the voices also.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	Because you flow better with people that you, you know, that you know and that you--you're comfortable with, you know? You can like if I'm talking to somebody that I know, I know what you're going to want to know. So you're my--if you're my sergeant on my shift and I know well this is how you normally take calls and I know you know it's okay for me to tell you anything then I'll be quicker, you know, to tell you everything I

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								might know, even if it's something that the person didn't tell me but if, you know, I don't relay know you like that then I'm just going to tell you what they told me. Like if I--say for instance we get like a 911 call and the 911 call is from somebody that I had a run-in with personally or something or somebody I know personally.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	Hmm. I, huh, honestly the most stressful thing about my job is the people that I work with. It's not even the people in the public 'cause I actually love to work with them and I love the--you know be able to talk to them and solve their problems and even just listening to their stuff, like I said, it's entertainment [Laughing] it's like it's really entertainment to me. But I think the most stressful part is the people that I work with. And sometimes you kind of feel like, especially in communications, like you're not valued I guess 'cause you're not the one that's going out and doing it. But I'm like, well baby, 'm the one that sent you so [chuckling], you know, my job is important also. That to me is the most stressful part.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	[Laughing]. Probably. It probably would. So maybe like if it was... something where we... sometime that everybody saw each other and got to, I guess, mix and mingle that might help.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	Mm-hmm. It's normally it comes back up fairly quickly. AT&T is who they use for all that or whatever but they--they're pretty good with it because when we call them no matter what time it is, like they're right on it. So they'll transfer our 911 calls for us and then we'll just--whenever they have an emergency or something that agency will just call us and we send whoever needs to be sent.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	So the relationship is really a positive relationship. Yeah, dispatchers are generally thought of as that... that entry level... position but I don't think of them that way and I don't think our sheriff does. I think he looks at them as someone who is not only a very important link from the public to the public safety resource, they are the link. But they are a very important link. And he tells them this in all of our staff meetings that dispatch, the dispatch radio room, whatever you want to call it,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								communications, is the voice of his agency. And so whenever he says, and he really means that, that he wants these people whenever they answer the phone, he wants them to be the most professional people because they are his voice to the public on a day to day basis.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	It is encouraged but it is limited. Because we don't want people just packing in here and having a social hour in here when these guys are really taking 911 calls and dispatching real emergencies, the background noise will get there. But they try to encourage people, as you're in the courthouse, stop in and see dispatch and stop in and say hey to these people that you hear all the time but you can't put a face with the voice. So I think that helps both sides realize that that's not just some animated voice, it is a person that's sitting there who is really--they have feelings and if you're ugly to them on the radio... then, hey, you know... that's a real person whether it's the dispatcher being ugly or it's the responder being ugly or short or snippy on the radio or even the phone. They're real people up here.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	And then it gives the dispatcher the chance to look at them and say, hey, that's a real--that's a real person that I'm talking to and whenever I sent it, hey, you know he's got a family at home or she's got a family at home that I'm here for an important reason and that person is the reason. So.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	To send on a call it's all about the same but to actually converse with them it's much easier to deal with the law enforcement than it is with fire because most of our fire guys being a rural area they're volunteer. So when they finish their call they're going home.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	Where the law enforcement guys, they've got to write a report. They've got to get additional information so they're going to call and have that more casual conversation with the dispatchers than the fire guys will in most cases.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	Every day we deal with different jurisdictions whether it's our neighboring agencies, whether it's state, whether it's at times federal, Coast Guard, the FAA, dealing with planes that are coming in and flying

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								over our area low, small planes, drones, those kinds of things because we're getting those calls and calling the FAA at the [City] Airport, calling those--those types of resources but state police would probably be our biggest...
Context_of_Work - Relationships	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	We got dropped because it was out of [County] and so those--the FAA can play a big part in helping us at times.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	People sit up further towards the edge of their seat and they [Laughing] they just answer as many as they can and as quickly as they can, getting the pertinent information. It's not a--it's not something where you can say, hey, call me, get me one of the secretaries from downstairs to come up here. Myself and the lieutenant in communications will try to sometimes go out there and help do what we can. But again it's--by the time we--they call us and say, hey, can you come in here, it's usually, okay, we're slow again [Laughing].
Context_of_Work - Relationships	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	So I think our public education efforts through NINA and APCO and our local public information officers are going to probably do that really well. But I hope to implement it here in the next few weeks.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	I'm sure there probably are. I think that sometimes we do overthink things and we rely on our technology and I always tell a story [chuckling] whenever I teach classes for new employees and I was telling them this yesterday in the class that I'm teaching this week. TTY for the deaf people. The deaf community... very rarely do we get calls for service from the deaf community. Number one, they're a very small population, a very important population for us to serve and make sure that they have access to the services but we got a call one time. This has been many years ago, probably 20 years ago in [City]. I got a call on a TTY call of a, and I think it was a medical call, but because it was an individual, hearing impaired individual, we needed to make sure that it was just a medical call.
Context_of_Work - Relationships	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	I'm a public official. So I want people to call me. I have my public--my sheriff's office cellphone on my Facebook site. But if you don't know how

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								to get to it, it doesn't help you. So... those are things that we look for. Technology helps us so much. Just being able to ping a cellphone for the appropriate reasons, with the appropriate authorization from a judge, and that's the other thing of being able to get to these people, sign a document, a warrant or a search warrant to be able to do that, getting that back to us really quickly. Used to, we had to bring it to them, sign it and bring it back. Now electronic signatures, ship it to you and you've got it over, over the applications, faxing applications or email. I mean technology has really helped us there being able to share data about certain events.
Context_of_Work - Relationships	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	We always have some fun calls. I like dealing with the people. I like dealing with officers. When I can get them all their information, and the call is easy, and it's set up, and we can do the steps that make it successful, that's when it's exhilarating. It's exhilarating when I can catch the perp, when we have someone, that we're behind someone chasing them, or we're dealing with possible bomb threat or something, we're able to take down that individual through protocol, properly, without any things being crossed, that's the most perfect, exhilarating day.
Context_of_Work - Relationships	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	We serve faculty. We serve students. We serve visitors. We serve fans. We serve celebrities sometimes. You have, ESPN will come here. You have, [players] comes here. You have people from, some police officers from other countries just want to come and see what we do. We've had them all over. So we serve even the locals around here. I even live right off campus [inaudible] in an old neighborhood. Sometimes we deal with some of them because they're concerned about traffic. They're concerned about football issues. Current situation events such as the shootings and stuff, they're worried about that, what we would do during that. So I'd say we deal with everybody.
Context_of_Work - Relationships	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	... I know when a professor, if he gets rid of the pianos in the music school, he'll get those at the, or send them back in the first part of May and then get them back in August, and I always deal with him. He's like I remember you.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	I like that. In a lot of agencies you'll find, especially in [City], they will not come to the station. They're stationed, and then COMMS, I want to say, I forget what they call that, the big EBRSO/EMS, and all them, they are their own station. They do not interact with, I don't like that as much. I like to get to know mine. They get to know me. They feel more comfortable when they know you, I think. And I think that that's good.
Context_of_Work - Relationships	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	We're like a family. [talking about the other dispatcher]
Context_of_Work - Relationships	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	They're kind of like honestly, it's kind of like brothers and sisters. They're like, a lot of these guys here are like my brothers. We kind of see them that way. We fight and argue with each other; we laugh and stuff. They'll bring us, they'll surprise us with cookies, ice cream sometimes. Their wives make us things, like cookies and stuff like that. It's definitely a family. And then when you speak to those outer dispatch agencies, you get to learn them as well. Not as close, but you still know them. You're like oh, I remember you.
Context_of_Work - Relationships	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	Oh it does, 'cause say a night shift, we're not as busy, if we are busy. But if we're not as busy, they will come in and sit with us. Or at night, if we have a serious situation, we're talking to them, sometimes we'll crack a joke over the phone if it's, like if it's not going to be tasteless or anything. But it does get a little bit more personal, I would say at night.
Context_of_Work - Relationships	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	It can be very thrilling. We have some calls that, you know, they're very--we need to get an officer out there as soon as we can. It is fun, we do have fun, we are like a family here, so we do have fun, but when serious things happen, we get on the ball and we get them out there.
Context_of_Work - Relationships	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	The officers? It's really like a family. I mean, we get along, they're like, you know, like I'm sure she said, say it with me, we're just like a family, so it's like, they're our brothers and sisters, you know, and we all--for the most part, we all get along, and it's nice. I like it, I enjoy it.
Context_of_Work - Relationships	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	I mean, it can get hectic in here, it definitely can, but we usually--we handle it pretty well. We usually--the phone is ringing, and if we're both

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								on something, I'll take over a call, or she'll take over a call, one of us will answer the phones, and then we keep going, but it definitely--especially during football games, it definitely gets heavy volume, but we handle it pretty well.
Context_of_Work - Relationships	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	S1: Okay. Great relationships with people in, you know, like the dispatchers know people? S3: Oh yeah. S1: Like, you can recognize voices and you know them and their relationships are what, I mean, do they -- you build a relationship or how does that work? S2: Sometimes yes and sometimes no.
Context_of_Work - Relationships	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S4]: Like, I prefer -- like you know people in there they prefer to socialize with them. When I was there, I wanted to keep work "work" and officers were officers and I didn't want to be friends with them outside of work.
Context_of_Work - Relationships	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	S1: I know, okay. Okay. So, relationships with the folks that you work with, I mean, people know everyone around, you know? S3: Inside the centre? Oh, absolutely. S1: Yeah, I mean it's a tight -- S3: We see each other more than we see our families.
Context_of_Work - Relationships	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S2]: And personally, we become family. Like I don't see my family very often, so it's like. Some people have Thanksgiving at home, and they are like -- hey, come over. So --
Context_of_Work - Relationships	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S5]: They are so public safety friendly. I mean, we depend on them from the start of the 911 call to get over their network on to [inaudible]. They also own [inaudible] and they also own FirstNet. So, they are so public safety friendly you can't dispute it. But you do know that us and nine other counties in [state] as well as whole bunch of counties across the country [inaudible]
Context_of_Work - Relationships	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	We don't make any money out of this, it's just a nice perk to help people out.
Context_of_Work -	COMMS	R	Not	Not	Not	Not	COMMS-	And not the brand new GM of Ambulances that's had the job for three

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			specified	specified	specified	specified	R-019	weeks. So it depends. We work as a team; I was the GM over at Ambulances after I transferred from Fire. So I went from Fire to ambulances for two years and I went, 'I really want my life back, I can't do this' I could but I really enjoyed riding my motorcycle [crosstalk]
Context_of_Work - Relationships	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	I'm 52 years old and I really don't want to keep doing what I was doing when I was 20. So this position came open and I migrated to here because I was really the only one that knew the CAD, knew the communications center and all that stuff, so we hired a new so I help him. The fire department, the fire chiefs, once I came from there [indiscernible] we need policies on how you want this truck dispatched on calls, how many trucks do you want dispatched on this type of call, this type of call, we built all those policies, and then it's easy for me training my dispatchers. If you're within policy, I got your back 100%. You violate policy; you're on your own. APCO; you APCO a call correctly and we find out the APCO codes need to be updated, you're covered. You don't use them, or don't do them, you're on your own, I can't protect you.
Context_of_Work - Relationships	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	So it's a lot quicker and easier. I can do one card instead of having to do all the cards. So I do like the new technology. But on the back of that, so APCO and [indiscernible] County have had a falling out.
Context_of_Work - Relationships	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	They're going to a new 800 that is supposed to make it more easier to talk to each other once everybody gets to 800. But there are a couple of different frequencies. So this is an 800 radio, but I sit and listen to it because I always want to make sure we're playing nice together here in there. This is our EMS UHF radio, the big and fat antennae's are VHF radio, and then the others are 700-800 radios that's on our TBRS system. Now the new system that the 800 is changing to will combine this radio and that radio on the left.
Context_of_Work - Relationships	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	No. The only time they talk to them is when they areas transporting, from the stadium, they'll call them and tell them they're transporting to wherever and we can see them on the map and then if we need them for an emergency, we will pull them out into our system, we just move them. So they have their own agency for events. It's the same with [County] so

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								if we need an ambulance right now from [county] because we're low level, we'll call them and then we'll transfer them from the [county] to [county] or change their agency and they'll show up on our [inaudible] and when we get done, we are going to transfer them back to [County] and they show up on [County] systems and they know that they are back.
Context_of_Work - Relationships	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	The other is, is if somebody would do that and not communicate. We're really, really fortunate here. So in [City] and [County], we all meet all the chiefs; we have the LAPC meeting once a month. After that meeting, all the chiefs, we have a meeting and we talk about these things. Fire department, police department, sheriff's department, rural metro, we're all there. So we do great; our EMS region, Region 2, our 16-county region, we meet monthly. We have the best of the best people to work together. I'm a private ambulance company, and we work great with all the other private ambulance companies and the other government ambulance companies. We meet and we take care of each other, we pool our money, sometimes we get money from the health coalition.
Context_of_Work - Relationships	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	The PD-SLEEVE's you can change [indiscernible] it's the same thing as the Broselow, it's got the dosages from the weight and the size, but we can individually change and update and it costs half as much. So it costs half as much on the front end., but we got a grant through the health coalition and we just brought those for every ambulance service in 16 counties, through that grant. So, when we do stuff we don't do it just for us, we do it for everyone on the region.
Context_of_Work - Relationships	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	That part of technology, we've had some issues. There may be a little bit even going on with this new radio system, we have egos. Depending on who is in that position, there's egos, there's politics, so we're able to get through all of that because of the relationships. I'm a big relationships guy. I mean if you have a relationship with somebody that they like you and they somewhat trust you, or do trust you, it's much easier to conduct business than 'oh crap, here comes that guy again.' So I'm really big on that, so I take time to meet with [City]PD leadership outside of

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								here, same with the communications liaison for [City]PD, he and I talk all the time. If an issue come up, I shoot him an email, 'go ahead and check into this', because I'm not first blush and there's personalities in there. It could be a personality conflict. But I look at everything as so we do adjust culture within EMR which is how I've always done business.
Context_of_Work - Relationships	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	My job is to make sure they're not mistakes that cause harm to anybody, or delays. But when I deal with our people, when I deal with irate people-- we had people that called the other day; I called 911 you showed up at my house non-emergency - yup; your big toe hurting for three days is non-emergency, but [indiscernible] - I don't care, I called 911, I want an ambulance here emergency. Doesn't work that way. I have those conversations all the time.
Context_of_Work - Relationships	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	It will get me in trouble with him. But I truly believe that if you operate, then you have nothing to hide, and you own up to your mistakes.
Context_of_Work - Relationships	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	It is much easier to fix it with less social media repercussions. Now you're going to have some social media that will tell one truth and trying to get attention [indiscernible] I don't address it, I don't touch them. But the mayor does. They've got some stuff on the social media and I've gotten a call from the mayor over the [inaudible] 'hey you need to look in to this' and I go "already looked at it and its not true and here it is" and he'd be like "okay". But they, the politicians pay attention to social media. They do.
Context_of_Work - Relationships	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	I would like to see technology to continue to move forward to true total interoperability between every agency. I've heard that my whole career. For 30 years, we've been talking about interoperability and politics always gets in the way of interoperability. More than money; egos, politics. I'm in charge. There is no "in charge" and there is less of that here than I see in other places but, you know, over the years the police and the fire get about -- [State] code states that if a fire department on the scene of a fire then the highest ranking fire official is in charge of that scene. The police hate that.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	And get you included and those are the things that I have been working on tremendously over the last 10, 12 years trying to fix and get those -- and we have that here; we'll talk, we'll communicate, and they'll say something and I'll go "I had no idea that was an issue for you" [indiscernible], alright, let's look at changing that, how do we fix that? How do we make it better for you, but not punish us? And then they're like "oh we didn't realize that went on for you" and it's all about that relationship and communication and that talking. Because if you don't have those talks then [indiscernible] freaking pigs. But if you're not out there, you don't know, if you're not having those talks, you don't know. I mean there're a lot of people the thing you say, "I didn't know that", people won't know.
Context_of_Work - Relationships	EMS	U	Not specified	Not specified	21-30	Male	EMS-U-001	...We also function as a legal liaison between the courts and our medics, because obviously we're in a situation where our medics are subpoenaed a lot for all types of court cases, whether that be family violence, or DWIs, or murders. I mean, whatever it is. We have a lot of that, and we try to be the go-between and make it smooth, both for the court system to have access and get our medics and get them scheduled off, and then our medics as well
Context_of_Work - Relationships	EMS	U	Not specified	Not specified	21-30	Male	EMS-U-001	...So there's some technology going on there as well, both what we use day-to-day sitting at our desk, but also how do we get information out to people on the phones and to their mobile tablets and things so that we're giving them good intel about how busy we're working right now, and how busy are the hospitals, and how do they make better decisions or help patients make better informed decisions about where they want to go. If a hospital's really busy, then we can offer them the next closest hospital that's in the same network.
Context_of_Work - Relationships	EMS	U	Not specified	Not specified	21-30	Male	EMS-U-001	...We want to be open. We want to be transparent. We want to share our successes and our near-misses with the community, because it only makes us better. And that's kind of cool.
Context_of_Work - Relationships	EMS	R	Field Responder	26-35	5 or less	Male	EMS-R-002	Best job in the world. Never the same. It's always something new. It's exciting. You get to work with your friends. You get to help the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								community out.
Context_of_Work - Relationships	EMS	R	Field Responder	26-35	5 or less	Male	EMS-R-002	So we do that and then from there, I'll go get dressed usually, put my stuff on. I have a cup of coffee with the guy coming off the shift just to talk about the kind of the things they did, calls they ran... From there we cook breakfast. So we go ahead and we cook breakfast. Make sure that the new dude's putting out the flag. It's really important. From there, we eat breakfast and we check our truck pretty much from the top to bottom, make sure everything's where it's supposed to be, make sure everything's operating, the full on water, all your lights work, any issues that you could have the night before.
Context_of_Work - Relationships	EMS	R	Field Responder	26-35	5 or less	Male	EMS-R-002	We have this kind of brotherhood here, we joke around, but when you get to a call, it's game on. No, I don't think there's anything that I would say that was detrimental at all. I really don't. I think that I've always felt very confident in my leadership in as far as where they take me, what they tell me to do. I don't ever question that because I trust them.
Context_of_Work - Relationships	EMS	R	Field Responder	26-35	5 or less	Male	EMS-R-002	...But you got to remember that you're here to help people and they need your help. I kind of call it my game mode, like I'm in game time. So [Name] takes a step back-- I'm sorry. I take a step back and I'm here to help somebody, and I'm here to help them in any way I can. So I take myself out of the equation and try to-- I'm just here to help you.
Context_of_Work - Relationships	EMS	R	Field Responder	26-35	5 or less	Male	EMS-R-002	...So I think that is awesome having an app that I can look at and be like, "This is what they took." Because when the medic unit shows up behind us, if you just kind of give them that look, like "Hmm, I don't know. It's this." Then you didn't do everything you could to help somebody.
Context_of_Work - Relationships	EMS	R	Field Responder	26-35	5 or less	Male	EMS-R-002	So it's pretty big because I want that person to feel like we are there for them.
Context_of_Work - Relationships	EMS	S	Field Responder	26-35	6-10	Male	EMS-S-016	...So whoever is in charge of the shift in-- on the nights that I'm in charge, I have a little briefing that we go over, whether hospital statuses, pertinent information like that. And then everyone goes and does housework or chores. They inventory everything on the units to make sure that everything is there that we're going to need for the shift. And

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								then we have dinner and then after dinner, we do training until 11:00 PM. And then at 11:00, everyone pretty much goes to sleep.
Context_of_Work - Relationships	EMS	S	Field Responder	26-35	6-10	Male	EMS-S-016	Our crew, I would say the average length of service on our crew is three years. So we've known each other for a lengthy period of time. Some of us have been here for longer. I've been here for six years. My co-officer has been here for 10 years. So there's a lot of longevity. But there's also new people coming in. So for them, we're trying to, basically, indoctrinate them into how we operate and those kinds of things. The dinner communication is very informal and kind of, "How was your day? How was your week?" The training communication is, we allow the providers that are in training to basically run a call, communicate as they think they should. We don't get involved until the end when we do a de-brief. That's more us providing feedback to them. All in person, but those tend to be one way in each direction during that time. And then as people call or walk into the station, it's a little bit random what we do. People come in for blood pressure checks and we need to provide some kind of a community service to them. Other people call with questions about their smoke detector battery that won't stop beeping. So that's a phone conversation. It just depends what it is.
Context_of_Work - Relationships	EMS	S	Field Responder	26-35	6-10	Male	EMS-S-016	--big incident here. But by and large, I mean we don't-- we need to communicate with the jurisdictions that neighbor-- that surround us. I don't necessarily need to talk to my friends in [State] I used to work with, on the radio from here. So it's basically making good with your neighbors and having good communications with them.
Context_of_Work - Relationships	EMS	S	Field Responder	36-45	11-20	Male	EMS-S-014	...Our boss allows us two hours of PT time, so I normally do some kind of physical training. After that I normally go around the county. I drive around in a Dodge Ram pickup truck in which I am available to respond on whatever calls I would like. My boss gives me a lot of leeways to what calls I want to run. But there are certain expectations that if there's a pretty significant call like if it's a stabbing or shooting or cardiac arrest, they kind of expect us to be on those kind of calls. And we can run at them at any time.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	EMS	S	Field Responder	36-45	11-20	Male	EMS-S-014	And depending on what kind of call that goes out and I decide to run, I see what those providers need to make their situation better. If we're doing a cardiac arrest, I tend to talk to the family and start letting them know what's going on. If their family member is passing away, or whatever they need to answer questions and making that incident just a little better... Providers, I typically mean other firefighters who are also EMT trained.
Context_of_Work - Relationships	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-015	So it is a second family. In many cases, I know more about the guys I work with than my own family in the sense of these guys I see every 3rd day for 24 hours a day. There's no hiding feelings, or stress, or things that are going on. So we're very close-knit. We depend on one another for everything. We see it may be our 10th call of the day, but still, it's the first time that a citizen in the county may have utilized calling 911. So we see people at their worst, most of the time or often. And that is a very stressed impact amongst all of us, but we share that stress amongst one another. And when I say I knew more about them, I mean in the sense of my family lives all over the US or can be all over the US, so I may only see them once or twice every couple of months.
Context_of_Work - Relationships	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-015	...These guys I work with, they live in multiple states, but we all come to the same goal at the same station every third day. So I see them more frequently than I do some of my own family. And when you come to work for 24 hours, and you're eating and sleeping together, and expressing the same life goals, life interests in a profession, you're more open to communicate those opinions and views. And so we certainly know if everybody's having a good day and we know if everybody's having a bad day.
Context_of_Work - Relationships	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-015	I would say things are good outside the station. Most people want to be out in the public. Most want to go out and train and do things, let people see what we're doing. A lot of interaction with children a lot of the time. They're almost a magnet at times, anytime there's a fire truck at a grocery store there's some kid that's coming up to see it. So I would say it's very positive image most of the time...

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-015	...Within the last couple of years, it's the the first that I've ever had to really work hard to maintain that professional image, in a sense of a lot of negativity within community or the changes of social media, civil unrest. And not going into too much depth of that, but everybody loves a fireman per se. Some people may not understand salary or taxes or why we're sitting in front of a grocery store, but I think education's the best part of that.
Context_of_Work - Relationships	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-015	...So I think communication's pretty easy in the sense of we're very fortunate in the county that we work in. Even neighboring counties that we have, and I'll use the word interoperability, we have a good means of communicating both through a lot of training or unofficially that we know one another. We know who's working. We have a lot of background knowledge of different stations and what to plan for, and although our department's very large, it would not be difficult for me to call [County], which would be just shy of an hour drive, so it's a large county. An hour drive and talk to a fire station to an individual that I really don't know. May be able to pick him out of a photo album, but to be able to communicate with him or address an issue or concern, and get immediate feedback from them just by picking up a phone.
Context_of_Work - Relationships	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-015	[RE: police] So I would say, in a whole, we have a good rapport with them, a good relationship...
Context_of_Work - Relationships	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-015	[RE: police] ...I think we've gotten better with some time, but I also don't know every officer that's in my area. I don't know their first names. I don't have their cell phone numbers. I don't know their radio identifiers. We don't have that relationship to communicate that personally, I guess.
Context_of_Work - Relationships	EMS	U	Field Responder	36-45	11-20	Male	EMS-U-017	Yeah. I mean, the relationships in the firehouse are usually, for the most part, it's sounds almost cliché because it's the same way as [I would?] describe it. It's almost kind of like a family because we're there for 24 hours. So for the most part, people get along with each other. When we're not running calls, if we have downtime, we're all working together to clean up, doing any kind of cleanup or anything that needs to be done or things that have to be done around the firehouse or be in the same

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								room just talking and watching TV or whatever, but.
Context_of_Work - Relationships	EMS	U	Field Responder	36-45	11-20	Male	EMS-U-017	...they're allowing us to actually-- if the person is in cardiac arrest, we don't transport them as often as we used to. Because it used to be we would just start CPR and do what we had to do on the scene, and then take them to the hospital. Now, we've kind of changed our policies a little bit, where mostly ALS care that we can do is the same thing they do at the hospital anyway. So rather than transport them to the hospital and have them declare the patient dead pretty much when we get there, we'll work them for 20 minutes on the scene-- at least 20 minutes on the scene. Do everything we can. If we don't get a rhythm back or anything, then we'll call our medical controller and ask for permission to just terminate there on the scene. And at that point, it becomes a [City]PD issue because then they got to call the-- they'll handle notifying the coroner and anything else to do with their investigation. Usually, it's an apparent natural, so usually, it's not anything related to a crime, but they still have to do their little investigations.
Context_of_Work - Relationships	EMS	U	Field Responder	36-45	11-20	Male	EMS-U-017	...There's other private ambulance services in the city, that operate in the city. They don't have any interaction with us as emergency responders or first responders. They do just mainly interfacility transports, taking the patients from nursing homes to the hospitals and back and forth. So, I guess, even though we aren't using them for 911 services, as long as the-- to the extent that the nursing homes utilize them, it takes a little bit of a load off of us because they're using the private ambulances to do some of these patients. Again, a lot of times though, too, even some of the nursing homes a lot of the times will call us, and it's a patient that could have gone by private ambulance or whatever.
Context_of_Work - Relationships	EMS	U	Field Responder	26-35	Not specified	Not specified	EMS-U-004	[S3] Occasionally, you'll forget to turn over. They'll be switching back and forth if multiple calls are dropping. And if you get canceled when you're halfway there. There's no written report for that, but you have to go back to the main frequency, and every now and again, you'll forget, and dispatch will just politely inform you that you're on the wrong channel.
Context_of_Work -	EMS	R	Supervising	46-55	11-20	Male	EMS-	...Like yesterday, I came up to [City] for a couple hours just to hang out

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Field Responder				R-007	and talk. We had a meeting in the morning, and then to hang out with the crews and talk to them. I moved to another station. I hung out with them and talked, and then there was kind of a little flurry of calls, and then it was kind of chill with a couple of calls in the middle of the night. And then today we did interviews all morning from like 8 o'clock until noon, and now I'm doing this [laughter], and then there was a transfer, so I had somebody else do my job while I was in the interviews. So she got the transfer at the door, and then-- it's just that kind of thing where the day dictates itself...
Context_of_Work - Relationships	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	...And we used to be two separate agencies. One in the west end. One in the east end. So there was a little bit of cultures to mix when we merged...Around 2012, 13. It was kind of a slow process that was happening behind the scenes without the people knowing that it was happening. We all kind of had our suspicions [laughter] that it was happening, and then it was announced that it-- I think they had to do some legal things behind the scenes to make sure that it could happen before they told us it was going to happen, and then said, "Oh, never mind. It's not going to happen." So there was that. And I worked in the east end first, and we had three stations, and they had two and we merged. So now we have five. But it's gone fine. It just took a couple years to transition into and changed things for both ends of the county when it happened.
Context_of_Work - Relationships	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	And you're coming from the slow end and this sort of seasonally busy end, and that never end transfers and their end transfers, and had a way higher property value, and that was managing themselves okay financially. But because of financial downturn, and because a lot of our money is based on property taxes, and because it takes two years for the property taxes to actually trend one way or another, even if they're going down, it still takes two years. They were in trouble financially. So it was to their advantage to merge with us. And their person that was in charge of them, saw all of that. And I think it also makes us stronger overall as an agency, to be together with five different fire departments.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								Fire departments sometimes like to take over EMS agencies, and if you have one through out the county with five different fire departments, it's a lot harder for one fire department to say, "I'm going to take your whole thing over when they only cover a certain part of the district."
Context_of_Work - Relationships	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	It's like a little household, kind of. There's five stations and there's generally two at most, and then with the supervisor it-- one leader, and there's three. And then in the winter time, we'll up an ambulance usually for 12 hours. So you could have two to five people in a station at one time. And everybody has their own bedroom, and then there's a kitchen in every station. There's a workout room in every station. Some stations, you have your own shower and your bedroom. Some, there's a couple extra showers. In [City], there's three bedrooms, one shower, two bathrooms. It's an older station. And then the brand new renovation that we did, everybody has their own bathroom in their bedroom which is whatever it is, may not be necessary because not every bedroom's being used. But there's a potential that are better-- could use it for grooves. So that's why they did it that way. So it's like a little household...
Context_of_Work - Relationships	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	...Basically it just depends, the daily life things. We have chores everyday that we have to do. Then people might have their own personal things they want to accomplish that day that might require driving some place. And then you run the calls as you're supposed to run the calls. And then you go on transfers through a list of-- we have a list of people, and we just go anywhere. And you go to the bottom and you go. And then some people cook together. Some people cook separately. Some people leave leftovers everyday. It just depends. Some people grocery shop together. Some people rotate cooking like, "I'll cook dinner tonight. You cook dinner tomorrow night." It's like a little family. So I mean, you spend 48 hours with these people, so.
Context_of_Work - Relationships	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	The thing is, you have to find people that you can get along with. It's almost like we can train you to do the job. But if we can't get along with you, there's no point in having you work with us. So it's just like any other living situation where you have to compromise with people. And that's it.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								I don't know...
Context_of_Work - Relationships	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	Yes. We use laptops for trip reporting. So every patient, we have a trip report that we have to write about them. And then it goes to a server, and it goes to billing, and it goes to the hospitals. So they can have a report of what happened before they ever got there. And different places have different abilities to make it better for the crews. And some places focus on-- I mean the billing is important because you need the money to keep doing the job. But some places it seems like a little higher priority [laughter] in making it better for billing, or QA, or research, versus the people that are running the 10 calls a day, who have to write the 10 trips reports per day...
Context_of_Work - Relationships	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	[RE: trip reporting] ...So [City] used to be-- I used to like it better than this place. But now [City] getting a new one and it's very similar to this. But it's all about billing. It's because Medicare, specifically, likes to deny. They look for ways to deny billing. So they have all these codes, and all these different patient types, and all these different things that they want everybody to fit into, and it doesn't work that way. People aren't numbers. So there's a lot more drop boxing stuff into stuff in order to make it successfully billable. And less focus on just making it something that I can do that's accurate, legal, but also concise. And I can get it done in 15 minutes instead of 25. It makes a big difference...
Context_of_Work - Relationships	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	[RE: trip reporting] ...And this is not happening with anyplace that I've ever worked yet, but I've heard it talked about so It's probably going to happen, where if somebody doesn't want to go to the hospital you can be like all right, "I'm going to video tape you, and I'm just going to talk to you and say, here's the risks of you refusing. You understand that this could be going on with you? This could be going on with you and you accept those risks?" And they say, "Yeah." And that's way better in court if the family's saying, "This paramedic--" ... That look, they clearly had decision-making capability. We clearly explained to them the possibility. We told them five times, "Will you please come with us?" And they would go. So now I think it's better in some ways...

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	[RE: trip reporting] ...some places have ways to transmit like the EKGs. So you take an EKG of a picture of somebody's heart on the ambulance, you can transmit it to the hospital. The agencies where I work, we don't have to do that because we have a relationship with the hospital that they trust that we can interpret it as well as they can interpret it. What we're saying is happening is what is happening. So I haven't worked in an agency where you have to transmit it before. Some places you upload the EKG into the trip report and then I have had that, and other stuff that you upload. And it's mostly to try to protect you...
Context_of_Work - Relationships	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	[RE: trip reporting] ...some are tablets, some are tough books. They're not that dissimilar. Touch screens are pretty big, and that kind of thing. And then some of them. they call information, drops in automatically. Some of them you have to tell it, "Drop this in here and connect these two things together." And then they have the ability to sign the refusal on the screen, sign the acceptance of billing on the screen so you need less and less paper, stuff like that.
Context_of_Work - Relationships	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	[RE: trip reporting system] So each ambulance has it. And then the people do different-- in [City], one person runs all the calls all day long, and then in here, they usually switch every other call, so you just share with somebody. Sometimes if you have multiple patients in [City], then you're like, "Here I got [inaudible] and you write it." Like if it's a car crash and there's three people and they refuse or whatever, I'll write that one up, or I'll write those two up and you write this one up, that kind of thing then you switch it back and forth. And you log in each time as yourself so it knows that you're creating this trip so it can come back to you if there's any issues. And here, it's the same way but they usually just switch off person. You just identify yourself as the person that was taking care of that patient on that call.
Context_of_Work - Relationships	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	[RE: trip reporting system] you have to log in every time. But it's not as hard as you think. So the computer program's already there. The laptop's already up and running, and then you say, "I want to create a report," and it's like, "Okay, log in." So you just put a login and a password and then

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								you say, "I want to make a report," and it says, "You're creating a report by [Name]. Is this correct?" And you're like, "yes." And now you're in. It's not like a-- the computer doesn't have to boot up each time you do that or anything like that. But yes, you have to kind of sign in as that primary person.
Context_of_Work - Relationships	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	we've gone from-- so I've started where we had van ambulances, which they still use in some places, but they're all diesel, and they've slowly, slowly moved. If you want a certain size ambulance, specifically one that works best in a city or isn't huge. And mostly, people that buy the huge ones are firefighters, and I'll leave that alone. But a normal size ambulance, like we have, that's basically a pickup truck [inaudible] or whatever, nobody wants to make them anymore. So Ford and Chevy are the last two-- Mercedes makes something, but they've gone from diesel. Nobody makes diesel anymore. So now they make gasoline like a V10 engine. So they get five miles to the gallon. But they're powerful enough and they're more reliable than diesel, but there should be so sort of incentive for companies to keep creating ambulances and there's not. They've stopped. There's no money in it.
Context_of_Work - Relationships	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	Like a lot of things in this county, it's a cooperative effort. There is a mountain rescue group. But they're sort of an arm of us unofficially. I mean, we paid for their building and a lot of our members are cross-trained. We work with the [Organization] out of the [Name] Airport. They have the high elevation training center.
Context_of_Work - Relationships	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	[RE: responders] So I still remember everybody's name, but [laughter]... Some of them I can't put a name on all of their kids, but I used to [laughter]...
Context_of_Work - Relationships	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	...when there's a call for [City] they just air the call and they say, "Attention, [City] ambulance. Here's your call. Here's your location. Here's what's going on." We can get that information on a mobile data terminal, as long as we have cell service [laughter]. And so that's all great. Now, in EMS, you never know how many calls you're going to get or when, or

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								anything else. You may get three calls in [City]. All of your other ambulances are 45 minutes away, so that's not going to do you any good. So all they know to do is throw out the call on the open airwaves and say, "[City] ambulance, you've got another call." And it's up to us to sort of triage those calls. Supervisor picks up the radio and says, "Hey, ambulance 2. Can you come up here to [City] and help with this call?" as opposed to location based dispatching, which, if you had a map and you could see all your ambulances on a map, you could tell which ones were available and which ones was the closest. Then you would optimally send that one. We don't have the technology installed, currently, to do that. And it would solve problems and it would create some, too, because it creates increased workload on dispatchers, who aren't that familiar with how our system works. I mean, they don't work for us. They don't know all our policies and how people move around and how long it takes to do this, that, or the other thing...
Context_of_Work - Relationships	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	I mean, I can't make any of my employees do anything. Okay. They're here 24 hours a day. I've done their job. It's not easy. If you throw all kinds of harder stuff to make their job harder on top of it, it's not going to work. I mean, I can put all of the sanctions and rules and everything I want on it, but I have to motivate people to want to use this technology and show them the advantage of using it. We get paid faster. We can post statistics that show us what we're really doing, how it's useful. But if it's not to them, what's in it for them [laughter]?
Context_of_Work - Relationships	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	Yeah. The tax payers say, "How much do you get paid to be a [Job title]?" That's how we have people because almost everybody has a working spouse. Well, it's tough to have a working spouse when you're away from home for 48 hours at a time, especially if you have a family. So it's tough.
Context_of_Work - Relationships	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	Yeah. It's difficult. That's probably one of the most difficult parts of my job, is adequate staffing so that they're not getting just beaten to a pulp in a busy season, and there's not a bunch of people standing around getting paid for nothing in the off-season. That's what taxpayers

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								demand, but it's-- you got to have a happy medium. I mean, I'm usually a little understaffed in the winter and a little overstaffed in the summer, and I try and smooth out those curves a little bit, but it's-- everyone complains when the ambulance doesn't show up for 10 minutes or something. It's like, "Where were you guys [laughter]?"
Context_of_Work - Relationships	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	...you got districts in this county, like us, who are pretty well funded. You get districts in this county, like [City], they are completely volunteer. Their budget is, I mean-- we give them our used equipment because they need it. They have no money to spend on anything, so how are you going to apply technology evenly across even as small an area as our county and make sure that it benefits everybody?
Context_of_Work - Relationships	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	There are times, like in the winter, when you cannot leave this county. The roads are closed in both directions. The weather's bad. You can't get in or out by air. You're it. This is what you've got. So if we don't cooperate, it just doesn't happen. So that's just the way it is in a small county.
Context_of_Work - Relationships	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	[RE: Tech ops committee] It deals with the 800 megahertz radio system in the county. And we recommend technical fixes. There's another committee that oversees the financing and the funding that actually runs the system. But we deal with like, "Okay. What vendor are we going to use for radios? Is there somebody besides Motorola out there [laughter] that would give us a better deal?" or, "whose equipment will work better, has better features?" or something like that. So we recommend things like that. We deal with things like the radio template. Who gets how many channels? What bank are you on? And how does it work? [inaudible] running after a guy with a gun in your hand and you can't change channels to call for help. Where does your channel need to be versus the other guys who are mobile who had the chance to look down and change over things like that? How many [repeater?] sites do we have? How many can move forward? Where do we need new ones? How long does it take to get them installed? Things like that. Just all that sort of technical operating parameters of the system. So it's

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								somebody from each discipline volunteers their time and we all kind of get together and go, "Oh. How's it working for you [laughter]?"
Context_of_Work - Relationships	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	We meet every month. And there's one paid radio tech for the county. The county [Job title] is the administrator of the radio system. The county sort of takes the-- they're the bank. They take on sort of the pass-through for the cost and everything, do the accounting and things like that. And again, it's another cooperative effort. So that's what the tech ops committee is.
Context_of_Work - Relationships	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-005	Coming to work, we usually try to get there about half hour, 45 minutes, before our actual shift starts so we can catch the offgoing crew, so we don't catch a late call. And the guys' got kids that they have to take care of. Whatever. Morning starts out usually rig checks. I work on a fire engine so we go through all the equipment, make sure that everything is there. If the crew before us didn't have anything, that's a really fast check. If the crew before us had some significant EMS calls or a fire, then we'll check that equipment a little bit more specifically...
Context_of_Work - Relationships	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-005	...As a backseater, my role is to take care of all the-- make sure that the equipment is there that needs to be there so I do the best that I can do. After that, usually, my particular crew, we will get showered up, figure out what we're going to eat, get to the grocery store, try to eat around-- we shoot for 11:00 to noon, but at my particular station, we usually don't get that. If we get that in that window, that's good. After lunch, time is ours, but almost always, we'll be talking about something. Seems like every day we're constantly talking about something to do with work, of course. That usually lasts till about 2 o'clock or so. Time is ours till around then...
Context_of_Work - Relationships	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-005	...After that, try to get outside and work out if we can, try to work out as a crew. If we have specific training that our lieutenant or one of us wants to do, we'll do that together as much as we can. That usually ends up getting done around 3 o'clock or so. We usually eat supper late, so we'll start cooking around 5:00, usually. Hopefully, we eat around 6:00, 6:30.
Context_of_Work -	EMS	S	Field	26-35	11-20	Male	EMS-	Oh, okay. So we work in a what I suppose politically would be called an

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder				S-005	underserved area. I like it. I take the bus to work. I take the [Name] to the bus. And in the mornings, I don't have any problem, but definitely in the afternoons, I would be more aware if I did that based on what we see. A lot of homeless population there. There's a clinic for homeless people that's right across the street from our station just down the road, and they tend to congregate there. And then there's a liquor store on the other side, so they get their liquor and they hang out in that parking lot there. But they're always cool to us for the most part. I would say I like running calls there because people like us, you know?
Context_of_Work - Relationships	EMS	S	Field Responder	46-55	Not specified	Male	EMS-S-006	So on paper, a firefighter paramedic and a firefighter EMT are paired together, where on a month-to-month basis, those two partners stay together and they rotate to an ambulance for a month, which is five 48-hour sets. And at the end of those five sets, they'll go to the engine for a month, and back and forth. So they have a partnership opposite of them, as well. And the reason for that is-- I think most people enjoy it because it divvies up the responsibilities between fire and EMS more equitably, and the EMS units typically are busier with longer utilization hours. So I think it helps paramedics with the fatigue and burnout of the EMS side of the system. And it also keeps all the workforce sharp in both fire and EMS skills, knowledge, and abilities.
Context_of_Work - Relationships	EMS	S	Field Responder	46-55	Not specified	Male	EMS-S-006	And then, our crews are also very active with community risk reduction activities, so public education, events at the schools or the senior living facilities, or just different community events. And then, we're also responsible for the pre-plans of all the buildings in our primary response districts, as well. So during the business day, we are active in the community outside of running emergency calls.
Context_of_Work - Relationships	EMS	S	Field Responder	46-55	Not specified	Male	EMS-S-006	[RE: doing pre-plans] That is every operations member on a fire apparatus or EMS apparatus. So outside of the emergency calls, there are plenty of activities to do within the community.
Context_of_Work - Relationships	EMS	S	Field Responder	46-55	Not specified	Male	EMS-S-006	So we do closest unit dispatching. So obviously, we have our primary response area that every apparatus is in the respective quarters. But again, being that we're so active in the community, we're all over the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								place all the time, it seems like, so being that they do use the CAD and the MBTs and the AVL to keep track of where we are and who is going to respond to calls. We go all over the place. But, I mean, it always seems like we end up making it back to the house, more often than not, before we have another call to go to.
Context_of_Work - Relationships	EMS	S	Field Responder	46-55	Not specified	Male	EMS-S-006	[RE: dispatch] And so, what's nice about this system is if grandma falls out of bed and she's uninjured, she's just too weak to pick herself up, you'll get just an ambulance non-emergent with no need to go lights and sirens. If there's a cardiac arrest and you need more caregivers than are on-scene, they'll send the engine company and the ambulance emergent to the scene to quickly get there and mitigate whatever's going on. So the dispatchers play a vital role in our system and are very useful to the end-user crews. But we do use TriTech CAD, so it's got the CAD which gives us directions if we need them and call notes in there and all kinds of stuff.
Context_of_Work - Relationships	EMS	S	Field Responder	46-55	Not specified	Male	EMS-S-006	But it's very receptive, as well. I think because the system is busy enough and people are good enough at their jobs that you can have open and honest communications without receiving a bunch of attitude in one direction or the other. Obviously, you're going to have some personality conflicts, but I think those are isolated issues. I think systemically the relationship between the ops folks and the dispatchers are just very positive. Every time I've ever had an issue or needed to have some support work from them, it's been quick and receptive and nice. That's just been my experience though.
Context_of_Work - Relationships	EMS	S	Field Responder	46-55	Not specified	Male	EMS-S-006	So thankfully, our fire and EMS system is one entity, which is great in my opinion. Everything's in house. The employees, the communication system, all that. We have very little to no communication with our police agency. We are able to scan their channel, but I don't think they want us on their channel, and they don't come onto our channel. And that's been identified as a huge problem in some of these large-scale incidents around the country of, for instance, the [City] shooting. There was no communication between the police and the fire on one scene. So I think

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								that needs to get bridged. I think that's done through policy and procedure. I think the technology is there. I just don't think we utilize it efficiently.
Context_of_Work - Relationships	EMS	S	Field Responder	46-55	Not specified	Male	EMS-S-006	I think the end-user organizations make decisions that don't bridge that gap well, so I think that there is plenty of channels able to be used that can be a common channel between police and fire, for instance. I just don't think we utilize it to the way that it should be used on incidents that both agencies are responding to. And again, like we were talking with communication issues being a contributing factor to a lot of poor outcomes on incidents all around the country, police and fire interface has been a large part of that communication problem. And I think that the technology is there, i.e., mutual-aid channels or radio frequencies. I just don't think the organization leadership in the fire and police side use them. I think the fire side tries to. I think the police are the ones that are more apprehensive to have that interface than the fire agencies are. That's a pity, though.
Context_of_Work - Relationships	EMS	S	Field Responder	46-55	Not specified	Male	EMS-S-006	I'm on our wildland team, so I think the communication is pretty good with the state and federal resources for a lot of wildfire incidents. I think the county is doing a good job overall of county and state resources for the fire districts. So I think you just have to have strong leadership to assert those channels early and the communications plan early. But all the technology is there to use. Again, it's just whether or not the leadership chooses to use it the way it's intended to, because the county actually has a communications plan for inter-agency operations for the wildfire side of things. So it's all drawn out. Every season, all the channels get cloned on the radios, and it's just a matter of people utilize it the way it's intended to be used.
Context_of_Work - Relationships	EMS	U	Field Responder	46-55	21-30	Male	EMS-U-003	...We're currently just finished up doing an RFP for a new LMR radio system, so I was involved in that. If anything breaks, I get involved in making sure the right people are coordinating to fix it. And then just the everyday stuff, too. I just listen to the radio, I make sure ambulances are behaving themselves on the radio, dispatchers are behaving themselves

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								on the radio. When mistakes are made, I send a lieutenant out to investigate, and then I take the results of those activities and would go ahead and take whatever action's appropriate there, so.
Context_of_Work - Relationships	EMS	U	Supervising Field Responder	46-55	21-30	Male	EMS-U-010	...I started out at a good house. By good house, I mean it was a busy house. We were constantly busy. I wanted to see everything both trauma, both medical, both dealing with people. So I started out at a good house, which means that we had good firemen. I had a good partner or partners because I had more than one. And I had a good chief, a good boss who looked out after us. And your question was how was it--?
Context_of_Work - Relationships	EMS	U	Supervising Field Responder	46-55	21-30	Male	EMS-U-010	So as long as you have those good people behind you, the firemen, your partner, it was good for me. I can't speak for anyone else. But for me, it was great because I would come in. I enjoyed my job. I go and inventory my ambulance. As a matter of fact, I had people who had 15 or 20 years on the job prior to me going to them. And they actually taught me how to deal with the mean streets of [City], how to take care of my ambulance, how to-- you talk to certain people in a certain way. And then you talk to other people in a different way because not everyone's the same...
Context_of_Work - Relationships	EMS	U	Supervising Field Responder	46-55	21-30	Male	EMS-U-010	...so from my experience, as long as I had people backing me up and showing me the way, I had a good time being a paramedic in the ambulance. I loved it. As a matter of fact, I love driving. I love starting the idea. I was a hands-on person. You have to be a hands-on person because you're constantly touching people. You're constantly starting IVs. You're constantly taking care of their wounds, their injuries. So you have to be hands-on. The other thing that I used was, I don't want to say joking with people, but also using humor too. Because sometimes we're responding to people's worst days. And I used to love using humor because most of the time, they would take their mind off of it, so.
Context_of_Work - Relationships	EMS	U	Supervising Field Responder	46-55	21-30	Male	EMS-U-010	So I would come in early in the morning, and as a matter of fact something that I teach the candidates, first thing I would do is open every door in my ambulance, open up each door. Make sure I have the equipment that I needed, in case I got to run that second, was there

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								because sometimes, since you're working 24 hours, you go on certain runs. And the medics that you were relieving may have forgotten to get the stretcher, or the stair chair, or the quick response band; the QRB is what we call it. So I would open every door, make sure that the equipment that was essential that I needed to respond to any kind of medical call or trauma call was there. Then I would go and-- if the person that I was relieving was not up, I'd go in, wake them up and say, "Hey, you're relieved." I'd go get a cup of coffee, bring it back. And then I'd start doing my detailed inventory of the ambulance.
Context_of_Work - Relationships	EMS	U	Supervising Field Responder	46-55	21-30	Male	EMS-U-010	It wasn't very difficult in our area. We always had a good rapport with the police officers. I can't say that there was one time where I can say we didn't have a good communication with the police officers. They were always backing up. They knew when we got a run. So communication was mostly verbal and on the scene they would just stand behind us, watching over us, and making sure that no one else was around.
Context_of_Work - Relationships	EMS	U	Supervising Field Responder	46-55	21-30	Male	EMS-U-010	...Now communication with the firemen, that was easier because we did have a channel that we could go to communicate with them if there was some distance between us. Otherwise, we would be we knew all the companies that were around us, and we constantly had runs with them. And so they knew what to expect from us and I knew what to expect from them. But otherwise, communications via radio was simple because we would just turn the switch over to that channel and communicate with them. And now that everyone has radios, I would assume that it's much easier.
Context_of_Work - Relationships	EMS	U	Supervising Field Responder	46-55	21-30	Male	EMS-U-010	Well, currently each member has their own radio, their own portable radio. And then they have their MDC. Their mobile data terminal, or MDT. However you want to call it. Which was where they get their runs. They also have an MDC inside the firehouse where if they're in quarters they get their runs that way, and they have to-- basically it's a touchscreen where they have acknowledge their runs when they get them. Sometimes the firemen do it for them. They also have a mobile recording unit which is basically a laptop where they do all the patient

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								care reports.
Context_of_Work - Relationships	EMS	U	Supervising Field Responder	46-55	21-30	Male	EMS-U-010	[RE: paramedics] ...they have to know the people that they're delivering the patient to. Some nurses and doctors are nice and kind to them. Others don't give them the light of day, which is unfortunate. So they're not partners in that way. But I guess they're out there to do their jobs. And for the most part they do.
Context_of_Work - Relationships	EMS	U	Supervising Field Responder	46-55	21-30	Male	EMS-U-010	[RE: paramedics] And I'll give you just from my experience. Some people can be-- I don't know how to put this so that it doesn't sound offensive, but some people expect-- some people are actually very receptive to you. They'll receive you and say, "Okay, yes. You're here to help me. Do what you have to do." Other people is, "Hey, you're going to do this. You're going to take me to this hospital. You shouldn't be doing that. I saw that on TV and that's not the way you do it." So some people are very receptive as far as you're the expert, you're the professional, do what you have to do. Other people are not that way, "I'm a paying citizen, you're going to do what I tell you [laughter]." So they have to deal with that personality, those different personalities.
Context_of_Work - Relationships	EMS	U	Supervising Field Responder	46-55	21-30	Male	EMS-U-010	From my experience, the work of a paramedic is very important and it's not often publicized because they're just doing their job, and I was in the military. In the military we used to take care of our medics. Sometimes that doesn't translate over to the fire side. Whether it's here, whether it's in New York, whether it's in Boston, whether it's in Los Angeles, a lot of the paramedics don't get the acceptance that they should get. Like I said in the military, first thing they do is take care of their medics because their medics are going to be taking care of them. So I think it's just important that we recognize our paramedics.
Context_of_Work - Relationships	EMS	U	Supervising Field Responder	46-55	21-30	Male	EMS-U-010	[RE: recognition of paramedics] Yeah. And even though they may not be going in-- oh, the other thing, yeah. We have the same courage, we have the same umph. We have the same that a firefighter has, that a police officer has. And sometimes, like I said, we're not recognized at that level and it's difficult to accept.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	EMS	U	Supervising Field Responder	46-55	21-30	Male	EMS-U-010	[RE: recognition of paramedics] Why do I think that is? It's just the culture, the culture that we developed here and it's difficult to change. Like I said, when I was in the military, a record meant something. As a firefighter, you only have this. In the military, if you have a record that means you went above and beyond, and that's what I tell people. You have a record, you've gone above and beyond. Be proud of that record... So that's just from my perspective, from my experience. So yeah like I said, sometimes we don't get the credit that we deserve [laughter]... But it's changing slowly. It's a huge cultural change and we have some good leaders out there that are trying to make that change.
Context_of_Work - Relationships	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	So at a firehouse, it's our home away from home. We've developed kind of a brotherhood, sisterhood at the home. And we are members that are assigned to that house so we're there all the time when we are on shift. So we do have a captain that's in charge of the house. We have a lieutenant. So for an engine company, you have a captain and two lieutenants all different shifts. Same thing with the truck company. You have a captain and the two lieutenants. In an ambulance, you have an ambulance commander and then three paramedic-in-charge because we work four shifts. So we have an ambulance commander who kind of is like the captain of the ambulance. And then we have the paramedic in charge is kind of like the lieutenants of the ambulance. It's kind of like the simplest terms to explain it.
Context_of_Work - Relationships	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	We do a lot of education with other companies, with the fire companies, with the BLS, with the basic life support. With me, when I'm coming in, once I do my checkout with the truck, [truck] and [engine], I always want to make sure who my EMT is because if we catch a run with an ALS company us, [company], and the truck, I want to know who my EMT is because if I need his hands-- not all firemen are EMTs. They're just firemen. So if we're on the scene I want to look up, I want to see who my EMT is because I'm going to grab him and he's going to help me. So in the mornings, I'll talk with that EMT and say, "Hey, do you need anything? Supplies? Are you okay with treatments? What do you want to learn-- is

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								there anything you want to learn on something that could help us in the field, could help the community out if there's a critical call? I may need you, you may need me on certain situations." So I always want to make sure that they're ready, too.
Context_of_Work - Relationships	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	...We do get calls a lot even for people that are sleeping on the bench. People are concerned, which is fine. We don't have a problem going out and making sure that they're okay, the homeless people. We get a lot of calls for that downtown. We get a lot of calls for the homeless, especially in the wintertime, which is fine. I want to make sure they're warm, so it's okay with us.
Context_of_Work - Relationships	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	[RE: congestion] You get used to it. My partner came from the Southside of the fire department where there's not that much traffic to this. And he was like, "Oh my God. I can't believe how much lights and sirens." The biggest thing here is that they still don't pull to the right. They don't. They don't pull to the right. I'd say about seven or eight years ago, we did a campaign here. I think CFD did a campaign, pull it to the right. That was great. We had stickers. We had billboards. And I noticed that worked out great. And we haven't done that in a while. So lately, I've noticed that the community has failed on that because we could be stuck on traffic and everyone's pulling to the left. And we got to zigzag especially in downtown.
Context_of_Work - Relationships	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	[RE: community visibility] No, no, and that's sad because we don't have enough manpower to do that, at least on our end... I would love to go out when it's not really busy and drive around and talk to the community and see what they think of us or what do they want from us. I do notice our sirens are really, really loud, and it's for a reason. And they tend to put their hands over their ears, and we do get a lot of bad civilians that are very unhappy about that, but we need it because the cars don't pull over.
Context_of_Work - Relationships	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	[RE: traffic noise] I know our community, especially [City] area, they hate that. And you know what? If it's two in the morning and we're coming into an area where people are sleeping, we're not going to be coming blazing with the siren.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	EMS	U	Other Public Safety Personnel	46-55	21-30	Female	EMS-U-009	Well, it's good. It's great if you have a good partner. Your partner is everything because that's the one that's going to make or break your day. So it's not bad as far as functionality. I mean, you're eating your meals in that ambulance [laughter]. You're bringing life into the world one minute and then you're watching one leave the next minute. It's really something. So that ambulance is your zone for 24 hours so you make it as comfortable as possible.
Context_of_Work - Relationships	EMS	U	Other Public Safety Personnel	46-55	21-30	Female	EMS-U-009	Absolutely. When we're there, yes. I had a very close-knit relationship with all the fire shifts. So EMS works one on, three off. Fire works one on, two off. So every third day that they were working, I would see them. So each day I came in for my shifts, my first three shifts let's say, I got to see each shift. So then it rotates. It used to be where fire and EMS had the same time off. So then you only were really tight with that one shift, but not for us. We get to see all the fire shifts. And it's great.
Context_of_Work - Relationships	EMS	U	Other Public Safety Personnel	46-55	21-30	Female	EMS-U-009	Extremely tight. Extremely tight. It's interesting because that's very good in a sense, but it's also very bad in a sense, because when the firemen have a-- when they go to a fire and it's a pretty bad fire, the ambulance is dispatched with them if it's in the same still district.
Context_of_Work - Relationships	EMS	U	Other Public Safety Personnel	46-55	21-30	Female	EMS-U-009	Yeah. And then you can also turn it around where we-- is it better? Is it better for us to be the ones taking care of them? We're more vested.
Context_of_Work - Relationships	EMS	U	Other Public Safety Personnel	46-55	21-30	Female	EMS-U-009	It's kind of a toss-up. Yeah, and we know them, but also familiarity is scary, you know?
Context_of_Work - Relationships	EMS	U	Other Public Safety Personnel	46-55	21-30	Female	EMS-U-009	I definitely think that-- their use of it on the job is helpful, I would say, to the older guys on the job. They might need help logging on their computer in the station, but you know what they are? They're socially inept. They don't go into the fire house and socialize like kids from years ago. You know why? Because they don't have to. They go in, they check

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								out their rig, and then they stare at their phone for 24 hours. They don't interact, they don't do anything, yeah. So our last class, there's a no-phone rule in this building. They don't bring their cell phones in. We had forced communications, we had forced where they had to learn about each other, and do this and do that. And I tell you what, I get compliments on this class that just graduated. They started [Date], they graduated in the middle of May. And I get compliments on them all the time. About how outgoing and friendly they are. But they figured it out. After I [inaudible] on them for 10 weeks, we literally-- the one guy, when he graduated he said, "Commander, what I just wanted to--" He goes, "This is going to sound really strange, but I just want to really thank you for helping me grow into a man." He goes, "Because I know I'm older, but I never really felt like a man." He goes, "I do now. And I'm very proud of my position on this job." And I was like, "That's great." He goes, "It's incredible how much you realize what you don't know." He goes, "I feel like I've missed out on a lot by having my head down on my phone, or in a game or--" Yeah, it's really unbelievable.
Context_of_Work - Relationships	EMS	U	Other Public Safety Personnel	46-55	21-30	Female	EMS-U-009	There absolutely is. These new guys coming on now, they can run circles. The two generations would be perfect together. You can have the young generation show the older generation how to work the system, the computer and everything else, if you can have the older generation come in and actually lend them some of their social skills. It would be a perfect mix.
Context_of_Work - Relationships	EMS	U	Other Public Safety Personnel	46-55	21-30	Female	EMS-U-009	Oh, absolutely. Yeah. You have a permanent partner and they know everything about your life. You are their family for 24 hours. Not only are you keeping them safe, you have their back. I mean, I've worked in-- the ambulance I was on was in the busiest, most dangerous neighborhood in the city. I never had to turn around because I always knew that my partner was watching my back if he was behind me.
Context_of_Work - Relationships	EMS	U	Field Responder	26-35	6-10	Male	EMS-U-013	Well, for once, we have a very large firehouse. So there's a lot of personalities, lot of bodies in our firehouse, so. Lot of just sitting around, telling stories, and I don't know.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	EMS	U	Field Responder	26-35	6-10	Male	EMS-U-013	Good. I mean, we have a lot of really good guys and girls at our firehouse, so--
Context_of_Work - Relationships	EMS	U	Field Responder	26-35	6-10	Male	EMS-U-013	I would say there's a lot of money down there. So, we deal with a lot of that stuff. A lot of tourists. So, a lot of people just want to talk to you and ask you questions about life as a [City] fireman, and fire department, and stuff like that. So, that [city] Fire show is kind of-- everyone wants to come in and see a firetruck now [laughter].
Context_of_Work - Relationships	EMS	U	Field Responder	26-35	6-10	Male	EMS-U-013	Yeah, well, there's three big hotels right next to our fire station, and people always stop at the desk and go, "Hey, what should we do?" They always say, "Oh, go check out the firehouse." So, I mean, we get people in and out all day.
Context_of_Work - Relationships	EMS	R	Field Responder	18-25	5 or less	Male	EMS-R-018	It depends really on who you are. If you are here and show an interest in helping them and teaching them and working with the volunteers they will share respect back to you on any given scene. You know it's all in the way you communicate with them. You know you yell at them, you get worked up with them or do you just calmly talk to them even in the worst situations because in truth they don't even have to be there so you know when they get the call at night they can choose rather or not they're going. We can't choose and that's what comes with the job so you need to understand that when you get out with these people. They're out here and every finger they lift is a plus for you. It's one finger you didn't have to lift so it's all based on how you talk to them I think. If you come over here, make yourself seen you know in classes with the EMR they'll know who you are out on calls. They're more likely to help you out. They're more likely to jump in the back and listen to you when you say hey, will you put your finger here? Will you grab me this? Grab me that? If you show an interest in them they'll show an interest in you and just don't act mean to them. I mean a lot of people in this business will say you're a volunteer, get out of here but coming from a volunteer background they're necessary. I mean very necessary so you got to have them.
Context_of_Work -	EMS	R	Field	18-25	5 or less	Male	EMS-	So for the most part the paid groups EMS and Sheriff's office work well

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder				R-018	together because we all get drugged through the same you know crap for a lack of a better word so we all know what each put up with and so whatever it is you know we go out together and for the most part we're all very cordial with each other. The difference comes when a volunteer shows up that doesn't like EMS or thinks these guys don't know what they're talking about because they're getting off the ambulance and it's a fire scene so I'm going to tell them what to do.
Context_of_Work - Relationships	EMS	R	Field Responder	18-25	5 or less	Male	EMS-R-018	Face to face yeah. If I had the time I'd be a lot more apt to come out here go to meetings and talk about where you can help us you know because there are certain things that these volunteers can do that help us immensely. If we have somebody that's losing a lot of blood and I come back to the ambulance with them and there's an IV set out, a drip set and a bag of fluids man all hooked up I'm ready. All I got to do is slam the IV, hook it up it's running and that saves 4 or 5 minutes so that's something big you know that a first responder who doesn't necessarily have to be hands on the patient but can make a huge impact. So you know there's tons of things that these people can do and you've got to communicate that to them and get everybody else on the same page. The problem is you have people that may not like this certain guy so now there's a little tension you know.
Context_of_Work - Relationships	EMS	R	Field Responder	18-25	5 or less	Male	EMS-R-018	It's all about the relationships yeah.
Context_of_Work - Relationships	EMS	R	Field Responder	18-25	5 or less	Male	EMS-R-018	...You're never going to have enough money to do everything you want to do right now. It's just not the way emergency services works. It's all plea to the public for money you know so it's frustrating but you know every day when you go out there you need to keep that in mind. These people are the ones that are paying for you so when you go out there you know you can't say oh you're an idiot you called 911 for this? You have to like I say solve the problem, fix it that's what they're calling you for so you know that helps you in the long run. They think back on that and say oh man, I think I'm going to vote yes for this cause because it helps the ambulance.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	... If we get on a scene and there's a cardiac arrest or something like that and we need backup if we need an extra set of hands someone my partner and I both need to be in the back of that truck with the patient we're going to need someone else to drive and we tend to back each other up when we have calls like that but if it doesn't dispatch out that way and you don't know until you get on scene and then you can't get out to your dispatcher you're kind of on your own.
Context_of_Work - Relationships	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	Here it's pretty laid back. We're all you know a close group and we just try to kind of get through the day and take care of anything that needs to be done here. We watch TV, pass the hours, read up for further training things like that.
Context_of_Work - Relationships	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	For the most part we're here at the station. There are times where we'll do community events like last week or so we had what they call a Touch A Truck which is community event where the kids can come in and look at the ambulance. We had one here at [store] or we'll go to the schools and things like that to let the kids get familiar with the truck, see our faces because we don't want an emergency be the only time they see us then they're not scared of us as much.
Context_of_Work - Relationships	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	...As far as technology and communication I don't think so. It would be much easier if we had better technology that's for sure. I love my job and but that's one of the more frustrating parts of it is to be somewhere need help or need to communicate and not be able to and I love working in a small community like this very rural. You get to see a lot of those people you get to know them by first name and a lot of the folks are related and stuff like that but it's also difficult because they all listen and then so if Aunt Suzy down the street has had a cardiac arrest they hear the address on the radio and then you've got ten people at the scene that you're trying to take care of your patient then you've got family members and they actually had one this morning and they had all of this family that was rushing them. They were only on the scene for 7 minutes which is extremely good and so that's frustrating. I think I kind

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								of went off on a tangent somewhere but--
Context_of_Work - Relationships	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	<p>They do all the time especially older people. You know they sit there and sip tea and they listen and hear things going on and they're not the ones that you usually have to worry about showing up. It's the you know the middle aged or the younger people but especially if there's an accident. Everybody it's like a train wreck everybody wants to see what's going on and you know if they realized some of the things that you do see and the fact that those things can't be erased they wouldn't want to but it's sometimes hard for us to do our job when you've got so many people that show up. Like I said the family is one of the big things because this is a family member. They're upset, they're angry at the situation. They may not be angry at me but I'm the person they're going to take it out on because regardless of how fast I move or how efficiently I'm doing their job all they can see is that their family member is hurt and no matter what I do it's not going to be fast enough or good enough at that moment so those are the ones when psych patients and things like that those are the ones that it's scary not to have a working radio because if I need help I know I'm not going to get it because they don't know so I think if there was a way to take the general public out of being able to hear our traffic and us be able to communicate easily and efficiently with each other without all of the areas that we don't have coverage it would be much better.</p>
Context_of_Work - Relationships	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	<p>...And so I've been a player and to carry the ball, run a route, throw a pass, but now my job role is to be the coach. And so the players on the field know what to do, and for the most part make very wise calls. And so when I get there, I'm more like safety, making sure they're making the right decisions, moving in the right direction. But what's a coach to do everyone once in awhile? He has to say, "Stop. We're not going to go for it this time. Get off the field. We're going to transition. Hey, do this, do that," as an overarching driver, if you will, although the players know what to do. What else does a coach do? He makes sure his folks are trained. That they're taking the right reps</p>

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	...So I've got to make sure my team is touching all those enough that they're going to be confident to make wise judgment calls. I'm a little different than other BCs. We have a modicum more training in these areas
Context_of_Work - Relationships	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	So there's an A, a B, and a C. And so for 24 hours, I'm the only. And then as you move on now, I will tell you as people have come in and out of teams because you don't just stay in one battalion your entire career. You might start in this battalion over here, and then move to a new station over here... You're way closer than I am," because he's going to make wise choices. And I'm going to go over here. I have the extramental. It's my burden or whatever responsibility that I can-- there are folks out there that I would trust to run a call.
Context_of_Work - Relationships	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	Sure. So we get together and have the staff initially. We have to make sure there's a right number-- there's a minimum staffing for the city that we've deemed as a department that keeps the city in their best posture. And so the battalion chiefs all get together at 10:30. They look at how many people are on vacation, sick, or training, and we staff our battalions and we talk on the radio, basically an open-talk channel like a-- when you hit it, everybody else is listening to your conversation or what you're saying and we pick people from a list, as a group, to fill all the spots.... Or I can take a picture now with my cell phone and send it, and I say, "I don't know anything about propane tanks," but I know somebody who does. Take a picture of the problem, send it to them, call them and then say, "Hey, look at this and help me understand what I need to worry about, other than what I just-- is there some other--?"
Context_of_Work - Relationships	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	... And so my job as a coach now, is my Tom Brady changes every time. So I've got to remember - I remember because I have a tactical sheet that helps me, a hand-written one - that when Tom-- when they go out and say, "Hey, I'm the quarterback," I've got to remember who the quarterback is. So when I get there, I can say, "Hey quarterback, what are the conditions inside the house?" And then they can get back with me. And if something goes wrong and the real, real, real reason, it's a span of

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								control. Where, when you're doing very critical tasks, we have a very small span of control.
Context_of_Work - Relationships	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	...So not just those four and four, we're going to bring another eight engines and four aerials to come on top of that just because it's so big, and so many people. And then with the rest of the group that came initially, we're going to have people that are focused on evacuating, because you fight the fire, but you also evacuate the occupancy. Just get out. Because smoke is an issue, we have one that's dedicated to help with ventilation, too, to get the bad smoke out. And we have somebody on the exterior to help with plucking people, throwing ladders, to let them rescue from the exterior.
Context_of_Work - Relationships	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	So because we are focused on the task at hand, so that first team of three, their job is to find the fire, see the extent, put it out and also do a primary search to see anybody who's really closest to the fire, they're in harm's way. And if it's just one door over, my expectation would be they would take them, start moving them towards safety. They would relay that out and we would have another crew meet them, say, at the top of the stairwell to take them on and out and then get them back in the fight. Because they already know what's going on inside.
Context_of_Work - Relationships	FF	U	Field Responder	46-55	21-30	Male	FF-U-002	We do. And especially on my end, in my job of [Senate?], we go into the county a lot. So we have the ability to change to their channels. And dispatch has the ability to, what they call, patch our channels, so they can stay on their channel, I stay in my channel, and they patch them so that we can talk to each other.
Context_of_Work - Relationships	FF	U	Field Responder	36-45	11-20	Male	FF-U-003	I would describe the job to anyone that we're trained to be there on your worst day. So we try and make people's day better, whatever that is. We do everything from change thermostat settings, to people who can't get out of bed, to fighting a high-rise fire. So it's a very unique job in that regard. But we always have to think about the end user and that's the people that we take care of. Everything else really doesn't matter.
Context_of_Work -	FF	U	Field	36-45	11-20	Male	FF-U-003	And I think for our communications people, there's a lot of things they

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder					can do inside this radio to change things and that's a big step for them, but as far as us and the end user.
Context_of_Work - Relationships	FF	U	Field Responder	36-45	11-20	Male	FF-U-003	They're pre-input. We call our com people and when we go there, there's a note in the call text.
Context_of_Work - Relationships	FF	U	Field Responder	36-45	11-20	Male	FF-U-003	So in my crew, we have implicit communication. We've worked together for a long time. We have a game plan for every event we're going to come to.
Context_of_Work - Relationships	FF	U	Field Responder	36-45	11-20	Male	FF-U-003	Yeah. And I mean we've work together, a lot of us, for so long that we just-- we don't have to talk at all. One of the guys I live next door to, we live next door to each other. We used to shoot horses together. And I mean, we would not talk the whole day. It was just working. And we knew what each other was thinking. And I would hand him the next tool. It was just like electrician's working on wiring on a house.
Context_of_Work - Relationships	FF	U	Field Responder	26-35	11-20	Male	FF-U-004	Okay. So as my boss was saying earlier, I'm kind of in charge of portable radios, mobile radios, pagers, and our paging system software. I'm not so much involved on the technical side of programming devices, more so I'm kind of a liaison between our fire department and the guys at our wireless shop who do the actual programming.... But some of the other guys, they cover things like we have some people back in that office that are-- they handle all the CAD functions. They keep the CAD databases up-to-date. They work closely with our IT department when there's issues to get things resolved. We handle all their MDCs in the trucks. Again, we work with the wireless shop, who's the ones that actually install and maintain most of that. But again, we are the ones that kind of make the decisions on what we want it to look and do.
Context_of_Work - Relationships	FF	U	Field Responder	26-35	11-20	Male	FF-U-004	If they could hear the call, what's going on on the phone. If there was some way for that, that might help them kind of get a better picture of what they're going into, getting into, and it definitely would show what the dispatcher is dealing with [laughter]. It's like, "Why am I not getting this information?" So, yeah, maybe I could see that definitely being a benefit. Having a little more access to that caller.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	FF	U	Field Responder	26-35	11-20	Male	FF-U-004	I mean, the supervisors can listen in, but typically they don't. Usually, it's just that one call taker. Now, since we have fire, EMS, police, if it's some kind of an incident that there's a medical problem going on, we're sending the fire truck, but they're also sending the police because someone got shot, then you're going to have three call takers. One from each agency will be listening in. There will usually be one, I think, just talking but everyone's sitting there getting information. If I'm the police call taker and I need to get something, I'll but in just like, "I'm sorry, ma'am. Is there any weapons?" They would ask about it.
Context_of_Work - Relationships	FF	U	Field Responder	26-35	11-20	Male	FF-U-004	Usually, they'll just ask somebody like, "Hey, how do you do this?" Or, "How do you do that?" They have--
Context_of_Work - Relationships	FF	U	Field Responder	26-35	11-20	Male	FF-U-004	...When the other station was going to go out and be somewhere new, we kind of had-- we would talk to each other and we'd know like, "Hey, we're going to go do training. We're going to be on the north side, so if a call comes in in our territory, y'all need to cover."
Context_of_Work - Relationships	FF	U	Field Responder	36-45	11-20	Male	FF-U-005	...There's multiple agencies using multiple different frequencies and we're able to communicate with each other on a pretty easy basis. We have a central dispatch that we talk to. They talk to us. We're able to talk to other trucks out in the field. We're able to talk to other agencies. We can talk to police and fire-- or police and EMS if we need to and it's-- the only communication system I know and have known is what we have in [City] and it seems to be a very good system.
Context_of_Work - Relationships	FF	U	Field Responder	36-45	11-20	Male	FF-U-005	Once we get there I do want to know from dispatch-- dispatch does a really good job a lot of times of asking when they're talking to the callers, "Is everybody out?" Or the neighbor says, "Yeah, I think they're on vacation but I don't know. Their cars are in the driveway." Dispatch does a good job of telling us what the caller says about occupants in the house. If I don't know anything, that's part of my job when we first get there.
Context_of_Work - Relationships	FF	U	Field Responder	36-45	11-20	Male	FF-U-005	...So dispatch does the best they can but it's still up to us when we get there to determine that no one's in there. And I don't know radio-wise--

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								caller information is always limited. The caller tells what they think they know and we can't get anything more than that from them, not until we show up. If we get definitive information that we didn't have before we show up and a neighbor comes out and says, "Hey, I see somebody stuck in that window."
Context_of_Work - Relationships	FF	U	Field Responder	36-45	11-20	Male	FF-U-005	And most of it comes back to just being disciplined with your communications. Being disciplined with your communications and trusting the people that are on scene that are doing the things they're supposed to be. And I think a lot of it just comes from, especially from the command perspective, being able to trust the people that are inside.
Context_of_Work - Relationships	FF	U	Field Responder	26-35	6-10	Male	FF-U-006	...But also, depending on who the first on-scene units are, they're going to be giving a size-up. They're going to be describing what they're doing, what they need the next-in company to do, and usually, that first one in takes command of the scene. And then if a captain comes in, they're going to jump up, take command. When the chief gets there, more than likely, it's going to jump up again and they're going to take command.
Context_of_Work - Relationships	FF	U	Field Responder	26-35	6-10	Male	FF-U-006	...When we do get assigned to an emergency like that, dispatch will also be monitoring, and then all of that gets transcribed for our reports or whatever they do up in the upper management. But yeah. So that's how everybody else is getting their info. Dispatch will hear it. They'll start typing everything in into our call text. So if somebody didn't have their headset on or something, it'll actually populate on the MDC, and then that info can be relayed
Context_of_Work - Relationships	FF	U	Field Responder	26-35	6-10	Male	FF-U-006	...Well, the probationary firefighter was having an issue with the C-collar and trying to get it set up. There's a couple of little things you have to do before it actually goes onto the patient. So I was like, "Hey, that's kind of backwards. So let's try it this way." And he kind of sat there for a second, just kind of, "Oh, man. I don't know how to make this thing work now, and we're all ready to get this patient moved, but we need to get the collar on there. It's--" "Hey, do this real quick, and it's going to pop down and do this, whatever." He was like, "Oh, cool. Okay." And then we got it on there, no problem.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	FF	U	Field Responder	36-45	11-20	Male	FF-U-007	Very often when we respond with police in general. We're pretty much when we respond to a medical incident with EMS, which is the third system in [City], but we operate on the same radio channel so if we have to stage for law enforcement to secure the scene, or we're on a scene where law enforcement is involved in the actual scene, it's very difficult to get information from them. We can scan their channels but we don't really have a good process. And maybe it's not so much the communications. It's almost just is getting it solved to communicate better with law enforcement. B
Context_of_Work - Relationships	FF	U	Field Responder	36-45	11-20	Male	FF-U-007	Okay. The big thing you're going to do is call for more resources, and you may having to think about folks that are downstairs, and just if it's going to endanger any other exposures or collapse hazards type of deal. But the big thing we're going to do when we get there is if we need more resources, call for additional alarms. We have a ton of folks, even on a third alarm a greater alarm high-rise fire, I mean it's in the neighborhood of probably 80 people, they're showing up to it, so we just get more resources and more people to come with more equipment to put it out.... And then also communications with law enforcement and just getting them to block off streets so we can get in there. A lot of times, too, we'll get there-- and this is part of our not communicating well with law enforcement-- they'll park to block people out, but then they'll have a fire apparatus needing to get down there and you don't know who's car it is or where they are, so just trying to get people there. But this communicating better with law enforcement thing is our big issue and it's probably just more of a policy issue than it is a technology issue.
Context_of_Work - Relationships	FF	R	Supervising Field Responder	46-55	21-30	Male	FF-R-008	Exactly. Do I got to log into 10 different sites [laughter]? That is the issue. So those would be probably be the bigger issues. We're very fortunate here that we get call takers that are really good at what they do, and they try and get information and they push it to us. Whereas in some cities, because of the volume and their staffing they may not get the same information. It's just, "Okay, where's the call, what's going on?" So I send them resources and then we're done. And then you end up

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								with a shooting, a stabbing, you walk into the middle of something that you really wish that you--
Context_of_Work - Relationships	FF	R	Supervising Field Responder	46-55	21-30	Male	FF-R-008	Yeah. So we purposely decided we didn't want to be incestuous and say, "Oh, we're really good," and so we sit around and just tell each other how good we are. So, to challenge our assumptions and how we do things and look at different options that we might not otherwise be exposed to. So we bring people from different parts of the country. And some of it we adopt, and some of it we don't.
Context_of_Work - Relationships	FF	R	Field Responder	26-35	6-10	Male	FF-R-009	So every day for three hours a day, we go pick up trash in this ditch to help out this pretty rough neighborhood. They got hit real hard, so we just go pick up trash. So we're here for the citizens, so anything they need--
Context_of_Work - Relationships	FF	R	Field Responder	26-35	6-10	Male	FF-R-009	If I had to describe the job, I would say it's a family-oriented department that we work for, a real tight-knit group. Pretty much, we're going to go help anybody that needs help, whether it's medical, fire, anything like that. If they need something, just call the fire department, we'll come on help them. I'd say that we're at their disposal for them.
Context_of_Work - Relationships	FF	R	Field Responder	26-35	6-10	Male	FF-R-009	Not with firefighters. I mean, I may text the other stations because our station [Name] is our medical station. So I may text them a list of medical supplies and say, "Hey, this is what we need." And we'll go pick it up. Stuff like that but I mean, that's just kind of if you need it. You'll ask them but it's not super related to the fire department.
Context_of_Work - Relationships	FF	R	Field Responder	26-35	6-10	Male	FF-R-009	We didn't train a whole lot over there, and they weren't super family oriented. So you all went to work and you all worked together, you had dinners together. They would kind of split up. We're a really tight-knit group over here. So whatever we do we're always together, and over there it wasn't like that.
Context_of_Work - Relationships	FF	R	Field Responder	26-35	6-10	Male	FF-R-009	I mean, yeah, you always get that time probably. Probably happens to everybody, whether it's your first CPR cardiac arrest call, CPR like on a baby or something, people are just going to-- they're not going to be 100% in it because they'll be emotionally invested.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	FF	S	Field Responder	Not specified	31-40	Male	FF-S-040	...So the citizens call us when they're having a bad day. Something's gone wrong in their life and they need somebody to come in and help make it right. So when we show up, sometimes it's a very straightforward situation with minimal risk, an EMS call where we just have a patient, that we don't have much in the way of outside concerns to deal with other than just providing treatment to the patient in question...So the citizens call us when they're having a bad day. Something's gone wrong in their life and they need somebody to come in and help make it right. So when we show up, sometimes it's a very straightforward situation with minimal risk, an EMS call where we just have a patient, that we don't have much in the way of outside concerns to deal with other than just providing treatment to the patient in question.
Context_of_Work - Relationships	FF	S	Field Responder	Not specified	31-40	Male	FF-S-040	... But whenever we deploy the task forces, we do deploy our own internal management team, which is called an IST, an incident support team, which basically mirrors the incident command structure of the receiving jurisdiction. And normally, what happens is we've got our people paired up with the receiving organization. And actually, as the program evolved is we actually pair up starting at the FEMA Regional Operation Center. So the USAR program will have a liaison in the ROC, the Regional Operation Center.
Context_of_Work - Relationships	FF	S	Field Responder	Not specified	31-40	Male	FF-S-040	...And this actually goes for the whole [City] region because within the [City] region, we have the Council of Governments which is sort of a-- it's a membership organization but almost all of the municipalities within the [City] region are members of the organization. And we coordinate amongst ourselves through COG. And in specific, there's a public safety communications committee within COG, and then under that, there's a fire committee and a police committee. And the fire guys organize the fire stuff. The police guys organize the police stuff. But then we also meet together to make sure that fire and police are organized--
Context_of_Work - Relationships	FF	S	Field Responder	Not specified	31-40	Male	FF-S-040	...So if [County] was having a catastrophic kind of day and we need to send [County] units down to [County], we would go operate on 5 Charlie

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								or whatever they told us to operate on, and we could operate-- one, every unit in [County] would know how to get to that channel, with no confusion, because it's a very simple pattern that everybody can understand. And we would be operating directly on their radio system just as we were a native [County] radio user. So that plan has been implemented throughout the COG region and works very well and helps to coordinate our communications within the fire rescue community.
Context_of_Work - Relationships	FF	S	Field Responder	Not specified	31-40	Male	FF-S-040	So we had a warehouse loaded with 8,000 radios sitting in a warehouse in [City]. So the [County] rep said, "Hey, I know where there's a whole bunch of radios sitting in a warehouse. Let me talk to [County]." The [County] rep came to us and said, "Hey, [City]'s wanting 1,000 radios. You've got 1,000 radios. Do you mind if we take them?" And [County] said, "Sure. Take them. We don't care." As it turned out, our warehouse provided not only radios to [County], but also to [City]. And they ended up pulling a couple thousand radios out of our warehouse and sent them to both incidents.
Context_of_Work - Relationships	FF	S	Field Responder	Not specified	31-40	Male	FF-S-040	.. So for about a week, the sniper tip line was at the conference table right in front of me and my fax machine was the fax machine for the tip line. And I was going through reams of paper and ink cartridges like crazy [laughter] as people from all over the country are faxing everything in to my fax machine.
Context_of_Work - Relationships	FF	S	Supervising Field Responder	46-55	21-30	Male	FF-S-041	... There are times when I go mutual aid to [County], and there are times when I go to mutual aid to [City]. But those are the only two places that I go. And that is about it. I mean, I don't know how many citizens we carry. I know that it is a lot of space and a lot of time. And if I am on one area of my battalion and the response of the call is on the other area, it takes me a long time to get there, but it is okay because there are at least two command officers that get dispatched. So the neighboring jurisdiction, the neighboring battalion will go ahead and move up and possibly get there before me and hopefully at quick time.
Context_of_Work - Relationships	FF	S	Supervising Field	46-55	21-30	Male	FF-S-041	...But the majority of the outreach events are covered by the stations. So school demo covered by the station. I may show up. I may not show up.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					Civic association, they have 500 people show up. They just want fire rescue to talk about smoke detectors? Sure, I may show up. We have 1,000 people showing up for a soccer event, and we need a table for fire rescue to talk about anything? I may show up. But largely, my role is to make sure that those things are covered by the individual stations. I very rarely get involved in that.
Context_of_Work - Relationships	FF	U	Field Responder	26-35	11-20	Male	FF-U-042	.... So you're running with all sorts of different companies, but in terms of the actual core, I guess, purpose of the special ops runs, you're running it with the same other rescue squads, you're running it with the same hazmat unit, you're running it with the same fireboat. So it's the same people. So we were very fortunate and even within our battalion, being smaller, that we 're working with a smaller group of people, we're working more frequently with each other, we actually were able to do more drilling
Context_of_Work - Relationships	FF	U	Field Responder	26-35	11-20	Male	FF-U-043	...We have the command unit. If that comes out, that has spare batteries on it, at least another six spare batteries. We have other things like our rehab unit or the canteen unit. They might come out on second-alarm fires. They just had a minimum-- again, we have six bank chargers sitting in the unit so that, they show up and somebody needs a battery, they can help them out and say, "Hey, here you go."
Context_of_Work - Relationships	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	Yeah, so I'm in Engine 4 and so we sit at dinner. I sit here, [Name] sits here, and [Name] sits there, and we are all at rookie school together 26 years ago [laughter]. And it's... extremely comfortable, very family-- or yeah, with the good and the bad that... Everybody knows everybody's buttons to push [laughter], lots of laughing, and it's very fun.
Context_of_Work - Relationships	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	You're seeing everything. And I wanted to follow up. You've mentioned that you have a lot of interaction with law enforcement, FBI, Secret Service. You're dealing with them on a daily basis, which is something very different than what we've heard in sort of other areas.
Context_of_Work - Relationships	FF	U	Supervising Field	46-55	21-30	Male	FF-U-044	Telephone, first-name basis. So a quick example, so the other day one of our units went to Union Station. They went in and they got a patient.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					They come back out and there's this device on the steps of the ambulance. And so "holy crap," so they backed up, they call me. I'm like, "All right, evacuate. Get the police, and I'm on the way." And so by the time I had gotten there-- it was Union Station, so Amtrak police has every asset you can imagine, so they had a bomb dog already walk past it. They had cleared it for EOD.
Context_of_Work - Relationships	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	The police, it's like, "This is my territory." So they're very territorial about who's in charge, whereas being the fire department, the only one, we're usually in charge if there's a fire issue [laughter], so it makes it easy. Anyway, I'm dealing with this sergeant from Amtrak Police, and right behind me, [Name] from the FBI pulls up. He's in a black unmarked cruiser. Guy's got khakis, hat, not-- no suit. You normally think FBI's going to be in a suit, and he's khakis, polo, ball cap, hat, half unshaven. "Who's that?" I'm like, "That's the FBI." "Who called them?" I'm like, "I did. I call them everywhere I go. I take them everywhere I go. So [City] was a little annoyed that FBI had shown up, which is typical law enforcement.
Context_of_Work - Relationships	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	It's the special operations chief. We formalized it as that-- there's four of us on shift work, and each one of us is on a first-name basis with Agent [Name]. He's developed these relationships and cultivated them.
Context_of_Work - Relationships	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	Q: Fantastic. That's good. I had always wondered. It seems like you guys are responsible for so much stuff that you would need help. So it's nice to hear that you do have that. Do you work with the same aide every day or--? SME: Yep. It's [Name], who I went to rookie school with.
Context_of_Work - Relationships	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	Yeah. We have some very easy communication back and forth. There's no ambiguity. We're always on the same page.
Context_of_Work - Relationships	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	So we have an official tactical worksheet which is create [crosstalk]-- no, so, engines are usually red. Trucks are green. Just their patches are usually that color, and squads are blue, and so then, it's green because it's usually a truck company. Why there is a red I'm not really sure. The guy that developed this is now retired. He developed it and I helped him

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								edit it. We changed some things together. This is not the official tactical worksheet. I don't even know if I even have the official tactical worksheet on here because I don't use it because I like this one better... Well, I got into a big argument with the big boss years ago about that [laughter]... He claims that we're going to be in court one day and they're going to ask him if they recognize his worksheet, he's going to say no and anyway, it was stupid. Yeah, like that, I'll do that. I'll take notes over here and record and I like it a lot.
Context_of_Work - Relationships	FF	U	Other Public Safety Personnel	26-35	11-20	Male	FF-U-045	So it's an interesting dynamic because I had-- I had always been in a company in a firehouse as a member of the crew, so to speak. Well, the incident safety officer works alone. So you have an office inside a firehouse, you are on shift work, you eat meals with the firehouse but you're not really part of the company, so there is that-- there's a dynamic when you're there, you're involved , you can go downstairs and have coffee with the crews but then you're also having-- you're in an office, so it's a really weird setting. It took a lot of time to get used to it because you lose that teamwork component of, "Hey, we're here every day, we're here together, I know your strengths and weaknesses, you know mine." You're just kind of there as a guest, I guess, is the easiest way to explain it.
Context_of_Work - Relationships	FF	U	Other Public Safety Personnel	26-35	11-20	Male	FF-U-045	Because the company officer here is-- this sounds really-- and it's probably not the best terminology, but you're almost like a caretaker. I like to say babysitter sometimes [laughter]. So you have people that rely on you and you rely on them, and then when you lose that dynamic, it's just-- it takes getting used to. Yeah. Especially a field that's so built on teamwork, yeah.
Context_of_Work - Relationships	FF	U	Other Public Safety Personnel	26-35	11-20	Male	FF-U-045	--and things like that, so. Yeah, that would be definitely a transition. So talk to me a little bit about the community that you serve here.
Context_of_Work - Relationships	FF	U	Other Public	26-35	11-20	Male	FF-U-045	I think it varies. I think it varies a lot by neighborhood. I feel like when you're downtown and there's more of a transient population, and people

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Safety Personnel					aren't from the city or don't live in the city, you're just kind of just an anybody, so to speak. I don't say that to be a bad term, but just-- you're just-- everybody's here to go to work and that's it. But when you-- say if you were to go get coffee at a neighborhood coffeehouse at a place where people live and work, you're more a part of the community. People will engage you, ask, "Hey, what happened yesterday?" or "How's it going today?" something like that. So I used to always try to tell my people as a company officer, you're always on duty, whether you realize it or not. So even if you're not on a call but you go to get pizza or something, you're-- people are going to come up to you. They're going to ask you questions. They're going to expect you to somehow represent the agency, so--
Context_of_Work - Relationships	FF	U	Other Public Safety Personnel	26-35	11-20	Male	FF-U-045	I definitely think so. Yeah, definitely with that. I can always speak for my position in the safety office, but we have the COG healthy and safety subcommittee. And we meet monthly and discuss whatever issue is going on either nationally in your own jurisdiction, regionally. It's an amazing amount of data sharing. Everybody kind of comes into it at the same level, whether you're deputy chief of risk management in [County], or you're a captain in the safety ops in [City], or in the [County], wherever. Everybody meets at the same table.
Context_of_Work - Relationships	FF	S	Field Responder	18-25	5 or less	Male	FF-S-039	...I take a little bit more of a management perspective around here sometimes. So I try to make sure that other people are checking out their units. And at 7 o'clock, I've already done the work I need to do. So then I make sure that other people who might have not showed up earlier doing what they need to do. Checking out the ambulances, make sure that they're all ready to go.
Context_of_Work - Relationships	FF	S	Field Responder	18-25	5 or less	Male	FF-S-039	If we have an observer, I'll orient them. Make sure that they know where they're riding, what they need to do. Any inexperienced people, try to walk them through any processes that they need to do in the first half hour. Then that's about a half hour of housework and management things.
Context_of_Work -	FF	S	Field	18-25	5 or less	Male	FF-S-039	Then we usually do dinner around 7:30, either some night crews cook in

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder					the station, some other ones say, "Just take the ambulance or the rescue squad downtown and grab some food at the [inaudible]," so that depends on if it's Monday or Tuesday, right [laughter]? So that's around 7:30 or 8:00 usually...
Context_of_Work - Relationships	FF	S	Field Responder	18-25	5 or less	Male	FF-S-039	I prefer in quarters. Cook it here, eat it here. More like a family around a dinner table type of thing. That's another half hour. Then once we get back from that-- and this is all if we don't get any calls.
Context_of_Work - Relationships	FF	S	Field Responder	18-25	5 or less	Male	FF-S-039	So I'm here a lot. I'm here five or six nights a week. So probably close to 100 hours a week. And there's a small group of people that are here that frequently. We're called the live-ins or the permanent sleepers. We have beds upstairs and a little bit more space, and we live here. And so we spend a lot of time together, and that's a very tight-knit group of people. There are seven live-ins right now. And we're very close. So that's kind of the group where you don't need to communicate as much. You can kind of know what they're saying even if they're not a good communicator or even if they don't say anything at all, it's still like, "Okay, I know what you mean." ...
Context_of_Work - Relationships	FF	S	Field Responder	18-25	5 or less	Male	FF-S-039	...Then the next tier of relationships, I'd say for me, is the people who ride the rescue squad a lot because I ride the rescue squad a lot. So even if they're not live-ins but they're very active, then it's the same type of thing. If they're only here one or two nights a week but every week and I'm always riding with them those one or two nights a week, you develop that ability to communicate better and to develop those strong relationships...
Context_of_Work - Relationships	FF	S	Field Responder	18-25	5 or less	Male	FF-S-039	...I'd say the next tier is the people who don't come in as often. So people who ride the rescue squad but maybe once a month, or once every three months, or couple times a year, those relationships aren't as strong because you just don't have the experiences with them and you don't have the calls, and the in-houses, and the training, those three things that add up to make the relationships really powerful around here...
Context_of_Work -	FF	S	Field	18-25	5 or less	Male	FF-S-039	...And then the next group is newer people, people who ride the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder					ambulances who we don't interact with as often. But there are people who ride the ambulance five nights a week who I'm very close with. So it's not like it's divided in that regard, but for the most part, people who ride the ambulances don't ride them as often as people who ride the rescue squad, so. And I don't ride the ambulance as often so my relationships with them aren't usually as strong.
Context_of_Work - Relationships	FF	S	Field Responder	18-25	5 or less	Male	FF-S-039	Not every night. Our requirement is 36 hours a week and 24 of those have to be overnight. So that would be three nights a week minimum. And then you have to get your other 12 hours through either weekdays, weekend days, or extra nights. So I'm an exception where I'm here six nights a week and then the whole weekend, right? But there are people who are here three nights a week and then they ride during the day once or twice a week too. But either way, you end up spending a good amount of time with these people.
Context_of_Work - Relationships	FF	S	Field Responder	18-25	5 or less	Male	FF-S-039	...I find that there's more pressure on us to be more professional in our interactions with our community because we know that a lot of them are expecting that from us, which is interesting because if you go to different parts of the county or different cities around the country, you have different levels of professionalism and I think that's probably based on the community's expectations of you, or at least what you perceive of that...
Context_of_Work - Relationships	FF	S	Field Responder	18-25	5 or less	Male	FF-S-039	...So we know that we have a lot of very wealthy people, a lot of people who are older, people who whether they know or don't know what the fire and EMS system is all about, they know what it means to be treated-- they treat us kind of like a service industry, and so they know what they expect from us and we know that they'll complain to us and all those things. And you adapt to that, so I know that it's a lot of, yes sir, no sir, yes ma'am. We try to be very over the top professional in those situations. But if we're cutting someone out of a car and they're unconscious, we don't have to worry about that, right, we have a mission at hand. But if it's on the ambulance and we're just taking somebody to the hospital, you totally have to learn how to interact with people

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								differently...
Context_of_Work - Relationships	FF	S	Field Responder	18-25	5 or less	Male	FF-S-039	Yeah, I like to treat every interaction with anybody outside of the station, or inside of the station really, but anytime you interact with somebody, it's a PR opportunity, a development opportunity, a recruitment opportunity. So, any member of the public. Could be someone who donates to us. It could also be someone that we might take them to the hospital the next week and they might remember that interaction. Or it might be they might have a relative who works here. Or they might be interested in joining one day if they're a child or a youth, or even if they're older, and they say, "Hey, you know what? I'm about to retire, and I'll have some time. I want to be an EMT." ...
Context_of_Work - Relationships	FF	S	Field Responder	18-25	5 or less	Male	FF-S-039	...So, every time I see a member of the public, and a lot of people feel this way too, they treat it like that. So, you try to be very professional. You try to sell the organization and sell yourself, but it's not like it's disingenuous. We're not lying or putting on face. That's genuinely who we are, which I think sets us apart from some other stations, where we all care so deeply about this organization and the mission of it, that when we see the community, we can't stop raving about it. So, it's not hard for people, I think, to really put on a good face and put a lot of energy into these interactions.
Context_of_Work - Relationships	FF	S	Field Responder	18-25	5 or less	Male	FF-S-039	[RE: comms with other disciplines] It can be challenging, especially since we don't train together all that much, especially people outside of this station. And we don't train together. We don't run as many calls with people outside of the station, and we don't cook together, hang out together either, so... Anybody that's EMS, fire, or police that's not in this station...
Context_of_Work - Relationships	FF	S	Field Responder	18-25	5 or less	Male	FF-S-039	I mean, when we're on a call with police, they're usually in a more of a supporting role, at least for the rescue squad, because if we're on a fire and police show up, it's because they need to block off the road. We don't need to talk with them all that much for that. We'll say, "Hey, can you block off the road?" Not really that bad, or if it's an accident, we're the ones cutting the car, and they're basically either blocking the road, or

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								they may have to check the ID of the person or do a sobriety test or whatever it might be. But our interactions with them are usually pretty straightforward. So, even though we might have bigger communications differences, I'd say we don't even have that many problems with it, because we don't do as much high-stakes interaction with the police.
Context_of_Work - Relationships	FF	S	Field Responder	18-25	5 or less	Male	FF-S-039	...So I know that the federal departments have their own radios and that can be problematic. I know we ran a fire on the Walter Reed Base six months ago and they were operating on their own radio system, but we were responding to them and we don't have their radios. So when we got on scene, they actually handed us their own types of radios that we had to use. Even though, when they respond to us, they already have their own [County] radios, so... Not vice versa. So that was definitely a challenge, and they have one for our whole unit. So our officer got one, but the rest of us didn't have a radio that would work, so that was definitely something we were all like, "Woah. I did not know they still did that stuff. That's kind of weird." ...
Context_of_Work - Relationships	FF	S	Field Responder	18-25	5 or less	Male	FF-S-039	Yeah, definitely. It definitely requires a mutual trust. And I think that a lot of times people do it because they've seen that they can't necessarily have that trust all the time. And a lot of times people would rather rely on the expectation that you can't trust the units because it's probably safer that way, right? So you can't blame them for that. For saying, "Hey, if I don't tell them to do this it might not get done." Versus, "If I tell them to do it there's a little more radio traffic but I know it's getting done." So they have to weigh that in their heads...
Context_of_Work - Relationships	FF	S	Field Responder	18-25	5 or less	Male	FF-S-039	...that's a benefit that we have here because right now if we were in a fire, our chief of this department can run that with us. And if he's command, he knows that he doesn't need to tell us what to do. But the [County] Battalion Chief might not know us and might not know that he can trust us. We've never proven otherwise but maybe if a different rescue squad has, or a different engine company has. And then because he might not-he might have experienced that lack of trust, he might just rely on that.
Context_of_Work -	FF	U	Field	46-55	21-30	Male	FF-U-030	...So the routine includes maintenance issues, housecleaning, and

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder					whatnot. There'll be training stuff. There will be inspections. So there's stuff that interfaces with the community: inspections, trainings, school visits, site visits, all that sort of stuff. There's stuff that pertains to us here in the station. So training, maintenance, health issues, health tracking, fitness, all of that.
Context_of_Work - Relationships	FF	U	Field Responder	46-55	21-30	Male	FF-U-030	...There's a lot of camaraderie at the station. We eat all our meals together. So in the fire service, unlike the law enforcement, the fire service you're spending a third or quarter of your life living with these people. And you sleep, eat, work, all of that, with the rest of your counterpart and stuff.
Context_of_Work - Relationships	FF	U	Field Responder	46-55	21-30	Male	FF-U-030	So within the respective stations, either it will work or it won't. And if it won't, usually people will on their own transfer to another station or another crew, or something like that. So there's a real cohesiveness and camaraderie that develops very quickly between people working at a given station, on a given shift.
Context_of_Work - Relationships	FF	U	Field Responder	46-55	21-30	Male	FF-U-030	So this particular station is bordered right on two different districts. We have our international district and that whole community, and then we have what they call the [Name] community. It's kind of the south end of the downtown core or the south end of the downtown business. I've worked downtown here for at least eight, nine years. And really, two really fun communities. Very different, but very fun communities to interface with, and work with, and stuff as far as identifying key members and just different celebrations in schools and all the fun stuff that goes with it.
Context_of_Work - Relationships	FF	U	Field Responder	46-55	21-30	Male	FF-U-030	[RE: communication with LE] ...The challenge that we had starting shortly after is the people side of it. So just because you can talk, police chief to fire chief, the cultural limits, the busyness, who knows whatever reason, they still may, to this day, not talk to each other. In which case, I can give you all the technology in the world but I can't force you [laughter]. We like to describe it in the national level, with FirstNet and SAFECOM and whatever, that we manage the pipes, we don't manage, necessarily, what's going through the pipes. That's up to every fire chief,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								police chief out there.
Context_of_Work - Relationships	FF	U	Field Responder	46-55	21-30	Male	FF-U-030	We could do a lot better on training. Training is probably one of the single biggest costs that public safety has, just because the citizens pay us to be able to respond. And so they'll put companies out of service for mandatory training and whatnot, to all drive to central points to get a message, or whatever, or to drive to a central point to do some kind of manipulative stuff. If there's a lot more of that that could be done, either in an online environment, or some kind of interactive environment through technology, that would save lots of time and money on that regard. So those are probably the big areas where's there's some real cool stuff that could happen [laughter].
Context_of_Work - Relationships	FF	S	Field Responder	46-55	21-30	Male	FF-S-031	...There are daily routine, daily duties to do around the station, maintenance around the station as well as business inspections, public interaction, public education. We may have to do presentations to schools, fire drills, home-owners associations, and then obviously, emergency responses or priority at any time of the day and night that we have to drop what we're doing and go on the run. And we provide emergency medical care, basic life support. If that's the case then we'll transport that person to the hospital as well.
Context_of_Work - Relationships	FF	S	Field Responder	46-55	21-30	Male	FF-S-031	... Sometimes we take the shift and go out and interact with the public, go out for a coffee. That kind of thing but we're generally busy the majority of the time.
Context_of_Work - Relationships	FF	S	Field Responder	46-55	21-30	Male	FF-S-031	Yes. And that's used for primarily our wild land interface. Wild land firefighting. And we communicate with an alternative dispatch center through Department of Natural Resources, specifically for the wild land deployment.
Context_of_Work - Relationships	FF	S	Field Responder	46-55	21-30	Male	FF-S-031	... And a lot of that has to do with trying to coordinate with law enforcement. They may be at the scene, and they may not be at the scene, and we just don't- we're not sure of that because the dispatch center can't give an estimated time of arrival.
Context_of_Work - Relationships	FF	S	Field	36-45	6-10	Male	FF-S-032	Sure. So as a firefighter, the daily routine is come into the station, chat

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder					with the people that were on shift before, the 24-hour shift. We work 24-hour shifts. So in the morning, we would talk with the people that were on the apparatus before us, see how their day went, see if there was anything, any information for them to pass. At that point, we start in with talking about a plan for the day, any training or activities we have...And then towards the end of the day, we would have a meal and we stay at the station 24 hours. So if we're slow, we'll get some sleep. If not, we'll get ready for the calls that are going to come in at night.
Context_of_Work - Relationships	FF	S	Field Responder	36-45	6-10	Male	FF-S-032	Yeah, yeah. Yeah, absolutely. And then we have paramedic units that we would call or that would get dispatched if there's an ALS-- an advanced need, yeah.
Context_of_Work - Relationships	FF	S	Field Responder	36-45	6-10	Male	FF-S-032	Yeah, I mean, we spend 24 hours together and we're not always assigned with the same people every shift, but we have a number of people assigned and then to account for vacations and sick days and holidays and stuff, about 80% of that full assignment is on and we just rotate that throughout. So we have, say, eight people assigned, but five are on shift any given day. So you get to know the people that you work with very well. So, yeah. So we do the mundane things from cleaning the station together to the higher-risk things like going into a house that's on fire, or working on a patient that's in cardiac arrest, or something like that. So you end up forming tight-knit bonds with your co-workers. Maybe more so than you would in a normal 9:00 to 5:00, 40 hours-a-week kind of type [crosstalk]. It's just a little bit different relationship, probably, than you have in a typical job.
Context_of_Work - Relationships	FF	S	Field Responder	36-45	6-10	Male	FF-S-032	... And then we do do some outreach to the community, community events, but our department's large enough that we have a division of our department that is kind of responsible for that public education outreach. So every once in a while, we will be requested from that division to go out and talk with some school kids or do an event, that sort of thing. But typically, that side of things is handled a little bit more from that division.
Context_of_Work -	FF	S	Other	36-45	11-20	Male	FF-S-033	...Other than that, I'm on various committees throughout the region

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Public Safety Personnel					planning three-year training plans, putting together training manuals. And I'm on an officer development academy committee which oversees continuing education classes for fire officers to improve their skills
Context_of_Work - Relationships	FF	S	Other Public Safety Personnel	36-45	11-20	Male	FF-S-033	We also do PR events. We go to preschools, and we show off the fire engine, and we do neighborhood block parties. We show up with the fire engine and we answer questions. And we have tourists come to the station. We answer questions there. We also go out and we do fire inspections. And so then we have to go out to individual businesses, and we have to make sure that they're compliant with fire code, and we have to write violations if they're not in compliance, and then follow-up to make sure that they fix the things that they need to take care of.
Context_of_Work - Relationships	FF	S	Other Public Safety Personnel	36-45	11-20	Male	FF-S-033	Well, it's like a second family because we spend 24 hours a day together and about a 100 days a year working together. So a lot of it depends on the size of the station and the crew dynamics. So we have some three-person stations. And so this much smaller station. And depending on the personalities that you have there, you might spend a lot of time together, or you might not spend much time together. Some people prefer to be by themselves and do their own thing, and some people like to be in a group. Kind of worked at a three-person station for six years and I really enjoyed it. My crew and I got very close. We're very good friends. After that, I went and I worked at an eight-person station.
Context_of_Work - Relationships	FF	S	Other Public Safety Personnel	36-45	11-20	Male	FF-S-033	[RE: relationship with citizens] I feel we have a very good relationship for the most part. I can't think of any instances where we've had issues. But as I've said, it's a diverse population. And we do a lot of PR events where we go out to schools, or churches, or community centers, and we do presentations, and try to get the community involved, and get them to understand who we are and what we can do for them. All the fire stations have an open house every year in October. And we invite anybody to come through. And they get to look and ask us questions, and look at our rigs and our apparatus, and see-- some of the stations will have a live fire demonstration. And so we can actually answer questions. And I mean, that goes along to teaching and informing

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								people, too, about when is it a good time to call 911 versus maybe you should just call your personal doctor? What kinds of things can we do? What kinds of things should be directed to somebody else?
Context_of_Work - Relationships	FF	S	Other Public Safety Personnel	36-45	11-20	Male	FF-S-033	One other thing that's unique for [City] is we have a program that's called CARES. And one thing that they do is if we have certain types of incidents that don't necessarily require an emergency response but the people feel overwhelmed because they don't know how to handle it, then we can refer them to be social workers. And then they can respond, and they can help the clients find different means of help that don't necessarily overburden the 911 system. It might get them some long term help. Maybe some different physician care, different mental health care, different, maybe, fall protection care, or maybe help relocate them to a place that would better suit their needs, so. I think we try to do a really good job of interacting with our community to help them and let them understand that we're here to help them. And here's what we can do. Here's what we can't do
Context_of_Work - Relationships	FF	U	Field Responder	46-55	21-30	Male	FF-U-034	...Then we have lunch noon-ish, we all [clutch?] for dinner at 6:00. And then after that, it's kind of a little bit of a hit and miss usually after dinner. Again, do our own housework cleaning and all that stuff when everything is done. For the most part, me personally, I kind of let the guys and gals do whatever they're going to do. And then I usually try and catch up on paperwork, or work on projects or something like that through the evening. Rarely do we do training after dinner
Context_of_Work - Relationships	FF	U	Field Responder	46-55	21-30	Male	FF-U-034	To a large part, I mean, we are like a big family, because it's not like you're coming and clocking from 9:00 to 5:00. I mean, we're here for 24 hours, which means that we're eating together and we're cleaning together. Everybody has individual bunks, but we all sleep here at night. We're allowed to go to bed after 10 o'clock, and then we get up at 7 o'clock to get relieved. Unless we have runs obviously, then you're up and down throughout the night [inaudible] and whether you have any incidents. But I would say there has been a little bit of a change, probably within the last 10 years. Before, at least some of it has to do

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								with station set-up. But there used to be a lot more, in my opinion, gathering where guys would hang out in the beanery, or hang out in the watch officer pool pen, and there used to be more communication. Now that, about 10 years ago or so, they started to really compartmentalize sleeping quarters. So instead of having the big bunk room where everybody was in the bunk room, now everybody has their individual units. So it kind of allows people the opportunity to go and shut the door, and do their reading or computer work or whatever. And so it gets a little more splintered than it used to. There's not as much gathering. But depending on the station and the makeup and the relationships with the people, there still can be. It's just not as much as there used to be.
Context_of_Work - Relationships	FF	U	Field Responder	46-55	21-30	Male	FF-U-034	Yeah. Yeah. I mean, obviously, there's all different types of personalities. And sometimes, some don't always mesh well with others. But for the most part, we are family. So not just because we're together 24 hours a day at a given time. But due to the job we have and the level of danger and risk associated with it, you kind of get to a point where there's a level of, "I've got to know you have my back," and vice versa. So I think that provides a different dynamic to the environment, where it's a little bit closer than just checking in, and coming in, and sitting at a desk and, "Hey, [Name]." You know, that--
Context_of_Work - Relationships	FF	U	Field Responder	46-55	21-30	Male	FF-U-034	Okay. It can be very rewarding. Absolutely. One of the difficulties that we probably have specific to our district is our clientele that we worked with, the majority, probably 90% of them are all of the homeless, the shelters. And so you end up in this-- society has changed to people-- before, it's like fire department showed up and they were real happy to see you. Now, the majority of our clientele, they're just like-- they're just as happy to tell you to go screw off. They just don't really care. So it's not like you're out going to the 80-year-old grandma that's most likely to bring you a plate of cookies the next shift, right, and really are happy to see you. Most of our people-- and you've got a huge mental health problem. So a lot of times, it's difficult trying to deal with the individuals that don't want help, but they need it. So it's a different dynamic,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								<p>depending on where you are in the city. And each has their own, right? So there are times where it can be very rewarding, because our job is to help people ultimately. Sometimes it can be very frustrating, because you try and help people and they don't want it. And there are other situations that get very frustrating. So you have to learn to kind of deal with frustrations and anger, and be able to [inaudible], "Hey, it's my job and [inaudible] put you on a-- represent the fire department the best we can." So there's a lot of times where somebody's going off on your face, and you just kind of got to swallow it and just try and, "Yep. Yes, sir. No, sir," and, "We're here to help. You don't want our help? Okay." Fun? I would say, I would've said that a lot earlier in my career. Now that I'm getting older in it, it's getting tired. I mean, the run volume and everything takes its toll, the clientele takes its toll. It's still a great job. You can't beat our schedule, and especially the people that I get to work with are fabulous. And so it does create a level of camaraderie, and I would say coming to work and working with [inaudible] will make it fun. Some of our runs that we go on, aren't as fun anymore.</p>
Context_of_Work - Relationships	FF	U	Field Responder	46-55	21-30	Male	FF-U-034	<p>... There are times that we do community events based on the area. Being downtown, we don't have as many because we're not really in much of a residential area. A lot more of those where they started-- they do their-- I can't figure what it's called, but they'll shut off streets and do that sort of thing. So a little bit probably more in your residential areas, we tend to look at more of that public interaction and just kind of showing up as the local fire department.</p>
Context_of_Work - Relationships	FF	U	Field Responder	46-55	21-30	Male	FF-U-034	<p>What we do get a lot down here, partly because we're kind of located at headquarters, which is where we used to be stationed. We moved here about, going on nine years ago. They built this. We get a lot of tours. It's not so much that we, where we are, go out. But because we're such a big station, a lot of people come in. So we're constantly doing tours and/or things like this, where people come in from different businesses and/or being HAZMAT, we have a lot of technology that we use for monitoring. So sometimes, we have a lot of people that want us to beta test their</p>

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								equipment and stuff like that. So there's that kind of interaction on a-- and then sometimes, it's getting out, going to shop because we buy our own food, cook our own meals, as well as just kind of taking care of the guys and going to grab a cup of coffee at the local Starbucks or something.
Context_of_Work - Relationships	FF	S	Not specified	Not specified	Not specified	Not specified	FF-S-035	[S6] Responding to the citizens of [City] in their times of need, when they need help outside of their own capabilities.
Context_of_Work - Relationships	FF	S	Not specified	Not specified	Not specified	Not specified	FF-S-035	[S5] I know there is, definitely on their standpoint. But sitting here, I try to keep and kind of do my own thing, in the sense of I make a lot of contacts within the community daily, whether it's in our car seat checks, whether it's dealing with people within the city, within the school district, within parent groups, within a big variety. And then on top of that, with their emergencies, it's communicating with the media regularly. So even if I'm not aware of something going on, necessarily here, the media will call, and then I would go online in the middle of the night and check and see what the emergency is to be able to communicate with the crew that's on the emergency before I go back to the media, and to make sure that I'm putting out the right information.
Context_of_Work - Relationships	FF	S	Not specified	Not specified	Not specified	Not specified	FF-S-035	[S3] Second home away from home. It's challenging, exciting, and fun, kind of all at the same time. And if you have a bad day with someone there's six other people there to kind of go to. I mean, anything kind of goes, but it's-- everybody knows it's all business but you try to lighten the load by having a good time at the same time. You have the comforts at home in the workplace. You have a fully-loaded kitchen, you have a place to relax and do your thing, and then you have a place to study that's private/personal if you're working on your project and your career advancement. You can go to pretty much anybody else for help and using group effort to kind of do the same thing.
Context_of_Work - Relationships	FF	S	Not specified	Not specified	Not specified	Not specified	FF-S-035	[S5] ... So at night, when it does slow down a little bit, when you get to do group dinners and do things like that, that just continues to create that bonded relationship. So when you're on calls, you know the person, you know their mannerisms, you know their good and bads. It just helps to

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								make things work a lot smoother, the trust factor, everything else. So it's nice.
Context_of_Work - Relationships	FF	S	Not specified	Not specified	Not specified	Not specified	FF-S-035	[S4] They call us when they don't know what to do no matter what it is. I mean, all the way from changing a battery in a smoke detector to major, widespread catastrophic disaster or a traumatic family event. And their capability is that they are trained and able to not only respond to that, but they can do something and make that situation better. So they have incredible capabilities and that network of that team with lots of experience. You have people from 30 plus years of experience all the way down to 1 year of experience. So there's a lot of information sharing that goes around.
Context_of_Work - Relationships	FF	S	Not specified	Not specified	Not specified	Not specified	FF-S-035	[S6] I think part of what goes into it too is that, as we've talked about already, our individual stations of the department as a whole, as cliched as it is to say is a big family. Right? So part of that requirement, I'm sure is finding individuals that are going to fit this family for the next, potentially, 25 years, right? You're hiring a roommate as well as a firefighter EMT, so.
Context_of_Work - Relationships	FF	S	Not specified	Not specified	Not specified	Not specified	FF-S-035	[S3] And I mean, we have a wide range of community members, of course, just like everybody else. We're pretty urban. But we're very well supported by our community. So of course we support that back in every fashion that we're capable of and we get that reciprocated back. And an astounding percentage-wise. I mean, whatever we went out for we've got back at a high margin. But we have a great community here. I think that's why most people that get hired here don't leave to go to another department. And the ones that have, have come back. So we've had a couple of guys leave this department, go to other departments, like they say the grass is greener somewhere else only to find out it's not and then they'll come back.
Context_of_Work - Relationships	FF	S	Not specified	Not specified	Not specified	Not specified	FF-S-035	[S6] It's pretty economically vast too. From one side to the other of [City] you've got people that are very, very well off and people that may not be as well off, which is-- it's great for us because we get to respond to those different areas and see either side of what [City] has to offer. I

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								think that as he stated here, the people of [City] really have a lot of support for our department. And we owe it to them to continue to provide excellent service and that's what we aim to do every time we are out there.
Context_of_Work - Relationships	FF	S	Not specified	Not specified	Not specified	Not specified	FF-S-035	[S6] Kind of one thing she was talking about with doing different community events, it was something that in the interview process was really appealing to me, this being a bit of a smaller department where we have three stations as opposed to [City], which is pretty vast. And just being able to actually be seen and involved with the public of the city of [City]. So going to those different community events, you get to talk to people in a non-emergency setting. It seems like everyone's usually really receptive and really likes that, kind of gets to know us on sort of more of a personal setting as well and kind of see us as--
Context_of_Work - Relationships	FF	S	Not specified	Not specified	Not specified	Not specified	FF-S-035	[S4] In some ways. To get [inaudible] they pool together because they're comfortable together, right? So you can kind of know when you go on a call, what you might expect given an address or a certain area. We have some of those same people who speak that language. They make themselves available by phone if you don't speak the language when you go to a particular apartment complex that you know is going to be one complete ethnic group. If somebody there doesn't speak English and we can't get through a language line that's provided to us by the county, we can call one of our off duty firefighters and hope he's always on duty. But it's not fashionable.
Context_of_Work - Relationships	FF	S	Not specified	Not specified	Not specified	Not specified	FF-S-035	[S4] They'll make themselves available 24 7 by phone. You just got to hand it to a patient and then you get it back and you get the information. And so that's pretty helpful. It's actually invaluable.
Context_of_Work - Relationships	FF	S	Not specified	Not specified	Not specified	Not specified	FF-S-035	[S6] Some people's cultural backgrounds, they prefer that, if it's a female being assessed, that they have a female EMT, and that's an opportunity for us to learn that, respect that, and use the tools that we have or use the individuals that we have on shift to abide by what their wishes are. So that's how it is.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	FF	S	Not specified	Not specified	Not specified	Not specified	FF-S-035	[S4] You're absolutely right and I think one of the-- you can go from this department to our neighboring department to [City] or to different departments that there's different cultures within those organizations. And there's a global fire service culture, emergency responder culture, but there's different cultural flavors within those organizations. I would say for the most part, my observation is that we are-- there's a lot of risks. There's humility in our organization, and a lot of respect for that respect that we get. I try to live by-- try to be worthy of the respect that I get from the people - that's my goal - and not take that for granted. And I think that is something throughout our organization is pretty much out there that we go out there, we appreciate it. We appreciate the support we get from the community. We try to pay that back, pay that respect back. With kids, it's pretty normal that the guys will be out shopping and there will be kids that will wave. They'll show them the fire truck and things like that, and the guys and gals are really good about that. Really good.
Context_of_Work - Relationships	FF	S	Not specified	Not specified	Not specified	Not specified	FF-S-035	[S4] There is a very broad fire service culture and then a more specific West Coast/East Coast fire service, volunteer-paid fire service culture, and then there's a lot of subcultures within each organization. But we could walk into any fire station across the country and still fit into that fire service culture [inaudible]. That is consistent.
Context_of_Work - Relationships	FF	S	Not specified	Not specified	Not specified	Not specified	FF-S-035	[S4] EMS in this region is incredibly integrated with the healthcare system. We're basically a part of the hospital system, particularly in the areas of myocardial, and partial, and stroke. They basically track our time. We all work on the same timeline of care so that whether it's getting a 12 lead and then getting them into a cath lab, or stroke care, we're all integrated very closely. Technology is one of the big tools that makes that possible.
Context_of_Work - Relationships	FF	S	Not specified	Not specified	Not specified	Not specified	FF-S-035	[S6] She communicates with the public through Facebook and Twitter. As she mentioned before, either educational opportunities, community events going on, incidents that are going to have some effect on the public whether it's because of traffic, or whatever it may be. Just

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								keeping the public in the loop as to what's going on with the department. As well as, she mentioned earlier, showing the department that we're consistently-- or, sorry, showing the public that we're consistently training as well. So if we're out there doing drills, we are pretty much daily, she'll come out and do a snapshot. "Hey, [City] fire department is working on this," and that's pretty much the overall scope of what she does as far as social media.
Context_of_Work - Relationships	FF	S	Supervising Field Responder	Not specified	Not specified	Male	FF-S-036	[S3] We are typically, the good guy. We get cookies and cake brought to our stations weekly by people saying thank you, which probably the station at the police department don't usually get.
Context_of_Work - Relationships	FF	S	Supervising Field Responder	Not specified	Not specified	Male	FF-S-036	[S3] Yeah, to answer the basics is to have leadership meeting once a week, on Tuesdays. He'll bring in his staff; people like me, the EMS, deputy chiefs, fire marshalls, gives us the broad message. We deliver it down to our people. I have monthly operations meetings where I bring in all of the battalion chiefs and, for three to four hours kind of give them briefings for them to take out into the streets. And then, yeah, we try to stop by and see the crews and let them-- they enjoy it actually, to actually see some of us out on the scenes. So we try, but when I first came in here, again I've only been off the streets for two years. So yeah, I was going to come in, and I was going to be that great communicator and I'm going to be out talking with the crews. You just can't do it.
Context_of_Work - Relationships	FF	S	Supervising Field Responder	Not specified	Not specified	Male	FF-S-036	[S3] I'd say it's kind of like living with family. I mean, they're there for 24 hours, so the day to day-- it also depends on where you're at. If you're working across the street here, your day is much more on plan because this is our busiest station across the street over here. So they're going to run 15 to 20 calls today. So they're in response constantly. The very little time that they get is spent in training and preparing themselves for the next call. Or we have some stations that only run 400 to 600 calls
Context_of_Work - Relationships	FF	S	Supervising Field Responder	Not specified	Not specified	Male	FF-S-036	[S3] . So it really varies. Other than, I mean, I guess, what's life like? It's just like a family. Some have great relationships. Some crews are tight. A lot of crews, I would say 80% of the crews eat as one. Eat their lunch together, eat dinner together. They shop together. They prepare their

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								meals together, sit down together. Most do that. Some crews eat in their own little separate spots. Same where, I guess, as a-- you see different families. Some are tighter than others. Occasionally, we have people that float in that they're not-- so it's not always the same crew. So it's dynamic, I guess. I don't know how to say it other than that. Very dependant on where you work, who you work with.
Context_of_Work - Relationships	FF	S	Supervising Field Responder	Not specified	Not specified	Male	FF-S-036	23:02 One of the biggest problems we have up here, too, is we're pretty much a medical provider to a lot of people. A lot of homeless and heroin overdoses and fentanyl overdoses. They go multiple calls a day now, homeless here, too. And that kind of wears on them. And 99% of those calls are somebody sleeping drunk. And we wake them up, and we leave. There can be call after call like that, so. That's probably more of an issue than the diversity and minorities, and other stuff is dealing with the homeless and the opiate issues.
Context_of_Work - Relationships	FF	S	Supervising Field Responder	Not specified	Not specified	Male	FF-S-036	[S3] Yeah, we have a public education department here that is very active, so our crews are either setting up tours in schools. We're at Every home football game across the way there our crews are at the home football game standing by. We do all the fairs, all the parades.
Context_of_Work - Relationships	FF	S	Supervising Field Responder	Not specified	Not specified	Male	FF-S-036	[S2] In any event, our contracts cities these have. And one of the big things we do, too, anytime we have a larger fire, even if it's a house fire, and there's a lot of people there, our public information officer will set an after the fire meeting. So we'll find a hall or fire station or a school or something. And we'll have the crews go out and leave flyers at all the homes around there to say, "We're going to have an informational meeting about the fire." And we meet with the neighborhood and tell them-- a lot of it's we take and do public education and fire safety, but we also tell them why we did what we did. So they understand. Why we cut that hole in the roof? Why did we not go in right away, or whatever it is we can explain what tactics we use and how we do what we do, and it answers a lot of questions.
Context_of_Work - Relationships	FF	S	Supervising Field	Not specified	Not specified	Male	FF-S-036	[S2] Yeah. And a lot of that is public education, but we also know as a fire district we go out to our voters for money issues. And the more

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					positive and the more communication we can have with our citizens, the better off at election time obviously we're going to have, too.
Context_of_Work - Relationships	FF	S	Supervising Field Responder	Not specified	Not specified	Male	FF-S-036	[S3] So that's the little stuff. What do they do on their time? They chose to do. They chose, to go and they drove to three different parks, parked, let the kid gave free each, that was all on the crew.
Context_of_Work - Relationships	FF	S	Supervising Field Responder	Not specified	Not specified	Male	FF-S-036	[S3] They weren't doing it, but that's just a little, "What do we do when we are out?" That. We tell them when we-- sometimes you catch slack when they see an engine at a grocery store buying. Some people "I'm not paying." But we try to tell everybody use them, one as a learning opportunity at all times when they're out there. If fire crews see somebody that has a flat tire they can stop and help the person. So it's trying to build that positive image when they're out there, whatever they're doing.
Context_of_Work - Relationships	FF	S	Supervising Field Responder	36-45	21-30	Female	FF-S-037	I would say it's all very important. Sometimes we're supporting the role of the other divisions in the organization, and we're also the community aspect of the fire department. We're the ones that are always out there interacting with the public.
Context_of_Work - Relationships	FF	S	Supervising Field Responder	36-45	21-30	Female	FF-S-037	So I communicate with the folks within the organization. I communicate with folks in the community. I mean, I do a lot of that through phone calling, emailing. It just depends on the situation how I would do that.
Context_of_Work - Relationships	FF	S	Supervising Field Responder	36-45	21-30	Female	FF-S-037	I think we have a great relationship with our community. We are able to kind of prove that support every four years when we do our levy. That's a third of our funding that is voted on by our voters every-- now it's every four years. It used to be every two. And we pass at-- over 60% is what's required, and we typically pass those. So that shows that there's a lot of community support for what we do in our organization.
Context_of_Work - Relationships	FF	S	Supervising Field Responder	36-45	21-30	Female	FF-S-037	I think it's our interaction with the community. Very rarely do we say no to a request that the community makes for some kind of public appearance. If they have an event at the school, we're going to be there. If there's an event at the park, they're going to call us and ask if we can attend, and we're always there. So we're very visible in the community.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								We're not just sitting, waiting for a call to happen. They do have a lot of calls too, but we're also very visible, which is, I think, one of the reasons why we have so much support. It's because they know that we're there for them even if it's not an emergency.
Context_of_Work - Relationships	FF	S	Supervising Field Responder	36-45	21-30	Female	FF-S-037	We have some really cool public education programs. We do smoke alarm installations, and that's-- we go into people's homes and install smoke alarms and do assessments of their home to-- "hey, this is something you could do to make your home a little bit more fire safe. And this is how you can prevent a fall in your home," because a lot of the people who call us for that service are seniors. So there's multiple issues why we would be going there not just fire. So we use those opportunities to communicate all the different safety messages. And then we're in every school, every classroom in every school, which most departments aren't in the schools to that level. We teach CPR in all the high schools. So, I mean, we're very visible. We do a lot of things for the community, so I think that's why our community supports us the way it does.
Context_of_Work - Relationships	FF	S	Supervising Field Responder	36-45	21-30	Female	FF-S-037	In my job, I do quite a bit. Whether it be local entities that are surrounding us or other agencies nationally. I went through the executive fire officer program with the National Fire Academy, so I was able to really build a broad network of folks. So if we're not doing something and I have a question, there's always somebody I can call and ask. Whether it be somebody that's local or somebody that's maybe across the country, so it's kind of cool to have that kind of a broad network.
Context_of_Work - Relationships	FF	S	Supervising Field Responder	36-45	21-30	Female	FF-S-037	So there is, but it might be every six months. And if you don't use it [inaudible], then-- I don't remember how it works. So luckily, we do have people who are kind of experts in those things, and I would hope that in a major incident they would be able to help us. Because I think once you use it a couple of times or the first time you
Context_of_Work - Relationships	FF	S	Supervising Field	46-55	31-40	Male	FF-S-038	Descriptors of the work in the field? It's a good question. It's a good way to put it I guess. Well, public servants. I mean, we are the public

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					employees who are here to work for the citizens of the communities we serve. So we're going to react to any request that gets put upon us and we're going to deal with it in the way we see fit with resources, deployment of resource, what we send, those type of things. I'm not thinking of any great adjectives that come to mind at the moment.
Context_of_Work - Relationships	FF	S	Supervising Field Responder	46-55	31-40	Male	FF-S-038	... So typically, when I leave the house, if I don't have a meeting that I need to attend in the morning, I will typically get out to one of the outlying stations. We have six stations. So I typically like to hit a station at shift change which our shift change is 8:00 o'clock. So I'll try to get to the station before 8:00, converse with the crew going off duty, and then converse with the crew going on duty. And not so much that I have an agenda, but I like to get out and just sit around and have coffee and interact with the crews, see what's going on, see if there's any issues with the station, with the vehicles, if anybody just wants to talk about anything. So more often than not, it's just sitting around talking about calls and those type of things.
Context_of_Work - Relationships	FF	S	Supervising Field Responder	46-55	31-40	Male	FF-S-038	...I have a good understanding of the benefits of face-to-face versus just the emails and the texting. I understand the benefit that it's easier for me to communicate with you face-to-face than a short little blurb on an email. You know what I mean? So that's been helpful in my position because for one, it gets folks out in the field comfortable with me and I get comfortable with them that I can, as an administrator, not all administrators feel this way, I could walk into any fire station at any time with any crew and feel comfortable and they're comfortable with me being there. They're not saying, "Oh wait a minute. What's the guy in the white shirt doing here this morning?" because they've come to expect that, "Hey, [Name]'s going to stop by and maybe have a cup." And it's just by generation. I mean, I wasn't brought up on this. I'm just learning it as I go in this position and in life. I'm learning how to deal with this. I call my daughter a lot and she helps me because she understands it, so.
Context_of_Work - Relationships	FF	S	Supervising Field	46-55	31-40	Male	FF-S-038	... They'll usually have a little interaction with the off-going shift around the coffee table just to kind of talk about how their day went, anything

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					that the shift needs to pass on, that they need to consider for their shift coming on, and just time for them to catch up with each other.
Context_of_Work - Relationships	FF	S	Supervising Field Responder	46-55	31-40	Male	FF-S-038	What is it like in a station? Well, having spent many years in the station-- I was 25 years on the line. So that was from a firefighter to a company officer to battalion chief, so I got to experience it on all levels. And it is very close-knit groups that work on the shifts. I will say we're very fortunate here. I hear a lot of different stories in other departments, but knock on wood, we're fortunate here that we got groups that really get along and enjoy working with each other, and I think that's just part of the culture that we've created through the years of how we do business. But you've heard this, I'm sure. They're like a family. They come in together, they have breakfast together, they work out together, they eat dinner together, and they talk about each other's personal lives with each other. A lot of them are friends off duty, and they go camping, and vacationing, and-- so yeah. It's a pretty good atmosphere.
Context_of_Work - Relationships	FF	S	Supervising Field Responder	46-55	31-40	Male	FF-S-038	...So we're very involved with the community, and everybody has kind of grasped onto that. I mean, that's kind of part of our culture that we're going to get out, and we're going to go stand by at the football games at Friday nights for the high schools. And most everyone enjoys doing that, because they know that we're getting out in the public, they're seeing that we're there for them. Grocery shopping, they go get their dinner goods if they didn't bring them in, coffee break, Starbucks. So they get around and they do what needs to get done, and they also allow time for those types of things to happen as well. So yeah. I mean, I don't know if [Name] mentioned. That's our model up there, and that is pretty much-- that's what we go by. And that's been in place for quite some time, but the last piece is the one that I like to focus on is to be nice. I mean, that is something that everybody knows that we're going to nice. We're going to be nice to you coming in and doing this interview. We're going to be nice to the citizen that we see on a call. We're going to be nice. I mean, that's just what the expectations are, and coming into this organization, you accept that, and that's the way business is.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	FF	S	Supervising Field Responder	46-55	31-40	Male	FF-S-038	Yes I would. And we are a-- as far as how our department's funded, we get our regular taxes, but we also have an excess levy that we go out for every four years, and that's a vote of the citizens. And we have to get 60% plus one vote to get that to pass. So we put a lot of emphasis into that because we know that when it comes time for the citizens to-- basically, they're grading us. When they get that ballot, they're going to see [City], "Yep. We're going to vote for them," and then we're going to continue on with our operation and get the funding that we need, so.
Context_of_Work - Relationships	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	[RE: sending EKG strip] ...So there's still a lot of steps that need to be taken to make the thing work. But I think it's just-- there hasn't been the big push to get EMS, and hospitals, and everybody working together... the thing is, one's government. One's the hospital. The hospitals are a business, I guess... They're out to make money. And so they want people into their system. And so now they're building these outlying EMS places. And I don't know if that's a big thing where you're coming from, but.
Context_of_Work - Relationships	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	[RE: stand-alone ERs] You save that money. You save that ambulance transport... Puts us back in service quicker for the next patient. There's still a lot of kinks that need to be worked out. A lot of it's insurance and what they're paying for, and what they're not paying for. So I don't know how it's going in [City], but we've had it here through a private agency. It's called a CCT unit... Critical Care Transport. So that unit would show up and then, like I said, based on what it is, they [would either?] take care of you right there and send you a bill or transport you. So I really think that's the wave of the future for multiple reasons, and I think it's a great idea. You're going to have those people where you absolutely have to transport them... But from the hospital's perspective, they don't want you to do that. They would rather see you in their building...
Context_of_Work - Relationships	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	[RE: cause of communication issues] ...But in terms of when we get with multi-agencies, that's when it's kind of a measuring contest. We should all work together, but it doesn't always work that way. Like I said, we are on a north area team that we do a trench rescue on. And we've had a

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								couple calls. [Yeah?], it gone smoothly. It got the job done, and outcome probably came out the same. But it's just too many people. Everybody wants to be a chief. Too many chiefs, not enough Indians [laughter]. So [inaudible] [that is?], but how do you fix that? We train on it. But I just think, again, you have your certain guys that you work with, and all of a sudden you're off on vacation, and I'm not working with you. So were not on the same page. And I'm working with some guy from A shift, and he does it totally different than the guy I used to work with.
Context_of_Work - Relationships	FF	S	Manager	46-55	21-30	Male	FF-S-023	[RE: medical supplies] Yeah, it's all about the money, I think. So anyway, so we're trying to reduce the waste that way, by using data again, to analyze how much they need: what they really need at the station, what's expiring, and maybe move stuff that's not expiring, or expiring to a more busy station so it can be used up. Yeah. Exploring things like how do we, maybe, partner with a hospital to get the stuff that they're going to use in a heartbeat, and just do a swap with them so that it doesn't expire, because that's just a waste of money.
Context_of_Work - Relationships	FF	S	Manager	46-55	21-30	Male	FF-S-023	Yeah, and then so I think that's everything. Oh no, maintenance. So I also have maintenance as well. Can't forget those goofballs [laughter]. So it's a little maintenance division, I've got a maintenance manager who's also-- does a lot of our building and facilities. He's got a part-time assistant. We have an assistant for that whole group that does a lot of paperwork and data entry and stuff like that. And then we have three vehicle mechanics that do all of the vehicles.
Context_of_Work - Relationships	FF	S	Manager	46-55	21-30	Male	FF-S-023	So there's an area radio meeting, where we have technical people talking about technical issues, one of our IT people, or actually our business information manager takes care of that for us. They try to work out all of the technical pieces, like how many banks do we have, how many frequencies, or how many talk groups do we have on any bank, and all that stuff...
Context_of_Work - Relationships	FF	S	Manager	46-55	21-30	Male	FF-S-023	...Then we have operations chiefs that meet and talk about what they want to accomplish: they want to be able to have several different EMS groups, they want to have several different fire groups, regionally PD

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								wants their groups, too. They don't always mesh as far as boundaries go...
Context_of_Work - Relationships	FF	S	Manager	46-55	21-30	Male	FF-S-023	...then you've got your technicians over here. God love them, technicians are wonderful, but they often can't talk down enough so our fire chiefs can understand. So often that's a miscommunication. We want to do this and they're like, "Well you can't do that. There's no way in hell you can do that," and then there's friction there until that gets ironed out. And then that gets fixed. And then those technical people take it back to their areas. They set up programming, and then we have to go through and touch every radio with a programming. We have to touch each console with programming. So it's a pretty heady and very time-consuming process. So we don't usually do like, if one person wants to change or if one little thing wants to change we don't do much. We wait, get a big change together, and go out.
Context_of_Work - Relationships	FF	S	Manager	46-55	21-30	Male	FF-S-023	...PD has their own little gig, which is they want to encrypt all of their transmissions, which is fine, but that adds one more layer of complexity. Do they give us permission? Can we read it? Can we hear it? Can we get their security keys? So all of these different systems we have to actually get physical permission to use each system. There's agreements that we have to iron out, and most of those are done, but we have to do that, but you have to review that periodically and look at those agreements. Make sure that they are all still good.
Context_of_Work - Relationships	FF	S	Manager	46-55	21-30	Male	FF-S-023	...And then there's the training side of that. So we are on one system here. All of our repeaters work this one system. If I move away from this system and these repeaters here, I can go to a different bank. I can go to a different system, but I have to physically change my radio to go to that different system to pick up those repeaters. So our firefighters don't often remember that or know which system they're in, so as they're going on a mutual aid, especially our hazmat team goes out a lot and they'll go way east. As they get out there, all of a sudden they can't talk. Well, that's because there's not enough power to get to our system. If they would change their system, they could still talk and it would be fine.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								So a lot of training with that and a lot of our firefighters are firefighters and problem solvers and they do this stuff. They don't necessarily want to know, "That I've got to do all this changing on my radio and programming and stuff," so would be kind of cool if it would automatically switch, but.
Context_of_Work - Relationships	FF	S	Manager	46-55	21-30	Male	FF-S-023	...I will tell you that I always thought computer programmers were kind of nerds and stuff and I can say that because I have done that in my previous life before I got hired. Radio guys? Much more nerdy. Oh my gosh... They are so technical, and there are so many little pieces to this, it's amazing... And I can't understand about half the things they say. Of course, they all talk in acronyms as well so... What is a BG and BFM? I don't know-- and so, anyway. But they're very smart people and very technical. They're almost all engineers anymore, so.
Context_of_Work - Relationships	FF	S	Manager	46-55	21-30	Male	FF-S-023	So there's several different facets to that I think. I've been trying to look into the future, my IT administrator is futurist. So we talk a lot. There is technology that's coming, that's going to make us safer. Robots, drones, that kind of stuff actually doing some of the hazardous work. So there's that kind of technology that's coming. And it makes sense, you've got building on fire, it's just like a bomb. We sent robots to go defuse bombs, why not send a robot into a burning building? If it's not something we have to actively go search for somebody. That way if it collapses, what do we lose? ... A million dollar robot, who cares? It doesn't have a family, so there you go.
Context_of_Work - Relationships	FF	S	Manager	46-55	21-30	Male	FF-S-023	I think the hardest thing that I'm seeing throughout this industry is, industry adopting stuff without ego. Bigger departments feel like the littler departments don't have the right to have a say. Littler departments think bigger departments are clunky and old and don't know what they're doing. Volunteer departments feel one way. Career departments feel another way. All of it's bad. So I started off with bigger departments picking on littler departments and we're a littler department. I'm not saying that I don't have my faults [laughter]. Ego has to get out of this system...

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	FF	S	Supervising Field Responder	46-55	21-30	Male	FF-S-017	A neighboring agency's having a line-of-duty death funeral tomorrow, so making sure we have a firetruck, making sure we have a certified engineer, and an officer, and [inaudible] off-duty people and honor guard people and getting their time off coordinated, making sure we have proper staffing tomorrow, working with our neighboring agencies to make sure we're all covering for this fire district who's going to have a tremendous amount of resources at the funeral...
Context_of_Work - Relationships	FF	S	Supervising Field Responder	46-55	21-30	Male	FF-S-017	So we work on projects like that. Those are kind of more of the significant ones. The operational ones. A little R and D, a little planning for it, so we're building incredibly large hotel out by the airport. And it is very distant from most of our core resources. Not only for us but PD, and streets, and parks, and water, and everybody. And we're trying to work together to figure out, okay, how are we going to provide services? Well, it's so far out, that now it's building relationships with north side fire departments that we've never worked with. But they're actually our closest backup. But it's so distant from the core of the city and we've never had any development out in that area that all of sudden now we've got almost a three million square foot hotel, convention center complex going in. And there's going to be one fire truck, for now, assigned out there when it first opens. We'll add resources as it grows, but figuring out, okay, if we have an incident, how do we cover that, and then building out the relationships with our neighbors to the north, and introduce ourselves, and do some tours, and some joint training, and kind of get that. So those are some of the projects that I have the opportunity to work on.
Context_of_Work - Relationships	FF	S	Supervising Field Responder	46-55	21-30	Male	FF-S-017	I think really good. We work very closely with a similar size or smaller departments. We have a good working relationship with [City] Fire, but they're big city fire department, with a lot of big city calls, a lot of issues going on. We have some border calls that we work together. We don't do a lot of aid back and forth to each other. But I would say, otherwise, and especially now that we've improved the radio systems, that's made it even better. I think as our technology opportunities change, if we get to

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								a point where our CADs are talking to each other, we could look at some-- we have some areas where dual responses, coordinated responses would work out really well for us. But it takes some time for us to have the comm center, notify a comm center, and then they process it. A call gets shipped out, and there seems to be some delay. Whether it's a training issue or a technology issue, not super sure yet because we haven't pushed that far into saying, "Yes, we're going to run dual responses together." But I think there's some opportunities in the future as money gets tighter, and that you just can't build fire houses wherever you want anymore. You have to figure out how can we work together to cover areas on the fringes of your protection area. So I think there's some opportunities in the future. It's just, okay, how do we work through that?
Context_of_Work - Relationships	FF	S	Supervising Field Responder	46-55	21-30	Male	FF-S-017	So normally I'll go out. There's two reasons I go to the street. One is to work with the battalion chiefs. So I'll either have group meetings. So we'll sit down. We'll do a little training. We'll have conversation about what's gone on at headquarters for the day or any issues that they have in their battalions that we can work through, the four of us. Sometimes I'll have one-on-one meetings. So like this morning I went out and had one-on-one meetings with the battalion one chiefs. I caught them at shift change, so I caught one before the other one came in, had a meeting. Then he changed and left. I sat down with the other one. And then yesterday I went out because all three chiefs were on calls, so that I went in service as the fourth chief. And then it's also my responsibility as that fourth chief to maneuver our resources around.
Context_of_Work - Relationships	FF	S	Supervising Field Responder	46-55	21-30	Male	FF-S-017	...a lot of times our chiefs only look at the internal resources and I'm lucky, after I left Arson, I went to training. I built a lot of relationships with the neighbors. I know what resources they have so I know how to use those chess pieces too. Some of the chiefs have that awareness and some are just-- all of them are very well aware of what's going on in our city, it's just what else can you do? The move up module is going to be huge for us, so.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	FF	S	Supervising Field Responder	46-55	21-30	Male	FF-S-017	Very good comm center, but the comm center, I believe, and it's easy for me to say because I'm sitting out here, really works up...
Context_of_Work - Relationships	FF	S	Supervising Field Responder	46-55	21-30	Male	FF-S-017	Yeah, like I said, the timing couldn't have been better. We had just finished a meeting. We'd just opened our brand new department operations center. They had a beautiful white wall for us. There's a map in there. One of our firefighter's kids is a dispatcher at a neighboring department where our fire calls roll to when the system goes down. So they go to [County] County and they roll them to [City] Metro Fire MatCom. And he called one of my chiefs on his cell phone and went, "What is going on? We're getting your calls. What do you want us to do with them?" So we went into the department operations center and set up a makeshift comm center until they could get everything up and running again.
Context_of_Work - Relationships	FF	S	Field Responder	26-35	11-20	Male	FF-S-018	There's community risk-production events where we do public education and anything like that. You can see how the calendar dictates our main points of the day. I mean, we have this. What else do we have?
Context_of_Work - Relationships	FF	S	Field Responder	26-35	11-20	Male	FF-S-018	We have an ambulance company with us, as well. So they're in and out. They try to do as much as they can with us, and we try to integrate them into what we're doing training-wise, and working out, and eating, and things like that. They're typically busier than we are, so they're in and out of the station quite a bit more than we are.
Context_of_Work - Relationships	FF	S	Field Responder	26-35	11-20	Male	FF-S-018	I mean, we do a lot of training with surrounding departments. For us and our station five, we're part of what's called [City] Technical Rescue, so that's eight departments. They're all kind of north and next to us. There's a really good relationship there. The department to our southwest, Metro, good relationship there, really, from the top down...
Context_of_Work - Relationships	FF	S	Field Responder	26-35	11-20	Male	FF-S-018	And we attend a lot of their specialized trainings, technical rescue and stuff like that. And we offer a vehicle extrication class, and they come to that, too. Along with the [City] TRT, we also have the [County] HAZMAT Authority, which is three counties wide. And it's a bunch of departments

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								together. So we go to quarterly trainings for both of those teams. And on our level, it's great. It's just like working with any other firefighters.
Context_of_Work - Relationships	FF	S	Field Responder	26-35	11-20	Male	FF-S-018	...There's been times in the past because our PD, even though we work really closely with them, they have their own dispatch center too...
Context_of_Work - Relationships	FF	S	Field Responder	26-35	11-20	Male	FF-S-018	[RE: dispatch] For the most part, I think they do a pretty good job giving us pertinent information.
Context_of_Work - Relationships	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	Well, we would say we're a big family. So we're a big family taking care of other families.
Context_of_Work - Relationships	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	Absolutely. That's my job, is to help those guys be successful. Sometimes I succeed, sometimes I don't. But I know at the end of the day, it's your driver's license, and you have to drive to the DMV to renew it.
Context_of_Work - Relationships	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	Back in the day, when I started, it was more of the community. You are a part of your community. It was a way to give then your community, and so it was that volunteer community fire department. Nowadays, because of all the challenges that we've discussed there, and that change in the society, the only volunteers we're getting are the young college-age level kids that want a fire job, and so they're using this as a gateway to get experience and get in. And then as soon as they have the opportunity, they're gone. So our average is about three to five years
Context_of_Work - Relationships	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	Networking, I would say, is probably the biggest thing, and partnering with [School], the local community college. I think that has been, because the demographic that we're pulling from is those college-aged kids looking for-- so if you can get in there, they're going through to get the education to become a firefighter. So if we can kind of partner with them to get them experience, that's so far been, I think, our biggest pull lately.
Context_of_Work - Relationships	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	In [County], I think that's something that we've been proud of for a long time, is that we work well together here. We don't have a lot of the rivalries that exist in other places in the country. For whatever reason, we've always worked well together. We are on the same radio system.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								We can flip over on our channel and talk to them any time we want. So I feel like, in [County], that we do okay there. It's always a surprise when we go elsewhere, at least, when I sit there and go, "These people don't--" they just have these rivalries, and since we're kind of homegrown here we don't necessarily see that...
Context_of_Work - Relationships	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	[County] works because we've always gone into everything as a county, and we continue everything we do, technology-wise. I sit in the same-- the reason I know [Name] here, we all have that tech ops group, and I happen to be the chair of the group. So we make sure that we include everybody in the county, and so we're as a whole. And then that ties into the state. So our state has gotten better. The state spent a lot of money in investment into a state digital trunk system, and it helps...
Context_of_Work - Relationships	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	...I mean, it's funny if you look at personality and look at how people behave, when you analyze people communicating or working together, they tend to work together if they can talk to them. It's that simple fact that back in the day, when it was up valley, down valley, they had different radio systems, and so then there was rivalries and stuff because you don't really know what's going on. You can't really interface. But as soon as you make it so they can just casually talk to each other, then the relationships grow. And it's not even an intentional thing but it just-- because that foundation is there, they talk, and then they work together more. And I think that's important. That's a subconscious thing that actually happens when you look at interpersonal dynamics.
Context_of_Work - Relationships	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	We work with the state, with the [Organization]. We're one of the few fire departments that have a fantastic relationship with [Agency] when we're out on the road. And I think it's because back in the day, we made sure we had their radio channels. We communicate with them. Every time we went out in the interstate, we don't need them or anything, but hey, we'd call up, and, "Hey, we're going to the interstate for this call." And just them knowing what's going on builds a camaraderie, and now we train with them all the time. We do all this other stuff, so that is key.
Context_of_Work -	FF	R	Not	36-45	Not	Male	FF-R-019	[RE: DOT] Yeah, we run to the calls. We provide the emergency services,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			specified		specified			but they're key for keeping us safe. I mean, getting traffic slowed down, putting out boards so that people know that there's an accident ahead. And they're actually responsible because of the way the [Name] tunnel works. It's very unique to this state. They actually have the responsibility for fire protection in a small section of the state.
Context_of_Work - Relationships	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	We had a town event, our annual [City] [Event] celebration here, and I probably spent four hours helping the town people get on the right channel or helping this organization get on the right channel or this group do this thing with their radio. So most of my time was doing what [Name] should have been doing - well, he was on vacation - which is interfacing with the public to make sure that they were where they needed to be on that confusing template. And I get it. At first glance, that's not easy to interpret.
Context_of_Work - Relationships	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	That's our radio template. This exists for every single radio in [County] County. All 1,200 radios have the exact same template. It doesn't matter if you're a public works person, trash collection, or the county manager. We all have the same template. That's something, again, as a group in [County] County, we've really embraced. And this has helped us really work well together, that we know how to find each other, and it's open. I mean, you're not going to get your hand slapped because you went over and called someone and talked to somebody.
Context_of_Work - Relationships	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	So it's all a group. There's a lot of duplication in here for tactile reasons. So there's not literally that many channels. It's just kind of some-- there's some duplication for the layout to make it easier for people. But they have input on it. We're actually just now going through another revision of our template. We have a subcommittee that sits down and works with us. It's sort of representative of all the agencies. And then it'll take about a year actually, from start to finish, to make sure everyone's good with it, happy, and gets what they need.
Context_of_Work - Relationships	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	So a lot of it's customer service. We also have a PowerPoint. And I think he said-- so we created a PowerPoint, and we do it here in our department. You're supposed to do it in every department. There's that

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								group, tech ops, built the PowerPoint. All the agencies are supposed to do it but they don't. But here, we actually stick to it, and it's about an hour and a half training. Every volunteer that comes in, it's part of their task book. They sit with me for at least an hour and a half, and we talk radios...
Context_of_Work - Relationships	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	...It's kind of a huge issue. Why didn't an officer come support the team? There's a lack of trust that develops out of that. There's a lack of trust against the officer, against the dispatch center. And it was nobody's fault, other than the two software's not talking to each other.
Context_of_Work - Relationships	FF	U	Field Responder	46-55	11-20	Male	FF-U-020	...Recently, the police department and the fire department and the sheriff's department took our radios and we made them all the same so that we can-- where police has their main channels and we have ours, fire can now access police channels and police can access fire. So incident commanders can actually-- we can actually talk significantly easier now because of the way our radio channels and our trunk [inaudible] is set up.
Context_of_Work - Relationships	FF	U	Field Responder	46-55	11-20	Male	FF-U-020	So when we set something up that is a large event we will have-- in the coordination piece of it we'll have an EMS branch, which would usually comprise of someone from [City] Health and Hospitals. So that's kind of how that works. And if they needed additional resources, they could bring in their own staff and/or us to assist with that EMS piece. So we could serve two roles of a fire rescue part or the EMS piece, so.
Context_of_Work - Relationships	FF	U	Field Responder	46-55	11-20	Male	FF-U-020	...so being able to come in without my emotional argument and bring in a logical argument and say, "Here's how this \$1.8 million could benefit you," is what these data analytics people could do, right? They're the ones that could come in and say, "I'm going to take your emotional argument, and I will show you how you can collect data, whether it's through response times, through call volume increases, through number of citizens that you're serving every time, how many touch points do you have. We can come in and actually utilize that data to justify a fire truck or additional staffing." Chief [Name] is a master at that...

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	FF	U	Field Responder	46-55	11-20	Male	FF-U-020	[RE: Fire Chief] ...He is phenomenal. Best chief we've ever had. Bar none. Hands down. He's amazing because, number one, he's a techie guy, so he loves anything technology. So he's always like, "What's the latest and greatest? How can we use stuff?" But he also understands that there's people out there that are-- that's their job to do that, and so he utilizes them really well.
Context_of_Work - Relationships	FF	U	Field Responder	46-55	11-20	Male	FF-U-020	[RE: Situational 360 program] As we start working through that, the ultimate goal is to bring in these other municipalities in and around the area so that all the jurisdictions in and around the metro area are operating on the same sheet of music. So that we can actually all see exactly what's going on. That's the ultimate goal, that we're not operating in our own silo. That we're actually really sharing as much of that information as possible. So that is the ultimate goal.
Context_of_Work - Relationships	FF	U	Manager	46-55	11-20	Male	FF-U-021	Basically, under the umbrella of administration all of the administrator components of budgetary, HR, all of the department directives and guidelines fall under administration. We also oversee all of the recruitment efforts, all of the PIO efforts of the department, also internal investigations, external investigations, anything to do with on-duty or off-duty behavior. We deal with City of Attorneys Office on litigations and lawsuits come this way. Claims against the city from accidents so on and so forth. We get all the citizens complaints, and then also around arson. Some of the arson investigations everything from fires falls under the administration as well.
Context_of_Work - Relationships	FF	U	Manager	46-55	11-20	Male	FF-U-021	Recruitment, there's never a problem with recruitment. It's more really just trying to mirror the city and the citizens that we served. So obviously, just like most other major metropolitan departments, we have difficulty recruiting people of color and women. As far as being staffed, we just added another full-time recruiter last year, so we have two full-time recruiters. We are very fortunate in that aspect. And we got a chief who's very supportive of all the things that we're trying to accomplished. So we kind of looked at the past of what has worked and mostly what has not, and we've kind of blown it up and we've shifted the paradigm...

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	FF	U	Manager	46-55	11-20	Male	FF-U-021	...We've got good relationships now with athletic directors at all major universities in [State], so we recruit all of the sports teams through those. And obviously, your college isn't so on and so forth, the typical stuff, but we really try to branch out more. We work with [Name] a lot. We go to churches. We speak at churches, community events. We really try to be out in the community. We try to turn people into recruiters for us. So when we realize we don't have two recruiters, we try to get by from people not only in our job but also in the community and say, "Help us to help you to represent our city," and we try to brand it that way. So it's definitely been more successful than in the past....
Context_of_Work - Relationships	FF	U	Manager	46-55	11-20	Male	FF-U-021	[City]'s awesome. [City]'s a very, very, very diverse community so it's a big melting pot. Nowhere near, I'm sure, you said you're in San Francisco or New York, no word to that level but it's definitely a mixture of people that are very friendly, they're appreciative of our services and we really get a lot of good support from the citizens that we service. And then from the mayor and most of the city government, so we're very fortunate in that aspect....
Context_of_Work - Relationships	FF	U	Manager	46-55	11-20	Male	FF-U-021	It's all fun enough here. It's just that it's a team environment, so you're working with not only friends, but your family and you spend 9-24 hour days to 10-24 hour days with the men and women so you really get close with them.
Context_of_Work - Relationships	FF	U	Manager	46-55	11-20	Male	FF-U-021	We work 24-hour shifts and the general starts at 7:30 like today and we'll get off tomorrow at 7:30. So you're off two days and you do it all over again, so you get very, very close with the people you work with...
Context_of_Work - Relationships	FF	R	Supervising Field Responder	36-45	21-30	Male	FF-R-024	Anyway, we get thousands of followers. We get good really feedback through Facebook. So anyway, decisions are made, PIOs are notified. They put together a little press release. They send them out. Up here, people are really good about listening to and abiding by the restrictions, even the visitors. The people who live up here understand what happens if you don't, so.
Context_of_Work -	FF	R	Supervising	36-45	21-30	Male	FF-R-024	[RE: EMS] They transport, and we don't transport to the hospital. Every

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Field Responder					agency is trained up to EMT basic... And then the paramedic system-- they're all paramedics, very highly trained. They're CAS certified. Yeah, and we work pretty well together.
Context_of_Work - Relationships	FF	R	Supervising Field Responder	36-45	21-30	Male	FF-R-024	I don't know. I think nowadays departments communicate with each other much more freely than the '80s and '90s, when there was a big territory thing. Consolidations are happening. Now, we haven't gotten that far up here in [County] yet. There used to be two EMS agencies, and they consolidated. They figured out that it was better, but the fire agencies just-- we just can't come to that, but at our level, the responder level, pretty good relationships. Yeah, people, they do things off-duty together, that kind of thing, and even the chief level, it's gotten much, much better, so. Unique? Probably not. Getting better all over. Probably back east, very territorial where you're from. Very territorial. You look at [County] which is 1,500, 2,000 firefighters, and half of them are volunteer and half of those volunteers operate in stand-alone-- I don't even know how it works, and then they have fist fights in the front yard. That's been on the news, by the way. It's probably different back east than out west.
Context_of_Work - Relationships	FF	U	Field Responder	36-45	11-20	Male	FF-U-010	Yeah, we do that stuff. We go to schools sometimes. Sometimes if the neighborhood's having a block party or something, they'll ask us to show up and we'll go and show the kids a fire engine and stuff like that. When we're out driving around, usually the boss is always pointing stuff out like, "Look at this roof, or that roof." And aside from that, it's the normal banter in the fire engine, which is always fun. So.
Context_of_Work - Relationships	FF	U	Field Responder	36-45	11-20	Male	FF-U-010	But generally, there's three other people and if you don't know where it is --[talking about other people helping you out]
Context_of_Work - Relationships	FF	U	Field Responder	46-55	11-20	Male	FF-U-011	Well, if you are a fantastic cook, yeah of course. And some guys aren't the greatest cooks so everyone helps out.
Context_of_Work - Relationships	FF	U	Field Responder	46-55	11-20	Male	FF-U-011	Yeah. So say, people are commuting to their jobs and so you throw a fire in there, and people are so upset. So we get little name calling here and there. Whereas, I think before, people understood more so what we did, we were more involved with the community. But now everyone doesn't

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								live here, people are--
Context_of_Work - Relationships	FF	U	Field Responder	46-55	11-20	Male	FF-U-011	It's a safety. Yeah. We're not allowed to be-- you always have to have a buddy.
Context_of_Work - Relationships	FF	S	Field Responder	46-55	31-40	Male	FF-S-015	Sometimes it's good. Sometimes it's not so good. Sometimes they like to hear what I have to say in terms of what we're doing with communications. They don't like to really be told to take care of their equipment for some reason. It's a challenge for them to understand it needs to be treated just like their breathing SCBA or their breathing masks, or their life support system when they're in a fire. That is their tool to be able to call for help. So they need to understand they have to take care of that. And that's a challenge sometimes. They feel that if I break it, I can always go and get another piece. So it's understanding the validity of the equipment. Other than that, on major fires, they enjoy having us there to support them.
Context_of_Work - Relationships	FF	S	Field Responder	46-55	31-40	Male	FF-S-015	What I find after doing it for 15 years now is the relationships, and who your point of contacts are, and how you maintain those relationships. Because you don't always have a lot of time to start trying to figure out who's who in the sandbox when you need to make decisions and get mission-critical communications backup. And it could be a line of sight communications. It could be regional communication. But you need to have some plans and some contacts so when stuff goes south, you can reach out and have those conversations. I've been fortunate enough to have contacts from the [City] and just work my way out throughout the state just because of what I do as a [comulator?]. That's what I bring back to here. When I go out to the big fires, that's what I bring back is trying to educate my leadership on what it takes to really pay attention and have contingency plans in your back pocket to be able to say, "Hey, this technology isn't working. Let's shift to this technology.
Context_of_Work - Relationships	FF	S	Field Responder	46-55	31-40	Male	FF-S-015	And EMS. We're all striving for the same thing, but we have different ways to get there because of our background in our lane in which we do most of our business. Our day-to-day stuff is different in all three lanes of those disciplines. But we're getting better at bringing those together

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								and going, "Okay. Let's meet up here." Now we need to make decisions in a unified command perspective. So I think it's coming. It's just slow type, and it's coming.
Context_of_Work - Relationships	FF	S	Field Responder	46-55	31-40	Male	FF-S-015	It's not really access. It's awareness. It's understanding. Because we all have the same access to it, but some agencies don't understand it, and they rely on other agencies to help them through that process. And it's kind of like that leading them to where you want them to be. And that's part of my fire scope kind of arena is we meet quarterly to try to guide these agencies. We all have representation of part of the state of local government, county, city, urban area. It's broken out into 12 different areas that we represent.
Context_of_Work - Relationships	FF	U	Field Responder	46-55	21-30	Male	FF-U-025	It's either the sports, or adrenaline, or whatever the case you want to call it. But it's the challenge. It's a challenge. And I guess you would say through a public's eye that it's not normal to actually want to go into fires. But once you get educated and have some of those fears reduced through education, it then becomes understandable of how you can actually do that because there is a process. There is a tactical process. There's a way to do it. So what may seem to be an insane activity to laypeople? or others is kind of normal for us because you kind of learn the parameters of your dangers and what you can and can't do. You learn your limitations. And so knowing all those things and putting them together and being able to size up the situation and look at and minimize your tactics, or what they do is they look at things, and you're able to size up a building and measure, through education, some of your dangers...
Context_of_Work - Relationships	FF	U	Field Responder	46-55	11-20	Male	FF-U-027	I'm in charge of a fire company. I have four men under me. I'm in charge of implementing whatever tactics when used in different responses, be it fire, rescue, or EMS. My main job is my men's safety and making sure everybody comes home.
Context_of_Work - Relationships	FF	U	Field Responder	46-55	21-30	Male	FF-U-028	[RE: job description] A lot of it is exposure to watching [City] Fire. I get that one all the time. Is it like that or not? I think some laymen do know what kind of what we do in a way, but from giving it perspective is this,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								what does a fireman do? We put out fires and help people in medical emergencies. We respond there. And then you could obviously advance further into an explanation, but that would be it. We fight fires.
Context_of_Work - Relationships	FF	U	Field Responder	46-55	21-30	Male	FF-U-028	...Advances in just information in itself for many of us, perspective of CPR, the enhancements of CPR, involves in getting that word out to the schools and into public agencies and also the private sector to actually go and do-- have the skill, and again that's done through technologies. If we think of it, it's better coming out of that through YouTube videos. YouTube is very big speaking of technology with that. But just getting it out in the masses to the people for them to learn, which I think kudos for them. More lives are being saved today from cardiac arrest just for bystander CPR. Getting that word out. How did it happen? Technology.
Context_of_Work - Relationships	FF	U	Other Public Safety Personnel	46-55	21-30	Male	FF-U-029	Yeah. I mean, that was always my step-off. And so it seems to blossom with people that have a good sense of humor, and others sometimes don't understand [laughter].
Context_of_Work - Relationships	FF	U	Other Public Safety Personnel	46-55	21-30	Male	FF-U-029	... The sense of not knowing if you're going to step into a hole and fall. So you've got all that going on. And that's where the more seasoned firefighters take the younger people under their wing, "Just go where I go and everything will be fine [laughter]. Don't go anywhere on your own, stay together," and all that. So there's a lot of that. Am I answering [laughter]?
Context_of_Work - Relationships	FF	U	Other Public Safety Personnel	46-55	21-30	Male	FF-U-029	Right. Or it's something that winds up being bad public relations, or a news crew may be filming a 20-second spot for the news at the scene of a multiple shooting, let's say. And then in the background, you have two or three firemen on their cell phones. And they may be laughing and joking at whatever's being discussed on the phone, which is irrelevant to the scene, but how is it perceived on the news?
Context_of_Work - Relationships	FF	R	Supervising Field Responder	46-55	21-30	Male	FF-R-051	All right. It's a good place. I mean it's--any time you work around a group of people that are willing to do what we do, I mean it's camaraderie, you know there's, excuse my language, there's always some kind of BS to go

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								along with them 'cause I tell people that if you really want to see something interesting you put, you know, a bunch of grown me with a bunch of time on their hands... they can find the best practical jokes to do and nonsense stuff to amuse themselves so.
Context_of_Work - Relationships	FF	R	Supervising Field Responder	46-55	21-30	Male	FF-R-051	Other than that. We train. We get along. Every once in a while they squabble. When they squabble I wind up having to fix that. So.
Context_of_Work - Relationships	FF	R	Supervising Field Responder	46-55	21-30	Male	FF-R-051	The people making the calls out on the road, get along without a problem. Yeah, you know there's always--there could be a hiccup here or there. Anytime you put personalities involved. But for the most part we have no issue. And when we do we work those out. We have some excellent dispatchers. We have some that just like anybody else, you can have a personality issue here and there. But from where we were... let's say 15 years ago, today is night and day. This building has a little bit to do with that. But they train. The person who had [Name]'s job before [Name] got it came from a whole bigger organization, brought a whole bunch of different ways of doing things and was better in terms of who he hired.
Context_of_Work - Relationships	FF	R	Supervising Field Responder	46-55	21-30	Male	FF-R-051	Oh, we're--we get plenty of support from the, you know, from the general public. We... nobody around here hate--well, the--you know you go to the city and you'll see people, you know, they don't like the police.
Context_of_Work - Relationships	FF	R	Supervising Field Responder	46-55	21-30	Male	FF-R-051	Around here they know the police because they either grew up with them or went to school with them, they know--or their mom and dad did. Same thing with the fire department. Most of our--a lot of our EMS people live other places and come here to work. But you know with a volunteer department your neighbor is usually the person that's--we don't--volunteerism has dropped. One of the things about our demographics is it's not the money, it's the age. The property values here are high so we don't have as many younger people living here. So that 18 to 30 demographic that you want to, you know, fight fire, we have few of those. You know I mean I had a birthday Monday, turned 49, so it's, you know, I still do it but, you know, I'd rather--[Laughing] I'd want those 20-

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								something's to do it, you know?
Context_of_Work - Relationships	FF	R	Supervising Field Responder	46-55	21-30	Male	FF-R-051	We only have... we had 4, we're down to--well we're fixing to be down to 2 career people because the fire chief is retiring to take a private sector job. We lost our deputy chief. We will figure out end of the year what we do about replacing the chief, replacing the deputy chief or what position gets filled after that. We staff 3 people 24/7 right now as part-time people. We're discussing going out--we've made the steps to go out for a tax, to see if the voters will give us some money to put some more career staff on. And after that we have 60-something-ish volunteers.
Context_of_Work - Relationships	FF	R	Supervising Field Responder	46-55	21-30	Male	FF-R-051	And if the system says, hey, I'm sending you to my house, okay? If the system has the data it ought to be bam. It's touch of a button there's a map, there's the this there's--and so, hey, there's the map. Okay I know where I'm going, I don't need the map. What's the floor plan of it look like? I can, you know, the guys on the truck that are fixing to fight the fire or whatever and say, hey, oh, wait this guy has a sprinkler system in his house or this guy has--this is where his electrical disconnect is and this is where--all that stuff is available and can be added to like I tell people every time when you go in somebody's house to a first aid call, the question you ask before you leave is did you check your smoke detectors lately.
Context_of_Work - Relationships	FF	R	Field Responder	36-45	21-30	Male	FF-R-052	I think for the most part everybody that works up here get along well with each other. Of course no matter where you go there's going to be one or two people that get under your skin or, you know, that... there's just a personality trait that you may disagree with or not care so much for but... especially in our line of business at the end of the day I'm my brother's keeper whether I want to sit down and have a meal with you, might be one thing, but when it comes to your life or my life I will be there regardless of my personal feelings.
Context_of_Work - Relationships	FF	R	Field Responder	36-45	21-30	Male	FF-R-052	Until just within the last probably month or so, I had only been over here one other time and that was to do an inspection with the fire department where we come in and check for life and safety code type stuff. Since then I've been over here several other times. But I don't... don't really

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								know the dispatchers or the people that work over here outside of them calling me on the radio and telling me where I need to go or whatever. But I'm starting to get to know some of them personally. And you know we spend a little bit of time together. And there's one guy that works here that I think he's also a volunteer with us just recently became a volunteer but he comes over and hangs out in the evenings.
Context_of_Work - Relationships	FF	R	Field Responder	36-45	21-30	Male	FF-R-052	-just, you know, things like that. Try to make it family oriented, I guess.
Context_of_Work - Relationships	FF	R	Field Responder	36-45	21-30	Male	FF-R-052	I think it is very helpful. For one if I have a problem I could call him up and say, hey, you know this happened or this didn't happen, you know, is it something on our end, is it something--I've had to call Miss [Name] several times. Speaking of technology when the CAD dumps the information in the system or whatever we have what we call Firehouse software, it's just our software reporting system, software that we use, but it also is integrated with something to do with the CAD or whatever and so we get our calls, I don't have to call over here when I get back and say, okay, what address was that and what were my times and for all the different trucks 'cause, shoot, there's 9 different substations in this [County] and we're all one.
Context_of_Work - Relationships	FF	R	Field Responder	36-45	21-30	Male	FF-R-052	I don't really know what would be a good way to describe it. I mean I just I personally like to be out in the public and talk to people and just do things like that.
Context_of_Work - Relationships	FF	R	Field Responder	36-45	21-30	Male	FF-R-052	They seem to be supportive... of what we do. Of course... everybody appreciate us when it's their time of need.
Context_of_Work - Relationships	FF	R	Field Responder	Not specified	Not specified	Male	FF-R-053	S4: And personalities can be a problem, it is a challenge sometimes. Some stations we have a bidding process every couple of years where we can actually pick a station where we want to work and normally guys who fought together will stay together so to speak, so we have our own little cliques in the fire department and like at this station we have got a good crew on all three shifts, we work pretty well together.
Context_of_Work -	FF	R	Field	Not	Not	Male	FF-R-053	S4: So you have some challenges with certain clientele, I dont want to

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder	specified	specified			stereotype anyone, and the community is great, they all seem really to look after each other, you know not necessarily a neighborhood watch but they do call the neighbors, hey do you see so and so or did you see this happen or any other, they are a pretty close community. Everybody helps everybody so to speak, there is a lot of history in this community with certain names, so it is a unique community in my book.
Context_of_Work - Relationships	FF	R	Field Responder	Not specified	Not specified	Male	FF-R-053	S4: Well you know you gotta - we try to educate people how to look at it. If you live in the [city], you pay city taxes; the city taxes cover your police and your fire and your trash pickup or whatever. If you live in a volunteer service, I have seen more cars or some of the volunteer, you get a lot of door to door sometimes you know. Per year the fire department asks for some help and then people usually donate a little bit of money because it keeps them there, keeps being able to respond if you do have an emergency. We look at it the same, way but how it is worded as subscription based, people look at it oh my god it's a magazine subscription, it is terrible.
Context_of_Work - Relationships	FF	R	Field Responder	Not specified	Not specified	Male	FF-R-053	S4: It's probably the best job in the world, where can you go get paid to go out and meet people and we do our pre-plan project, running our calls and being able to meet people and being outside and not stuck in my cubicle or bound to a certain facility for eight hours and go home you know.
Context_of_Work - Relationships	FF	R	Field Responder	Not specified	Not specified	Male	FF-R-053	S4: So it is nice we go out to eat sometimes, sometimes we cook in you know; it's kind of a unique job. I love it.
Context_of_Work - Relationships	FF	R	Field Responder	Not specified	Not specified	Male	FF-R-053	S2: You do? Okay, and they fight, they would traditionally fight that fire?
Context_of_Work - Relationships	FF	R	Field Responder	Not specified	Not specified	Male	FF-R-053	S1: And they have got crews that come in and do what they are supposed to do and we just support them.
Context_of_Work - Relationships	FF	R	Field Responder	Not specified	Not specified	Male	FF-R-053	S1: They had more than what they can handle to being with. They even turned people away you know, you guys gotta go home, we can't, you dont have to work, we dont have anything to do for you because right now we are just doing this, and that's all that they could do. So it could

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								be a hindrance more than it can be of help.
Context_of_Work - Relationships	FF	R	Field Responder	Not specified	Not specified	Male	FF-R-054	S4: It is very good, everyone communicates good.
Context_of_Work - Relationships	FF	R	Field Responder	Not specified	Not specified	Male	FF-R-054	S4: Everybody is like family.
Context_of_Work - Relationships	FF	R	Field Responder	Not specified	Not specified	Male	FF-R-054	S1: Good, good. How about the communities or what's the community like? S3: They are real nice S1: Are they supportive? S3: Yeah they're supportive.
Context_of_Work - Relationships	FF	R	Field Responder	Not specified	Not specified	Male	FF-R-054	S2: If you wear your shirt in like public, someone will come to you and be like thank you for your service.
Context_of_Work - Relationships	FF	R	Field Responder	46-55	5 or less	Male	FF-R-055	Oh Lord. We help the people that need the help on their worst days of their lives. So, usually we see people when they are at their lowest. House burned down. Child dying. Car wreck. You get a parent that runs up and screaming at you, let my kid go and you can't, you've got to restraint that parent, and sometimes you get parents that their kids are pregnant and you got to sit and hold that girl down because she is trying to run to her mom and dad, I mean, it's --
Context_of_Work - Relationships	FF	R	Field Responder	46-55	5 or less	Male	FF-R-055	S2: I think mentally, if you are strong mentally, not necessary the physical. Physical is part of the job but if you've got a strong mindset on what's going on, not so much put it in the back of your mind; you have to talk about it, but if you have a heart and a mind, that kind of think the same on that person is having a bad day or that person is hurt or you've got to find in yourself, in your inner self to how to take care of it, how to approach that person on a different level.
Context_of_Work - Relationships	FF	R	Field Responder	46-55	5 or less	Male	FF-R-055	The fundraiser, yeah. We do a lot of fundraisers because of the community and we're the biggest fire department in this county as far as - we got 96 square miles. I think it is more now because we cover more over towards [county]. So, we have got all of [cities], but we also go all the way up to the [cities] and what they call mutual aid, we help [cities] and when they call us we go over to [cities]. So, we're all mutual aid, real metro.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	FF	R	Field Responder	46-55	5 or less	Male	FF-R-055	You are like [laughs] Oh, err. Especially if it is somebody you know, because in this area, a lot of people grew up together, lived here for years. Like my wife has been here since she was born but sometimes it's -- it was so and so. And you are like, oh my God -- are you serious? And they are like, Yeah. Yeah, they passed. And she is like -- oh crap. That's like got off the road here, [Event]. Well like, it felt like 30 minutes. It was probably 10 minutes. But they got there and [Event] and I'm like oh crap -- and he knew who I was and I was like, ugh -- I'm sorry. He was like -- no, no. You did what you could. You did what you could. And I am like --.
Context_of_Work - Relationships	FF	R	Field Responder	46-55	5 or less	Male	FF-R-055	Yeah, it was through mutual aid and I was at the station with two other guys and they created a task force. Each county has usually a task force that will go from that county and a certain amount of fire fighters, so many trucks, like we have brush trucks and they will like send 6 or 7 fire fighters, you know, to man those trucks and when you get to the Incident Command scene, they will dispatch you to different parts where they need. They will see where the fire is going down one side, they will send a team over here and a team up there.
Context_of_Work - Relationships	FF	R	Supervising Field Responder	Not specified	Not specified	Male	FF-R-046	And then get ready for work, come to work, meet with my [Job title] and then come to the office and find out how the day is going to go from everybody that I interact with in the city and then usually work till about 5 and then if I can I try to get out of here by 5 but very seldom does that work.
Context_of_Work - Relationships	FF	R	Supervising Field Responder	Not specified	Not specified	Male	FF-R-046	I'm supposed to be in this office at 8:30 but I was downstairs meeting with my delegating some work so I got it off my plate.
Context_of_Work - Relationships	FF	R	Supervising Field Responder	Not specified	Not specified	Male	FF-R-046	Yeah and then with [Name] we as long as I've been here we've been trying to work together we have auto eight agreements so we cover each other on fires. We have a joint back country medical rescue team for hunt angle rescue and any kind of technical rescue services so we have some motorized equipment that they house at their [Name] station and we have all the high angle road stuff here at this station and yeah we do avalanche rescue and because we have red avalanche zones

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								actually in the city with houses in them.
Context_of_Work - Relationships	FF	R	Supervising Field Responder	Not specified	Not specified	Male	FF-R-046	So yeah the [City] well is a contractor I don't know basically [Name] provides the ambulance and we provide first responders so we'll go and assist the scene and we actually we work really closely with [Name]with our EMS support and we do all of our joint training together for EMS and basically respond with our auto aide and mutual aid agreement and [Organization]'s we kind of definitely proud of how well the both organizations work with the side of things.
Context_of_Work - Relationships	FF	R	Supervising Field Responder	Not specified	Not specified	Male	FF-R-046	It's not uncommon for having a 10,000 square foot home that we go to and yeah it's definitely has its challenges and I mean it's a great community and they're very supportive of emergency services but it is a battle trying to keep up with staffing and equipment and all of that just due to the type of community that we have.
Context_of_Work - Relationships	FF	R	Supervising Field Responder	Not specified	Not specified	Male	FF-R-046	And also it effects the volunteers that come back into because it's holiday period so they're going to drive up with their families as well so it kind of produces on response for them and so we definitely rely on all of our neighbors I mean to work closely especially during those times. Because during those times too we have back country rescues which are personal idensive so we got to be staffing those while we've got other incidents going on and so---
Context_of_Work - Relationships	FF	R	Supervising Field Responder	Not specified	Not specified	Male	FF-R-046	Yeah it's non-infrequent so there's no aid areas at the bottom of the mountains so if the people don't have a ride which a lot of people you know they fly in get a ride in at the airport, they don't have cars, they're using buses and so they rely on the ambulances to take the people to the hospital so it's not uncommon for us to have like ten ski runs in a day and sometimes there's three at once and we only have three ambulances in [County] so then [County] has to send an ambulance up to back us up.
Context_of_Work - Relationships	FF	R	Supervising Field Responder	36-45	11-20	Male	FF-R-047	It's just my deal is is getting I guess when I became chief I was pretty young. I still had a lot of older folks on, most of them were okay but I got the feeling of you know being there was an age difference they didn't

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								want to listen to a younger guy but most of them had left and I mean everybody knows everybody here but it's a struggle to keep the training up and get people to training let alone meetings when they have children and basketball games, stock shows and you know regular lives, jobs and you really got to have a heart to volunteer and want you know to strive to make the meetings and make calls.
Context_of_Work - Relationships	FF	R	Supervising Field Responder	36-45	11-20	Male	FF-R-047	No the app is free to download but I think and I haven't been we just had it for maybe a month now our department but I think see there's seven departments in [name] and we all have a chief's meeting once a month at a location and it started out just for task force reasons but it ended up being more of a chief's meeting but I think they pay out of our tax money that we just recently got for this system.
Context_of_Work - Relationships	FF	R	Supervising Field Responder	36-45	11-20	Male	FF-R-047	It's a great community. Very small, very tight but they have really, really supported this fire department.
Context_of_Work - Relationships	FF	R	Supervising Field Responder	36-45	11-20	Male	FF-R-047	Not all of them but for the most part I mean we're good working together. [County] has a task force now so we try to send at least one truck from every department and we go about the only place we do go is [name] or [name] that's about where there's always fires at but we may spend 2 or 3 days out there on those big fires. We've been to [names X 4] around in there.
Context_of_Work - Relationships	FF	R	Supervising Field Responder	36-45	11-20	Male	FF-R-047	Well it used to be out of [name] is where we would get our ambulances from in the past. But [name] became I guess you could say an agency and they have an ambulance so if they're not busy they're the ones that we get and they're here within 5 minutes to where [name] it may have been 20 or 30 minutes before they'd get here so I mean that's really helped us out a lot you know especially emergency, emergency deals of them getting here so quickly.
Context_of_Work - Relationships	FF	R	Other Public Safety	26-35	6-10	Male	FF-R-048	This is a community that they stand behind us. They support us very, very well here in [town]. They're very thankful of what we have and I mean everybody seems to get along you know most everybody is either

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Personnel					farms or is in oil field around here.
Context_of_Work - Relationships	FF	R	Other Public Safety Personnel	26-35	6-10	Male	FF-R-048	Yeah I mean obviously you know our trucks are getting outdated. I mean but you know we're working on a tanker right now to replace the one we've got and it's going to cost over a hundred thousand dollars just for the tank part and the bed and that's not including the cab and chassis on the truck which was donated thankfully and like our jaws you know ours are hand me down, hand me downs and I mean you're looking at ten to twenty thousand dollars for a set of those you know stuff like that you know there's always things like gear.
Context_of_Work - Relationships	FF	R	Other Public Safety Personnel	26-35	6-10	Male	FF-R-048	Yeah we've showed up where our pumps we couldn't get our pumps to fire up on the trucks or on one truck I know. I was trying to get the truck I've been on seen where the pump was running and the pump quick. We just had to park the truck and get on with another truck and go.
Context_of_Work - Relationships	FF	R	Other Public Safety Personnel	26-35	6-10	Male	FF-R-048	Yeah well we had a [Event] just west of town here and I was first on the scene in my personal pickup because it was between my house and the station. I knew we had guys in route I didn't know how long. I had a guy I'm not trying to be graphic here but he was basically it chopped the cab off the semi-truck. We're talking an oil field tanker truck and the truck was on its side and his legs were pinned underneath the dash and he was literally dangling, screaming. I'm there helping there was 2 bystanders that had called it in and that's a helpless feeling.
Context_of_Work - Relationships	FF	R	Other Public Safety Personnel	26-35	6-10	Male	FF-R-048	You got a helpless feeling that you can't help you can't do anything. I mean yeah we can support and kind of you know our EMR's can you know get the guy stabilized. Yes the guy survived I mean we may have flighted him out and he did survive but I mean that's seconds, seconds matter you know and what makes it harder in this area I didn't know him personally but when you're on a scene and it's involving your friends who people that you know and treat like family it makes it harder and everybody knows everybody you know kind of a deal in these small towns so we want our stuff to work.
Context_of_Work -	FF	R	Field	36-45	21-30	Male	FF-R-049	It would be we're public servants so that I guess that could be the basis

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder					of the question but under that umbrella falls into a lot of categories. Educators, advocates which there's a line there you know you have to educate the public a lot of times on what you do because we are public service, we're funded by the public. Being an advocate that means let's just say you're in an area where you work you know you have different demographics pay scales on what people make.
Context_of_Work - Relationships	FF	R	Field Responder	36-45	21-30	Male	FF-R-049	You have to be an advocate for people that are less fortunate, people that are renting homes is a good example. You have to educate them on being update on their fire safety and things of that nature and if that means installing smoke alarm for them or giving them directions on where to find a good smoke alarm or just letting them know that you know as a renter your landlord is responsible for this, that and the other and we run into a lot of people that have not so nice landlords and we have to actually become an advocate for those people that live there. We're not really law enforcement but we can be code enforcement and that's where our not patient advocate but being advocates for our citizens our customers.
Context_of_Work - Relationships	FF	R	Field Responder	36-45	21-30	Male	FF-R-049	They pay us but we provide a service for them so as you know public safety is tax based and you know customer service is number one that's something that can fall short sometimes as new generations come about but the core and tradition of the fire service is the customer is number one so that's why when it comes time to risk our lives and put other people number one you know that's where the customer service really comes in on that level.
Context_of_Work - Relationships	FF	R	Field Responder	36-45	21-30	Male	FF-R-049	We come into work, we do a pass along from our outgoing shift find out if there's anything wrong with the truck, if there's anything that needs to be taken care of that day and then we talk a little bit of junk to each other, pick at each other a little bit, talk about the fire that they got the shift before that we're probably not going to get that shift or whatever and we start with our daily duties which will consist of a truck check to begin with, we check our apparatus, we make sure it's in good working order all the equipment on it is in good working order that includes you

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								know make sure it starts, it's able to pump water, lights, communications and then from there pretty much we have set dates throughout the week to where we take care of what we call our station duties. We have yard day, we run it essentially like a household and then on top of those duties different types of the year we handle details such as hydrant maintenance, we handle what we call pre-plan and building familiarizations. We go out and we check local businesses. It's not really an inspection it's more of an investigation for us to see what types of dangers we may encounter in responding to these certain types of businesses. While we're there though that's where we do fall into education role and an advocate role.
Context_of_Work - Relationships	FF	R	Field Responder	36-45	21-30	Male	FF-R-049	If we see some stuff that you know if the [Job title] were to come in right behind us they may put these people in a little bit of a pickle we try to point that out and say hey you know let's get that knocked out. We have a duty to make note of it but we don't really necessarily have a duty to report it immediately unless it's a life safety violation so we have some days where we're assigned a fire safety education which means anything from going out to a school to talk to kids, going to community centers to talk to community groups, going to retirement centers to talk to elderly people so we have routines but it just depends on what day you work per say and what comes down the pipe.
Context_of_Work - Relationships	FF	R	Field Responder	36-45	21-30	Male	FF-R-049	It's the general picking on each other, complaining about this, that and the other and the topic is talking about how to keep it running out here. What our next fundraiser is going to be, how bad is the county going to short us this year with money you know...Whether you're a volunteer or you're a professional when you're on a call the same level of accountability is necessary and I think that's what they're going towards making sure people are trained, training records are kept.
Context_of_Work - Relationships	FF	R	Field Responder	36-45	21-30	Male	FF-R-049	...There can be same type of confrontation between those entities and a volunteer setting as there is a professional setting. I'd say 80% of the time things go great. We all get along, we get it right and it does great but that other percentage left over when we get it wrong we get it wrong

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								big and you know we have to mend some fences and the thing about out here is the mending fences happens and it has to happen because we all know each other. It's a rural community we all know each other. As big as it is it's pretty small as far as who knows who so you know you have to you hurt feelings you got to get over it and that's on a personal level and a professional level out here.
Context_of_Work - Relationships	FF	R	Field Responder	36-45	21-30	Male	FF-R-049	...Our I think that goes back to working together because you have to have communication but it's a good relationship. I know when I've worked here and EMS, SO, Sheriff's office comes by and chit chat a little bit. Public safety is a brotherhood volunteer or paid. Ya'll experience such tragic and wonderful things you have to know each other and it helps to know each other especially when you're working. It's a good feeling of comradery and also you know it's good to know that people know you and have your back.
Context_of_Work - Relationships	FF	R	Field Responder	36-45	21-30	Male	FF-R-049	I'd say those guys probably buy some barbeque tickets and stuff like that. You know the paid entities out here they know how hard the volunteer works. As far as our EMS goes we have our EMR which are volunteer responders that help with medical issues. Those I'm not involved with that at this time but those personnel have really do make an impact you know. You get on scene of a cardiac arrest one thing that will save a life in that case is good CPR and we have some good, good chest pushers around here.
Context_of_Work - Relationships	FF	R	Field Responder	36-45	21-30	Male	FF-R-049	... I try to stay quiet and lay low out here because as a professional I can get looked at as the paid guy who thinks he knows everything but and it's not that I do it's that I do know a lot and fire burns the same here outside of the [name] area as it does up where I work professionally and you know I hear people tell me all the time well you're used to doing this and I'm like it can do this here too.
Context_of_Work - Relationships	FF	U	Field Responder	Not specified	Not specified	Male	FF-U-050	[speaker 3] Kind of everybody kind of welcomes us over there. Very diverse all races, types of life, you kind of get welcomed with open arms around here being a firefighter.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	FF	U	Field Responder	Not specified	Not specified	Male	FF-U-050	[speaker 2] And territories are diverse. It can be residential to business district to industrial district and then it can be very suburban so your residential areas those particular stations there's a lot of outreach within the community. You may be going to a homeowner association meeting or community meetings associated with the city, you may be going to schools to talk to the children, the downtown areas or more or less dealing with the businesses you know getting out stay at a hotel district here in this area where we are now.
Context_of_Work - Relationships	FF	U	Field Responder	Not specified	Not specified	Male	FF-U-050	[speaker 3] The same way we have their code blue so where we can turn up their frequencies if need be because certain stations we're kind of right on that borderline where we will share our territory a little bit.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	26-35	11-20	Male	LE-R-001	...Sometimes, I'm obligated to cover a shift and work still on the patrol side because somebody's out or something like that.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	26-35	11-20	Male	LE-R-001	...During the school year, in the mornings at 7 o'clock to 8 o'clock, we patrol the school zones heavier. We stay around the school zone areas and stuff like that, make sure people are slowing down. And then throughout the day, this kind varies on call volume, and what's happening throughout the day.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	26-35	11-20	Male	LE-R-001	No. We're a small town, so every bit of the town is theirs. There's not a sector, or a region, or anything that they only patrol this area. The whole town is theirs.
Context_of_Work - Relationships	LE	R	Field Responder	18-25	5 or less	Female	LE-R-002	Your presence as a police officer in the neighborhood or at businesses at night, can deflect a criminal from coming in and committing a crime.
Context_of_Work - Relationships	LE	R	Field Responder	18-25	5 or less	Female	LE-R-002	Yes, because we're assigned to the city but it's generally every officer's goal to hit every part of the city in their shift. Every street, every corner, those [inaudible].
Context_of_Work - Relationships	LE	R	Field Responder	18-25	5 or less	Female	LE-R-002	Well, my partner, I worked with him long enough where I kind of knew where he liked to hang out and where he liked to go check, and I'm sure that he learned my behaviors too. So you really just- it's quite random.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	LE	R	Field Responder	18-25	5 or less	Female	LE-R-002	You adapt and you pull your radio out of the holster and try to find a signal, or you ask your partner to try to call or different situations.
Context_of_Work - Relationships	LE	R	Field Responder	18-25	5 or less	Female	LE-R-002	I come from the individuals that like to do a lot of things on their own. I don't like to bother dispatch. They're busy enough, and I know that because I've been in that position.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-003	So I am a full-time recruiter that wears a police uniform. So I go to colleges, military bases, career fairs all over the country promoting the [City] Police Department and trying to get applicants to apply with us. There's a lot of travels involved, a lot of communicating with potential applicants trying to get them to take their final steps and to apply in with the department.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-003	Sort of. They're by region. However, if it's like an officer needs assistance, like an officer's in trouble, or if it's something big like shots fired, or a school shooting, or bank robbery, then it's just an all-out everybody respond.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-003	So in the area that I worked, it was right by a high school that, at the time I was working there, it was kind of a problem high school. Now I think it's kind of cleaned up a little bit. But there was a-- we had a big problem with some of the students sneaking off campus during lunch, and then going around and burglarizing cars in the neighborhood, or they would go on-- the train tracks are by the school, so they'd go underneath the train bridge, and smoke dope or whatever. And so when I wasn't on a call, typically, I'd just kind of float around the neighborhood, or park my car and kind of walk on foot so no one would see me coming and try to stop crime before it happened [laughter].
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-003	...But on a patrol level, at least here in [City], it's-- yeah, we don't work together. We don't take calls together, nothing like that. I mean, occasionally, if I see a deputy making a traffic stop, I'll pull in behind him, and walk up, and ask, but there's no communication on the radio, nothing like that. It's just more of in-person communication.
Context_of_Work -	LE	U	Field	36-45	11-20	Male	LE-U-003	...So I would show that to other officers, "Look, man. All you got to do is

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder					just edit it, and it would jump free--" it would jump zones, and channels, and this, and that as opposed to having to flip switch A and B and then tune it in.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-003	...If you were going to a call, to be able to look to see what your partner is currently seeing would be very helpful. So you can have an idea of maybe where I should come in from or if he's in trouble, what's going on or I look at the suspect before you even get there in case he bolts and just starts run.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-004	Working nights, there's very little foot traffic. So anyone on the streets at three in the morning, if they give us a reason to stop, we go stop and talk to them, and go from there. Take people to jail. Help people. I was a mental health officer so I would work with that community and get them help in the ways that they needed help.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-004	... We'll do demos with different companies trying to come in and show us their product. We have weekly meetings with maintenance for all the projects that we have with the-- I work on different video stuff, so the videos that are in our cars, we have body cameras coming out, that kind of thing.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-004	...And then a directed patrol will be set up to where an officer is assigned, or decides to assign to it, and just watches that neighborhood for an hour or two. And pulls people over for speeding or just sits there and that usually deters speeding in itself. Same thing with graffiti and you can kind of get the idea. If there's a homeless problem behind a business, and they want us to go check that out, we go do that kind of thing.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-004	...It's helpful if your buddy's writing a report on a suspect, and they want you to send them over some information, like a supplement. So we go to a call together, and it's a somewhat involved call.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-004	...If dispatch is busy for whatever reason, or if we don't want to tie up the radio, sometimes if we're going to a call that we know a suspect, or if shift mate's going to a call that we know the suspect, I'll run his warrant

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								checks and then I'll send him the warrant checks.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-004	...The longer you're there, you just get a better idea of how to ask something to get across your point, or something along those lines. And then, the longer you get to stay on a shift, you actually recognize someone's voice. So if they're talking in a calm way, everything is good. But if you hear them talk on the radio, and maybe their voice is a little higher, or they're speaking a little faster than they normally do, you might want to kind of head over there and see what's going on, that kind of thing.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-004	...I think, yeah, specifically the body cameras, I think it's going to be great. One more thing to help us be accountable, and to help citizens be accountable, and--
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-005	No, but there is kind of a social requirement because if your buddy goes out to a call and the other shift's already gone and now your buddy's dealing with a serious call by himself, so there is a time constraint of getting out to making sure you're not leaving your partner hanging.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-005	...We get bombarded when we go to a very difficult call with family members, suspects screaming at us, victims screaming at us. The crime scene we've got to maintain, blood gore, dispatch yelling at us, supervisors potentially yelling at us, other troops trying to get an idea of where I need to be, what I need to do
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-005	We currently have a roughly 60,000 deaf people in [City]. We have a huge deaf community here because we've got some of the only state schools for the deaf. And we have no means of-- we have very few sign language interpreters, maybe one citywide that's certified to be an ASL.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-006	So specifically, [City] and [County], us, [City], and [City], we all share the same CAD measure. So we do like our own user groups. So we do get together. We try to get together. We say once a quarter, but it's more like twice a year. And we talk about, again, some of our struggles.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-006	...Certainly the older officers will rely on some of the younger officers. And it's not just age. But the more tech-savvy officer, they'll, "Hey. You're

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								that guy. Can you do this? Can you look this up for me?" And even within a shift, there's always going to be a dynamic. Even if it's not technology-related. It could just be tactics related. There's going to be the folks you work with on a daily basis, you know are strong in an area, and you'll use them to help you out.
Context_of_Work - Relationships	LE	U	Public Affairs	26-35	6-10	Female	LE-U-007	Well, I work specifically in the public information office. So our primary goal in that office is to get out information to the public and the community as accurately and as efficiently as possible.
Context_of_Work - Relationships	LE	U	Public Affairs	26-35	6-10	Female	LE-U-007	...What we do is we basically get the information from the investigating detectives or the officers on scene and then we provide media with the briefing. So whatever it is that's going on. Because our goal in this department is to be very transparent and very open. So before we are able to release the information and doesn't jeopardize the integrity of the case, that's what we want to do. Because we do realize that the public and the community, they're a great resource to utilize.
Context_of_Work - Relationships	LE	U	Public Affairs	26-35	6-10	Female	LE-U-007	And we have stuff just pop up last minute because the media they want it now. Everything is now. Which is different for a governmental agency that's like, "Oh, give us a week." It doesn't work like that in my office. They've got to make the five o'clock news. So we have to help them package the story. And we try to build that relationship and vice versa. Because we both need each other.
Context_of_Work - Relationships	LE	U	Public Affairs	26-35	6-10	Female	LE-U-007	He'll [the watch commander] call us and let us know. Make the notification. And they also send the emails overnight. Those significant notification notices to let us know, maybe what we've missed and what we might be getting called on during the day. So we're kind of prepared. We have case numbers. And we have at least a summary. And then if we need more we can try to reach out to the responding officers.
Context_of_Work - Relationships	LE	U	Public Affairs	26-35	6-10	Female	LE-U-007	...So if a supervisor gets on, soon as media starts showing up, most officers don't want to deal with media or cameras. They're like, "Aah. Where's PIO?" It's kind of funny [laughter]. They get more worried about them than like a suspect or something like "Media's here. They have a

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								camera." It's okay. So we'll show up. And they'll say "Is PIO en route?" And they can just look at the screen and they'll be like, "Yes. PIO [Name]. She's en route. And she's going to go in." And then we just kind of corral the media into one space. Most of them are pretty good about staying where they are supposed to. I mean it's public too
Context_of_Work - Relationships	LE	S	Field Responder	26-35	11-20	Male	LE-S-033	Yeah. And I think there is still, no matter what department you work at, you're always going to have folks that enjoy other folks more than not. But there is somewhat, more than not, of a camaraderie where, I mean, we're typically meeting up every night for coffee. We're meeting up for dinner, so I mean, it is definitely-- you're not out here all by yourself. Technically, you're riding alone by yourself. But we don't run calls-- very rarely do run calls by ourselves. Officers will respond and go to the same calls--
Context_of_Work - Relationships	LE	S	Field Responder	26-35	11-20	Male	LE-S-033	...I think [City] and [County] is a unique area because I think there is a lot of police support. But I also think there are plenty of folks that are interested in joining and just jumping on the bandwagon, and they have no facts and/or reasons to do so in our specific demographic in which we-- where we serve. So in general, I think law enforcement, because of the lack of community support, because of the lack of political-- because of the lack of support as it relates to our administrators and our politicians and elected officials because they are more consumed with the pressure from the public, it is making our job very difficult because the average patrol officer does not feel like the administration has their back, which is why I think, quite candidly, you see violent crime on the rise and you see crime nationwide going through the roof. Officers are not patrolling the way that they used to patrol and as a result, you take [City], for example, which is a war zone with over 750 homicides last year and 100 shootings this past weekend.
Context_of_Work - Relationships	LE	S	Field Responder	26-35	11-20	Male	LE-S-033	We have a very good relationship with [County], so my agency communicates directly with them on their radio channel. We supplement them. They supplement us. We all run calls together, so for us, it's very fluid. So from my jurisdiction specifically, no, it is very fluid. I live in [City]

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								and that is not the case in [City]. They operate on two completely different radio channels, although they're working right next door to each other.
Context_of_Work - Relationships	LE	S	Field Responder	36-45	11-20	Male	LE-S-034	I mean, it's all professional. I mean, when I'm at the station, we're usually talking about something that happened at work. And I mean I--
Context_of_Work - Relationships	LE	S	Field Responder	36-45	11-20	Male	LE-S-034	So typically, you try to stay in that geographical boundary. You don't have to, but typically, you try to because that's the area that you're going to be responsible for. And then, you can hear all the calls being dispatched. So unless they specifically ask for you, you can make a determination whether or not to go on that call or not if you're in the area. So if I'm driving by NIST and they say, "Hey, there's an accident at the NIST parking."
Context_of_Work - Relationships	LE	S	Field Responder	36-45	11-20	Male	LE-S-034	I'm right here. I'll just come over to you and help out.
Context_of_Work - Relationships	LE	U	IT Specialist	46-55	11-20	Male	LE-U-035	So if there's anything that goes up into the neighborhoods and there's business community cameras, so they share a video with us as well. Now we don't view those here, but if something was to happen, we know where those cameras are. We can send the detective out to ask for that video as well.
Context_of_Work - Relationships	LE	U	IT Specialist	46-55	11-20	Male	LE-U-035	But we can support each other. If something goes down, we all know to do it. So I could VPN in, if my guy-- I'm the primary, but if another guy couldn't do it, he's having a problem, I would log in and VPN to see if I could see what the problem is and help assist him, so.
Context_of_Work - Relationships	LE	U	IT Specialist	46-55	11-20	Male	LE-U-035	In the event that they might need-- I mean that we're taking the lead in-- we're the lead agency, but we're utilizing a partnership system, camera system that we have access to that we're utilizing their system, which we were using each and every event. But because we're the lead, we will have one of their representatives on site in the command center with us, so that if we tell you to move a camera in a certain direction, they'll do it immediately.
Context_of_Work -	LE	U	IT	46-55	11-20	Male	LE-U-035	Yes, so they're in here as well. They have a station. Whenever we go live

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Specialist					from a planned event, they have a station where they send fire and EMS. Both come. Now, on the command bus, they're not on that, but generally where our command-- they have a bus as well. So, generally, where they park, we're close to them. Yeah. We're close to them. So we can convey information whether we go over the radio or we physically walk to them.
Context_of_Work - Relationships	LE	U	IT Specialist	46-55	11-20	Male	LE-U-035	Yeah. Juggling the problems that we're having is not necessarily with fire because [City] Fire, we have no problems with that. It's the surrounding jurisdictions, they as [County] is a little different. So well actually [County], we can now get that over-- I bet they've upgraded to 800 megahertz I believe. But there a couple of them that are not on the same frequency, so we got to-- so that makes it a little challenging when they're involved in it. If they're not involved, then there's no challenge. There's no problem at all. But you never know when especially anything that happens right here in [City], you automatically, like about 911 type of event, you automatically have [State], onto [City], [City] You have [County]. You have [County]. Those are five just outside of [City] not to mention what we have on the inside, which is Park Police, Secret Service, Housing Police. You have all these different agencies that's running into support of what you're doing as well. So they're right there with you as well, so.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	5 or less	Male	LE-U-036	--or assisting with making meetings and going to meetings with him, and helping him with whatever tasks he needs, and reviewing things that come from the lower or the units that are under us. That's more of the administrative side. Then I was a patrol officer before up until last August. And that just incorporates responding to 911 calls and conducting proactive enforcement such as traffic enforcement, and parking violations, and helping citizens with whatever they need, so.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	5 or less	Male	LE-U-036	Yes. So we would come in, go to the locker room, get changed, put your vest on, put the belt on, and then we'd go to roll call, which the beginning of every shift, all the members of your shift are in a room. And then your supervisor is at the front of the room, and he gives you assignments such as Officer X is assigned to area Chinatown, and Officer Y is

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								assigned to Union Station area, and this is the vehicle you have, and this is the equipment you're issued. And so basically, the roll call is essentially time where everyone is together, and they give you out assignments and what roles everyone's taking that shift.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	5 or less	Male	LE-U-036	It's a good atmosphere. In general, when we're at the station, it's a little less stressful because you're with your colleagues, and you can blow off some steam. And there's a lot of joking that goes around a police department just because it can't be all doom and gloom all the time because no one would be happy. So the stations where you can kind of relax a little bit, and do your report, or do whatever you have to do at the station before you go back out on the street. But unless something terrible happened, and people are all in a bad mood or whatever, I mean in general, it's a pretty decent environment... It also depends on who's supervising your shift on how the environment is in the station too, because other supervisors are different than others, and so it's a dynamic too that they kind of play on there.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	5 or less	Male	LE-U-036	Oh, I haven't gone to any community meetings or whatever. So last time I was on the street, I went to a community meeting at the police station. And they have citizens come in, and they actually brought juveniles in from the city, and they had a facilitated conversation between the officers and juveniles like what the juveniles-- questions they wanted to ask us and questions we can answer for them in reference to why I would stop that time, or what do you guys think would help the trust of the police from the juveniles? So that was the only one that I've been to. But I know a lot of the commanders of the districts go to community meetings at least once a month and address concerns they have. And every district also has an email LISTSERV. And so whenever something significant happens, the commanders email out to the community what's going on and the updates on different things, so.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	5 or less	Male	LE-U-036	It varied. Some people didn't want to talk to you. Others were very friendly. And it could vary by block. It's not even neighborhood by neighborhood. It's literally one side of the street's friendly. The other side

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								isn't. And even within one building or even within one family, one person's cooperative, one person isn't. So it's very varying, but also, I think it depends on their past experience with law enforcement. So if they had a bad experience in the past, they're a little more negative, whether they met me before or not. And if they've had a good experience recently with law enforcement, then they're a little more friendlier. So I think it's a lot to do with their past experiences. But then also, it's important not to judge them. Be like, "Oh--" Because you also can't take things personal on this job. They don't hate me personally. As a 26-year-old kid from Chicago area. They don't hate me. They hate the uniform, and what it represents, and stuff like that. So I mean, you can't take things personal.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	5 or less	Male	LE-U-036	So we have a horse-mounted unit, and they do a lot of community events. And they also come out for large demonstrations. But the heaviest mounted presence is probably park police.
Context_of_Work - Relationships	LE	S	Field Responder	36-45	21-30	Male	LE-S-037	Correct. When we come on, sometimes, they are already looking for dogs or the evening dogs-- I work midnights, so there's at least two evening dogs working before I come in, and they stay on-- they work until 2:00 AM. I come in at 8:00 PM. So if they're running calls and they need help, I go help. If it's not, then I'll either go to our central K9 office and deal with any paperwork, administrative duties I may need, or I'll go to a structured roll call.
Context_of_Work - Relationships	LE	S	Field Responder	36-45	21-30	Male	LE-S-037	Some people that have single-purpose dogs are the firearms detection dogs and the bloodhounds. So that's a second animal. So if you have a narcotics dog and they ask-- so when they ask for a dog, they just say, "Hey, is there a drug dog close?" And then, one of us that has a drug dog, we pretty much self-police, meaning if I don't have a narcotics dog, somebody working in the neighboring district does, I'll either hit them up on the computer or call them and say, "Hey, they're looking for a drug dog." And then, they'll come over.
Context_of_Work - Relationships	LE	S	Field Responder	36-45	21-30	Male	LE-S-037	I mean it's a small unit, so it's very cordial. We all get along. We all know each other fairly well.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	LE	S	Field Responder	36-45	21-30	Male	LE-S-037	We as K9, a lot of times, will get on the air, the police radio, and ask them to set up a perimeter or do something to help us when we get on scene. That's usually our biggest request. Sometimes, they're already on it and we don't say anything, and sometimes they forget about it and we have to say, "If we're going to be doing a track, we need to help and try to contain this as best we can."
Context_of_Work - Relationships	LE	S	Field Responder	36-45	21-30	Male	LE-S-037	Case in point is a lot of times the fire rescue system will stage to make sure the scene is safe. So we have to go in first, make sure it's safe, and then they can come in. So if you're on a scene of a major incident, a shooting, say, we've got to make sure it's safe for them. It makes total sense. But if they're bleeding heavily, there's only so much we can treat, and so they're staging where they should be. But then, we go, "Okay, fire rescue can come in and help us take care of this person." But that goes from police officer, police dispatcher, police dispatcher, fire dispatcher, fire dispatcher, to fire engine. So that's a long chain to get an ambulance and a fire truck to come in and help us take care of a bleeding person [laughter].
Context_of_Work - Relationships	LE	S	Field Responder	36-45	21-30	Male	LE-S-037	With the SWAT team, very, very rarely. Like I said, there is a couple dogs that work predominantly with them, and most of those dogs, their handlers are on the SWAT team as well. Sometimes, we kind of get thrown in a perimeter location with them sometimes on a SWAT call, but that's not very often.
Context_of_Work - Relationships	LE	S	Field Responder	36-45	21-30	Male	LE-S-037	Q: Oh, okay. That's interesting. Okay. So how is the relationship with the state police in general, or is it just that--? SME: It's very good in our county, both with the road troopers and the pilots. And the nice thing is is they have all of our channels. So predominantly, when we're working something with them, they come over to our radio channel and it's seamless.
Context_of_Work - Relationships	LE	S	Field Responder	36-45	11-20	Male	LE-S-038	I guess, it's a work-- I guess a work environment-- I don't really know how to answer that. But everybody going back and forth to their assignments, whether going to do security in a courtroom. There's maybe an issue in a courtroom then you respond to. People are hanging

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								out waiting for assignments. People are being sent out to do different things, like fugitive guys they're gearing up to go out and lock people up. I mean it's good. It's a good environment, where basically everybody comes together to one location to be sent out to do a job, and help each other, I guess. I don't know if it really answers that question.
Context_of_Work - Relationships	LE	S	Field Responder	36-45	11-20	Male	LE-S-038	I have good working relationship, and a good, I guess, personal relationship. We all pretty much get along. We all get along because we-- I don't know, we all get along, but everybody comes together for the same goal. So if there's a call for one K9, and if another K9 handler comes out there, they know what they're doing, why they're doing it, and we're there to help support them. If I'm running a call and another handler shows up, they're there to help me, and then afterwards it's-- or outside of work same thing. Everybody has a good, for the most part, personal relationship. Yeah, so everybody pretty much gets along.
Context_of_Work - Relationships	LE	S	Field Responder	36-45	11-20	Male	LE-S-038	It's a good relationship, it's-- they're there to help us just as much as we're there to help them. They're there to help the community just as much as we're here to help the community. And so it's a good brotherly relationship. We all support each other in the job we're doing. We have different jobs, different assignments, but at the end of the day it's-- we're all here to serve the community, and we all, in my opinion, do a good job at it within the county.
Context_of_Work - Relationships	LE	S	Field Responder	36-45	11-20	Male	LE-S-038	No, we have a good working relationship. The only issue wise would be the communication because I don't know-- outside of [County], like [City] police, [City], whoever else, I know what channels to find those. So outside of this county, it's hard because I don't know what channel [City] uses, [County], [County], but within the county it's not as hard as long as you know-- it's hard as long as you know what channel they're on. And you can flip through your radio and find it and communicate with them.
Context_of_Work - Relationships	LE	U	Supervising Field Responder	36-45	11-20	Male	LE-U-039	And we also get information. So we have anonymous text tips that come in. So citizens can text tip - it's 5041 - any kind of information or pictures anonymously to us. So if they have a tip about something going on in the neighborhood or they see something, they can take a picture. And

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								then we'll dispatch officers out there. If it's something that's going on immediately or if it's something like a long-term investigation, maybe a drug complaint or something like that, then we'll send it over to the appropriate unit. And they'll come back and do a follow-up investigation and see, is there really something to it or is it not.
Context_of_Work - Relationships	LE	U	Supervising Field Responder	36-45	11-20	Male	LE-U-039	folks who are inside our command information center, they're pushing out information. So they're using social media. They're using your Twitters and your Facebooks. They're pushing out traffic information. So if we know there's a street closure because of the traffic accident, we have a separate Twitter account for that. They can push out Twitter information like that. And they're also pushing out to the news media. So there's local traffic folks that push out others an accident here or there. When we get it, we push it out to them as well. So that way they're aware. They can put it through the radio and the TV so folks can avoid those areas in their commute and know to stay away from that. So we're pushing things out that way. We have LISTSERV on the department. So prime things, if there's something in the patrol district. So maybe, say, we're going to have a community bike ride one day. On the LISTSERV, we'll push out that information. If there's a shooting in the neighborhood, the district commander will go on there and say, "We've had a shooting in the 1200 block of [street]. Anyone who has any information, please contact us at XYZ phone number so that we can get information back." And we're telling the public what's going on. In the same token, they're providing the information they may have to us.
Context_of_Work - Relationships	LE	U	Supervising Field Responder	36-45	11-20	Male	LE-U-039	...So everything now is kind of connected. It's no different in law enforcement than it is in the rest of the world. You have to stay up with the times. So as social media becomes more popular, we have to adopt that, and embrace that, and move forward because if not, we're behind the times. And a large majority of people-- 20 years ago, you had your major news networks, and CNN pops up, and Fox News. Now, people get their information from a variety of sources. And if you don't embrace that, then people are missing your message. So if you're not pushing out

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								<p>your own message, then yeah, it's kind of lost. You have to be your own best advocate. So when we're doing good things, we have to make sure we broadcast that as well. If there's issues or concerns that we're addressing, we want to make that [inaudible] as transparent as possible. So by being able to push out your own message to social media-- there's a lot of good things that happen in law enforcement that, in the past, unless the newspaper or the local media kind of want to pick up and do one of those feel-good stories, it kind of got lost in translation. Now we can push that out ourselves. "Hey, our officers just rescued these folks from this burning building last week." Maybe the media would have got it. Maybe they wouldn't have. But if something bad had happened, it's always out there. So being able to push out forward things out there-- and then a lot of times the media will grasp on, "Hey, this is a really good story," and then they kind of re-tweet it. They push it out. Maybe they'll make their own story that goes to a larger audience-- or more traditional audience, I guess, is kind of what you say. But young people today, they embrace it. And as those young people get older more and more of the population is using social media, using these electronic platforms and less so much of newspapers and things like that, so.</p>
Context_of_Work - Relationships	LE	U	Supervising Field Responder	36-45	11-20	Male	LE-U-039	<p>... Last night we had a fatal traffic accident. This is the 22nd traffic fatality for this year. What are we doing to reduce traffic fatalities, working with patrol districts because the majority of our traffic enforcement happens in the patrol level. So what are the patrol districts doing towards a city-wide goal of reducing traffic fatalities to zero? So where the special operations division is working on a city-wide plan, they're bringing in all the districts to say, "Okay, what are you doing? These are the locations within your district that have the most instance of traffic accidents. And we've noticed there's been an increase in this corridor of traffic fatalities over the year." So that way the district can develop a focused plan of how they're going to let patrol assets work on that, where we within the bureau, we put that all into one big plan. But then there's target enforcement. Stuff like your hotspot policing, you may call it. Okay, we know there's been five traffic fatalities in this</p>

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								stretch of railway, so even the districts doing their routine daily enforcement, we're going to put some focused overtime enforcement here or maybe one of our upcoming programs, Smooth Operator, Ticket It or Click It, things like that. We're going to do enhanced enforcement in this area, because we've seen there's been five traffic fatalities, and they've all happened on Thursday, Friday, or Saturday between 10:00 pm and 3:00 am.
Context_of_Work - Relationships	LE	U	Supervising Field Responder	36-45	11-20	Male	LE-U-039	...Maybe it's something you work with the ABRA or the Alcohol Beverage Regulatory Commission. Maybe you have a lot of folks doing a lot of drunk driving, so maybe educational programs. We need something like that where maybe we do a sobriety checkpoint and hotspot enforcement. [inaudible] a lot of bars, but maybe they're pushing out educational information for patrons. In the bathroom stalls, you sometimes see different fliers and things like that, or maybe they have things around the bar, reinforcing, don't drink and drive. There's been 10 traffic deaths related to alcohol use this year in the city. Things like that to make people more aware and remind them of their behaviors when they're out there. So kind of working with other agencies, that's something that falls underneath us. So it's another form of communication.
Context_of_Work - Relationships	LE	U	Supervising Field Responder	36-45	11-20	Male	LE-U-039	.... The special events side, there's a biweekly task group that meets. And it's the police, the fire, the DCR, the district stuff, the Department of Regulatory Consumer Affairs, Department of Transportation, Department of Public Works, they sit there and, "I want to come, and I want to have a festival here on the street." I have to go in front of these individuals and say, "Hey, we're planning to have a festival here on [Street] from 5:00 am until 5:00 pm on Saturday, December 15." And they go through things you have to do by law to make sure it's safe. Now you have to have-- the roads have to be blocked off. You have to have people clean the roads afterwards. You have to have tow trucks because if you come and have your events-- so they help work people through how to have a successful event to ensure it's safe, compliant with the law, and

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								everything they need to do to have a good event. So things like that. And there's lots of events. Just about every weekend, there's always something going on here in the city. Summertime is a little different, because it's so hot, it's hard to deal with. Especially in the fall, marathons, and 5K's, and food festivals, art festivals. Then you have just your regular baseball games and things like that. So there's always lots of task groups, and groups convening communicate on a more routine basis about what's going on, sharing information back and forth.
Context_of_Work - Relationships	LE	U	Supervising Field Responder	36-45	11-20	Male	LE-U-039	Depends on the event. So anything that's a special event that requires a street closure, it's the same group of individuals that go and attend those, and help them and walk them through it. Things like the baseball stadium, for transportation there's a work group that the individuals from the ballpark, the Department of Transportation, the police department, we all come together. The Department of the Vehicles for Hire, Taxicabs, Ubers, that kind of stuff, we all work together to say, "Okay, baseball season is starting. We did this last year. Here's some areas for improvement. We had issues with Ubers and Lyfts, backing up this roadway. Is there something we can do differently? Maybe we can work with them to geofence this area, keep them away, and have them go to this location, that would be better. It's safer for the folks who are leaving the ballpark to go there. It's less of a hazard for them. It won't interfere with us getting traffic out of the ballpark, and we won't have 30 cars waiting, that could be a potential threat to the ballpark right outside." Working through those issues together. It's a different group, but the key is, communicating what's going on. The people who are there, the key stakeholders are there sharing information, trying to work through solutions.
Context_of_Work - Relationships	LE	U	Supervising Field Responder	36-45	11-20	Male	LE-U-039	So believe it or not, we actually work very well with the federal law enforcement agencies here in the city, and it's because we have everything that we do - I don't want to say everything - but a lot of things we do, we do together. So we have a demonstration at the White House. Well, the street is our jurisdiction. The sidewalk and the park are actually

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								<p>US Park Police jurisdiction. And the Secret Service Uniform Division stand on the sidewalk. So it's not like, "Well, let's--" so we know there's a large demonstration. We actually host the bi-weekly meeting with all the law enforcement partners here, FBI, Uniform Division, everyone. They come, so we kind of all talk about, "Hey, this is coming up. This is on our radar." So everyone's kind of aware what everyone else is doing. And we all know each other, so if there's an issue, I can go to the phone. I can call the assistant chief of the park police and say, "Hey, we know this is going on. What are you guys doing?" "Oh, yeah, we got this going on." Or, "There's a large demonstration that's planned for the mall we see here." Just because it's happening on the mall and that's their jurisdiction, people have to get there. So they got to ride on the metro, most likely, or park their car. Well, the metro, they have their own police too. So we got to make sure that we're talking to them. But when they get out of the metro, they got to get from the metro to wherever, and they're going to walk on our jurisdiction. And we have jurisdiction everywhere. So we have jurisdiction in the mall. We have jurisdiction in the metro. So they kind of have their focused areas. But, at the end of the day, we'd be like the state police for the city. So everything kind of-- we're responsible for making sure things are covered. So making sure that we're communicating. So we do a really good job with that, and it all comes back down to personal relationships, talking about what's going on. And the same tools, I mean, email, in-person meetings, phone calls, just picking up and, "Hey, what do you guys seeing on this?" I mean, information sharing is key because, as we talked about, things rapidly evolve. So making sure everyone knows what's going on. And you want to make sure that if you do have some information about, "Hey, we heard there's a threat towards the monument. Did you get that?" Pick up the phone and calling the right people, making sure they're aware.</p>
Context_of_Work - Relationships	LE	U	Supervising Field Responder	36-45	11-20	Male	LE-U-039	<p>We do a lot of interagency collaboration and coordination, and then all the NSSCs, so the State of the Union, the Inaugurations, a lot of these Summits, Nuclear Summit, African Leader Summit. Those are all NSSCs, so Secret Service takes the lead planning role, which means they're</p>

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								<p>responsible for making sure it's planned out. But that's not to be confused with who's in control. We work as a unified community structure here. So it's a federal city. There's lots of people. Everyone wants to know what's going on. Everyone's kind of got an vested interest so there's kind of two ways you can go with that. You can try to fight over who's the lead person, or you can all come together with a team of individuals and make the decisions that go on. And then if it's something that really is park police centric, that's something that they'll do. And be like, "This is what we're doing." Because what they do is going to affect everybody else. So we have to all make sure-- not making decisions in a vacuum. We have the appropriate resources because a lot of times, when it comes to an incident, especially an impromptu incident, maybe a terrorist attack or a train derailment, or whatever, it comes down to resources. Who has the most resources? So the FBI may be in charge and maybe in 15 hours they will be in charge, but initially, they're probably going to have maybe 10 people. Whoever they have here right in this area to respond out. Where we're going to have 3,800 people. So, I mean, whoever kind of controls the resources, but at the same token, you know at some point the FBI's going to be taking it over, so making sure that we're all working together. Making sure that they knew what's going on, and there's resources that they can start pulling in, and the appropriate resources to help out, because, yeah, maybe we can put a rush of resources in there, but you know what? We still have to make sure the city's safe. We can't shut down patrol operations and you have people, okay, calling 911, someone's still got to answer those calls. So we have to make sure that we're not depleting all of our resources out in the districts to handle an incident. And that's why things like special events, planned things, we bring in additional resources because, yeah, we have a lot of people and we can probably handle it, but you have to make sure that you maintain or surpass the patrol operations on a routine basis. Because when you're having people-- an influx in the downtown area, which is where most people come, it's going to have an effect. You're going to have more traffic coming into the city. So all those</p>

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								things play out, and you have to maintain that in the city. So it's really important you're not lowering your level of service response time to handle a special event. You have to make sure it's planned out appropriately.
Context_of_Work - Relationships	LE	U	Supervising Field Responder	36-45	11-20	Male	LE-U-039	Sure. So, yeah, fire and EMS. So whenever we get special events and things like that, they're all involved in the planning. So one of the key things is making sure there's adequate EMS and fire resources. So even when you think that something that's maybe more security centric, you think the inauguration. "Oh, we got to make sure it's secure and all kinds of security measures." You have to make sure the security measures are such that the fire department can get in, that they have the appropriate resources staged within. They have to be intimately aware of what's going on. So, I mean, there's going to be-- there's folks on the fire department, they have security clearances, so they're fully aware of what's going on on the law enforcement sides so they can make sure that they have the adequate resources there to make sure you have folks there. Because if you have things like the Inauguration, you have a secure perimeter. You can't drive in or out.
Context_of_Work - Relationships	LE	U	Supervising Field Responder	36-45	11-20	Male	LE-U-039	And then on game day we use the ICS structure so for large events we activate, what we call the Joint Operations Command Center here. There's a fire comm that the fire department stands up and we have liaisons in all the locations. So if we're having a marathon, we have our command bus up, we'll have someone from the fire department on there...So being together in unified command we can easily do that. Everyone knows what's going on. Keeping all the partners briefed. Sharing that information and then that way they can control their assets, we can control ours and then you don't have that cross talk when you don't really need it. If you need the crosstalk you can directly communicate, but a lot of times it causes confusion
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Female	LE-U-040	Administrative side, first thing in the door is to review all of the correspondence that's come in overnight. Then it is reviewing the chief's correspondence to see what important documents we load through the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								cloud to his iPad, so he has them handy. New daily briefs, any pertinent crime trends or anything that's come in overnight, or something that's pertinent to our bureau. Like we have major crash, so any crash fatality reports, anything like that. Then I go through any and all of the correspondence and scrub the correspondence, which means review, typos, anything like that. Got it to where it needs to be. Address any correspondence that's coming from our chief's office. We have what's called an IQ system, where it's from citizens, or questions, or anything that we can direct to our many bureaus. Since we are a Special Operations, we have a lot of public issues to address, marches, parades, demonstrations, harbor patrol. So people want to know where they can park their boats, things like that. So it's a very diverse area. And then it's down to the daily operations, receiving, doing what the chief needs to be done, scheduling his calendars, scheduling appointments, reviewing command manuals for events, things like that. The patrol side, it is respond to my assigned patrol district, and participate in roll call, whether on the roll call of official, scheduling the members to take their beats, give out assignments, get out pertinent daily information. And then, from that point, once we're dismissed from roll call, it's supervising the officers on their beats, not just the officers assigned to my group-- it's called the redeployment, where everybody that is not assigned to a-- specifically to a patrol district, is put out in groups. So I'll be assigned with most of the people from Special Operations and that's our core group. And we assist the regular district personnel. So, I could be assisting on a scene with district personnel or my personnel, or a combination of both. And so it's just a matter of-- I'm extra manpower for them. So, I might be acting in a sergeant capacity, or I might be acting in a role of an officer, just responding to a call, going to a call for service, helping blocked traffic on a traffic crash, something like that.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Female	LE-U-040	It depends on what job function that I have. Myself and one of the officers that I work with are actually on an inaugural committee. So, we were walking the parade route, up and down [Street] on the day of the Inaugural Parade. As a member of Special Operations, you can be called

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								out-- well, Homeland Security Bureau, Special Operations has been pretty much my career for 13 years so far, for that [risk?] patrol. But Homeland Security, you have to go to respond to marches, demonstrations, specific events, things on the National Mall, July 4th celebration, any and all marches that are large-capacity or high-publicity events. Things that happen on the National Mall, even in they're National Park Service, we could have to respond to help with traffic along the theater streets and things like that. Also called to demonstrations or events throughout the city where we could be of use.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Female	LE-U-040	So events there, events at Nationals Park, whenever anybody climbs a crane to hang a sign in protest, we're there [laughter]. In patrol, I'm mainly assigned to the Seventh District, which is on the other side of the Anacostia River. That mainly consists of responding to calls for service traffic, crashes, assaults, domestic violence. Those are the more-- here, it's more businesses. It's more high-publicity. Getting the [State] Monument in the background. Over there, it is your family living. It is neighborhood crimes. It is neighborhood issues. It's the neighborhood folks coming out to support us and help us. And then there's the criminal element that can be found in regular cityscape.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Female	LE-U-040	It's doesn't. It's doesn't. We have very good relationships with the law enforcement agencies. I think there's something like 29 other law enforcement agencies in the city. We are the primary law enforcement agency. When you dial 911, we pick up and nobody else. Also, if there's any type of homicide, we handle it, no matter what. So it's a lot of coordinating effort.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Female	LE-U-040	Actually, we're working with Fire Department and EMS. And I'm not as good--[Name], who's in the other room, he's our tech guy. So he'll be able to tell. But we are trying to get to a comprehensive system where we could share radio communications if we need to. And we are working with our Fire Department and EMS to do so. Some certain are encrypted different ways just based on their security function
Context_of_Work -	LE	U	Field	46-55	21-30	Female	LE-U-040	...And it makes it a lot easier nowadays than having to get on the radio

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder					and ask a question. These people, you will be on, when you're on details, even when you're on regular patrol, people will ask you a question. I'm like, "I don't know, but let me find out."
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Female	LE-U-040	...Because you get random things that you're like, "I don't know." And so you hopefully find somebody and you work it out together because somebody may know because they've experienced it.
Context_of_Work - Relationships	LE	S	Other Public Safety Personnel	36-45	6-10	Male	LE-S-027	My job title is Community Resource Officer. So I'm a police officer, but I'm the liaison between the community and the police department.
Context_of_Work - Relationships	LE	S	Other Public Safety Personnel	36-45	6-10	Male	LE-S-027	Yeah. I think on the normal-- so I usually look at calls in the morning when I show-- so I show up to work. I work a little different schedule because I have a lot of later meetings. I do HOA presentations and community meetings.
Context_of_Work - Relationships	LE	S	Other Public Safety Personnel	36-45	6-10	Male	LE-S-027	Yup. Yup. Check calls and then, depending on my schedule, like today, I don't have a lot on my schedule. So another part of my job is Salmon Days. It's a big festival that we do in October. Every city has a big parade and stuff. We do ours in October, first weekend of October. I'm in charge of that.
Context_of_Work - Relationships	LE	S	Other Public Safety Personnel	36-45	6-10	Male	LE-S-027	So for me, I mean, it's great but I'm pretty personable. I get along with everyone. I don't have a problem with anyone, so I enjoy it because my desk is right over here. Records department is on the other side of my wall. So I go in there. I just brought them coffee, actually, so that's a big part of my morning too [right now?]. But just interacting and getting to know people, it's extremely important because we don't all hang out outside of work. Some of us do, but a lot of us don't. We just hang out inside work.
Context_of_Work - Relationships	LE	S	Other Public Safety Personnel	36-45	6-10	Male	LE-S-027	I figured it didn't matter. But yes. So it's a nice environment. It's a very open environment. We're not a big city so we do talk to the chief. We do wave at the chief. We do talk to him. In some big departments, you don't ever see the chief.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	LE	S	Other Public Safety Personnel	36-45	6-10	Male	LE-S-027	Yeah. It's all with them. It's not even us. So they sign up, and they have to confirm they live in that neighborhood. And then they can send out any information. They can send pictures there, and it goes to only their big group, which is in their neighborhood. And so we now, as a police department, I'm on Nextdoor. I cannot see their activity, but what I can do is I can post to the whole directory, everyone out there. I can post things. So crime prevention tips like, "Hey, watch out for-- there's been some prowls in this neighborhood." I can put notice, pictures. I can do all that, and I can direct it to everyone that's on Nextdoor in the city. So it's kind of cool. So I've seen a huge amount of change when it comes to using all the technology, but using the new social media and all those things. That has been the biggest change over the years, how we use it. Because our city, we use Facebook. We use Instagram, Twitter. I mean, almost every department is using them now. So it's definitely a big change.
Context_of_Work - Relationships	LE	S	Other Public Safety Personnel	36-45	6-10	Male	LE-S-027	People can use drones, yes. Yeah. We don't have drones as a police department, but yes, they can use them. So people still get freaked out, and they call about them [laughter]. But technically, they can use them... There's this sensitivity of it... But having infrared or something on a drone, that's one way above the house. That's one way of getting a location too without having a surveillance, so we don't have that. And I think there is-- I mean, helicopters, we have our-- [county] has a Guardian One, which is-- if we need them, that's our mutual aid. That's our service that we call them. If we need them to come out to look for night time, look at infrared, night vision looking for suspects that ran off into the woods. But they can--
Context_of_Work - Relationships	LE	S	Other Public Safety Personnel	36-45	6-10	Male	LE-S-027	I don't think it would be much different. So with everyone in here, it's just-- I mean, more [as?] person when you're walking by or it's email. I don't know. That's the main thing. And the guys that I know or I'm more friends with, we text on our personal phones outside, and sometimes we text at work, the same thing when it's not necessarily work-related, or it's just hey-can-you-come-over-here-and-see-me type of thing.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	LE	S	Other Public Safety Personnel	36-45	6-10	Male	LE-S-027	Well, I mean, I think just law enforcement in general, as the world is the way it is right now, our name is-- as a police officer, a lot of people look-- some people look down on us and what we do. So that is a huge challenge, and a lot of it comes from well, social media. It's good and bad.
Context_of_Work - Relationships	LE	S	Other Public Safety Personnel	36-45	6-10	Male	LE-S-027	Yup. Yeah. Yeah. And like anybody, I would say 95% of probably police officers are all good, and moral, and make the right decisions. And 5% are knuckleheads, and they do the wrong thing, just like any other group or person. So that is always going to be a challenge. Luckily, here in [inaudible], we have a little different. We're not in a big city. But we still deal with the same type of stuff.
Context_of_Work - Relationships	LE	S	Supervising Field Responder	36-45	21-30	Male	LE-S-028	I mean, there's a lot of interaction that goes on. We prefer the patrol staff doesn't spend a lot of time in the office because that's then less time that they're out on the street. But we have our own dispatch center, our own jail, and our own records division. So patrol officers, as well as all the supervisors, interact with all those people. It becomes family-like at times. We're a really small agency but we're a small agency so we all know each other and we all get along. I can go and sit in the chief's office for half hour, just chatting about whatever, as well as I can go and sit in our dispatch center or whatnot. As a patrol sergeant especially, although you don't get to do it every day, especially during the night shifts, you try and spend time down in the jail and down in dispatch.
Context_of_Work - Relationships	LE	S	Supervising Field Responder	36-45	21-30	Male	LE-S-028	Well, they work in isolated areas, so we try and ensure that you go and spend a little time and chat with them a little bit, just because it's very difficult to get-- we, as patrol officers, get to go out in the city and drive around all night long, whereas the individuals here who have to work in more secure areas don't get that for the most part. But as far as life goes in here, I mean, people come in and out. I mean, this is kind of the central hub for the police department, so officers will be in and out during the day, and if they have any questions about an investigation, I'll get people at my desk saying, "Hey, what do I do about this," or, "What is your division? Do you guys want to take this?" That type of thing. So it's

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								not like, after briefing, everybody just leaves and you never see them again. So there is a lot of movement inside the office during the day.
Context_of_Work - Relationships	LE	S	Supervising Field Responder	36-45	21-30	Male	LE-S-028	Yeah. We have a lot of programs that we work with the community on, and again we have a really good relationship with the community. We've formed a strong bond as a small town and that bond's existed-- even throughout the city, throughout city government there's a pretty strong bond between the community and the city. So we do have a lot of outreach programs. Like you, I've had a chance to talk-- Officer [Name] can talk at much greater length than I can about that because that's his job, so.
Context_of_Work - Relationships	LE	S	Supervising Field Responder	36-45	21-30	Male	LE-S-028	But I feel like we do a really good job connecting with the community. We use social media pretty-- the city itself has been on cutting edge for social media and does a lot of work in that realm. We as a department-- they've kind of held that pretty tight, so we don't have our own social media stuff. But we're able to work with the city to put stuff out through social media. So I'd say we have a fairly strong, if not above average strength, bond with the community.
Context_of_Work - Relationships	LE	U	Supervising Field Responder	46-55	31-40	Male	LE-U-029	Relationship? I mean, as a rule, we'll meet as a command staff. We'll meet every Monday to discuss things. Other than that, I mean, I'll get phone calls from my immediate boss who's Deputy Chief [Name]. So she and I talk fairly frequently, usually by phone. Generally speaking, I don't have a lot of meetings with my bosses. It's more phone conversations about specific topics. And again, I try to get after the precincts. It's fairly infrequent though that I can get out to the precincts. For me at least, most of my communication going from me down to the precinct matters to the officers, and unfortunately, mostly email right now.
Context_of_Work - Relationships	LE	U	Supervising Field Responder	46-55	31-40	Male	LE-U-029	...So very, very strong ethnic neighborhoods. And again, we have the neighborhood councils, but we also have community councils that are based on ethnicities. So, East African community, Filipino community. A number of these communities also have advisory councils for the department as well so we can address things that they are concerned about.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	LE	U	Supervising Field Responder	46-55	31-40	Male	LE-U-029	Yeah, they meet with the department. Usually, they'll have the department representation, too. So they'll have somebody that that's the department representative to the gay and lesbian community or to the Filipino community or to the East African community. So we have kind of-- they have a conduit, they an officer that they can reach out and talk to.
Context_of_Work - Relationships	LE	U	Supervising Field Responder	46-55	31-40	Male	LE-U-029	[RE: relationship with community] It goes up and down. What unfortunately happens sometimes, and the reason we have the liaisons that communicates with these folks is there will be a new story about something, about a contact between an officer and someone in the African-American community and it'll turn into a news story and emotions will flare, but then the goal is to have this liaison that they can reach out to and go, "What happened?" And we can try to provide information to the degree that we can. So I think it's pretty successful. It's important that we continue to do that. But again, it turns on what happens if there's a bad news story then we usually have some damage that we might have to repair.
Context_of_Work - Relationships	LE	U	Field Responder	56-65	31-40	Male	LE-U-030	Yeah, I work Monday to Friday, roughly 9:00 to 5:00. I mean kind of just regular business hours. But oftentimes, there's a reason for me to come in early because something's going on or because the Community Police Team does a lot of community hour each work, and the captain is very engaged with the community. There are oftentimes meetings or other obligations that extend beyond that 9:00 to 5:00 range,
Context_of_Work - Relationships	LE	U	Field Responder	56-65	31-40	Male	LE-U-030	They're all patrol. Yeah. Well, except for the four officers that are assigned to the Community Police Team. And there's a sergeant and six officers assigned to the Anti-Crime Team, which is it's a uniformed assignment, but they're usually tasked with specific crime-related projects. They're often engaged in doing anti-narcotics type of work. They will do search warrants. They'll do narcotics operations. So they're kind of halfway between a regular patrol squad and a SWAT Team. It's their function.
Context_of_Work -	LE	U	Field	56-65	31-40	Male	LE-U-030	Yeah. I mean my personal style is to get to know people on an individual

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder					basis. I like interacting with them. Before I became the operations lieutenant, I was a watch commander in the precinct, and so I had direct supervision over the sergeants and squads on one of the watches,
Context_of_Work - Relationships	LE	U	Field Responder	56-65	31-40	Male	LE-U-030	Obviously, there are people with all ranges of experience in the department, so there are some people that I've known for as long as I've been on the department. Most often in patrol, you have the younger officers, and so the bulk of the officers in the precinct came on well after I did, but when I was their watch commander, I tried to get to know as many of them as I possibly could. And now because my responsibilities are precinct-wide, I try to get to know as many of the officers on the first watch, which is the early morning watch and the third watch, which is the night time watch. And so I hope that I know everybody in the precinct at least by sight if not by name, but it's a lot of people and we all work different hours as well.
Context_of_Work - Relationships	LE	U	Field Responder	56-65	31-40	Male	LE-U-030	It's quite a bit of extremes, and so socioeconomically, it's very diverse. Racially, ethnically, it's very diverse. [City] is not particularly diverse when it comes to political views, so in the East Precinct, there's not so much of a recognizable right and a recognizable left. But we have a lot of residential areas. We have some very dense population areas in the sense of multistory, condos, or apartment buildings. There are quite a few businesses. The [Street] Corridor is a mix of business and residential. There's not a lot of industry in the precinct, but there are some little pockets of more or less industrial-type neighborhood, not heavy industry, but-- so it's a very, very diverse community. It's both fascinating and challenging to provide police services because not only do individuals expect different things from the department but specific neighborhoods expect different things. And so it's a bit of a challenge to deliver the services that those neighborhoods asked for in a consistent manner.
Context_of_Work - Relationships	LE	U	Field Responder	56-65	31-40	Male	LE-U-030	I think that the vast majority of the residents are supportive and appreciative of the police department. I think that there are smaller but measurable number of individuals, and neighborhoods, and

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								neighborhood groups that are less satisfied with the police department. But my opinion after being on this job for this long is you're never going to make everybody happy, but as long as you do your best, to remain professional and responsive. And when you do interact with people, you treat them with courtesy and respect and do the very best job that you can. And that's really the best you can hope for. There will always be our detractors, our critics. And police work is a very public thing, and so it does not strike me as unusual or unacceptable that we do fall under scrutiny and criticism. I think that's just part and parcel of the job, and the critics, the detractors, I think, get more attention drawn to themselves or paid to them than the supporters because the supporters are usually, I think, quieter, less vocal, less public about their praise and appreciation. And so the media is drawn to the attention from the negative aspects.
Context_of_Work - Relationships	LE	U	Field Responder	56-65	31-40	Male	LE-U-030	Right, and not to dismiss their concerns, because we do address their concerns. But sometimes, their concerns are and their demands are unaddressable or unanswerable because they're just beyond what is reasonable or possible.
Context_of_Work - Relationships	LE	U	Field Responder	56-65	31-40	Male	LE-U-030	Well, I don't think-- I cannot recall a single incident in my career where I spoke to a firefighter or another first responder on the radio system. So if we're at a scene where both police and fire are present, it's very easy to talk to them. I think the police department and the fire department has an excellent working relationship. And from that perspective on a one-to-one basis at a particular call, it's very easy to communicate with them. There has been some difficulty at times. If we're trying to get information from the fire department over our radios. So our dispatcher has to ask their dispatcher, and so it becomes a four or five step process. So that's a little cumbersome, but it's understandable because if we all shared the same radio air. Their free time on the air, right? I mean, it makes sense to keep them on different radio systems. I can see and I believe that our radios have the capability of fire could go to the same radio that weekend, and we can talk-- I think it's technically

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								possible to do that. I've just never seen an operation made to do that.
Context_of_Work - Relationships	LE	U	Field Responder	56-65	31-40	Male	LE-U-030	Well, as an operations lieutenant, not really, because I don't have any operational obligation to it. But for example, say, the watch commander for that particular shift isn't available, isn't working, and if the sergeants--there's some things that need lieutenant's approval to do. And so I make myself available that if they need a lieutenant at a scene and the watch commander is not available. In principle, if someone from the East Precinct needs a lieutenant at the scene and the East Precinct is lieutenant is not available, then a lieutenant from another precinct could respond. But if I'm working and if I can be of assistance, if I can contribute to whatever they're trying to accomplish, then I'll make myself available.
Context_of_Work - Relationships	LE	U	Field Responder	56-65	31-40	Male	LE-U-030	... So much of police work is just being able to talk to people, and I think that those among us who rely too much on the technology lose those interpersonal skills or never develop those interpersonal skills. And so I mean, it always kind of makes me chuckle a little bit when I see police officers driving around. And if they're in a two-officer car, the driver officer is doing what they're doing. They're driving, and the passenger officer is over there on their cell phone doing whatever.
Context_of_Work - Relationships	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	We listen, and we use it and all that kind of stuff, of course. And so we provide high visibility patrols in high crime areas, try to make the community feel safe, try to interdict crimes and make arrests, and that's kind of it.
Context_of_Work - Relationships	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	There's a City of [City] app called Find It, Fix It which is-- actually it's designed for citizens or community members. If they see a street light out or illegal garbage, they can go to the Find It, Fix It app that finds your longitude and latitude. So it gives you a location, you snap a picture and you send it to the city for an illegal dumping.
Context_of_Work - Relationships	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	... It would be nice if we worked better with [State] Patrol because sometimes we interface because the freeways go through our precinct, and usually that gets transmitted through 911 and there's a delay and--

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] Okay. If I was to describe my work to a complete stranger-- I attempt to be a bridge between public safety operations and information technology, and I try to speak both those languages.
Context_of_Work - Relationships	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] Yeah. Yeah. We put out a lot of fires metaphorically, and then the first responders that do it literally. We have a lot of that. And it comes from that high demand, I think. When things do change rapidly and dynamically, they look to people like [Name] and I for that immediate responsiveness and being able to provide the answers or be able to look in the right place for the right answers.
Context_of_Work - Relationships	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S2] Yeah, I don't know what the relationship is right now because I haven't been on the dispatching console for years. I would say that it isn't as good as it could be. I would say that you still have-- one end of the spectrum is it's them versus us. You've got that attitude. You've got the [sworn?] versus the civilian. And then on the other end of the spectrum you have real good working relationships. Just depends.
Context_of_Work - Relationships	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] I'd say overall it's professional above everything else because officers or first responders aren't mingling in dispatch center. I don't even think our call takers or dispatchers know half of the people, at least personally, face to face that they're talking to and because the department is so large. I think that could be a cause for no relationship in general except a working relationship. Then you have others who do have relationships at work, outside of work.
Context_of_Work - Relationships	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] Just today I scheduled a meeting between police and fire because, again, both centers deal with each other all day long with the transfers, and sometimes maybe we've changed a policy that the fire department doesn't know about, and they're not understanding each other or what a word might mean, a fast backup versus a healthy officer or those little things. So I did get a group started just like you're talking about between police and fire and 911 users. So think of supervisors, duty officers, the people operationally dealing with these things, and we're going to try to meet, for now, once a month and see where it goes.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] But I think we really need to do it even more so between our own people and the police department.
Context_of_Work - Relationships	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] I'd say good, I think, overall. I think communication's good and how it's achieved is by all the same means we've talked about before. I haven't had any issues off the street business-wise with the fire department in communication. I think both entities are open and receptive to it and understand that we work in a lot of overlapping areas and want to increase efficiencies and all of that. So I think they've been eager, the fire department has, and I would say historically and traditionally, and correct me if I'm wrong, [Name], but the police has led the effort on a lot of just things in general when it comes to emergency response and especially from the 911 center, us being the primary piece [up?] and them and always being sort of the secondary or backup to us. They usually follow our lead on those things.
Context_of_Work - Relationships	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S2] From the 911 center I'd say that's true. Traditionally, with the police department and the fire department as a whole, we've had some very rocky times, but it all depends on who's in command and who's leading the efforts to bring people together. So I'm not going to get into some of the things, but yeah, it hasn't always been the best. But for the comm centers, it it has. We've always had a very good relationship with the fire department. And because the E911 office for the [County], the directors and a lot of the back-line people routinely get together, it was always a good working relationship.
Context_of_Work - Relationships	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S2] Yeah. And the same on the police side, I mean, as far as the other police departments on the 911 side always had good communication. However, we all do business differently. And I was leading an effort through the county 911 office to maybe look into having CADs that talk to each other or eventually having one CAD system, etc., etc. It was painful. It was painful, because everybody does their business differently. Everybody wants it their way. Nobody really wants to change.
Context_of_Work - Relationships	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S2] What has been probably the best, most cooperative group is the voice radio. The group has been together for many, many years and has

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								managed to put together a tactical interoperability plan for the region and all had to come up with policies and procedures that govern it all the way to terminology which did take us a long time. But yeah, I would say that of all the groups that I've been involved with, they're the ones that have the best communication regionally.
Context_of_Work - Relationships	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] Relationship-wise, I just haven't been out there long enough to observe that. I think it's always cats and dogs with police and fire, right? Traditionally?
Context_of_Work - Relationships	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S2] I think that for the most part - and I could be wrong. I'm not speaking for the police officers, just observation - that boots on the ground people usually do pretty well with each other. It's at that middle management, upper management level that there can be butting heads and things like that. But like I said, the comm center has always worked very well with fire. I think that most of the police officer's and firefighter's line people work well together, right?
Context_of_Work - Relationships	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] It's its own petri dish of life [laughter].
Context_of_Work - Relationships	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] ... My point for that though is that when things were tough, when staff is short, which is almost always, and people are being called in on their days off to come in to work overtime or to fill gaps, they get the job done. That always happens. We've had bad leadership, lack of leadership, no leadership over the course of years, and they still every single day get the job done. Not to say that doesn't cause all sorts of boiling up tensions inside the comm center. So you're going to have people that need to get separated I think at certain points in time, not maybe physically because they're fighting but just I don't want to sit next to that person right now or you're always going to have that in dispatch centers.
Context_of_Work - Relationships	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S2] You're plugged into a console, and that is your world. It's your world in a bubble. And you're going to have disparity between shifts, right? Between roles, right? Call-takers and the dispatchers, chief dispatchers.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								You're going to have cliques. You're going to have-- I don't want to use the word petty; I hate that. But comm centers, the people on the operations floor have different stressors than maybe somebody outside of in an office or an officer on the street. Things are mountains that might just be molehills. Does that [crosstalk] [laughter].
Context_of_Work - Relationships	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] That made me think of something too. I might be interfacing for example with somebody in the dispatch center, and they could have just had a horrible experience with whatever they were just dealing with, and I asked them something simple and they snapped back at me. I've just been in that job long enough and worked also as a dispatcher to know I don't snap back at them, I just give them their space and then we'll talk about it later on, and usually everything's okay after that. So it's the stressors is what you said that cued me into that.
Context_of_Work - Relationships	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] ... So that's difficult to communicate with callers. We have language barriers, but we do utilize a pretty great language service so we can get translators online fairly quickly. Other issues would just be, I think, callers maybe not understanding that. "Hey, I'm going to get interrogated." And either they don't understand sometimes how the call taker is getting information and maybe are upset because they're not hearing the right things or that help's on the way, which we'll tell them eventually. But it's hard sometimes to corral and control the caller, depending on what's going on. Among the communication employees, communication-wise, difficulties--
Context_of_Work - Relationships	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] Yeah. We're on the same page with a lot of stuff, and I will just say, just like earlier, sometimes you're on the toughest days but you've just got to get the job done. And everybody in this job more or less does that. And it's one of those we're all in this crack together sort of situations where we just make it work. I don't think we-- there's personalities on the job and everything else but coming from public safety, I think [Name] and I always try to do what's right for the public and for the city of [City]. That could lead to fights. That could lead to not even amongst us but I think healthy arguments good and some of the butting of heads is good.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								Good things come out of that. So overall I think that happens here.
Context_of_Work - Relationships	LE	U	Not specified	46-55	Not specified	Male	LE-U-041	[S3] ...I'm also in charge of enforcing the rules and regulations and ensure that our supervisors are doing the same, as well as keeping a very close eye on the customer service aspect of call taking and dispatching, and make sure we're running efficiently.
Context_of_Work - Relationships	LE	U	Not specified	46-55	Not specified	Male	LE-U-041	[S3] Sure. Sure. Voices, sometimes. Not as often as I'd like to see it but sometimes cops will even come by with a cup of coffee or something and thank a dispatcher. When they come for the tours we have police officers come here. We have newly assigned sergeants, lieutenants, and they'll say, "Oh, I want to meet the dispatcher in citywide."
Context_of_Work - Relationships	LE	U	Not specified	46-55	Not specified	Male	LE-U-041	[S4] ...And we conduct daily roll-calls twice a day, and make sure that all lines of communication are open between federal and city, and really stay in authority because the MTA police is on there, [State] Police. And so everybody is-- all lines of communication are open. Hold on one second, please.
Context_of_Work - Relationships	LE	U	Not specified	46-55	Not specified	Male	LE-U-041	[S3] ...It's pretty good. We're always trying to make the relationship better. There is a slight separation. The officers in the field are uniformed members, police officers. And the civilians are dispatchers. We're always encouraging the uniformed officers to come here. Well, we even mandate it when the new academies come through. So we do it for several months. They all come in while they're still in grey shirts, which means they're still not police officers yet. And they sit down with the dispatchers and they sit down with the call takers.
Context_of_Work - Relationships	LE	U	Not specified	46-55	Not specified	Male	LE-U-041	[S3] We have them, meaning our citywide dispatchers, go to ESU, as well, at Floyd Bennett field to see all the helicopters, the trucks. So we want the dispatchers to know why certain things are done the way they are, to give them a better understanding so they buy in and they accept it. We're trying to make the relationship better and better, but I believe it's a very good relationship.
Context_of_Work - Relationships	LE	U	Not specified	46-55	Not specified	Male	LE-U-041	[S3] Everybody. And we do that for-- it goes on for a couple of months to get the whole police academy, depending on-- say there's 1,000 police

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								officers. We bring every new police officer while they're still in the academy. They actually come in this room, and they sit at this-- all these chairs. And we bring in-- I'll speak with them, the captains will speak with them. Then we give them a tour, and we have them sit down. And sometimes, we bring them down after so we can answer their questions, but we feel that that's made a big difference because I don't think it-- and I'm not saying it because I'm the commanding officer of the 911 center, but I don't think any police officer doesn't have a newfound appreciation of what the dispatchers do, because you'll see-- especially a busy day.
Context_of_Work - Relationships	LE	U	Not specified	46-55	Not specified	Male	LE-U-041	[S4] Well, in the [City] area we have an interagency communications committee. And it's actually been established since 9/11, and it's a strong body of operational and technical personnel across multiple jurisdictions - city, federal, state. And it's chaired by [City] OEM, EM, Emergency Management, actually, [City] EM - they changed their name recently - and we participate in that. So I was one of the founding members.
Context_of_Work - Relationships	LE	U	Not specified	46-55	Not specified	Male	LE-U-041	[S4] ... So fourth of July is a good example where the fireworks are on the Hudson River. We have to communicate with [State]. We have a pre-planned sort of patching scheme that we deploy where [State] may patch certain channels that are then patched to our channels.
Context_of_Work - Relationships	LE	U	Not specified	46-55	Not specified	Male	LE-U-041	[S4] I like to call transit radio my baby. I mean, we pay a lot of attention to it. We have service level agreements with our partner Transit Authority, who maintains a lot of the system. We maintain the above-ground, they maintain below-ground. And we have a lot of-- we built up that partnership over the past couple of years and we think it's strong now.
Context_of_Work - Relationships	LE	U	Not specified	46-55	Not specified	Male	LE-U-041	[S4] I think having the right engineers, the right-- and the right people, and the right decision makers is key. And also bringing the unions in, explaining to them the process of transition, what we're trying to do. And really getting out-- before we're going live, ensuring that all the notifications are in place. We really had to really white-glove it in a lot of ways, and there was a lot planning and a lot of process involved. So that

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								was big, big challenges.
Context_of_Work - Relationships	LE	U	Not specified	46-55	Not specified	Male	LE-U-041	[S3] ...If they're calling from [County], they may hit a cell tower in [State]. So we just have to work with the surrounding 911 centers where basically-- but there'll always be confusion because the person calling doesn't realize that they hit a call center in another jurisdiction. So they're giving a location that will not come up in our system. So they're giving a street name and an address. And what's going to happen is the call taker is going to say, "Well, that's not working. What are the cross streets?"
Context_of_Work - Relationships	LE	U	Not specified	46-55	Not specified	Male	LE-U-041	[S4] ...So Chief [Name] and I, we met and we're going to be working with him on making some adjustments to, like I said, tweaking some capabilities that we have. So giving EMS access to communicate with us in the subway, for example. There are ways to putting this tactical interoperability channel in all our radios, all their radios. So there are some things that we've done to optimize our interoperability. So ESU, our Emergency Services Unit never had an iMac. Now they have an iMac. So you make changes along the way, and you make it better.
Context_of_Work - Relationships	LE	U	Not specified	46-55	Not specified	Male	LE-U-041	[S4] ...But for our commissioner, she'll-- there's a lot of focus groups that our police commissioner sets up. And they do re-engineering and there's a lot of this kind of stuff that is really talked about. I mean, and, really, outside commands are the ones that would bring the requirements in to be the-- a lot of the best wishers of what they would like, and all that. I don't know that we can answer that, but, again, it's pretty overwhelming when you think about all the things that we're doing now. That's a pretty broad question and it's difficult to answer.
Context_of_Work - Relationships	LE	U	Not specified	46-55	Not specified	Male	LE-U-041	[S3] I have a stats unit that I work with almost every day, and it can be broken down by the number of calls, by their codes. So what we can see is there's a lot of, say, emotionally disturbed persons in a certain area, or there are a lot of overdoses. And so we do have pretty good analytics just on that. And, as he said, they have the mayor's office of data analytics as well.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...Our population of tourists turns over every weekend. Summers are just as busy as winters, not just the skiing. But they fly in on Thursdays, party like rock stars all weekend long. Eat too much. Drink too much. And they're probably good folk. But they left their brain at home, and they just do some stuff here they probably wouldn't do, whether alcohol, drugs, all the above, with marijuana being legal...
Context_of_Work - Relationships	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	Both. But I try to use my desk phone more because I'm inside. And maybe it's because I'm in my 40s. So it's just as easy for me to pick up a desk phone. Plus I got the big foamy things so I can rest [inaudible].. Also hands-free. So I'm like this, and I can still type. But yeah, both desk and cell. And I've got a car that's got Bluetooth. So I've got my phones wired through that so I can talk as I'm driving down the road. And that happens quite often. I got police radios. I got one in my office. I got one in the car. And everybody, if I don't answer my work cell phone, they have my personal cell phone. So they'll call me in there. Thankfully, that tends to be more trash-talking. And that I thoroughly enjoy. I should cut down on my trash-talking. But at this point, I'm enjoying that.
Context_of_Work - Relationships	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	[RE: apps] So I've got Facebook, Google, Voice, and Messenger. But they're all linked up to not my real Facebook. So they're all hooked up to UC accounts, undercover accounts. So I got Snapchat because dopers put all their shit online. So you can get Snapchat video. I got my Dunkin' Donuts app because I need to know where I can go to get a good cup of coffee [laughter]. Chive, like I said, for boring meetings so I can entertain myself and not be loud. Reddit. We're just starting to get into dark web and some stuff like that. And there's a lot of shenanigans of food on Reddit. So I have the app but don't really know much about it. I've got [State] Road Conditions. Being up here and being-- it can come in handy especially when your only connection to somewhat really outside is [Street]. It's your main one. And it closes down for hours at a time so-- and it's always when you need to go to Denver. Let's see. Pandora, Spotify. I've got one called Scannable. So when I get sent somewhere, we have to keep a copy of receipts. This takes pictures of them, and

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								then you can email it to yourself in a PDF form. WhatsApp, another one, you talk to the fine citizens that I deal with. Google Maps...
Context_of_Work - Relationships	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	So the front desk folks, if they need help, they have a question, they kick it back to us. And we get a lot of, "Hey, can you come here? I need you for five minutes." Well, five minutes, and five minutes, and five minutes, and five minutes. Then where our office is, it's kind of a-- so for you, it's an L-shaped corner. Our office, the detective office, is between the [Job title], [Job title], and the [Job title]. So everything filters into our-- and it's a corner office. So everything would filter into there, whether it's some command staff just coming in to BS, which is-- it's cool. "We're letting you know we're one of the boys." But they come in there. Or if they have a special project that needs done right away, they come in to us. "We need this done right away." And all you do is say, "Okay." Whatever I was working on, it wasn't the priority. Now, this is my priority. But what happens is they come back to you, "Why didn't you have that done for me?" "Well, it's because you told me to do these three other things." "That doesn't matter. Why isn't this done? I don't want to hear any excuses." So we're kind of a dumping ground of-- we get everything...
Context_of_Work - Relationships	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...the other detectives that are down there hate me because I'm off-site... It seems to be out of jealousy. Because they'll go in. And they've got a bunch of paperwork to do. And then they don't type it. And then we shut our door, and then we're told we're anti-social. I'm like... But I got to get this done... So station life is-- life at the office is you avoid it as much as you can... Just because you know you are going to get more work done some place else...
Context_of_Work - Relationships	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	You're called anti-social. I've been called way worse. But all the [Job title], we all have desk or laptops. So we have that ability, but it never feels-- you need to be by a printer, or there's always-- if you go somewhere else to work there's always the price to pay, wherever it is. So I mean, I hate to admit that I do this - and my wife gets pissed at me - but I just sit at home in the kitchen table sometimes because I'm one of these people that's blessed with not needing sleep. So I just will sit and

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								type because it's quiet. And the worst thing I got is a cat bothering me. So it's not that big a deal.
Context_of_Work - Relationships	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	Oh, no. I talk. I'm not bashful. My mouth gets me in trouble more than anything. I love teasing firefighters. I mean, I call them American heroes and Band-Aid throwers [laughter]. I don't care. I love having fun with them. And there's a former [Job title] now - he's retired - he and I would just start going at it. And it was all out of fun. But if you didn't know that, and the way we were going at each other, you'd think we hated each other. But it's breaking balls. We're out here doing-- they're different jobs, but they're extremely dangerous, and they're extremely important to society. I've been through training, the narc stuff, where you have to wear the respirators and the air packs and go crawling through smoke-filled buildings and-- no. Shoot at me. I'll take that. I ain't going in no fire...
Context_of_Work - Relationships	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...So I've got a lot of respect for those guys, and gals, and what they do. But they're not above teasing. I mean, firefighters, I tease them all the time about working out for calendars and going saving kittens. Their trucks, like the [Job title] you've just in here, their truck looks like a boar's head truck. So every time I see a boar's head truck, I snap a picture and send it to the fire marshal because it's that type of we're all on the same page. I think that's like a brother. You can say some stuff to your brother, but if somebody across the street says something, well we're going to throw. And to me, that's the kind of relationship. But I'm not afraid, and I should be...
Context_of_Work - Relationships	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...I'm on a first name basis with most the chiefs... Police chiefs and fire chiefs. I got their numbers. And I can call them if I need something. I don't abuse that. And I respect the position and where they are. But at the same time-- one of the local police chiefs, he was the best man at our wedding. I've known him for 15 years. So I can say some stuff to him. And I do it in appropriate places... But it's just we're buddies. It's not adversarial or anything like that and the same with some of the fire chiefs. I'll give them hell. I will just give them hell, tease them. But there's a time and a place.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	Not so much right now in my current position. But yeah. You do. When I was handling general crimes and there's a fire, you go there and you check in with the IC, the command, and find out what's going on. And depending on who the [Italian?] chief is, is how much trash you can talk because they don't always know me, and I kind of just if it's here, it comes out. There's not much of a filter. So I'll start teasing them right off the back. "Hey, what time does lunch show up? We're hungry [laughter]." Just to let them know that you're not better than anybody else... I hurt a lot of feelings too...
Context_of_Work - Relationships	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...it's getting to the point of there's so much stuff in the car. You're like Emerson, Lake & Palmer trying to go to a call. There's a computer here. And it's giving you dispatch updates. You've got siren controls. You've got a radio. You may have two or three radios. And then, what burns my ass is when dispatch tells to switch a channel. And you're like, "I'm doing 100... and I'm driving, and I'm dodging man, and machine, and [critters?], and everything. And then I don't blame dispatchers for this or people on the other end of the radio. They don't know what you're going through in the moment as you're trying to hurry up and get to call or hopefully save somebody. But there's tons of technology in the car...
Context_of_Work - Relationships	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	And I get that. I'm not saying open the flood gates and start spending like a drunken sailor. But there's got to be a median, comfortable. And the decisions made by the command staff, usually with little or no impact on the people that it's going to affect the most. Someday I'll probably be in that command staff position. But one thing I always want to remind myself is how is this going to affect the boys.
Context_of_Work - Relationships	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...there's not that-- and I see that from talking to cops around the country. There's not that open lines of communication. It's decided up on a high, and it's dumped on, and you shall accept and make it work even if it doesn't work.
Context_of_Work - Relationships	LE	U	Manager	46-55	31-40	Male	LE-U-020	So that's the ability for us to-- and that's required of all of our centers. We have our busy radios with the multiple troopers, and everybody has to have their ability to work that radio. And we get kick-backed

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								sometimes and says, "No, we want our dispatch. We want this dispatcher." And I'm saying, "Yeah, but I've got to make sure this other dispatcher that may not be as fast, and may not be as fast, has functionality in you because your favorite dispatcher may not be here someday. And if the other one has never been there, it's going to be a lot worse."
Context_of_Work - Relationships	LE	U	Manager	46-55	31-40	Male	LE-U-020	...jurisdictional is just different areas. We have a lot of good relationships with agencies. They'll say, "We're here. We'll move them out the way," or "We'll handle it," or that type, but there are some where, oh, no that's state, call state. But they don't call us on the initial call if there's a question. They wait till they get there and then they decide, and then they call us. So that's a frustration piece, but working with 63 different counties and multiple local jurisdictions, you're going to find the good and the bad and the others.
Context_of_Work - Relationships	LE	U	Manager	46-55	31-40	Male	LE-U-020	...There are some counties in the state that will cover traffic accidents. They actually have a traffic division. And they do accidents on the county roads. And we still monitor main state highways and major thoroughfares. But they handle their county roads unless it's something big and type of thing. But that's fewer and far between because, on the other side, they're taxed on resources as well. So the first thing that they want to give up is traffic because, well, traffic's the state patrol's problem [laughter]. Yeah. So we're getting some of those back. But we do very well in working with other agencies. We have a very good working relationship with the sheriffs and the local PDs.
Context_of_Work - Relationships	LE	U	Manager	46-55	31-40	Male	LE-U-020	We have an interoperability with [State] and then it's generated through a radio system. In [State], when we go into [State], we have some of their talk groups into our radios. They have some of our talk groups into their radios. The only problem is if they go to somebody else, our dispatchers lose track of them, so now they're on their system. It's not the best, but at least they're able to talk to the officers in the particular area because we have time gone quite far into other states. But we try to set that up that way. [State] is very difficult. We're having very difficult time. They run

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								their radio system differently, and their legal department has indemnity issues type of things about sharing their resources with others. And so when you start getting into legal problems, I mean, it's, why are you involved?
Context_of_Work - Relationships	LE	U	Manager	46-55	31-40	Male	LE-U-020	I mean, we do that in eastern [State], which, a lot of times, our guys are their backup, I mean, because there's not a lot in eastern [State], [laughter] okay? So his backup may be coming from [City] or something because that's where the population-- The guys out of [City], so we know these type of places and we have very good relationships with those type of people. But sometimes, when we get politics involved, it kills processes.
Context_of_Work - Relationships	LE	U	Manager	46-55	31-40	Male	LE-U-020	Well, it's pockets of local influence. And what I mean there is that in the rural areas, rural [State]-type areas, and [City] extends into [inaudible] then [City], but they extend into Southeastern [State], which is extremely rural. All of those entities work very well together. They know that they have to count on the State Patrols for backup. They know that we handle all the Hazmat responses for their areas. So we work very good and very cooperative type of thing because, one, they don't have the resources, they have their own, and they need the state. And the state is very well-liked, very well-received in our smaller areas. Our [City], is in one of our communications centers, we only have one troop there, but we dispatch for 20-plus agencies and they're all local.
Context_of_Work - Relationships	LE	U	Manager	46-55	31-40	Male	LE-U-020	...So we're just one of-- it's a different dynamic. So we do have very good working relationships with some. Some we don't because they're self-sufficient and they want to have control over everything. And that's why we a multi-county thing that they bought their own digital trunk radio system, that is the exact same system as the state is on. But they don't have control over the state system, so they got their own in a tune of over a million dollars.
Context_of_Work - Relationships	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	[RE: CAD system] ...quite honestly, we were lied to by the company when they said they could do a lot of what they can't do. So that's what the primary issue is. It won't do a lot of what they told us it would do...

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	[RE: PIO use of social media] They'll put out information about things that are going on, mostly putting the police department in a good light when possible. They'll respond to questions from citizens on social media.
Context_of_Work - Relationships	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	[RE: PIO use of social media] They post [inaudible] that we may get from the citizens. This kid's missing, popular news things that we can get the community's help with.
Context_of_Work - Relationships	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	We're in the process of-- just kind of rambling on here, but we're going to a regional comm center... It's been a two or three-year process, and they've had to fire the director a couple of times. But when that comes about, it will be the entire team of [county], ongoing CAD system, which is between police and fire, there's like 26 agencies. Which in my mind, is a very big step backwards as to where we are now because our dispatchers now know us. They can hear differences in our voices. They can tell when something isn't right. They have an idea as to how our city is laid out, how it works. And I think we're going to lose that when you go to a comm center...
Context_of_Work - Relationships	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	We'll call through the radio to ask for the tow to respond, and our dispatch center will then call our contract tow company and send somebody out. Sometimes if they're really busy, and I can tell dispatch is busy, I will use my phone and call the tow company direct and say, "Hey, I need a tow out here." But that's pretty much it.
Context_of_Work - Relationships	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	[RE: relationship with dispatch] I think it's pretty good. I think we have-- again, we have people who think that dispatchers should be doing more than I think dispatchers should be doing. Where we have officers asking for so much stuff that I can do myself. And that's just me, I guess. If I can do it myself, I'm going to do it myself. I'm not going to use somebody else to do what I can do... And I think that's, again, a mindset that, if I can do it myself then I'm going to do it myself. If I'm in the building, I'm going to do it on the computers compared to keying up the radio. From the back of the holding cell, I'm not going to call dispatch on my radio to get them to run a query for me. If I can't do it myself, I might

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								call them on the phone, just the landline phone back there. But I'm not going to use the radio up to do that.
Context_of_Work - Relationships	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	... we'll have the officer who will spend all this time on the radio, okay, asking dispatch, "Okay, can you go and can you check this other database and see if you can find this person, find a phone number?" and all this stuff. He's got a computer in his car. He could do it himself. But now he's having the dispatchers do it, who are then also still answering phones and dispatching calls. And so then they get upset when I don't get my responses back real quick. It's like well, that's not their job, they're communications and dispatch. They are not to do your follow up for you...
Context_of_Work - Relationships	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	[RE: data storage for body worn cameras] So we decided, yeah, yeah, \$250,000 a year is better spent on dictation of our reports because we have good relationships with our community. We're not in trouble all the time. And for the most part, if we say that this is how it happened, then we're believed.
Context_of_Work - Relationships	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	Our community is very supportive of us. We pretty much get every thing we ask for. Since I've been here we've past two different tax initiatives to pay just strictly for police, and equipment, and manpower, and stuff like that. So we get along really well with them, and they like us to be innovative and encourage us in that direction.
Context_of_Work - Relationships	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	[RE: drones] Policy's written, we just haven't made the purchase yet. In fact, two of us are going to [City] on Sunday to the training to get our pilot's license. Because we're the government, so you have to go through extra hoops [laughter]. Yeah, I could buy one on my own and fly it over my house today. But because I'm the government, I have to get a license and all kinds of other approval. So yeah, it's coming. Strictly for the purpose of [inaudible] crime scenes, search and rescue, tactical situations, and that type of stuff. It's not for the spying. So we've had to--everybody gets concerned, so we have to put all these special caveats in our policy that this is what it's for. Again, [Name] can do it, but we have to be careful.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	Fire has access to our encrypted channels because we share a radio system. But the channels that they use primarily are not encrypted. And we thought that that was going to be a big issue, and so our PRC, our Public Relations Coordinator was all freaking out because the news was going to be able to get our radios. It has not been an issue at all. It has actually improved because we used to stop cars, and they have the app up, and then we could hear ourselves key it up, and it's coming through their phone. And now that doesn't happen. So it's very good. We still let the news know what's going on. Tweet them or whatever [laughter].
Context_of_Work - Relationships	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	It's fun because we've got a small group, so we kind of all know each other. It's not like a huge agency where if I get a case, I don't have any idea who is writing it and what the circumstances are. So that helps to know everybody a little bit better and know what their strengths and weaknesses are to some extent. Especially with the newer people, when they're still learning and being able to guide them and stuff like that. And then, being able to work with the sergeants if there's issues or if there's disconnect somewhere like that because we've only got four patrol sergeants, I think, and four patrol teams. So it's pretty small.
Context_of_Work - Relationships	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	[RE: comms with FF and EMS] We don't have to do that a lot in my capacity as a [Job title]. When I was on patrol, we did it more, and fortunately, again, being a small town, we've got a pretty good relationship with the fire department, with the EMS. And my wife's father is actually-- he used to be the [Job title] of the fire department, so we would give each other a hard time a lot. But it helps having been in dispatch, I kind of know which radio channels they use, and that helps that I can kind of talk to them a little bit more directly than a lot of the patrol guys.
Context_of_Work - Relationships	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	[RE: jurisdictional agencies] we've got a pretty good relationship with all of them. I think the biggest issue is that State Patrol's on VHF or UHF, I can't remember... And we're on 800, and our dispatch center has the ability to patch our radio channels so that we can talk to each other. And then we've got certain mutual aid channels that we can all get on from

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								our individual radios and talk to each other, which is very helpful...
Context_of_Work - Relationships	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	[RE: recording via body worn cameras] If it's anything more than "Hi. How are you doing?", pretty much. We have a very-- we have a very good relationship with our public up here. And, for example, an open container of alcohol is against town ordinance. 9 times out of 10, if I'm on patrol, I can walk up to someone and say, "Hey, that's against the rules. Can you go throw that out please?" And they'll say, "Okay."
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	We don't have body-worn cameras yet... most of the agencies in a county do. So I usually talk with them about it, just kind of the pitfalls that they've gone through. And then read their policies and there's bigger discussions on the privacy issues. When to record, not record. So we sort of stood back and watched that from the edge. The current under sheriff and I used to joke about, "The day my word's not good enough in court and they will demand to see a video, it's time to get out of this line of work."
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: body-worn cameras] Certainly, there's a public expectation now that, "Well, where's the video? Where's the pictures?" That's so ubiquitous in this world that they expect to see it. And then it's going to get to the point of if your agency doesn't have that, you're now not up with standards. And certainly, there's an expense and a cost to all that.
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...the running joke we have from law enforcement is that we tell the fire guys, "Well, if you just stayed awake, you wouldn't need all these apps." And the fire guys joke back to us about, "Well, if you worked 240 hours every month, you'd probably take a nap too [laughter]." So it's kind of the running joke. They're different work environments. But I think we both recognize that because of that there's different apps, if you will, or technologies that come into play because of that type of environment.
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: LE paired up] So from a security standpoint, I could stare at the device and not worry because I know another guy was with me doing situational awareness if something were to happen. And so we recognize that in that environment. I think we also came out of that

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								environment recognizing that's a potential pitfall. You can't give people more stuff [crosstalk]-- on my radio, I can talk on my radio and watch and see everything that's going on. We all practice and train for that. Now, you give me something I have to hold and I have to data input. You can't maintain both of those. So that was one of the things that came out of is recognizing you're deploying more and more of these devices that give you the security and personnel. And if it's truly a tough environment, you need to pair people up just for that purpose. Kind of go back to have one person who's running all the devices in communications and someone else who's making sure you're safe.
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: in-vehicle boosters for cellphone coverage] And certainly that is necessitated by the public's demand that when they call and they have a question, they expect to be transferred immediately to someone. Nobody wants to wait anymore. This idea of where they're going to call you back, that's not what the public demands any more. They know communication should be instant...
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...Kind of a paradigm change from how it was before of, I'm going to show up at your house. People don't want us showing up at their house anymore. They only want to talk to you on the phone. If you suggest, "Well, I can come to your house and meet you," "Oh, no, don't do that. I just need to have a question." I don't know if that's a change in attitudes in general with society if we can deal on the phone and just resolve it then, I just wanted the information so it's done. I don't know. I haven't given that one that much thought... But it kind of relates back to the equipment that's in the car and why we have all that equipment in the car now... The boosters are the big one. They get the fringe areas...
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...We're fortunate that we've got the [military training site]. So they bring in helicopters, crews from all over the country, the world. I know we've had Israeli troops in here and they do the training. We benefit from that in our mountainous area with some of our search and rescue stuff. Back in the day, if you will, things were much looser and we could just call up the station and the commander would drive up there and say, "We've got

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								a lost party in this area. Can you guys launch a bird and go look for them?" or "We need some support." ...
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: helicopters from military training site] So there is a more formal process, the chain of command to make a request for a resource. And then they approve it, or don't approve it, and then it comes down to logo base to say, "Yes, you can use the resource," whether it was a budgetary standpoint. Fortunately, we didn't have a bad situation that necessitated this. No one got hurt and was told, "You weren't even approved to be up flying." So that's a good thing. But I think they wanted to tighten things up and know when the resources were being used and why they were being used...
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: decrease radio time by using computer] "And then when you get on query, you say--" and let them know you already did it on the computer. So it's MDT traffic stop. Then everyone who doesn't have a computer knows you built a traffic stop somewhere. So that was a process of working through. I'll say it was a little letting go of control from the dispatchers. They disagreed with a lot of this. I think, as a field user, we said, "We don't care. This isn't your decision. We love you guys. We appreciate what you do. The person most responsible for my safety is me. And so if I need to build it on the computer, don't try and give me a policy that says you shall not. It's not going to work. Highly discourage. Make it as strong a language as you want. It's going to happen."
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	So then, in response, a lot of agencies have gotten to encrypting their radio talk groups. And then the press is like, "Well, wait a minute. What are you hiding? Why can't we hear what's going on?" Kind of a whole nother discussion on privacy and just the way our system works. So we have been able to change our protocols on how vague can you be. You're on foot patrol and give the town. And if I want to know, I can go look on the computer and see exactly what business complex you're at. But we expect people are listening. A lot of our guys have the scanner app on their phone because they like when they go on vacation to listen sometimes. I don't know why.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	And so we know how ubiquitous that is, and everyone's out there doing it. So rather than trying to hide all our radio traffic, let's take the steps to safeguard ourselves or our procedures to still get our job done but not let anyone think we're trying to trick them, or hide anything, or be the big, bad government that a lot of people suspect we are.
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...I mean, if you sit there and listen to radio on probably anywhere, and you hear the calls that gets dispatched out, you would probably sit there and go, "Okay." If you wrote down every call type, and realized, "Well, what is it the police officer's been given all these calls has to know?" Pretty much everything. And I understand when the citizens call in and they don't know where else to go. Maybe we don't have enough 211 services, 611 services, but I listen to some of these calls going, "How are we supposed to know that?" But we're going to answer the phone and they're going to expect something, and we don't want to look like fools.
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	I talk about when I used to deal with runaways, and people were telling me to counsel them and their kid. And I'm going, "I don't have kids. How is this my job? It was never a part of my training to bring all these things in." And so I don't mean it in a negative way when people talk to me about it. I said we need to understand what is being expected, and just because the law enforcement guys are there, and they're getting all these calls, it's a lot. And if you screw up any of them, then you're not doing your job and it's going to come back and impact you. Not that people don't screw up their jobs intentionally or in ways they should have known better. There just seems to be so much more coming in, and then the backlash within the country these days...
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...I tell people I feel very fortunate in the area we work and the level and the qualities of the guys I worked with. The stuff I hear about the bad cops. One or two guys French guys, but for the most part, I'm very comfortable with all the guys we work with...
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	For some reason, having to dial 911 because we've trained everyone to dial 911. It was supposed to be for emergencies only, but we've done a good job of training them. So everyone dials 911 for everything. And I

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								hear stories in big cities of people getting yelled at, "This is not an emergency. You need to dial the administrative line." "Well, can you tell me that number?" Because we've trained everyone, dial 911...
Context_of_Work - Relationships	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	[RE: criminal database] we want to know associates. So that's one of the main reasons that we do this. So if a car runs from us, or if it's involved in a burglary or robbery or something, we want to know the players that are connected to it. So some people view it as Big Brother, that sort of a thing. But it's a means of you-- it's just like CCI, CNN, CIC, where you have to do it for a valid legal reason. You're not just searching for the fun of it.
Context_of_Work - Relationships	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	... So anyone that has a [information sharing software] login, they can now view our photos from our crime scenes, from our booking photos, anything else, surveillance videos from bank robberies, anything like that. We don't have to now try to find an encrypted way of sending it, they can just log in and view it. We're the only agency that stores it like that so nobody else has that capability. But if you go to the desktop versions, you will now also be able to read any agency's reports from any of their systems. So while you don't get the media, you still get the reports, so it's all great sharing.
Context_of_Work - Relationships	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	So I'm part of a CIR team, so it's a Critical Incident Response team. So anywhere in [county], if a shooting happens or an officer-involved incident of any sort, we can respond. So we get called out for that. So we won't just work in our agency, we work in other agencies. So now when we go over there, we kind of have to buddy up with another agency member and say, "Okay, you listen to your radio, I'll listen to mine, and I'll tell you what I hear and you tell me what you hear." That's the only way that we can communicate...
Context_of_Work - Relationships	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	Yeah, so as a [Name] unit-- so we're all assigned our own identification, so I was [ID]. And that's what we refer to ourselves as. So if I call out on a traffic stop or something, it's [ID], and then they respond to me as [ID]... Yeah, so my sector partners would be a [ID] or [ID], and those are the people that I'm with in my sector that I'm trying to back up or just know

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								where they are at all times and make sure that I'm just aware of any situation that they might need help in or something.
Context_of_Work - Relationships	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	...He showed me this app that basically determines our jurisdiction. So if we have a car crash on [Street] and I don't know, let's say or [Street] or something where we kind of are butting up against other jurisdictions, [City] or CPS, or anything else like that, you can pull that app up, and it is a GPS locator with our jurisdiction and directly where you are, and it'll tell you whether or not you're in the boundaries of your own jurisdiction. Because we have to have them respond or take the reports or stuff if it's their jurisdiction. And that's why I kind of reference that with our vehicles. Our vehicles are kind of accurate as to where we're located, but we can't establish jurisdiction based on what our vehicle reports, we have to do it on that phone or with a map or something, a physical map... I like that app quite a bit. Saves a lot of aggravation with other departments.
Context_of_Work - Relationships	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	so our cheat sheets, if they're on our phones, it's because somebody took the time to scan theirs and then email it around. That's how I got mine, as well. Another officer took the binding off and actually sent it through the scanner... But our municipal code, you can search for stuff, which is pretty convenient. Because otherwise, [statutes], the revised statute, state law, we have to go through this gigantic book to find stuff, and it's not always the most convenient thing to-- or time efficient thing to just sit there and peruse... I mean, it's fairly user-friendly for the most part.
Context_of_Work - Relationships	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	I think, in general if there's ever information that's not provided to us prior to arrival, it falls upon the reporting party or their inability to communicate effectively through dispatch. People are in states of panic or whatever, so it's very hard to communicate. And so dispatch has to do the best that they can and provide us with the most succinct and direct response to what they're being provided. So yeah, a lot of the time we show up, and it could be a suspicious incident or something, and it's actually an active domestic. So you get on scene and it's, "Okay, well, I

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								wasn't provided this information," but it's not necessarily their responsibility to tell us everything that we need to accomplish our end goal...
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Just like every other city, it depends on what the needs of the city is. That also includes district. We're downtown. We have foot beat officers. Sergeant [Name] right here is in charge of the foot beats. We have officers that are walking up and down [Street]. People want to see cops walking around. We have officers on bikes, and they're riding around on the bikes. And then we have officers in cars, who are actually going from call to call to call to call. We also have officers that just deal with homelessness, and so they're getting all their resources for all the homelessness, which is not in the job description, but they're actually picking up mattresses for lice, garbage in the street, and putting it into a police pick-up truck because the Department of Public Health is short their staffing, too. So these cops are doing a little bit of everything. They're not going-- they're in uniform, but they're not out making arrests. They're going out, engaging with that homeless person. They're engaging with Department of Public Health trying to get the people to clean up the needles. They're also picking up-- they're kind of like the problem solvers for the captain for each district. And then we have a pickup truck with police lights on it, and they actually put garbage in the police-- because people leave stuff everywhere, and you just don't have time and wait around for people calling 911 going, "There's garbage on the sidewalk. The sidewalk's blocked, and I've called everybody else," so who are they going to call next? Call the police department. So we actually have cops that come out. And every once in a while, even at 2:00 at night we'll get cops to actually fill up the truck, and when the officers get here in the morning, they'll go dump it to the dump. So we do a little bit of everything.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	It's horrible. That's why it's great you have bikes. Get up and down with the bikes real quick. I go and handle calls for service, just like [inaudible] there's times, and I'm sure you guys work for people who they worked in

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								position, they kind of went up the chain, but they forget where they came from. I try really hard not to forget that. Just like these guys, I'm out there humping. If I'm out there humping as a sergeant, I expect them to do the same thing. I'm not going to do anything that I won't do and telling them to do it, so.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Or they used to do it-- because after it's all said and done, we get the complaints of, "So they used a key and they keyed my car during Critical Mass, and I wanted to file a police report." And then I wait with the person at the window going, "You guys aren't doing anything about it. I demand to speak to the supervisor." Here comes the supervisor's boss. I go out there, "Yeah, can I help you, sir? What happened?" "You guys are not doing anything about this. What's going on around here?" Or the person who called 911 and saying that there's a homeless person in my doorway. By the time the officer gets there, then I get some advocate from the Homeless Coalition saying, "That person is not doing anything, officer. Let me get your badge number and everything. Where is your supervisor? I demand to speak to your supervisor." So these are some of the things I have to go out to the scene by. The problem is he is in violation of a doorway. Well, this officer had no reason to wake him up that way. Or the officer had no reason to talk to him that way. He's homeless. There are dope dealers around the corner. You guys aren't doing anything about it.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Yeah. We try to-- you do the ownership. By having it every day you know everybody on the street. "Oh that's [Name]. That's so-and-so." But the biggest thing is you get a hold of the business owners and you check in with the business owners. The footbeat officer, if he does it right, would know everybody on the street. All right? And a good footbeat officer will see someone and says, "I don't recognize him. I'm going to stop and make contact with him." I'm not saying the person did anything wrong. And I'll go, "Hey. I don't know you. What is your name?" "All right, [inaudible]. I don't have to tell you my name." "You don't. But I don't recognize you, and I'm going to keep on standing right by you and

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								standing right by you until I know who you are." "My name's so-and-so." "Okay. Where are you from?" "I'm from the United States." "All right. Okay. Where are you from?" "I'm from [City]." Okay. So these guys over here are from [City] and [City]. Well I know that some guys from [City] and [City] don't get along.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Sometimes the officer-- since we've been sitting here, I've got three phone calls from guys on the street. But then I have two other sergeants here that'll go, "Okay, he's talking right now." So they'll go, "Hey, Sarge, we just arrested this guy, this is a charge. We're going to go to the hospital with him because he has an altered mental status. But he has a warrant for his arrest." "Oh, yeah, no problem," because they need permission to go out there and do that, because now I have two cops going to be at the hospital with a prisoner, who was high on drugs, but he has a warrant for his arrest. For me, to book him at the county jail, those drugs have to be out of his system. So what do I do? I have to sit out there until those drugs come out. That could be up to 24 hours.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Yeah. We also have people, concerned citizens, who have officers' phone numbers. I call them concerned citizens. Other versions of it: snitches or [inaudible] okay, so. Concerned citizens that call officers and say, "Hey, this guy has a gun." Call that officer, a head officer at home, "Hey, are you working right now?" "Yeah. I just got a phone call. There's a guy standing at the corner. He has a gun."
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Yeah. We have husbands and wives working together.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	I mean everything can be just like every other company. You get along with some people and some you just don't. You get different personalities that just clash. That's with bosses sometimes. You may be my boss, but it's like, "If he says one thing to me, I'm out of here today." Right? And then bosses come and go, and you just deal with the next boss and you move on, and that's about it. For me, I try to-- I don't want to be that boss. IBM, Apple, it's what any other-- a police department you figure is a big corporation. And they have the top and things filter down

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								to below.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Oh yeah. Yeah. It's not like you hear those horror stories on TV. I watch those Blue Bloods, and all. It's not like that. That call for help-- it doesn't matter if you don't like the cop or not. They're going to show up.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Right? So what do I do when the ICE agent or the Feds call for backup? They're an officer. What do I do? Do I not respond? Or do I do respond? I have to ask those questions, "What do you need the backup for?" or, "What are you doing?" "Oh, we're doing immigration law." "Oh! Oh-ho-ho-ho-ho-ho-ho [laughter]!" Right? And I got to backup right away? Oh, no, no, no, no, no. Right? He's calling for help. What do I do? Right? So they stop people all the time. Just like anything else. Hey there's a guy over, have a knife then it kinda goes through their dispatcher, it goes through our dispatcher, and I come flying down there, you know, 'cause I'm thinking there's a cop in blue calling for help. Their politics are different from our politics.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	... And I'll go IP slash this, this, and I reconfigure it. I can do it over the phone. But only I can only do that. These cops are-- yeah. And then what they do is the make an image of the computer and say "Okay, everything is working fine, we'll keep this image for July and see what the next issue's going to be." But that's the shots fired, the biggest thing was actually trying to get the civilians on board. Because I had to go to people's houses and say "Hey." Or commercial buildings, "I need to talk to the resident manager." "Hey, we want to put this device on top of your roof. This shot spotter. It's volunteer only. I can't force you to do it." And pretty much everybody came on board on that.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Not necessarily. These cops, I know their voices on the radio so when you talking about how the cops get-- you start to know their voices so that macho guy with the deep voice if I hear him screaming on the radio [laughter], something's not good. Do we have a new female officer working today? No, no [inaudible].
Context_of_Work -	LE	U	Field	46-55	21-30	Male	LE-U-010	Yeah we have a little flavor in here. We make fun of each other because

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder					that's how we get our release. But communications with each other, I mean, we have these inner-communications skills that we go to these classes and academy and stuff. Does it help? I don't think the classes, but being touchy-feely helps.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	No. "Oh, no we believe in timeout. No. We'll give him a timeout. [We'll give him a long nap.?] We do this together." We have a huge generation gap. I got these. We got the new cops from [City]. And worked at Starbucks all their life, and never-- I got an [ebop?] instructor here. I got people who never had their license until a week before the police department, the academy because they never had to because there's Uber.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	I think if the burnout comes from the lack-- from cops making that arrest and then the DA dropping the case, that's where you get a lot of burnout. Anything like, "My captain yelled at me and told me to go out there and zero tolerance on this block because the communities complain about dope dealers and stuff. I go to make the arrest, and then the DA drops it."
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	I work at the discrepancies between dispatchers, dispatch management, and the patrol officers. They are supporting on the field. I try to initiate training on both sides, so they're operating on the same page. I think my best role here in the building is to allow the dispatchers to vent [laughter], and that makes 95% of the problems go away.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	We are in the midst of a three-year \$72 million project to replace our whole radio system, portables, mobiles, desktops, tower infrastructure, transmitters, repeaters, everything. This contract was just signed about 9, 10 months ago, so we're just getting geared up, working on permits and other issues to try to get everything ready for the subcontract. Motorola won the contract. Now, we're working with Motorola and their contractors to make sure it's done on time.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	There is no routine, really. Nothing concrete. Come in, check in, say hello to everyone, try to finish what I didn't finish yesterday. The proverbial

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								emails, meetings, kind of-- I left my gotomeeting.com hat upstairs, and I've got one [laughter].
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	Yeah. And that creates the conflict between the dispatchers and the officers in the field. [talking about the number of runs pending on the board and on the CAD screen in the car – see 06:19]
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	Yeah, it's like the land God forgot. I mean, it is the definite-- and then it has a big immigrant population of Vietnamese, Laotian, and they're not necessarily very demanding of services or whatnot. They try to keep it low profile, and they shelter in place. They leave early and come home late, and they don't-- and then the rest of us-- I mean, so many people are so poor that you can't even go call them impoverished, and it's--
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	Right now, there's very little faith between the lower levels and the upper levels.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	There is very little direct positive communication between the ranks, between the station level individuals and the management.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	For the majority or have been there for a while, I can only speak for Northern Station where you wouldn't-- family would be a strong word but loose-knit maybe cousins kind of thing but family. And not necessarily from-- and distant relatives from district to district, depending on how long you worked there or where you came from or past assignments.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	And you don't have to live in the city anymore, right? Yeah, my dad talks about-- my dad was a cop. My grandfather, all my uncles, everybody cops and firefighters. And my dad talked about that shift from when you were-- because when he was a cop, you had to live inside the city, and he talked about that meant that you went to everybody's christening for their kids, and you went to baptisms and you went to--
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	Well, someone joked at a party recently. My son is 17. He's going to be a senior. "Are you going to be a cop?" And I go, "If things go towards civil service, it will be the fire department." And everyone kind of looked, and again, listen, this is not, this is not the time to be-- I mean, I imagine as things progress, there's going to be a big assault on our pay benefits and

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								to release if not roll them back somehow to freeze them until the next horrendous crisis, and then we'll be the flavor of the day again.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	Yeah. Well, if back in the day the general consensus was I don't want cops on my fires. I don't want cops talking to my radio and police. I don't want fireman talking on my radio.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	Yeah, it's like hey, what is that? We don't train it. We don't practice it. Fire lives and dies by it. So once again, when we talk about unified command- fires, we run in, guns blazing. We get it done. Fuck the fire department. Just do it. Jesus Christ, all they're doing is tying up the streets with their trucks and their hoses [laughter]. So I've been trying to develop a thought towards a formalized unified command training.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	People are dug in. I don't know how a handful of civilians can make the case that if they were to allow me to have their channels, it would interfere with the highway patrol officers doing their job, given the fact that the civilians at best work at a little lab playing with transistors, or they manage the people who play with the radios, or they manage the people who make sure that the transmitters and everything work, but they don't know shit about what's going on out in the field. I can have a CHP officer out in front in a life and death situation, and he will be calling his dispatcher to call our dispatcher to call a cop to come help him.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	It's happened to me. You go over the [City] Bridge. I was in an unmarked car, me and my partner, following what, at first thought, was just an auto-booster, but we didn't have enough for the stop. But as I worked, my private cell phone calling the car rental agency to find out who had rented the car, and then doing some follow-up computer work to realize this guy was a very bad guy that I knew of, who always had a gun with him. And so once we got over the [City] Bridge, got towards the [Name] tunnel. We started to lose comm, so I'm talking to dispatch on my phone. And I'm trying to get them to talk to [State]HP, to get [State]HP to come out because I'm in an old hooty car, and so it turns into a chase, goes up highway 24 to highway 680, and then all of a sudden, there is 16 outside agency, police cars chasing me. And I have the phone on

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								speaker on the dash, and my partner was driving. And I'm talking to the dispatcher, and I'm telling her, "Okay. Listen. I don't know what you told them, but you got this all fucked up."
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	I don't know where I go right now. There's 16 cars surrounding us with their long guns pointing at us. So before I get out of the car, I want you to make sure you get on the horn with CHP dispatch.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	--because they don't know-- they didn't grow up here. I would bet you that if you put that on the terminal-- and there's no reason why it's not. The map, they have map rigs upstairs. The dispatchers are looking at where the call is, the streets, everything. Oh, my God. When I asked why I can't see that same thing on the MDT in the car, it was like, "Well, you don't need that." Once again, you have civilians telling me, telling officers what they need.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	And then people who normally get stuck in the little user groups or focus groups or picking are people that can be spared from their day-to-day patrol duties. And they get sent down, and they are just so happy to be out from under the thumb of someone else. They sit there, and they have no presence to make a case one way or the other. They're just happy to be-- like the 10 people who were chosen to carry these test radios way back.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	Yeah. What do you do if all of the sudden, dispatch goes off the air? You're going to drive to dispatch to see if anyone is home. Right now, that's what your average cop would say. They drive over here and see what's going on.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	The who, what, why, the whole bit. And a good dispatcher will get you all of that before you come-- 97 come, present yourself at that location. You're going to have a mental picture of what you're facing.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	But you can, on your phone, pull up, but once again, it's not an easy-- so what a lot of people do, they call the station. They pull it up on the desktop, take a picture of it, send it to me.
Context_of_Work -	LE	U	Field	46-55	21-30	Male	LE-U-011	My Google Calendar, my Google Docs, everything is just as soon as-- I

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder					have a shared email with a couple of people I work with downtown. They put something on Google Docs or Google Sheets, ding. Please look at this. Oh, no, that's just crazy.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	But we're trying to master this quagmire because a group of families came to us, came to the chief, a year and a half ago, and said, "How can we flag our homes so that the officers know?" Whether it's a deaf person, they're not going to hear the door. A blind person, how do we-- that's where technology is not being touched.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	...A good dispatcher will see some of these things if they run the address separate. But if I'm running up the stairs and someone dialed 911 and put the phone down, and it's check on their well being, and then they won't answer the door, and then I have to force the door, which creates anxiety for the autistic person or whatever, if I know right off the bat that I'm dealing with someone with a diminished sense of communication skills [laughter] or a different set of skills, I'm going to approach it differently.
Context_of_Work - Relationships	LE	U	Field Responder	56-65	31-40	Male	LE-U-012	... One guy's driving; one guy's looking at the information prior to going to the scene itself. The only times that you would use, I would say, your phone is if you're doing the investigations, usually after the fact. The primary is when you arrive at the scene, depending on what you're responding to, you have to render the situation. Is it safe? So last thing you're going to be doing is taking out a cell phone. Talk to the victim. Talk to the reportee. What's happening. What you have here: the who, what, when, where, why. The standard procedure stuff that you have to go through.
Context_of_Work - Relationships	LE	U	Field Responder	56-65	31-40	Male	LE-U-012	... Dispatch does a really good job of when they send the information out to the persons, for the addresses, anyway, for the officers. So they look out for the cops too. They're pretty much our eyes and ears because they get the information. They see it on the screen before they dispatch it out to the guys, so.
Context_of_Work -	LE	U	Field	56-65	31-40	Male	LE-U-012	Yeah. "Give me your description. Someone's calling." They get the call.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder					They get all that information. Yeah, so it's a really good teamwork. You have to have that.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-013	We're multi-faceted. We're teachers, doctors, nurses, medics, moms, dads, coaches, counselors is a big one, mental health specialists, which is what we get a lot of in [City]. We're jack of all trades. We do everything. Report takers, problem solvers, crime fighters. I mean, we do everything in [City]. It's a different city.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-013	So with our department, we have our line up in the morning. It's like roll call, I guess in other departments. They give us information. If we're looking for someone or if there's someone that's wanted, they'll show us a BOLO or a be on the look out for. Information that's passed down through the captain or command staff, if someone is ill or if there's a birthday in our station, we kind of relay information. So we have that in the morning, and then we have what's called secondary line up, which means a few of us will go grab coffee somewhere else and just catch up on the week, especially if it's our Monday.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-013	So a lot of cops that work that station are-- it's just basically work and home, because we work so much. There is camaraderie. There are officers still hang out with each other. But me, I've been in so long, I just want to go home. Not just me. I mean, I see groups of guys who still drink and hang out after work and stuff. But me, after work, I workout and I go home.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-013	..." I had a business meeting with the department. I sold it to the old chief, but with any government agency, there's a lot of red tape. So they got aced. They got canceled. My programmers and me don't talk anymore because there was a guaranteed amount of money from the department. I never got it, and basically got a "No, thank you. We're not interested," from our technology department. So it's kind of a touchy subject for me.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-013	You're talking to the person, and they're on their phone doing your receipt. They're using your credit card to purchase the item right on their

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								phone. And they're telling you, "Oh, man, this is a really good cell phone case cover. It does this. It will help with that, water-resistant." So they're building an interaction, and I saw this trend three years ago with us and the community.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-013	And now, our department is-- they want us to be more like this with the community, interactive with the community. And I was using technology to kind of build that bridge of helping us become more friendly with the community.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-013	It doesn't work anymore, but I have a whole presentation. I did it for Command Stop. Everyone loved it. And I wanted to make our job easier, so we're not in the field taking extra time looking up information. And I also was using the Apple experience, where they're talking to you [crosstalk]. They're using their phones to engage with the public. Community interactive technology, but I dissolved the company. I'm not pushing tech anymore. But just drones and just simple information. You have people in law enforcement. They want to build a legacy, and they're utilizing technology in the wrong way. They're making it harder for us because it looks good for them.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-013	Do it. Do ride-alongs. I hate when people go-- they tell us how to do our job, and they've never done one day. The morning routine is a perfect example. Have you done ride-alongs with an officer?
Context_of_Work - Relationships	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	Well, I think consistency is probably one of the most important out of those because if you know what you got going in, you're not going to be surprised by an answer. But if you're meeting somebody and then-- not even somebody in particular, but if you meet a particular unit-- it's like going to the DMV. You go to the DMV. You get somebody who is nice at the window. You get some news. like they've already checked out as soon as they checked in.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	So in my current position, my current position is I'm on the captain's staff, so I deal with most of the events in the South Market areas, all the large events. So I'm dealing with different community groups, different

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								promoters, and these different protest groups. So on a daily is communicating with them trying to figure out what their agenda is for an event, getting parameters on that event, figuring out what the police response will be at those events, our concern for the public safety, for the event itself, coordinating with every other agency in the city as far as for Department of Health, and the parking and traffic, for our DPW, public works, to coordinate the other perimeter or infrastructure for these events and coordinating with the promoters. On top of that, my patrol responsibilities, as far as supervising the officers in my office, and then once it would fall under me on the street, so depending on what calls for service they're responding to. So it's got many hats, but my primary role is on the staff right now with the captain staff, which is dealing with all these communities and all these different events, so manage those, coordinate those, and facilitate those.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	The other events, depending on the size of the events, we coordinate with the city because they do a lot of street closures...So that's where we deal closely with all these other agencies and event promoters. And the event promoters, this is not usually their first rodeo, so it's a pretty good relationship and interaction between them. And then every year, you find out what went well and what didn't, and you try to tweak it and improve upon it for the next year.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	Yeah, so that's a different animal. So that's contained in the AT&T. I mean, we've got the Giant's games that go on over there. We have the larger concerts that will come there, but they're contained. So we have a system in place within that venue, as far as how to respond, what the coordination is. And we have a pretty good relationship with the Giants as far as addressing security concerns, and then security plans for that, and that footprint
Context_of_Work - Relationships	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	And then the other enforcement, we have different units that work in different areas where we have a different concentration of crime or different calls for service density. So we have foot beat officers that we put in those areas, and they're part of the district, and they'll be up there.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								And each district in downtown, I would say, has foot beats. When you get out towards the outlying districts, you don't have the same kind of calls for service. But the concentration downtown in the [County]. Southern, we do have foot beats that are assigned to the higher concentration call for service areas. It's more quality of life stuff and more face-to-face kind of contacts that are needed.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	.... So it's a big part of-- we coordinate communication with the event planners, the stage managers, often by their radios that they have there because we're not giving them ours. Because that just doesn't happen. So we try to have either a liaison from us with their staff, into a command post type situation, and then have that information pushed out
Context_of_Work - Relationships	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	The social concerns with the street population that we have whether it's homeless, whether it's mentally ill, whether it's lifestyle by choice, or alcohol and drug-dependent individuals, I mean, they all kind of get lumped into this homeless umbrella. But that's something that the PD is consistently working with the mayor's office and all these different agencies to address. But often, the community is concerned that this voice to us is that issue up front. So how we respond to them not to pacify them, but to at least include them in the conversation or let them know that they're not being ignored or not heard in their observations or complaints. So that's something that's universal all across the district. And it's interesting. And people throughout the district have their own perceptions of why things happen and what should be done, so trying and to find that happy medium to explain to them-- I often use the analogy of you're kind of looking at the duck. It looks like it's nice and relaxed, but underneath, it's going crazy. So the underneath going crazy is all the other city agencies that are involved.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	The fact that we utilize our plain-clothes units and other agencies within the department to respond to these different crimes in these different areas, the fact that we have our own officers that are assigned specifically to address the homeless issues and the encampments and

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								that kind of thing on a regular daily basis and work closely with the mayor's office and the homeless outreach teams from different city agencies and DPW giving that information to the public is huge because I think some have no idea how all that is happening.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	...So if we're looking for them, we'll try to raise them on the radio, but unless we know they're assigned to something, then we won't find them. The sheriff's department, if we have a large event, will assign their units to us. They'll be on our own channels. They'll have their own call signs. We communicate with them. If we have a large demo or something like that, where all of a sudden we are going to have a lot of arrests, we'll call the jail and coordinate with them that way.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	...So we communicate closely with our DEM folks, their emergency medical guys. Because we can kind of see what their plan is, where they're going to be situated but also try to work out a better plan for our communication between them and us and whatever else is going on at the event. So we do that.
Context_of_Work - Relationships	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	... We have a venue in the district, the [Location], which has a lot of huge events. We have a great working relationship with them. So they have Oracle. They have Salesforce that would come to those. So then, coordinating with those people and their security personnel, and then trying to work out the plan with them is better, I think, than some of the smaller event planners, not so much in the smaller events but the event planners because those larger companies bring so much more to bear with their technology. The personnel that they hire are pretty specific into their field of security and safety for their company and for their venue, so it's a little different dynamic. So we work with them and whatever they provide us, and then our different units. So if there's particular concerns at a venue, we'll coordinate with our special investigations units to query if there's any threats or concerns for a particular venue. Or if we hear something, we push it up to them and they do their own research and dig out a little bit more to figure out if there's something else.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	Like today, I thought I'd have a little bit slower of a day, pretty much right off the bat, we had a call that had me do a report. So right off the bat, I go to the call and I have to go type a report that puts me down for about 25 minutes. And it's after the interaction that we've had with the individual. So normally in the morning, especially since I am on days and that's our slow time in the day, that's when I go up and down the blocks and did somebody's car get hit overnight, is somebody passed out on the front lawn, that's my chance to look for stuff like that. And starting out early like today, it doesn't really give me the chance to go talk to the guy in the corner that's cleaning up his yard or something like that.
Context_of_Work - Relationships	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	If I do start to talk to somebody, I'll try to get out because I think it gets a better response, a little more personable to talk to somebody instead of yelling at them from the street inside of a car.
Context_of_Work - Relationships	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	I'll just snack every so often or usually, I'll go to the firehouse if I need to use the washroom. There's a handful of other businesses that I would go to in the district. But other than that, I'm usually on the move just pretty much waiting for calls. Or there's a handful of spots I do prefer to run traffic at. And if I have that beat or that sector that day, then I'll use those spots that I like to sit at.
Context_of_Work - Relationships	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: comms with other LE jurisdictions] ...My old department, I had my own radio and then I had three more radios in the car. So it was something-- [city] was on one, our fire department was on the other. And the other one was whatever we chose we wanted to listen into that night. So it was always an option for us to listen to [city] to know what was coming our way if it was going to come our way. But I think it's interesting that we don't really work with state even though state functions here.
Context_of_Work - Relationships	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: 10 codes and plain language] I think it's a little bit of the radio like how we talked about radio discipline. I think it's a little bit of the problem. But it's not encouraged here. It's keep it short and sweet. Now I've noticed that I've gotten that way a little bit, too. Now that I'm working here, I will get on the soap box and maybe hold the air for too long where

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								it would have been totally inappropriate at the last department, and there's a 10 code for inappropriate use of radio. So if somebody was on the radio too long, somebody would come over and say 10-39, like you shouldn't have done that. So you got called out on it.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	We're all very busy. We're all very busy. I'm close to the people that are in my office, that I'm with. One of them used to be my-- well, he was, on occasion, my PPO when I was in FTO, so I knew him when he was brand new. Yeah. So there's that relationship... So at the desk, a lot of the officers know that I used to be a FTO or I was their FTO, so they come in there and ask me questions. So they come in my office quite frequently. I have a very good relationship with my lieutenants, so we talk very openly. Any questions they don't know the answer, they'll look it up.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	I know a lot of people in the community. I'm just a text message away from some of them... I was a patrolman and, yeah, that's how I met them. Some people would meet me in the back of an alley to give me keys to an apartment building so I could catch drug dealers. Some people will email me and tell me what's going on. They still call and text.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	Well, I can go in a squad car and leave and go outside if I needed to. Like yesterday, I was outside for a little bit. I work overtime a few times a month. So I just go outside, and they'll see me. The bad guys will see me. Some of the bad guys I have known for a while. So they'll address me as [alias]. The bad guys will even say things like, "Oh, you're outside today." They're like, "Nobody cares about us anymore. Nobody tells us to get off the corner." And they'll snitch on their rival gang members, and I appreciate it.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	[RE: communication with FF and EMS] They're shot, how are they shot, that's pretty much the extent of-- and then they're leaving, and then I'm leaving.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	Sometimes we have problems with dispatchers, and they're the ones who are relaying the information. For instance, somebody is chasing somebody outside and we can see it on the cameras. The dispatcher

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								doesn't always acknowledge the people in the room. She'll purposefully not listen to them. Or if ShotSpotter goes off and, "Hey, there's nine rounds here. Now there's seven rounds," you can clearly see people are shooting at each other with the way that it's going off, she'll purposely not answer. Just disregard, "I have other things to do. You need to wait." ... Almost like she is part of the technology. She's part of the communication with the technology.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-023	Yeah, I've been blessed because my partner's a great guy-- or my partner was. I don't have a partner anymore. I'm a sergeant now. But I had an awesome partner, and we didn't want to be off [laughter]. It was great.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-023	That is the number one tool. We cannot forget that. That's kind of what the most difficult part about this whole thing is. We're all human beings. I'm a human being. My victim's a human being. The offender's a human being. We're all human beings. That kind of gets lost in the day-to-day grind. When you start just going by the numbers, and start looking at stats, and this and that, it gets lost. And my partner and I never lost that, and we were able to come up with phenomenal results based on building trust relationships within the community. We were literally solving crimes at home on the phone. People would call us and tell us. The police can't be everywhere at all times, but the community is everywhere at all times. Can't forget that. And if they're willing participants, if they trust you-- and that comes with work. See, trust doesn't come from a community-police event. It's just an event. When the event's over, the trust is over or that engagement is over. It comes with building relationships over extended periods of time.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-023	Knowing your community, caring. Caring is so huge. Caring is everything [laughter].
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-023	I'm one of them. I'm Indian. I'm from India, and when I got on 10 years ago, I was one of the only Indian officers, one of the first few that got onto the department. So I was always a conduit between the police department and the Indian community just by default, even without trying. Many times because I was translating, many times because they

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								felt more comfortable speaking with me, especially coming from where they come from and their background being-- sometimes the police can't be trusted where they come from. So to overcome that stigma-- how did I deal with all this? My partner is Puerto Rican. He spoke Spanish. I spoke Hindi, and Urdu, and Spanish [inaudible] now [laughter], after all these years being with him. So we had it covered. Wherever we went, we pretty much had it covered [laughter].
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-023	Before my department phone, I was not giving my phone number out as much as I wanted to or needed to because I was like, "This guy looks kind of shady. I really don't want to give him my number, but he may be a good source of information, but I don't want him having my cell phone number." But my department phone, that eliminates that. So your ability to reach out to people and be more available to members of the community and to people that may reach out to you is enhanced when you have a department phone, for sure.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	... Go to work.. I'll see who's there, everybody says hey to each other and-- our work on the 10th District is pretty nice. Everybody in 10th gets along very well.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	Yeah, I think so. Because even with your personal phone, and I'm not going to lie, every police officer uses their personal phones. But a lot of the times it's where you going to park and access this information. I would say that the station is more controlled and you're safe there, whereas being out on the streets-- you see, everybody sees the squad car. Okay. You can't see everybody looking at you. I think that's a big thing in every police officers mind is, "Who's looking at me?" Well, they're not, they're just, "Oh, this guy's on his phone all day." That's the prime example. You're here looking at them and they're all on their phone or they don't do nothing. Is that good for community relations, always looking down?
Context_of_Work - Relationships	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	... The dispatchers, I think they do a very good job of getting us the information that we need, and they kind of know what kind of situation we're going into. And I think they pay a little bit more attention to the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								more important jobs. And I don't want to say important but more high-risk jobs. So, they're always-- our dispatchers, I think, are very good.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	Okay, the little red dot. We call it the red eye. So when you see a red eye in my car, I am not going to come. But for me, depending on what kind of call it is also, if it's a domestic or something, or something that was violent in nature and there's maybe a chance of the offender coming back, I'll always stay on scene and complete the report. And I usually let the victim know, "I'm going to be in front writing my report. If you need me or anything, just call or come out, run out and get me or something." So that was the focus of putting that report on there, instead of the officers be in the streets more than coming in at the time, unless the OIC tell them to go at the station. By the time you drive to the station, that's 5, 10 minutes. You're going to be, "Hey, what's going on [Name]?" And I think that's the goal of headquarters, is that they try to keep you on the street more than having you come into the station. And I think police presence out there accounts for some type of deterrence in crime.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	Oh, yeah. Everybody there is friendly. Everybody gets along. You hear that from a lot of police officers that the 10th is very friendly. And so I think any time there's openings in 10th, you get guys with a lot of seniority coming. I don't know if it's just getting closer to their home because a lot of them live by here. I mean, I'm sorry, Midway, or is it the guys and the bosses
Context_of_Work - Relationships	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	Well, it's generally poor, very poor. I would classify it as poor. I could say I try to focus more on the north side of the district. A lot of broken families. A lot of fathers that aren't there. Multiple children. Aunts, uncles all living together in one residence a lot. And when you see kids that are never given a bed to sleep on, a food to eat and stuff. So it gets depressing, I would say. A lot of the time we focus on always the bad guys, bad guys, bad guys, but I think cops here, they say, "Oh, this neighborhood's shitty. I hate working here." But it's not all shitty. I think a lot of coppers lose that perspective where, yeah, you're dealing with the 3% of the population that are bad. That little kid walking on the street

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								nobody ever-- do you wave to him? Do you say hi to him? Most of the time they're going to wave back. I think they look up to the police. Even if they get a little wave from them, that makes their day. So I think that's kind of lost nowadays. The cops has become jaded for the communities that they serve.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	I think they get along real well with us. You'll always see the same ambulances almost all the time unless they're really down on something, then you get another ambulance from a different house that's kind of far away
Context_of_Work - Relationships	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	...On the southern end of our county we have kind of high desert and on the very northern end north of [town] it's a mountainous national forest recreation area. I think we have a fairly large Hispanic population in the community. I've heard upwards of 30% which is different than probably the rest of the state but all in all I think from a law enforcement standpoint I think we have a lot of support in our community for law enforcement and first responders. I think we have a very good relationships with our citizen reign. I think people I think we've established ourselves as a competent law enforcement agency that provides very good service to our citizens.
Context_of_Work - Relationships	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	I think it's hard to tell. I mean [State] is a fairly different state than others you know. I think generally in [State] I think the citizens support law enforcement. I think compared to you know I think you see across on the national news in certain states or certain parts of the country there's a lot of maybe where agencies they feel less of a support from their community so I think this area is not only unique you know it's probably not unique to [State] but it's unique to other parts of the country.
Context_of_Work - Relationships	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	I think you know we have a pretty tight knit group. We have a lot of employees that have worked here for a long time and then we have a lot of employees that are fairly new. We do see some turnover just because this area is very expensive to live so I think often times we have people that move here and they think oh it's great. What a beautiful area. The ski resort and once they move here they go oh it's hard to buy a house

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								here because I think meeting the home prices are far above any other place in the state so that's a challenge...
Context_of_Work - Relationships	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	...I think generally we have a good culture of you know we have I think most if not all of our employees you know work very hard day in and day out. Some of them have really tough jobs and it's all in all I think it's a very positive environment. I think people can come to work and feel free to express new ideas and embrace changes and so that part is definitely one of our strong suits.
Context_of_Work - Relationships	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	[RE: radio interoperability] ...And it's something that always seems to be somewhat of a struggle I think primarily for the fire departments because they're kind of the ones that do not get it on the grant and now I think they find themselves in a place where they're saying well how come we don't have any inoperability and I think on the law enforcement side sometimes it's like well you guys had your chance. You guys can come on board it is a good system. It works well for us but I think they have had or have some concerns on how it would work for them not having a full understanding of what their issues are with the functionality of that type of system for them. I probably couldn't speak to that...
Context_of_Work - Relationships	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	I think all in all the communication is a good system for us here. We do have some geographical challenges. We have parts of our county where we have no radio coverage at all and it's been that way for many, many years. We have started trying to work towards installing a repeater in the north end of the county. We're actually just in the process of that right now. We've met with the forest service, we've met with the radio tower owner and I think our goal is in the spring once the snow melts and we can get up there is to have it all installed and up and running by early summer.
Context_of_Work - Relationships	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	I was going to say after listening to [Name] talk about all the systems earlier it made me think like you know our computers and our technology work 99.99% of the time and that's a testament to [Name] and his team because there's from my perspective and probably most of

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								our employees here when they turn on their computer they expect it to work and like I said it normally the vast majority of the time does and our systems work and it's probably something I mean I'm sure our employees have no idea what you guys do to make things keep working and so that's a testament to [Name] and his team.
Context_of_Work - Relationships	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	Certainly and in this valley originally there was a 19-2 modem system with a repeater just right up here on this mountaintop for county because we have such a wide or big geographic area. The cities we use 4.9 broadband modems and so we have several different technologies that we utilize in the vehicles to communicate back to the Sheriff's department and so now that they're all on 700's and cell based communications for the in mobiles I think it's a lot more reliable, the coverage is vastly better, the ability to interact not just with local agencies but across the state and federally has come a long ways to BHS, DHS the different organizations that have come in and helped make these more robust and so just the radio systems alone have vastly improved.
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-052	It has its moments. For the most part everybody here works well together. But again, just like any family, there will be--there will still be gripes. But what's unique is we don't see our dispatchers. We don't see them on a daily basis. This location is secured, because the layout, as you saw, you have to have our eyes scanned to get into this building and only certain people are allowed in. If you are not a shift lieutenant, you're not allowed inside this facility unless you're called here or given permission as far as this communication section. But we never, we never see our dispatchers. Your north deputies may never see their central deputies because it's just that long of a [County]. On a busy day, unless there's transporting a prisoner, because what happens if a south deputy makes an arrest, they bring them to the south substation. They're booked in, they're processed there. But if their bond is too high and they can't bond out, or it's a major crime, they have to be brought to [City], where they bring a prisoner to central unit. Central unit picks that person

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								up and brings them to the north unit. So it, that is normally the only time we interchange--our deputies interchange change out with... to see another deputy. They hear them on the radio, but they will never--on a day to day business their chance of them just going to hang out or see or talk to somebody up north there, it doesn't happen. Because of the way the [County] is split apart.
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-052	That's the uniqueness of our position at the sheriff's office. We do a wide variety of calls where most sheriffs' offices won't even answer those calls. Even our sister [County] is right next door us, like we still unlock vehicles. Any--we respond to any case or any call that comes into the radio room. If someone, like this morning for instance, a woman was mad because her grandmother posted a picture of her child on her Facebook account. So agencies, this to them would have been like, this is--we're not going out--we're not coming out for that. But here in the sheriff's office we respond to all--because at that moment, that is their emergency. So if that's what your emergency is at that moment, and there's--we have nothing else pending, there's not another emergency going on, we'll take the time of our life to answer that call and say, look, there's really nothing we can do about it, even though, but you educate them. You're also at the same time, you're answering their emergency. But the calls are unique for the deputies on the streets because we handle animal complaints also. We go onto domestics. We--your major call, it's homicides, suicides, so the deputy's from your day to day bin us, yeah, they all see our radio of complaints coming in.
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-052	The only challenge we have is, you have different thought processes, visions, the way things should be carried out. You have different leaders, policies, their policy, maybe like for instance in here in the City of [city name], just for instance, they don't do lock jobs. Their chief said, no, that's not our responsibility, we're not doing those. Where our sheriff is, we would do whatever it takes to serve the public. If they need their car unlocked, we'll go and unlock it for them. So we will actually come into their jurisdiction to do lock jobs for them, or for assistance. But that's

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								more like--your major thing is just do them. Operating business of one agency to the other. Because for instance, [City] Police Department, they have a Chief of Police, however, we dispatch for their agency. At nighttime, their Chief of Police is at home asleep, he has no chain of command other than the two deputy or two officers that are working that small area, so if they get in a high speed pursuit, our policy is our shift lieutenant controls all of this, but they don't work for our agency, so it's hard to control. Now we can give them our advice and normally they'll listen because most of them, we're close, we work close with them, we know them, so they'll stay--shift lieutenant say call it off, let's call it off. But I think we have a well working relationship with all of our agencies here. I don't think there is any type of internal beef.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-053	Alright. Well our department, our fire department is set up to where every first Wednesday of the month we have a board meeting which everybody's always invited to attend. And then the second Wednesday is a departmental meeting where we actually cook a supper and the whole department meets as an organization and then every Thursday of the month, throughout the year, every Thursday is a training day where some days we'll do classroom activities. If the weather's nice we'll go out. We do have a real fine training facility here. We have a three story burn building, a seven story tower. We have a lot of things that we can do there, a big vehicle extrication pad, so depending on what's going on weather wise we'll determine what we do for training.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-053	I think it's, I mean they always say that first responders kind of like a paramilitary type organization whether it's the fire department, ambulance service or the police department you kind of have that bond and I guess you kind of understand what the next person goes through. Like a lot of times, a lot of times you go to a real horrific scene and you see the officers on the side and they're laughing and joking and it's really not good for the public to see that, but what they don't understand is that's the way that we deal with them problems. We laugh and joke about it because when you see that every day, it's not that you become

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								kind of demoralized by it but it's a way to relieve the stress. Because I mean look, just recently we had an incident where a guy shot his neighbor, and then he set her on fire in the front yard and I was on my way home, responded over there, we actually had to stomp the lady out. I mean she ended up dying, but I mean how do you try to deal with that? How do you--if you don't, if you don't somehow just get it off of your mind, and talk about it amongst your peers, people that understand, you've got to live with that. So once again I think it's a real, it's a tight bond, it's a tight bond among first responders and they kind of really, everybody has an understanding of what each other goes through each and every day.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-053	Absolutely. And especially here, especially here, you see a lot of police officers that are volunteer firemen. They can relate to what's going on. They understand the need to serve the community and kind of work in that type of environment. So yes, the fire department I find, especially the volunteer fire department is more of like a brotherhood than I would say the police department is. We do a lot more family oriented things with the fire department than we do with the police department. We do dinners on a regular basis where you bring in your family. We do a banquet once a year where we come in and you bring your family. We do a family day where we set out big tents and do like crawfish boil or, so we do more things geared toward family with the fire department than we do with the police department. And it really, it creates a tight knit group of more like a family, brother oriented atmosphere.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-053	Well I think it's a combination of both. I mean some areas the officers get out there and they do foot patrol, they walk through the shopping centers. Law enforcement in general, the police officers get caught up in that bubble where they're driving around in their police car, and I think as supervisors it's important for us to get them focused on being able to get out of them cars. To get out of them cars and be part of the community. Remembering that we are part of the community, we're not this isolated group that just here when bad things happen. We need to

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								be there in good times as well as bad. We need to be part of that community and focus, I mean even though, even though when things go bad, they look at the police and they look at the fire department to take care of the issues. But on the front side of that we need to be part of the community when things are going right. You know.
Context_of_Work - Relationships	LE	R	Field Responder	Over 65	11-20	Male	LE-R-054	They're good. Of course, you've got your different personalities, I sometimes refer to it as an adult day care, but--and again, policemen, when they get bored, they tend to get bored, so--
Context_of_Work - Relationships	LE	R	Field Responder	Over 65	11-20	Male	LE-R-054	It's good. We don't really have that much interface with our dispatchers. They're encouraged--the officers are encouraged to come by and kind of see what Dispatch does, and again, I think they've encouraged the dispatchers to ride with some of the officers, but we find that in the past, that if they hang out too much up here, that it kind of disrupts what they're doing a little bit, plus again, policemen getting a little bored, it kind of disrupts a little bit of what they should be doing, too.
Context_of_Work - Relationships	LE	R	Field Responder	Over 65	11-20	Male	LE-R-054	The technology is okay. We can talk to them when we need to. Sometimes, the--of course, you've got the different acronyms and lingo that goes with each of the different functions, and I think you've got the egos that go between the two functions, but for the most part, we work well together when it's time. Sometimes, it's like a dysfunctional family, that they have their mission, we have ours, and the understanding of the two sometimes don't really mesh real well.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-055	You know being on the campus setting, you're covering about 2 square miles and 250-some-odd buildings so we're not--we're big but we're not big enough that we have zones or districts of everybody kind of has the same--everybody patrols campus and we have a few areas that people like to target. We have a Kindergarten through 12th grade school here so we have officers who like to go walk through and do those sorts of things. We have guys that really--and we have officers that really love to get out and interact with the public so you'll see them in the quads so yeah. You're not always assigned to the same area but you did tend to have tendencies in what people liked to do.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-055	We actually did a drill 5 years ago maybe in our library involving mass casualty, active shooter, and we had [City]PD, [City] Police, [City] Sheriff's Office assisting, State Police, they all participated. We dispatched them. We brought them in in as much real time as we could and I think we found a few bugs in the interoperability at that point. And I think they've been addressed since then. But I don't know that we've actually done a live test on it since then so.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-055	Yeah, we're--you know we're probably in the neighborhood of a 70-officer department. So we're big but small. Everybody knows everybody. I think you have, I don't want to use the word cliques, but you have groups that like to hang out together outside of work and you kind of see that during work. They pal around and they're working with each other. I think each shift, each patrol shift kind of has their own...familyhood about it.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-055	And, yeah. Yeah, it's small enough that everybody knows everybody and friendships develop and you know I mean the chief knows every officer's name from the 2 new people who are still in training to the guy that's been here 30 years.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-055	Yeah. They... I think they each realize the importance that each has on the other. And you know... I'll be the first to say it. I think probably our communications officers are underappreciated and undervalued for what they actually do. But we have a good group now who... they understand their role and they want to be that lifeline and so they take it personal and they give it 100%.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-055	So obviously we're university police so we're serving [University] which is I think our student population is just over 30,000 right now. And then you figure, I don't know, 5,000 to 10,000 in faculty and staff every day, you're looking at a small city here on campus. Staff... is not that big of a turnover I guess but when you look at the student piece, every 4 years, you know you've rotate a completely new set of people in theoretically. And so you know we see it in some of the safety campaigns that we've done. You'll see an improvement and then a rotation comes through and you've got to start back over because the group that you educated that

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								understood it has now moved on.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-055	Ah...no, and I think we're unique in our environment because we do it so often with all of our large events. You know we have 7 home football games. We used to have a 3-day country music concert. The sheriff's office actually worked some of our events with us. So we're kind of used to that, that side of it. And we always laugh, you know when we have an incident we just go into football mode but it's--the relationships formed through working those events and all, you know it really tends to lead to a, I won't say seamless, but an easier transition into, you know, a multi-agency response.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-055	I think we're lucky here in that we have a great relationship with the [City] Police Department and the [State] State Police who operate a fusion center. And so we have... when we have events and we have known things, then we can use those to start pulling that information. The piece that we're missing is the day to day... maybe it's not surrounding a large event, what are we missing?
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-056	It is a college campus, it's mostly students. We--our community changes year by year as students leave and students come in. We've got staff and whatnot, we have a pretty good relationship with athletics persons, we do a lot of work with athletics. Some of the staff, maybe labs, whatnot, we've made RC [phonetic], just because they don't come out, and they don't--they've never had a reason to call us, so we don't--that interaction between us is less. We also have a pretty good relationship with the different halls, the residential community, the residential life and the people who manage the dorms, and manage the people who live in the dorms, work in the dorms.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-056	Certainly, some officers, we're small enough that everybody kind of knows each other, we certainly have events and whatnot. The schedule we work now, I find doesn't lend itself to hanging out with us, or may have spent time away from work, or even at work with the same group of people, because it'll be three different teams on one shift, and they'll all rotate their days off, while ours, the dispatchers work a different

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								<p>schedule, but each team, each shift tends to have a pretty good relationship with each other. There was a time when we all rotated all at the same time, so you knew your same dispatcher every time you came to work, you had the same dispatcher.</p> <p>It was a lot closer with everybody, I think, and some officers want their dispatchers calling to them in a certain way, may have not been great for the uniformity of the department, but most of the shift, because it was the same dispatcher every time, had a good idea of what they wanted, what they needed to ask, things like that, or at least the pace of which they were going to get something.</p>
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-056	<p>...And there are certain times that I could just hear my name over it and know that somebody needed me somewhere, right then and there. That was either an emergency, or it was a more dangerous situation, and they needed somebody, and they just could call, you could tell, because you've been around them so much, wow, he's worked up, ask someone to go back him up, or clearly, something doesn't feel right to this officer, let me head over there and see if they need help, just from hearing their voice and having built that communication with them, that we could get a lot of the nonverbal aspect of that.</p>
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-056	<p>Here, it can be pretty quiet. We have a lot of foot traffic, so you've got to drive a little slow. The--a lot of the buildings can't be accessed by vehicle, and you have to get out on foot and go to them. We encourage--or at least I encourage my guys to do it, and I enjoy it, as just get out and do foot patrols, and go out and communicate with people that way, that way you have a physical--someone is actually out there, a physical presence out there, as opposed to a car just driving by, because once you're in the car and you're going somewhere, you have almost--except for having to stop for people at crosswalks or the other traffic, you really don't have any real interaction with anybody. They're--all the buildings are set off, people inside those buildings, they're not out, walking around.</p>
Context_of_Work -	LE	U	Field	36-45	11-20	Male	LE-U-057	<p>Victims, I always prefer to meet face-to-face with them. We will email</p>

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder					and try to set up appointments to talk to them and have them come in. We'll speak with them on the phone to have them come in. But I always want to meet with the victim, sit down with them, put that human aspect there and let them know who the detective is, who the person investigating it is, let them feel comfortable talking to us. And once they make that connection, I think maybe they feel more comfortable calling us with information. Or they have a concern, then they know there is a face to that voice and I can, that person is there to be my advocate, they can help me through things. So I think that's very important.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-057	Oh, I think it's very similar to anywhere else. A lot of times we are in plain clothes, so maybe people don't realize we're the police officers until we have identified ourselves. But I would imagine it's pretty much the same as everywhere. I mean some places we're received well; some places we're not received as well.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-057	Yeah, I mean I don't deal too much with EMS or fire department. I guess if there's a major scene or some type of investigation, we had a fire a few years ago where we did deal with the fire department. We were on scene just to make sure, we had cameras and crime scene resource where we could assist the fire inspector if he needed us. So we had an incident command set up. But other than that, not too, too much. We do communicate with other law enforcement in the area. We go to monthly briefings with them, and we deal with the fusion center that state police runs, which is a resource to all law enforcement in the state where you can, they can do information sharing and assist with investigations, different databases.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-057	I think we have challenges as being university police officers when we deal with these other agencies. I don't really foresee challenges that, I think there is, sometimes there is a view that university police aren't really dealing with the same thing, what they would say real police, metropolitan, the sheriff's departments are the same. We're actually, I think once they get to know us and they see what we do, we're a full-functioning police department we do exactly the same things they do.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								We deal with the same things. We write the same warrants, same legal paperwork. It's the same reporting system. I think getting past those barriers is about it. But other than that, no.
Context_of_Work - Relationships	LE	U	Field Responder	36-45	11-20	Male	LE-U-057	I think technology slows things down maybe sometimes with just all the redundancy and notifications and emails. And I understand the reasoning for it. But if you're just talking about solving case, get people in jail, let's get it cleaned up, sometimes it may slow things down. But I mean on the back end, there obviously are reasons that it's done, and it is for the public and to make everybody feel a little bit better and to notify them and keep them informed. But as far as solving crime, I think some of these things could slow down investigations a little bit.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	You know, for us being successful in accomplishing our mission and that being, being able to help somebody in need, you know, having proper resolutions to criminal cases where people were victims of, getting that satisfaction for those people, if you will. Satisfying is a good word to utilize to describe the position; it can be very, very satisfying, but then again, the flip side of that is sometimes it can be struggling, and like I say, sometimes very mundane, dealing with some of the personnel issues - it can be very, very difficult because it's like a family and you know as well as I do when you have to discipline somebody in your family, it's never an easy thing. So that is some of the things that I would describe as maybe tedious or, you know, certainly not desirable, those type of things, but you know, as far as day to day you know, it's a lot of paperwork and that is where maybe some of the mundane comes in.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	Oh absolutely. You know, generally, and that is still something that I try to be involved with, you know, being in a smaller department I still, I feel it is necessary that I be in touch with our officers and understand what our officers are doing out there on a daily basis, so there may be a day that once I get that morning type stuff done, then I will jump in a patrol car and actually get back out there and see, but certainly there is a routine; I don't want to call it routine because nothing that we do is routine.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	Everybody carries personal phones but they have been, there are a lot of different issues with utilization of personal phones. Our folks are - we still have more of the sense of being for the community and allowing the department to have access to those phone numbers and utilize their personal phones for business activities. A lot of other agencies are not quite as receptive to that; again, we still have a little more of a working relationship between the officers and the actual department in regards to that.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	Yeah, there is, and certainly that builds that camaraderie, you know, because a lot of times, it's almost like a debrief, if you will, when they go out on a situation and just - a domestic situation, for example. Clearly have to write or document the incident in some fashion so there may be times where they have the opportunity to both come back into the office after dealing with that situation where they can talk about, okay, this person said this or did you see this, or, you know, something along those lines where they tend to debrief before they document that information and certainly that can be a very, very beneficial thing - [coughs].
Context_of_Work - Relationships	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	You know, we tend to stay away from the conversations on the MDT and again, unless they are of critical nature or very - not critical nature but sensitive nature I guess is the best way to put that, we generally don't have those chats back and forth on the MDTs, again, unless it is something that is officer safety related, you know, maybe embarrassing to whatever the complainant may be, something along those lines, you know. We don't put that information out via the radio. Because we are such a tight community, people tend to know, okay, if I send an address, you know, in the [city], you know, ten people might recognize that address and who that address is associated with, so if there is something of sensitive nature or a potentially embarrassing nature, we tend not to, or we try not to put that information out there for public consumption.
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	Well, I mean most people have an idea of what a fire-fighter and police officer does. The problem is, it's very limited, so yes; we take bad guys to

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								jail, alright? Or, we put out fires. But it's almost regardless of what I feel; I guess it's really transitioned into a lot more than what those traditional roles were. You know, for instance, you might get called; there might be a 911 call for just to go help an elderly lady put her batteries back in her phone. So it's become a little bit much more community service, nondenominational, if you will, level of service. Most people don't know what paramedics do, they know it is some sort of medical something or the other, but it entails quite a bit as far as, you know, understanding Cardiology and Pharmacology to the point where your interventions are pretty much mirrored to what they would do in the emergency room for those significant cardiac events; cardiac arrests, you know, heart attacks and so forth. Early detection as far as police work, all the traditional - take complaints, investigate crimes, make arrests, prepare for court, testify.
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	Pretty good. Everybody here gets on pretty well and there are obviously personality issues with everybody, but for the most part we all work very well together.
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	Oh, I think everybody has a culture. I don't know that I - how I would explain that. I mean, I don't know that we are - I mean, I guess when you look at normal police calls, there are a lot of times police officers are a little bit more tight knit and their work relationships will transcend the social area, it doesn't really - not so much here. Everybody kind of goes their own way.
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	Probably for the most part that everybody has got other things besides police work that they do or they are involved in, so what I - when I became a cop, one of the first things is that you keep your non-law-enforcement friends just so you have an avenue of not dealing with work all the time, and I still have and I think most people here do, so..
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	I don't - I like it because I am more personable, so you know, I might get out and give a little kid a sticker [unintelligible] whatever.
Context_of_Work -	LE	R	Field	46-55	21-30	Male	LE-R-060	You know, I usually engage the population pretty good.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder					
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	I don't know that it really - I mean, that is really all I have ever known. I worked a couple of different places and there generally wasn't any but they expect a higher level of customer service than what some of the other areas might.
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	And a lot of it is because we have allowed that to happen, and I think it's a good thing but you know, our core value and you know, other duties don't really infringe on us to be able to give them that extra level of customer service like some busier areas. You know, we do lock-outs and get the bad out of the house and you know, a lot of places don't have that luxury.
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	In [City], its fine. In [City], it's fine. We work well with each other. I think part of it is - I see it a little bit different because I know most of them from the fire training as well; there is always a little animosity between the two. A lot of it is just done in jest, but any time you got two departments, it doesn't matter if it is Police or Fire vying for the same budget, you know, relationships can get strained, or it trickles down, but as far as you me not wanting to show up to help them, we don't have that.
Context_of_Work - Relationships	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	And pretty much in the county I dont see that. There is also a level of - you know, most of your career fire departments have a better working relationship with the career law enforcement than some of the volunteer departments and I think that boils down to professionalism and you know, the professional police, because we dont have volunteer police for the most part. You know, they look at the career fire fighter generally is more professional and more resourced and so the volunteer agencies dont exhibit the same level of professionalism because their standards are a little bit lower as far as accountability and so forth, so, and there is a little bit but you know, as far as not helping or - you won't find that kind of division. Not in a lot of way anyways.
Context_of_Work -	LE	S	Field	36-45	11-20	Male	LE-S-061	Well, the lieutenant is a supervisory position that you work up to through

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder					the ranks. My job is - specifically I am in charge of patrol, any kind of supervision over the sergeants who handle patrol, and then I am assigned to the detective bureau as far investigative matters, and anything that we handle. We work as a team in the detective bureau, so I am one of two lieutenants in this department. And then I am assigned out to the Chief at the same time, and I am in charge of hiring and any kind of possible grant work and stuff that we need to work on, I assist him on that.
Context_of_Work - Relationships	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	Retirement. You know, I have been - God - I will say it is still rewarding because I do enjoy making sure everything is done for the department to help the citizens out. Darn; adjectives for my job; I don't know, honestly.
Context_of_Work - Relationships	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	Well, for the most part, they are good. You got, you know, you have got your problems; you know, you have got 24 Alpha-type personalities in a station with you see each other more than you probably see your family, so do they get on each others' nerves and pick at each other and complain? Oh yeah. So, but for the most part, they are very forgiving and they move on.
Context_of_Work - Relationships	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	For a couple of guys that are coming from inner city departments kind of [inaudible] stuff like that, I think it's substantially slower. I think that is a big adjustment. I actually think they like that it is slower. We are not busy enough. If you want to go out and do - get out and walk around and talk to people, you are got plenty of free time to do that stuff. Honestly, I don't think - oh, I know for a fact it's not done much because I think the whole perception with the whole police thing people are just -officers, they get blinders and they don't wanna deal with people unless they have to a lot of times; I really, really do see that; they just - you could go up on a just a normal meet and greet just to talk to people and it always, you knowing, the interest turns negative or they want to complain about something, you know, citizens have a habit of really complaining about every single thing that goes on in this city, whether it my neighbor is cutting their grass and it's on my sidewalk to they want to complain about the mayor. So, a lot of times, the officers, they have the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								opportunity to go out and talk to people but they don't want to because they don't want to hear it.
Context_of_Work - Relationships	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	It doesn't have to be and I think we have got - you know, we dont have much contact with like [unintelligible] and stuff like that. Actually, our biggest community contact, I would venture to say, would probably actually be the mosque.
Context_of_Work - Relationships	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	Well, it's a total different scenario now. [city] took over our fire department, so they are [city] employees and it used to be - I would go over there for dinner and I knew all those guys like first name. I could walk over there right now and I couldn't tell you one single person that is in there. They have isolated themselves from us. There is kind of a - I get the impression that they don't want to be here and they really don't want to deal with us and that is the officers' impressions that they get. They are not the same buddy-buddy guys that we used to know all the time.
Context_of_Work - Relationships	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	Right next door; yeah, the interaction between the two departments is very minimal.
Context_of_Work - Relationships	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	Yeah. We can hit up like the state police and [unintelligible] switch over to radios and contact them, but again, we have very minimal contact with them.
Context_of_Work - Relationships	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	The problem with a small department is you see these people more than family and you know, guys get on each others' nerves and have disagreements and it is a small station, a small department, so you are always, no matter where you go there is one of the same people.
Context_of_Work - Relationships	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	[unintelligible] but if something happens on the street, then it's different. I mean, you know, here people squabble or make sarcastic comments or argue at times, but on the street, in front of the public, we don't do that, and in front of the public, if something needs to be done, everybody just teams up, work gets very very fluid and all these internal drama issues just disappear and we are a team out there.
Context_of_Work - Relationships	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	...I would say about 60% of the town is home owners, owning their own homes. Those are your generally more supportive, more involved

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								residents, people who take care of their stuff really well. We have had issues with renters. We have a large rental population here because a lot of people became more affluent, or retired or whatever, moved out to a bigger house or more land, and here things are close together and I think [inaudible] sounds very nice but, you know, if you go around the east side of town, the houses are very tiny, they are [unintelligible] because we needed houses for factory workers and you know, they don't age all that well necessarily and people dont take care of them, you know, if you are renting a house, you are not going to landscape it or put a lot of money into it because it's not yours. I would guess [town] has probably about 65 to 70% whites, a large Arabic population mostly from Yemen, a large Hispanic population or fairly large, and then a lot of our apartments are mostly black. And then the Asians and everything the whole spectrum is covered here.
Context_of_Work - Relationships	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	For the most part, pretty good. And we have got a lot of business owners here in town that are very supportive and when we got our last canine, we had to do fundraising - we didn't have money to get a canine and we went out to businesses. Businesses don't have a lot of money, I mean; they really come out for us. They are very supportive, you know.
Context_of_Work - Relationships	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	It's - I mean, it's a fairly friendly town, I would say. I drive around neighborhood streets, I mean; you wave at a lot of people, a lot of people wave at you. A lot of people come up to see how you are doing, lots of time I just stop and talk to people because they are regular people you see all the time, they have been here a long time and you know, they are very supportive of the police and make sure we are all there to patrol the neighborhoods and keep an eye on their stuff for them.
Context_of_Work - Relationships	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	Me? All the time here. I am [unintelligible] all the time to it. I dont have a landline at home or anything but yeah, here I use it all the time. I do a lot of traffic detail anda lot of it involves like counterfeit insurance, fraudulent insurance, things of that nature, no insurance, and I place a lot of calls to insurance companies; and I would endeavor to say upwards of 50 times a month I call insurance companies to verify

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								paperwork. Local sector [unintelligible] not very often because they just put you on hold and it is just as bad as going in person. But I use it to call the guys for -and that most of it is work related but then you know, even if you are going to lunch, like hey, what are you doing for lunch, stuff like that.
Context_of_Work - Relationships	LE	S	Field Responder	26-35	6-10	Male	LE-S-063	You know, I come here and I get ready and then I do a vehicle inspection and go out on the road and drive around for a little bit maybe and try to - especially during the daylight hours before it gets dark, just make our officer presence known so.
Context_of_Work - Relationships	LE	S	Field Responder	26-35	6-10	Male	LE-S-063	Generally I think people in the community feel safer if they see the officers coming down their street and looking in the yards and checking cars and things like that, so.
Context_of_Work - Relationships	LE	S	Field Responder	26-35	6-10	Male	LE-S-063	It's - generally the people are accommodating. They are nice, and most are [unintelligible]; some are a little jaded but...
Context_of_Work - Relationships	LE	S	Field Responder	26-35	6-10	Male	LE-S-063	In general, yeah. Most people don't invite us over for a coffee and donuts, so.
Context_of_Work - Relationships	LE	S	Field Responder	26-35	6-10	Male	LE-S-063	I perform a lot of IT function here at the station so - I am in charge of the LEAN network and the contact person for our validations for LEAN for the state and the WireScan administrator and deal with troubleshooting the body cameras and things like that and processing videos to be put onto disks or flash drives for evidentiary purposes and stuff like that, so I would say I am generally here a little bit more than some of the other officers but I - we eat here and we, have our bathrooms and our locker rooms and stuff like that, so - spare equipment that we have in the armoury or in a locker that we don't generally use a lot, we can come back and get that or if we have a specific question like for a supervisor or something with either on-shift work or scheduling or you know, the peer-to-peer conflict or something we need resolved, then we get to come back here and take care of that, but generally they like us to be out in the side streets and make our presence known and
Context_of_Work -	LE	S	Field	36-45	11-20	Male	LE-S-064	Kind of usually people will flag you down if they have a question or if you

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder					are visible. Ideally you just stop and go into stores and stuff like that and chat with people sometimes and it's always helpful to hear different things from different people, the issues going on and stuff like that.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	We have -- I have been here for a long time, almost 30 years. So, I've been here at a time when the Sheriff and the Police Chief would not speak to each other. I've seen when the county mayor and the city mayor could not communicate, didn't like each other. But today, what we live in today is totally different. We get along famously with our police chief. We work with other agencies, like the ATF, the FBI, the DEA, the Marshal Service, we have all right task force field and we work really well within our law enforcement community with all our partners. [city] Police Department, [county] Sheriff's Office train school security officers for the school system. We do a joint venture on that. So, you know, if you've been around [city] for a long time, you'd understand what I was speaking of when I said the police chief and the Sheriff didn't get along and we didn't know [inaudible] as officers working on the street or we didn't really know how it affected us because it was just the way it was -- right.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	I think in our agency with the resources we and our technology, I believe we are doing very well. How, we are reaching -- and for us, not just the way we communicate internally but how we communicate externally to our citizens -- I think we do a really good job with the -- we have a crime mapping initiative that's an online initiative that's on our website that you can go in and see what's happening in your neighborhood or you can set a radius up around your address to see what has happened and you can see and it is updated. If I come to your house to a burglary report, it is updated as soon as it is approved in record. So, you know, we update hourly on that thing, so we try to let people know what's happened in their community because we believe that those people are a great force equalizer, you know, you can't be successful in this job, in law enforcement unless your community trusts and supports you -- you can't. So, we have great trust within our community and great support. We really do. We are very fortunate to live and work what we do.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	Really reaching out to the community with these types of things that engage them in our day to day work. We had a shooting a few months back, you know, and you've this and I know you have talked to a lot of agencies, but there could be a shooting where 40 or 50 or 200 people are there and nobody saw them laughing. We had a shooting a few months back where an 18-year-old guy got shot over a bag of marijuana. People stood in line to talk to our detectives.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	That's the community support we receive. We asked -- our community started raising teddy bears to give to kids in traumatic situations in a wreck or dealing with mom and dad -- give them a -- you know, we got so much outpouring from our community. We can do it only do it every other year. We can't do this drive every year. And we give those things away to every county that touches us. Every agency within that county like [County] we'll have [inaudible], so everybody around us, I mean it is amazing when we asked our community for help, they come running. They really do. It really is.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	We do have MOUs signed but, you know, [city] and stuff, we have an aviation unit that supplies air support for them if they ever need it. We have [Organization] within the [state] Sheriffs Association. You know, if anybody around us in this region needs us, we are always there even if we don't have an MOU signed, you know, we are always there to help.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	...He is a Captain and works in our special investigative unit but we are working at developing some apps that we can use for our citizens to use and [name] is spearheading that. But he uses a lot of different apps. I mean, just Monday we were talking to a group at [Organization] in [city] about an app they can use to track bank robberies that are all across the country. So, that gives them a face and it gives them information on what's happened in other areas of bank robberies because many times if you have a prolific bank robber, he travels, you know [crosstalk].
Context_of_Work - Relationships	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	Yeah, we were kind of cutting edge around here on that. We were knocking on their door. They weren't knocking on ours. Or actually, let me reverse it. They were knocking on our door because after [city],

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								everybody went to them. And in that interval we were already implementing our program. And we did that and I talked to our community a little bit, it wasn't because we had bad officers that we wanted to watch. It was, we really wanted our community to see what our officers were doing for them. What they were putting up with. The mentally ill that we had to deal with and the closing of [city] and what it means to us as a Sheriff's Office and Yeah, we were kind of cutting edge around here on that. We were knocking on their door. They weren't knocking on ours. Or actually, let me reverse it. They were knocking on our door because after [City], everybody went to them. And in that interval we were already implementing our program. And we did that and I talked to our community a little bit, it wasn't because we had bad officers that we wanted to watch. It was, we really wanted our community to see what our officers were doing for them. What they were putting up with. The mentally ill that we had to deal with and the closing of [city] and what it means to us as a Sheriff's Office and
Context_of_Work - Relationships	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	It has. It has, it's -- we've never had a rash of, you know, mistreating people or of officer --
Context_of_Work - Relationships	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	I mean, it's dropped that. Officer's assaults on citizens where we have to lay hands on people, it has dropped. So, you know, we are seeing those things pay dividends for us and that's good for our community because everywhere you go and if you are doing something, somebody is right there, you know? So, you might as well have one on you and this camera gives you that perspective from what the officer sees. Not that, you know, 10 feet away.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	And we've dropped our crime rate -- our crime rate has been cut 26% two years down there. In two years, our precinct with an Office of County Sheriff's Office on it, it's in [town]-- being able to have that presence, shrinking our zones and those officers moving around not there more and I'll tell you too -- we've got young guys.
Context_of_Work -	LE	R	Supervising	46-55	21-30	Male	LE-R-058	You know the last 8 or 9 years has been really tough on law enforcement

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Field Responder					now, but, you know, I have mentioned community never bought into that false narrative of, you know, "Hands up, don't shoot." you know, and I'm not diminishing the fact that there are problems in law enforcement in inner cities and with, you know, African-American populations. Those things that have happened that you can't get by, you got to own it, right.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	Yeah, I mean, you think about it. Our community as a whole, I told you how well we interact with our public, you know, and by the message we put out and what we deal with, you know, it's -- you can see, you can see -- there's a group called [Name] [city]. If you are in law enforcement, there is not many reasons for you to get me there. They're almost radical a little bit, they are left-leaning inter [City] that thinks that we mistreat people. It's what you would think if you are not listening to them -- okay? That's what you would think, but you go and listen to those people, you know, I mean, I've had people scold me -- what are you doing about those people? What are you doing eh? They don't like law enforcement. You know? [Laughs] No -- it's just -- if you listen to them, they are worried about the way we are treating the mentally ill in our jail. You know, they are worried about things that we should be worried about, you know, they are worried about the [Organization], oh my and what are we gonna do. So instead of shutting them down because they are intercity left-leaning liberals, you know, listen to them. We will find common ground.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	I think down the road, may be not in the so far future, it will be like real-time dispatching. I mean, it won't go from a call -- the call processor from 911 -- the way it is now being, that crime mapping that we do. I mean, why couldn't they see where that officer is at or where the closest officer is or why couldn't the community touches that officer directly?
Context_of_Work - Relationships	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	The flip side of that is the bad guys will know where the officers are at, you know, so -- but I don't know what if that call went into a group and an officer had to grab that call instead of 911 --
Context_of_Work - Relationships	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	Or the officer would know where the call is coming from so he would -- I mean, there is something there that will take the middle man out and increase our response time and effectiveness in dealing with the public

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								-- I don't know but I think that is probably --
Context_of_Work - Relationships	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	<p>That they can order commissary, sick call, they can email, they can do visitation on them, and there is a cost associated with that, it is paid through their commissary accounts. But, that technology is bringing efficiencies to us so we don't have to lay hands on an inmate to bring them to a visitation booth, let their people visit, then take them back, you know. It cuts contrabands -- contraband from being brought into our facility and it cuts that office-inmate contact that drives confrontation. So, our inmates love it.</p> <p>Some people, there was 40 or 50 people that protested it because they were not getting face to face visits anymore and cost associated with it but you can go down to the jail and visit for free. It does not cost you anything. But if you want to set it at your house and visit, like a Skype -- you can do that.</p>
Context_of_Work - Relationships	LE	R	Other Public Safety Personnel	36-45	6-10	Male	LE-R-043	<p>So the environment within this building is pretty good. Yeah it's pretty fun, jovial. I mean it's got its issues I guess you know like any other place but overall I think people are respectful and understanding of different personalities, different beliefs, different philosophies of life so we all get along and joke around. I have heard of any having any issues. Obviously there's you know I'm probably one of the people that people talk about behind my back yeah I don't know right? Like there's always that one person that everybody digs on and if you're not digging on anybody then you're like oh they're digging on me so right? So yeah no it's cool. I don't know it's pretty laid back, relaxed. You know people have their concerns and they talk about for the most part. Obviously as with anything else in life everybody has certain things they're not comfortable talking about, things fester and come to a head at some point or otherwise you go past them and off you move on so yeah.</p>
Context_of_Work - Relationships	LE	R	Other Public Safety Personnel	36-45	6-10	Male	LE-R-043	<p>Well I'm doing it poorly so I probably won't give you the right answers and I know there's no right answers but anyways you know I'm talking mostly amongst the first responders here, the county commissioners and the [state] and so I'm more of a liaison between the [state] and the</p>

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								local responders as we go through this. My work with the local responders would be more the you know the emergency operation plan, the EOP they call it in developing that, developing your all hazard mitigation plan... I'm pretty in the middle type of person so it works out well. I don't kind of follow the one side so and that's good for this position because of the fact that you do have to work within all these jurisdictions and all these different entities and then to the state which and somewhat it's kind of weird like I'm supposed to work with the state, the state is supposed to work with the feds yet I have the feds working with me on certain things. It's kind of through the state but anyways they're kind of in there too. So yeah and as far as how we did you ask how we communicate too?
Context_of_Work - Relationships	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	They help us with our biggest event of the year here which is the [name] and [Event]. I don't know how much I mean it's basically 40 percent of the world's wealth comes here for a week in the second week of July and it's we have to mand it obviously with air medic ambulances and command post and there is a ridiculous amount of security both national security and their own security firm and then they are here Weapons of Mass Destruction for what they do which is CPR and they don't do explosives but they do monitoring and they're a major part of the conference.
Context_of_Work - Relationships	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	We've had a couple of exercises with them over the years and a big Hazmat scenario at the airport one year which what did we do for that one? When we did when they brought all their toys up so it was a plane crash with lots of patients and hazardous material issue and it was a massive exercise. I mean it was really impressive. They put on their suits and rode their little ATV's out and got samples and brought them back and tested them so but we interact with them every year for sure and then we can use them anytime we have an incident here that's not an explosive incident which seems to be mostly what we have here whatever those bombs that were going off for a while.
Context_of_Work -	LE	R	Field	26-35	6-10	Male	LE-R-044	Look at all the groups I have here so I have about a hundred contacts on

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder					ESCHAT around the state and the government and then groups we were all at FDIC together in [name] so we had our own group and then there's a [county] Fire Chief's All Call there's a Gold 1 which is our primary, there's Yellow 1 which isn't setup right now and then I have two groups for [Name] fire and I have the Stanley one, I have [Name] All Call, I have the [Name] Ski and then I have a Unified Contact as well so definitely helps because when I was at FDIC you know I got the active 911 for call and I was able to turn it on and if I have to save something I can actually talk on it just like a radio that's what's nice.
Context_of_Work - Relationships	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	The south county agencies and it's one of those things that they like to poke fun at each other just as far as they're always listening to give each other a hard time and most of it's in good faith.
Context_of_Work - Relationships	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	We had one of our guys he was out for close to 60 days this summer as a [Job title] and doing various positions on fires and stuff but he went to [name] three times I think and he was all over the place. One appeal and a positive impact from being able to send resources out is the experience that people get and then bring it back to our community being where our communities have situated in the wild land of an interface.
Context_of_Work - Relationships	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S2] Well the street crimes unit is a newly developed unit. There's only four of us in the department. What we do we're more directly involved with the community. We go off tips I'm sorry tips off tips basically anonymous tips, we work closely with [abbreviation] and other groups inside of [town] and if there's a specific problem they need dealt with they call us so we'll go out we'll do surveillance, we'll try and hit a certain neighborhood really in order to detour the crime from happening there.
Context_of_Work - Relationships	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S3] Stressful, demanding and I say that not necessarily because of what exactly we're asked to do it's you do your job but you also have to really take care of the people that you're working for and understand trying not to pick a side.
Context_of_Work -	LE	R	Field	Not	5 or less	Male	LE-R-045	I[S2] used to on in the patrol division. I would have my we have certain

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder	specified				zones that we have to patrol so whenever you're given that certain assigned zone and a lot of officers like to be put in the same zone that way they establish a rapport with that particular part of the neighborhood. That way his presence is known they know okay he's on duty we kind of need to calm down and we developed on our own little routes that we like to take, there are certain houses that we like to make sure we pass, we also have to go based on our watch list and make sure that we go by those areas that people have requested additional patrols for certain reasons. Other than that like Officer (INAUDIBLE 00:08:34) no call is the same so it's really hard to get into a routine. The only routine you can get into is your traffic patterns while you're doing your self-initiated stuff.
Context_of_Work - Relationships	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S3] ... We work with the [Organization], we work with the [Organization], we work with [Organization], anything or anyone they need us to track down, we also work with community groups so anything that we're asked to do we put that in a priority as far as if it's a felony warrant for like \$500,000 bond for bad crimes such as homicide, rape stuff like that priority one then we'll go into drug activity, warrant services stuff like that and then go from there.
Context_of_Work - Relationships	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S2] Each shift is different. You know I've been on night shift since I've been here 2 ½ years. He's been on night shift the entire time he's been here so our night shift group we've always been kind of a tight knit group of guys. We always go do things together you know we hang outside of work.
Context_of_Work - Relationships	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S3] We're going golfing after this.
Context_of_Work - Relationships	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S2] And even our Sergeant there are Sergeant's that we always hang out outside of work. We have our work relationships but then we also have outside. There's other shifts that don't get along as well. You know there are shifts that people throw each other from under the bus. There are shifts where people call for help and some people don't want to go help so they send someone else which is bad but me and [name] we've

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								worked together for it'll be 3 years in July for me so we've done everything from drug calls to traffic stops, DUI's to chasing down people who get in fights with people I mean we've done it all together you know whenever we work we work the same days all four days we work together, we take the same side of town, we build a rapport and you know who you can work with and it's a non-official partner. We wouldn't rent the same car but we would usually end up unless they let us.
Context_of_Work - Relationships	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S2] Absolutely. We work for the community. They don't see it as that.
Context_of_Work - Relationships	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S2] You know we swore to uphold and do all that stuff with the [city] for the community for the citizens of [city] to help them and show them and needing our help. A lot of people like you said they don't see that whenever we're busting in a door or something like that because we're not just going in there for a reason we're going in there whether it's a drug related call, a domestic related call, child abuse whatever it maybe we have a good reason to be there. They may not think it at that time but we're actually helping them because if it's a drug related call who is to say that the next step they take might be it. They'll overdose and then we can't ever help them again. There's always that one chance that we help someone that they get the help they need to get out their (INAUDIBLE)
Context_of_Work - Relationships	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S3] And the unfortunate side to that because I mean [city] is a heavy drug area. I mean we have quite a bit of drug usage usually it's going to be more or less [state] going to be a prescription pill problem for the most part but we have a lot of meth here, we have a lot of marijuana here, more meth than anything but my main zero tolerance especially is when it comes to you have yeah you might have an addiction but you also have two kids. You don't want to think about them in that way I'm sorry I don't know how to help you. I'm going to help them. I'll get [Organization] involved and I'll do whatever I have to do to make sure they don't have to grow up in this and actually have three meals a day because you don't want to spend that \$20 on them. You'd rather put it in

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								your arm. I have no tolerance.
Context_of_Work - Relationships	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S2] For the most part I mean we still have people that hate us. We have people that get on Facebook and talk about us all the time but they only talk about the negative side. They don't talk about when we go around Christmastime and give all the bills that need them you know.
Context_of_Work - Relationships	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S2] They don't see when we go out like on a SWAT team when we have grades and stuff we go out let the kids play on our Harvard vehicle which we call ARV and they don't see that stuff but whenever we kick in their door because they're selling drugs to kids then we're the bad guys. So they don't see both sides of the story.
Context_of_Work - Relationships	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S3] It's with other law enforcement. It's other departments, [city], [county]. Over the phone we'll talk I've had to talk to [county] in [state] that's as far as I've had to talk to. It just depends but as far as other first responders like life and fire we do the same calls and life and fire code 3 or code one and our dispatch will take care of it.
Context_of_Work - Relationships	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S2] On the other hand the bad thing about that is I would rather trust him to take me somewhere and save my life than to wait an ambulance.
Context_of_Work - Relationships	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	Aside from NIMS we will always use ten codes. The only time is I mean we're in tornado alley so we've had specific NIMS training and stuff like that for catastrophic events and everything like that and five tears through more for the sixth time and you have people from not just counties states people coming up from Texas over through New Mexico everybody wants to help you. You have National Guard you have everything so we have our NIMS training to set up who is in charge and they branch out from there and that's when the ten codes go out the window and you just use common terminology because our ten codes are different from (INAUDIBLE 01:07:53).
Context_of_Work - Relationships	LE	R	Field Responder	26-35	6-10	Female	LE-R-046	Well you know we serve the community. There are a lot of tiny towns all around here and we usually patrol in our cars. We're here to keep people safe. We're here to answer calls when something comes in.
Context_of_Work -	LE	R	Field	26-35	6-10	Female	LE-R-046	... I'd say it's rewarding in that people generally support us not everybody

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder					we get our bad comments too but generally I think people support us and we've got a good rapport with the community and so yeah there's it's not real busy, it's not real we don't have a whole lot of crime here but we do need to try our best to keep people safe given everything they do.
Context_of_Work - Relationships	LE	R	Field Responder	26-35	6-10	Female	LE-R-046	Sure. We start out the shift and we're talking to the folks who are coming off shift. We're seeing what was going on. We'll generally have at least a little bit of time in the department in the station there and go out we check our car, we check our equipment then we're out on the road and most of us we've got our kind of patterns where we go when we're out there but and then we're just patrolling until we get a call and if we get a call then we'll go someplace specific yeah and but otherwise we're just driving around trying to make sure people are feeling safe and feeling okay about what they're doing.
Context_of_Work - Relationships	LE	R	Field Responder	26-35	6-10	Female	LE-R-046	We're we've got a lot of different communities but generally there are two of us out there at a time and you generally are just going around the whole kind of county all the communities in it. Most of us I would say when we're out there on patrol most of us are doing our best to cover as much of that territory as we can because that does make a difference you know when people see you, when people know you're out there they just feel better about stuff.
Context_of_Work - Relationships	LE	R	Field Responder	26-35	6-10	Female	LE-R-046	Well like I said it's a lot of farmland. We do have some small towns but they're not real towns really. Some of them have a couple hundred people in them and it's mostly the folks outside of there that we're also serving so the sheriff's department we serve kind of all of these rural areas here out here and those areas that don't have their own police departments especially. None of the small towns in this county have their own law enforcement so we are really all that they've got as you know as folks who are going to respond in the case of you know when there's an accident, when there's a vehicle accident, when something's been stolen, when something's gone wrong that's what we're doing here. Sometimes they call fire, some of these small places they do have volunteer fire departments. I think it's a ballad that got to folks you know

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								it's not much so we're often responding too to those calls to help them see if they need help as well but the community it's pretty simple I would say.
Context_of_Work - Relationships	LE	R	Field Responder	26-35	6-10	Female	LE-R-046	... We start the morning there we end the afternoon there. It's fine. If dispatch is there we usually come in. We're joking with them usually. We'll run over what happened during the day, we'll talk about maybe what didn't get done, if something didn't get done for some reason so the evening shift can look at that take that on you know but not much. If we've had something going on during the day we might have to be writing a report or finishing something up but that's really pretty rare really.
Context_of_Work - Relationships	LE	R	Field Responder	26-35	6-10	Female	LE-R-046	Well we got a lot of like I said a lot of down time, a lot of time when we're alone out in our car so you got to like driving, you got to like driving for this job or it can be a little boring that's true, that's true but you know we're also stopping and in the different places that we are. We'll stop at the gas station, we'll have a little chat with folks. I usually check in at the post offices. When I see people out I'll just stop make sure everything's okay double check you know just have a little conversation with folks and they know then that we're out there for them and they appreciate that so that's a lot of it. Driving, talking again if we get a call and this season you got to know this season it's deer rutting season and we get a lot of accidents this time of year so this time of year it can be a little busy for us given the accidents that we see and lots of those are deer related absolutely so that's one of things we're doing a lot of right now but otherwise we're driving and being out there in the community.
Context_of_Work - Relationships	LE	R	Field Responder	26-35	6-10	Female	LE-R-046	... They help each other out a lot and so sometimes it's not as easy as just calling fire because you don't know which fire is responding so a lot of times we'll just call we got their numbers we know who they are. They're our neighbors too right and so we'll just give me a quick call say where you at? What's going on? Do you need us there?
Context_of_Work -	LE	R	Field	26-35	6-10	Female	LE-R-046	... We have a job here. We try to do it as well as we can and we hope the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder					people here in our communities are happy with the job we're doing but I think they are in general in general I think they are.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	I'll go out and write tickets. This last weekend I wrote 29 tickets this weekend myself personally as [Job title] and all my guys work you know if you have a badge and a gun you ain't no better than anybody else everybody can work but the other thing is how you do it and we'll use (INAUDIBLE) patrols to really raise awareness and put something on Facebook saying hey you know we had one place it was next to an elderly community and people were having trouble getting out in the road because people were speeding. It was a 45 mile an hour zone and I went over and checked it out and people were doing between 60 and 70 miles an hour through that 45 in town so we went up there got a laser, we had 5 deputies go up there, one person ran the laser and the other four actually we stood out in the road we didn't even pull people over we just waved them in and we wrote 36 tickets in about 2 hours and I put that on Facebook and said hey, slow down in this area obviously it's an issue. Here's why we're doing it. I wrote 36 tickets in 2 hours here you know we're going to be here and in reality we're not going to be there because we don't have the people to maintain those resources but people don't know that. You know you create an omni presence by the way they see. First day of school this year someone hires us to risk groups as kids you know.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	The other thing is when you put something on Facebook saying hey we're doing road checks tonight you know and somebody goes and gets stopped at road check what can you really say? Really and truly I mean they're like we told you, you dummy and so actually strengthens our connection with the community because they see us as being fair you know not see us as running speed traps and stuff like that and you're always going to have some distractors and stuff you know.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	When we start looking at the areas where we have a lot of thefts we'll start pulling people on that area and just keep our eyes open and see who is moving around and a lot of times people won't bother to call and

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								telling you but when they get stopped for a traffic infraction they want to help you out and tell you who is doing what so we got a lot of great information off that but overall we have some really good people here, really good school systems. We have a lot of households where both parents are still in the household.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	... Some of the biggest issues I've seen is law enforcement people trying to make this perfect deputy, this perfect officer.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	I will go with them to the retirement center and help with that but also talk to the doctor's offices and stuff and put stuff there and let folks know how to do the program. My wife is a Type 1 diabetic. We'll have one in our car so it works out well. Anytime I can put give kudos on Facebook, if I take a photo of an accident scene I try to get the ambulance in there, I try to get the fire in there. I specifically name them hey great job. Thank you for coming out to this blah, blah, blah and just makes them feel good and makes others want to cooperate and participate in what we have going so it's good to have the relations.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	But this year we're having our Christmas party together. Never done that you know. Probably have fun. I think you should enjoy your time. You shouldn't be too stiff. So we're buying the hams, they're buying the turkeys, everybody's bringing their own potluck and I'm buying the plaques for my guys. I'll recognize my people's service within our public safety community Officer of the Year, Employee of the Year all that kind of stuff Dispatch of the Year. Also got an ugly sweater plaque. Whoever wins the ugly sweater plaque we'll give that out you know. We'll let them bring beer and wine. Can't have it in bottles or cans. Have to have cups so if anybody takes pictures but anybody needs a ride home you ride home. We have accesses here to check people. Don't let anybody drive drunk but let's loosen up and have a good time and doing things like that helps bring the community in together, the public safety community in together and I think that helps tremendously and just getting out there

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								and I tell them all the time you know we're one team. Public safety in this community is one team.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	Public safety in this community is one team. Anytime I can put give kudos on Facebook, if I take a photo of an accident scene I try to get the ambulance in there, I try to get the fire in there. I specifically name them hey great job. Thank you for coming out to this blah, blah, blah and just makes them feel good and makes others want to cooperate and participate in what we have going so it's good to have the relations.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	You know we all hang out together and talk you know we have good relationships. Last night had a fire over there near [County] line. Called [Town] PD and [Town] Fire Department because they're closer than we were. I don't mind you know there's no shame in asking for help. That's what it should be. Now I think sometimes people's egos get caught up and don't want to ask for help and you should and there's a possibility someone's in the house and if they can get there before I did and help get somebody out or see if there was you know makes a big difference. So it worked out really well and they got there everybody worked together.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	... He has a little side business and he gives us all the equipment at cost and then he just charges us to install it at a reasonable amount but he does a really good job and rumbler is \$600.
Context_of_Work - Relationships	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	...You got four hours extra at home every day with your family that's important so it makes a big difference and just the way they interact and just to your philosophy. Listen you're here, you serve them they're not here to serve you. You are supporting their efforts. You support the fire department, you support EMS, you support the police, you know you need to understand where you stand in this relationship and once you get that and they stop being smart butts about stuff and humble themselves and embrace their role it goes a long ways.
Context_of_Work - Relationships	LE	R	Supervising Field	36-45	21-30	Male	LE-R-048	I have good relationships with the sheriff's around here so we help each other you know in whatever we need we know. If he calls me today and

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					needed some of my people to come help with something there they are there. We had a shooting down in [County] where they shot an officer involved shooting you know I was at dinner, called us I sent everybody I had over here to help.
Context_of_Work - Relationships	LE	U	Other Public Safety Personnel	46-55	11-20	Male	LE-U-049	... I tend to be somewhat flexible in my job duties and description so that I can do my best to meet the needs of the department as a whole. Currently I oversee or I'm participating in a number of collaborative projects with either student [name] groups or with [name] Police Department/[name] Institute projects dealing with say vehicles and robotics and how the [name] Police Department might leverage robotics for use in conducting patrols on campus. So anyway that we can leverage the police department's presence and gain better visibility into the on goings and happenings on campus I tend to be involved in.
Context_of_Work - Relationships	LE	U	Other Public Safety Personnel	46-55	11-20	Male	LE-U-049	Yeah I would think very well. It's not like some large departments where you know dispatch could be outside of your zone or beat and you never go to the building or the location where dispatch is and really don't know the person by their call sign or their voice. Here we are a much more intimate department. We all know one another and you know officers have the capability they share the same building, the same headquarters with dispatch. They come into dispatch in order to get printouts of their vehicle stops and things along those lines so there is a personal knowledge of the people here that you may not get with another agency.
Context_of_Work - Relationships	LE	U	Other Public Safety Personnel	46-55	11-20	Male	LE-U-049	They are out there with the sole purpose of establishing relationships with the faculty and staff, the students, the businesses so that people know them by name and by face and they're very successful at that and that has really helped. That engagement piece has really helped to build trust amongst our community and establish that personable approachable nature for the agency but we don't want to be the cop in the car you know who you'd have to flag down in order to speak with. We want to be approachable. We want to be in and amongst our community so that they can provide us the information we need that we wouldn't gain otherwise. The tips and that intelligence that you wouldn't get if you

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								have a cop stuck in a car.
Context_of_Work - Relationships	LE	U	Other Public Safety Personnel	46-55	11-20	Male	LE-U-049	We have we are truly blessed in having an incredibly supported community both from the administration of the institute who has a solid finger on the pulse of the department and a good working relationship with our chief so that they know what our budgetary needs are and they do their best to meet those budgetary needs in providing us with the manpower and the equipment and the technology that we rely upon to succeed all the way out to the students. This was largely felt by the department in the recent officer involved shooting that we had of a student in crisis who committed suicide by cop. Immediately following that there was a group from Antifa that took the opportunity of derailing what was a very peaceful vigil in remembrance of the deceased student and turned it into an anti-law enforcement protest which culminated into a riot right outside the department, assaults on our officers, the burning of a police car. What was amazing was that our students came out verbally detesting the actions of that Antifa group supporting the police department bringing us incredible amounts of food to help sustain us as a show of support and solidarity. The cards and the calls and just the outpouring of support was absolutely amazing. It truly was. Never experienced anything like it before. Where we had a subsequent protest on campus and we had mobilized our officers to deal with the protest that was what we were expecting. What we did not expect was a turnout of students who began a counter protest on behalf of the police department. Now all of a sudden we had to mobilize to act as intermediaries between these two protest groups when we had only anticipated the anti-law enforcement protest group...
Context_of_Work - Relationships	LE	U	Other Public Safety Personnel	46-55	11-20	Male	LE-U-049	...Our students here are a very different mix. They're not the [City] type you know social movement or liberal mindset. The students here are so logical and so focused on their studies they just don't have time for the political stuff and it's amazing to see how they for being as young as they are they identify work belongs here on campus in an academic setting and what doesn't and they will very swiftly adopt a side and stay

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								fastly stick to it. I am impressed by the student body that we have here and I was truly amazed by again the outpouring of support for the department which I think really reflects on the relationship that we have established with the community. Had we not had the trust of the community that interpersonal relationship them knowing our officers on a personal level and vice versa I think it could have turned out very, very differently for the department over those very trying couple of weeks immediately following that unfortunate incident. So it's amazing the relationship we have with our community.
Context_of_Work - Relationships	LE	U	Other Public Safety Personnel	46-55	11-20	Male	LE-U-049	... after 9/11 video surveillance is expected to be hosted by law enforcement and people don't understand why a criminal can't be caught sooner given the fact that it's become so pervasive in our society. So the citizen's academy really helps to develop an appreciation for what the department's capabilities are and has received absolutely rave reviews. I think our agency does a very, very good job of helping to give them that experience.
Context_of_Work - Relationships	LE	U	Other Public Safety Personnel	46-55	11-20	Male	LE-U-049	... One, we lack the where we are blessed with having very generous resources at our disposal we are also kept very busy. We are not fat. The resources that we have are tasked pretty much to their maximum capabilities and that's why we use this the community the way we do with by employing part time student help because our full time staff are tasked pretty much to their limits.
Context_of_Work - Relationships	LE	U	Other Public Safety Personnel	46-55	11-20	Male	LE-U-049	... We also have a large foreign population of international students that aren't accustomed in many cases to some of the crime that we experience here on campus. They're not accustom to locking their doors. They're not accustom to having to worry about where they walk or when they walk so there's an educational piece to this and that's why we that CORE unit. We have a crime prevention unit.
Context_of_Work - Relationships	LE	U	Other Public Safety Personnel	46-55	11-20	Male	LE-U-049	They are getting out there ahead of this engaging these students in different programs, providing presentations so that they can begin to train them as the students begin to age here on campus and they progress to sophomore, junior year and whatnot they too through their

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								experiences and through the education that we provide begin to become more seasoned and can assist us in helping to bring up the new students so yes it is a bit of a disadvantage in that there are new victims potentially coming on to campus every year but it allows us knowing that it allows us to get ahead of it, train them immediately, establish those relationships very early on, take the preventative measures and look for new ways that we can do things.
Context_of_Work - Relationships	LE	U	Other Public Safety Personnel	46-55	11-20	Male	LE-U-049	We just implemented a bump lock program where if we see a bicycle that's not secured properly secured our officers will put one of our locks on it that has instructions. Call the police when you get back to your bike. They call us, officers go out, it allows them the opportunity to engage and educate the person, it also allows us to give them a gift of the bicycle lock that we secure their bike with so now they don't have an excuse to not lock their bike in the future. That generosity goes a long way obviously it's funded by the department and by the institute but it's seen as a generous gesture by the recipient and builds the rapport that we have with our community so it again it allows us is it a detriment? In some cases in other cases we're able to take advantage of those opportunities to build rapport and to educate.
Context_of_Work - Relationships	LE	U	Other Public Safety Personnel	46-55	11-20	Male	LE-U-049	These kids, students, young adults they embrace that. Some of them are more apt to interact with a robot then they would an actual live police officer. If we can cater to that community's desires and provide them with the device that they want or the means with which they want to communicate with us we owe it to our community to do that and so we are looking to develop robotic technology, autonomous robotic technology that can go out and perform patrols to notify us of dangerous environments.
Context_of_Work - Relationships	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S2] I'm the supervisor of the traffic unit assigned to special operations which consists of various units so me and him kind of oversee everything but I'm over traffic, I'm responsible for the scheduling of my officers, for their pay, for doing their payroll. I mean just in the sorbent of thing dealing with citizens who have complaints against officers, being

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								out on the street and making sure that officers are doing things properly or procedure per the law providing intelligence to the officers so they know what the objective is. That about sums it up I would say.
Context_of_Work - Relationships	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S2] See with the amount of people we have we have 13 people in our unit here full time. The amount of people we have we're most effective if we could get everybody together to address that one priority problem. The problem is or this is the trend that usually happens is wind up taking four of those people and putting them on drugs handling the drug complaint and then I got three or four SWAT guys that are going over to help execute a warrant and then we've got three traffic guys going to address cars being stolen so it's very rare we could have our entire unit at one place at one time because like I said like detective [Number] said there's so many different things that come up and pop up with different parties.
Context_of_Work - Relationships	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S4] ... Now if we're in a certain area for a certain type of crime burglaries for instance we'll let the dispatcher know that and we'll be on a separate channel from the regular patrol units and then the dispatcher will switch over and say hey I got a burglary in your area so that way that's our priority that's why we're there we head over that way but in the meantime like we said all these other forms of communication if we're working on stolen cars that's when we have most lines of communication come in because the stolen cars travel from jurisdiction to jurisdiction and we're getting this information from so many different officers.
Context_of_Work - Relationships	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S2] Rarely together. I mean if everyone gets here on a rare occasion you know people are usually pretty busy. I mean they'll be maybe some hanging out just because people don't get to see each other that often but mostly it's business though.
Context_of_Work - Relationships	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S2] Now by March there's supposed to be the city police department incorporated so what's going to happen with [county] Police is still unknown. Now us as the SWAT team and the county police we are able to help other jurisdictions go into other jurisdictions if it directly effects

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								anything we're investigating. We have other agencies asking us for assistance all the time. [City] because they don't necessarily have a SWAT team so if they need warrants served they usually contact us, what else can you think of? The difference between countywide not countywide.
Context_of_Work - Relationships	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S4] Based on our talents and equipment that we have we're part of the [group abbreviation] group so everybody knows we have this equipment so they reach out to us rather than putting it together themselves and being a big venture for them with personnel equipment and money and whatnot. It's easier to reach out to us if they don't need a SWAT team but twice a year.
Context_of_Work - Relationships	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S4] Sorry. I'm thinking of recent occurrences like Florida you know or whatever so a major incident happens where all these jurisdictions have to work together and communicate together it used to be in the past where you know we were on one channel and could not communicate with anybody else and you had to go through dispatch or peters and now everybody has been provided with these [group abbreviation] radios, we all share a band channel, you can communicate with them you know the departmental heads get together and figure out who is doing what and basically provide assistance for the metro area under the [group abbreviation] umbrella.
Context_of_Work - Relationships	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S4] Well day to day if we're out doing something we have this crown trend of sliders where kids are jumping in the cars at gas stations because people leave their purses and their keys in their car. Well if they're happening on us but we know they live in [city] we talk to [city] we'll just flip on their channel and talk to them. Hey, we've had a car stolen or vice versa they'll let us know so we have great communication there. On the [group name abbreviation] end we've had full scale incidents where training incidents so I'll go to one area and we've had comm checks or whatever and we've been able to talk to the command posts and incident command and whatnot.
Context_of_Work -	LE	S	Field	Not	Not	Male	LE-S-050	[S2] But now now I mean like we just know we have good relationships

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Relationships			Responder	specified	specified			with everybody around here and just it's been a lot more activity on the communication end along with meetings.
Context_of_Work - Relationships	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S3] Along with that app like people have gotten on the app before and said hey, does anybody have a contact in [County] and right away you know somebody that you know has automatically given you a contact you know so it's a lot easier than calling the main number somewhere and saying hey can I speak to the supervisor of detectives.
Context_of_Work - Relationships	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S2] We've had a working relationship with these jurisdictions in [city] as we said before reached out to us [county] other jurisdictions for these big scale events.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-051	... We attend a lot of community events both like just to engage so setup a table and have you know swag and engage the public and students help us with that but also informational type sessions so employee orientations, Q & A's about law enforcement, Q & A's about safety. We engage in any sort of interviews, any sort of like you know public inquiries of any variety would probably come through me. I'd have sort of the PIO duties in that I deal with.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-051	The student newspaper does a weekly crime meet so I'm the person that contacts them or they contact me and I tell them what's happened and give them the information they did for their reports and then on the training side of things my job is to schedule departmental training. If people are going outside the department for training my job's to schedule them for that, pay for it, it's maintaining all of our posts, police officers and standards, records, making sure that people get credit for the hours, making sure people have met their [name] standards. Every year you have to have 20 hours of training and there are certain mandates of what that training has to be so and then also I'm involved in background and recruiting. Right now we're doing recruitings, I'm calling people setting them up for ride alongs, I'm helping a couple of other supervisors in doing the preliminary screens on the new applicants there's a lot going on.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-051	There's a sense of fulfillment, there's a sense of it's interesting which sometimes police work isn't, engaging community engagement I really enjoy, I suppose important. I think the core of being police is answering calls and being there for the public but behind the scenes making sure that people are trained and we're meeting our standards and people can keep their power of arrest. I think there's a level of importance to that. I would say those.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-051	We're not just you know we're the key holders and when an alarm goes off we don't reset it, when a pipe bursts we call FM, facilities management so there's a big value and also just being seen, being proactive, keeping people safe so I would a big part of the routine is the expectation is that you're going to be mobile, checking buildings, walking buildings, driving parking lots. There's some little stuff like there's a park that we have where we unlock the gate every day and someone has to go and unlock the gate and someone has to lock the gate. I don't know if that's quite the routine but it's just one of those things where it's like you know most municipal police departments don't have to go unlock and lock the gate.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-051	...You know we don't police the [name] but it's right next door so we have interaction if we need to go there if we need to help out but there's also all that traffic flow and then there's also just the connection between [name]. There's a lot of people here so there's a call volume during the day at night it's not as much.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-051	We do. Yeah we have our own call center. We're lucky that most of the community knows to call us. We get it's sort of surprising sometimes like the volume of calls we're getting where people seem to know to call us. I mean obviously if you pick up a land line and it did come through to us at one point the 911 calls came through to us and then when they redefined what a 911 call center was a number of years ago they stopped so they would go to [name] County dispatch but [name] has a long relationship with us and they get rerouted back to us but also most people do know our number and most people know the five digit

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								extension to call our dispatch center so yeah we staff 2 to 3 dispatchers a shift. We take calls for all three of our campuses that we currently police.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-051	Yeah we it's probably by most standards not too much communication but our dispatch is in the center of the police department. It's accessible by the officers. Officers can go back there and I know some agencies restrict access to their call centers so yeah there's coming from [name] which is a large agency dispatchers are up on a floor that we didn't have access to and I sort of knew some of them but I didn't some people had relationships. Here you know your dispatchers. Everyone knows them they know us first name basis that kind of thing because we have about 50 or 55 sworn positions I think we're budgeted for somewhere close to sixty but fifty to fifty-five would be our number and then we have about 10 dispatch positions.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-051	There's coverage issues for the portables. I feel like we're able to get what we need from dispatch and I feel like we have a pretty good working relationship. Some are stronger than others and we're getting more people that have come from for a long time a lot of the people that dispatched here only dispatched here and I certainly don't hold that against somebody.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-051	... We can go to [name] sometimes with [name] we've gotten on their channel and asked them to help with things like our NCIC went down and we asked them to run it or if we hear something. Somebody took off from us or we've helped them out when they've had stuff going on so we can access most agencies around here.
Context_of_Work - Relationships	LE	U	Field Responder	26-35	6-10	Male	LE-U-051	They needed they were looking for a FLIR and we sent ours up there. We went up there and shot FLIR for them to try and find the bad guy so that's sort of an example of our ability to communicate. We heard it on the radio, we talked to them on the radio, we asked them if they wanted us to come, we went and we used our we were able to use our technology which was pretty cool.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Risk-Safety	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	... Well, the problem is [laughter] that when we want a new set, we're like, "Okay, we need a new set. Okay, well, this isn't working." "Well, you're stuck with it for another few months." "Hey, we got to call the manufacturer and get somebody over here to service this. Three weeks left." So that downtime, I'm really suffering because there isn't plug-and-play components that are affordable, and cheap, and easy for the user to just say, "Yeah, I need this replacement and this." But, yeah, communications has got to be on top of my list. I wish I had audio files from fires before and after good communications in mask. It's scary to the point where I had somebody from the public-- I was teaching a class, and they go, "You know what? We were listening on the Five-O app." I don't know if you've ever seen that, so--
Context_of_Work - Risk-Safety	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	Yeah. So it's like a radio-- it's delayed 30 seconds or something like that. But they go, "Yeah, we were listening on the phone, and we couldn't hear anything those guys were saying, and we knew they were inside the fire. Did you guys hear that?" And I'm like, "No, we couldn't." They're like, "That's shocking! Don't you guys have some sort of in-mask?" And I'm like, "Well, we used to." And so when the public brings that to our attention, you know it's an issue, right?
Context_of_Work - Risk-Safety	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	I don't want to call it dangerous because our line of work is somewhat--
Context_of_Work - Risk-Safety	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	--risk associated, right? But not being able to hear, like, "Okay. What did he say? Did he say he needed more people or did he say he was coming out of the building?" I mean, you would think-- you're like, "Whoa." I mean, it's sometimes that bad where you really have to [go do a?] face to face. And that wastes time, and time is everything.
Context_of_Work - Risk-Safety	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	So back to like-- so some of the mandates are techno-based. So the county, through a grant through [City] Regional Public Safety Consortium, which is kind of our POST academy for the region, they have this mobile trailer. And I'm sure it cost a bunch of money, right? You

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								got all of these mobile simulators in your car. And I kid you not, like 75% of people, when they go in there, they get car sick.
Context_of_Work - Risk-Safety	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	So my alarm really isn't quarter tank, it's really 50% tank, but my alarm doesn't go off until quarter tank. So riddle me that. I mean, where did--
Context_of_Work - Risk-Safety	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	The other good use for it is kind of the law enforcement side. It's a tactical tool, right? Let's say we have a bad guy pinned down with weapons and other things, having the ability to put eyes up in the sky and really look down [at an event?] is huge. My gut tells me because of where we live and some of the high-end brands around us-- I mean, you have technologies that they want to deliver your toothpaste via drone to your door. So I imagine that we will see progression into that, where maybe 10, 20 years from now, we'll see-- from the PSAP, we would see a drone launch when we have a fire or we have some sort of tactical event involving weapons or bad guys, and we would see a point-to-point coverage of where somebody [inbound of the event?] could look over at their CAD and they could see live--
Context_of_Work - Risk-Safety	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	We take rehab pretty serious in this agency, and we've gotten better over the years, I think, of addressing that, only because we've had to. Right? We are seeing hotter fires. The turnout gear is heavier. Our bottles allow us more breathing time on air. Our work duration cycle is longer than it used to be--
Context_of_Work - Risk-Safety	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	And we have better tools. And so we're able to be more efficient. But that means you're exposing your people to more heat stress. When we rotate out of an operational assignment, we go from operations group [until?] we go to a rehab group. Okay. And so that formal rehab process includes kind of a cool-down period. And then we have a standby paramedic unit that's going to monitor them for pulse and blood pressure, and if they're not within the normal limits, they'll notify somebody. And then they will start looking at heart rhythms, and they have EKG, and all that good stuff. So from there, once you clear rehab,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								you go back to staging. But in that rehab section, we're very good at providing water, shade, rest, a little bit of food. We always laugh because the cookies [laughter] they give you--
Context_of_Work - Risk-Safety	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	... With [State], I mean, we do a lot of mutual aid with agencies, so a couple of our rigs are specifically mutual aid deployable to other parts of the state. So we always, about this time of year, get kind of the reminder of, "Hey, by the way, you got to drink water. You got to stay in the shade. You got to prep your body, rhabdomyolysis." We get all those warnings of, "Hey, look, this is dangerous. If you get too fatigued, you could end up in the hospital. Here are the warning signs." We've gotten way better. We've gotten way better over the years of wearing our gear, wearing our masks, full head-to-toe protection, respiratory protection. Before my age in this business, guys were doing overhaul without any-- and they were using a particle mask which is complete bunk, right? Because of HCN, and CO, and all the bad things, right, that are in smoke, let alone all the carcinogens. So it's interesting because we've gotten a lot better, I think, as an industry. The gear nowadays,, I mean, the turnouts, I mean, they're C burn rated. And, I mean, they've got little seals. I mean, it's crazy. I mean, it's absolutely wonderful. They're hotter.
Context_of_Work - Risk-Safety	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	They contain more heat, but we're definitely more protected. There's also more awareness, I think, at this level, the company level, of, "Hey, look, just the smoke itself is bad." And it's fuel, right? And so a lot of that has come out of good trainings from the other lab, like pushing that. But really, some of the training that is done not only nationally, but at the local level, really pushes the need for rehab and the need for your respiratory protection and just managing that and being very, very careful about what we're around. I mean, we always say, hazmat-- everybody goes, "Oh, hazmats, hazmat. Yeah." But every fire is a hazmat. Every single one of them. And it's deadly. We take our meters and we put them into a burned-out building and they just go off, immediately. So the amount of carcinogens, and especially the stuff like hydrogen cyanide and the CO that's off-gassing, that stuff is in our gear as we're leaving

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								the event, so. I don't know if you noticed on the outside of the station, it says, "Clean living space."
Context_of_Work - Risk-Safety	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	...And again, we haven't figured out how to stay away from the fire to actually fight the fire or a hazmat event from afar. I mean, there has to be some interaction with tool-on-task, and unfortunately, people are susceptible to some of those bad things. But, minimizing it over the years with good training and some technology-- and another thing for technology, I wish we had more money for monitoring equipment for a lot more people. For example, I have disseminators for this team at this station. I don't have them for everybody. I used to. Okay? They were grant-funded. The grants dried up. Post-9/11, we had a lot of money. 10 years later, not a lot of money, okay? I wish we had a four gas meter: oxygen, CO, whatever else, LEL [laughter], all the good stuff. I wish we had one of those for every engine company. We don't. Money. Right? I wish I had a natural gas meter, \$795 unit, for every [first-in?] engine company. I don't, okay? Some departments do. We don't. Being able to go, "Oh, yeah, there's no natural gas in the building. There's no CO in the building," okay, and ruling out a sick building based on symptoms is really critical, I think. And that's one of the things that, it costs money. Those meters are expensive, right?
Context_of_Work - Risk-Safety	LE	S	Not specified	Not specified	Not specified	Male	PS-S-002	"And the last four times she was contacted, she was a much calmer person, but she does have a drug history. Maybe she's high on something now. She's clenching her fists." So when we were talking about that, everybody thought that was a great technology. But what does it require? It requires something on the back end. There's still going to be human interaction. The artificial intelligence is growing, but it's not there yet. In the meantime, you're going to have to have somebody in a center that's looking at that and evaluating the criteria that's coming back because the officer doesn't have time to do that.
Context_of_Work - Risk-Safety	LE	S	Not specified	Not specified	Not specified	Male	PS-S-002	I would say it's very-- but you're locked into an ear and you're getting tones, you're getting officers yelling, you're getting sirens.
Context_of_Work -	COMMS	U	Comms	18-25	5 or less	Male	COMMS-	... I don't know which side you came in on but the courtyard but just

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Risk-Safety			Personnel				U-006	across the courtyard is there's the jail and that houses most of the sheriff's office but there's also some of the sheriff's office over here and then in addition to that we also have ECC here as well and it's convenient but also in terms of public safety critical infrastructure this is not perhaps the wisest setup because everything is one place and then I don't know if she spoke to you as well but across the street actually literally right across the parking lot is our backup center.
Context_of_Work - Risk-Safety	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	So if anybody from here ever needs to have a meeting over there with someone from the county or if the police department needs to go have a meeting with the county or whatnot the county offices are right there, the county board offices are there, that's all very convenient, the fire department offices are over there but you kind of have this there is an issue of geodiversity in the sense that all of our critical infrastructure is in one spot.
Context_of_Work - Risk-Safety	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	Which is not good and there's a perfect example I don't remember the year before my time but a couple of years ago there was a suspicious vehicle that they thought may have contained a bomb and that was parked right on the street between the backup center and the main center and if that had gone off [City] would not have a public safety answering point, it would not have a piece up. So that is great and that's something that's been expressed to the county but one of the frustrations I feel like that we have here is we do feel like they don't the county does not prioritize public safety as much as you know maybe we should and so when we've expressed that we need a geodiverse separate building for public safety specifically for the piece app they're like you know interested. They don't want to pay for it because it is expensive to set up and they just don't really see the value because they don't think the way that we have to think.
Context_of_Work - Risk-Safety	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	...Are they guns, knives, what do they have? Has anybody been drinking? Is anybody under the influence of anything? Where are you? Where is this other person? Are you both in the apartment? Is this going on right now? You know did they leave? Okay let me get a description of them.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								Are they black, white, Asian, Hispanic? What color shirt? Pants? And then I go back around. I do my next descriptions you know how tall are they? How much do they weigh? Heavy, thin, medium build? What color hair? You know and then I'll say you know which way did they leave? Did they leave on foot or in a vehicle? If it's a vehicle I can look up a description. If they went on foot I want to know which direction of travel they went. How long ago did it take them? That sort of stuff.
Context_of_Work - Risk-Safety	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	And so there's always this baseline level of tension that you never know what's going to happen and then the other part of it is too once you become more experienced in this job and you do start doing other things like police dispatch and stuff you know I'm starting to recognize the officer's voices and I know some of the officers you know now that I've worked here for a while because we do ride a long a lot, we work with them, we meet them in teletype and stuff like that and so I know them as people and if in addition to me being nervous for perhaps the person on the line because you do get invested in these people even though you don't know them you're still worried about them you care you know. You'd be talking to them you stress for them and then on the other hand you're also stressed for the officers because or the paramedics or whoever's responding you know because we're all kind of one family and we all care about each other and your job and this is how we think of ourselves our job is to keep them safe and make sure they get the resources they need. Make sure that they are prioritized you know and we're sending them into these crazy situations and we want to make sure that they're going to be okay. So there's a lot of stress about just again the unpredictability just don't know what's going to happen and then in addition to that the liability that if anything that goes wrong you are responsible.
Context_of_Work - Risk-Safety	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	...So you know you have a situation where somebody is getting stopped and then you get a hit off of this person and then the information in there has something that says for some reason this person is a white female 200 pounds or whatever when in actuality it's an Asian female

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								who is the same descriptors, same similar name and instead it's an Asian female it's one letter right? You put an A or a W and the officer could arrest the person because they're like this is an Asian female fitting that description and they arrest this lady and she's never done anything wrong in her life.
Context_of_Work - Risk-Safety	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	...The bad part is it's across the street and we have had two situations in recent years where we have needed to evacuate the area and we've had nowhere to go and that is part of the reason that sparked the conversation of sharing telephony systems and eventually CAD with [name].
Context_of_Work - Risk-Safety	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	From [name] inside their dispatch centers we cannot reach on the radio all of our county on portable radios. So we do have some technology difficulties that keep us from moving somewhere. In those two situations we ended up staying put. We had a box truck parked backup center is technically west of us just across the parking lot and there was a large box truck parked in front of it and bomb dogs got a sniff, bomb squad was called out if it was filled with any bomb or chemical stuff it would have most likely effected this building as well because of how large the truck was. It was about a ten foot moving trash type vehicle and then and that was on July 4th a couple of years ago.
Context_of_Work - Risk-Safety	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	And that if anyone evacuated the building there were snipers set up around the building to take them out. We had enough staffing it was right around a switch time so the oncoming staff was told to go to our backup center and our staff that was in our main center was escorted out under SWAT protection so shields, everything, the whole shebang escorted out of the building. There were no bombs found. We didn't find any snipers but at that point we were still just across the street from where our building could potentially collapse and our backup center is actually where we answered 911.
Context_of_Work - Risk-Safety	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	Yeah. It's unknown territory because we've never gotten to that point. I mean there was even issues when they told us on that July 4th incident you need to leave the building and we said and where do we go? And

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								who answers the 911 calls because even though we're having an emergency in this area the rest of [County] is still having their emergencies so how who do you expect to answer these calls? How do you expect to get them help? Where do you expect us to go to do this?
Context_of_Work - Risk-Safety	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	...And then, when we go to submit the warrant, we've got all that paperwork that goes with the warrant. If it's an accident or an arrest, you would be responsible, excuse me, to get a wrecker. Or if they get to a scene that came in as a non-injury and somebody says, "I'm having chest pains," they'll contact us on the radio, we get ambulance and fire on the way to have that person checked out. If we have a combative person that needs to go to the ER we will call the ER and say, "We're coming in with somebody", you know, same thing with the [crosstalk], anybody that's combative, we would let them know for safety reasons, "We've got somebody coming in, you might need more manpower or some way to strap them down or--"
Context_of_Work - Risk-Safety	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	...So you take all those things into consideration where you get into some of the bigger departments and they have beautiful stations that adjust, you can stand, and that's one of the other crappy parts of this job, is you sit in crappy chairs and your back and your neck and you leave here at night and you're like, "Oh my God, I feel like a truck hit me." And we don't have headsets because our phones are old. Sometimes the phones are crackly because I mean, they're old phones.
Context_of_Work - Risk-Safety	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	...Yesterday one of the officers called me and he called four times and it sounded like he was whispering and I said, "You're totally unreadable." Well, that's an officer safety issue, when you can't communicate with your officers and they can't communicate with you it's scary because-- sometimes we grab our cell phones, "Hey, are you okay? I've called you three times. I didn't hear anything." I mean, all officers and dispatchers should have equipment that works.
Context_of_Work - Risk-Safety	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	... So I mean if you were to come in contact with someone or if someone else came in contact they can't call you or send you message and saying, "Bad guy's coming into town." Or if for example, if somebody has

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								an officer safety caution, which could mean that they are a violent criminal, we don't know any of that. Because I mean, we've had instances where our computers-- it's generally not too long, but sometimes like six, eight hours. You might work a whole shift and not have phones or computer because everything's down. So you're relying on-- sometimes we go down and the sheriff department's still up or sometimes they go down and we're still up. But again, sometimes it could be the cable company that provides our Internet or our phones. We use D&P or it could be on the other side of the state somebody was doing a construction job and hit a fiber optic line and took out all of us. So I mean, we have those-- obviously, those are circumstances beyond our control, but it can be an officer safety issue.
Context_of_Work - Risk-Safety	COMMS	S	Other Public Safety Personnel	36-45	11-20	Male	COMMS-S-001	[S3] So our department just made the decision recently to give every person that's on patrol a cell phone from the agency. They're doing that for a couple reasons, one: they can't have the excuse of I didn't have the ability to make a phone call. But it's also a lifeline as well in that case, if you really need it. Our county is so big geography-wise that people can be out in places where there-- we have 95% coverage from our radio system, which is significant. I mean, you don't really find radio systems that high. But the fringe areas that our county patrol works in are the 5% that you don't really get it so you need to have an alternative way of communicating.
Context_of_Work - Risk-Safety	COMMS	S	Other Public Safety Personnel	36-45	11-20	Male	COMMS-S-001	[S3] Well, so if the big one really does happen within [application name] there's a status board, right? So if you're online literally, right, you have the ability to connect. You'll update your status. So that's a pretty operational thing that we've worked out. That way if you don't check in we know that there's probably a problem, right? And now we can start to understand situationally that, "Hey we have three cities on the west-end that haven't checked in. That's probably where a significant amount of damage is."
Context_of_Work - Risk-Safety	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S2]... Now, moving across to the other side of the room and what [Name] said, we have dispatchers- lots of places have call taking and

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								dispatching by same person or split. So, we got the dispatcher talking to the field units and of course they have a different responsibility to make sure that they are responsible for the safety of the officer that's answering the calls and then to make sure that the information that comes from the person on the phone to what the officer gets in the car is correct.
Context_of_Work - Risk-Safety	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	I'm 52 years old and I really don't want to keep doing what I was doing when I was 20. So this position came open and I migrated to here because I was really the only one that knew the CAD, knew the communications center and all that stuff, so we hired a new so I help him. The fire department, the fire chiefs, once I came from there [indiscernible] we need policies on how you want this truck dispatched on calls, how many trucks do you want dispatched on this type of call, this type of call, we built all those policies, and then it's easy for me training my dispatchers. If you're within policy, I got your back 100%. You violate policy; you're on your own. APCO; you APCO a call correctly and we find out the APCO codes need to be updated, you're covered. You don't use them, or don't do them, you're on your own, I can't protect you.
Context_of_Work - Risk-Safety	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	Mine's antiquated, that's why we're replacing them. So another good thing about going to the new systems is we're replacing very old antiquated systems. A trunked 800 works a lot better than our portable or our mobile repeater system, it's either you do or you don't, there's not multiple a lot of places to go, so the new technology is safer for the crews, it's more apt to work -- you know all the stuff is great, it works, but some of the stuff is 10, 15 years old and so we're - and its ageing.
Context_of_Work - Risk-Safety	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	Making sure that the deputy that's responding or fire service, EMS, whomever that we have responding, gets there and have the direct avenue to get there, the perfect location, have the correct information on, as far as if it's safe to enter or is it safe to go in, and do you need backup.
Context_of_Work - Risk-Safety	COMMS	R	Manager	36-45	11-20	Male	COMMS-R-011	So protected. We don't know it's raining outside unless we hear the water dripping in the gutter [inaudible]. So it's kind of comical

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								sometimes. A lot of people, they can't get over it that we work in a building that has no windows. But at the same time it's kind of a safeguard more than anything, so it's pretty neat. It's pretty unique, if you will.
Context_of_Work - Risk-Safety	COMMS	R	Manager	36-45	11-20	Male	COMMS-R-011	... Let's take in-car cameras for instance, just on a vehicle, on police vehicles right now. They expect a lot of dispatchers to watch, for officers' safety sake, they're in a traffic stop. But if you have three different officers and you only have one dispatcher, which one do you watch, number one? Number two, what about the trauma on the dispatcher God forbid something goes awry? If the dispatcher sees the law enforcement officer doing something wrong, that's blatantly wrong, that's malfeasance in office, that person's just as much on the hook as the, I think it's going entirely too far.
Context_of_Work - Risk-Safety	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	... We have multiple screens to deal with, so now we can look at everything all at one time instead of closing one thing down, opening another, closing. And the computers are much up to date, so they move a lot faster, and we don't have to worry about officers being in danger 'cause our computer is frozen, we forgot where they were, or having to go to paper and then back, back and forth from the computer to paper.
Context_of_Work - Risk-Safety	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	Basically the radio, and it's been the same since I started working, your main priority is the officer safety. So they don't want you answering phones, which we still answer if it's too busy. But you're going to be the last person to pick up the phone
Context_of_Work - Risk-Safety	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	Which that's typically not a problem, but if it's a subject that the officer is potentially in danger from, like we're dealing with somebody that's like a murder suspect, we don't know, we got an agency saying oh, you've got to send me a teletype. So that tends to be frustrating. And other times you have other agencies, if they're calling for a warrant, before they even handcuff the guy, even if they're in danger from this man, they want the warrants in their hands, when we're trying to express you're putting your officer in danger. It's just different ways, different agencies communicate, which this agency, we tend to be more, best way to

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								describe, I just described it to one of my trainees.
Context_of_Work - Risk-Safety	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	It definitely does because if you aren't asking what that person, what they, you need to find out, or you need to tell your deputy, then you have a lack of communication 'cause that person is failing to tell you. And at the same time you're putting your officer in danger 'cause you don't know what's going on.
Context_of_Work - Risk-Safety	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	So in a non-ideal call it would be, okay, well can you walk outside and tell me, you know, do you see a number on the house or a mailbox or anything like that? So that's my main stressor like I always want to make sure I'm at least getting somebody to the right place. And also that whenever they get there the officers are going to be safe also. That's important, too.
Context_of_Work - Risk-Safety	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	I guess that's the point that I look at it from because I've been there and I don't want something out there that's going to harm them or harm their responsibilities because to me the most important thing that-- responsibility that we have is protecting the officers, the deputies, the firemen, paramedics that are in the field, protecting them as they're responding to these emergencies. From the very questions that we ask to the technology that we use, that's the most important piece of... information that--or... that's the most important part of our job.
Context_of_Work - Risk-Safety	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	Location is number one. We can dispatch. We can do anything else in the world with that call if we have the location. But getting that location is just paramount. We can't do anything if we don't get a location. Finding out what's going on and who's involved. What hazards are there whether it's a police call, law enforcement call, or a fire call, medical call, still finding out what hazards are there that can impact that responder going or the people around that event. And then giving them the basic instructions to help themselves before we arrive.
Context_of_Work - Risk-Safety	EMS	U	Not specified	Not specified	21-30	Male	EMS-U-001	All this safety component to that. Because when you're by yourself treating in the back, 9 times out of 10, you're probably standing. And because you're by yourself and you're trying to access head to toe. And

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								try to access and re-access, and treat, and provide comfort, and start doing your paperwork, all the things that happen. But with two sets, two people in the back when they can both in essence-- "Okay, you take the head, I'll take the feet, and split the torso down in the center," and maybe be seatbelted in.
Context_of_Work - Risk-Safety	EMS	U	Not specified	Not specified	21-30	Male	EMS-U-001	Tracking individuals, we have some capability to do that. Well, the radio system has some capability to do that. We have not started to use that functionality, but being able to not just know where an ambulance is on the map, but being able to see where those medics are as they're [crosstalk] [inaudible] for safety, and even for response. If we've got responses going out where we have people on foot out walking around at a venue or walking down [Street], to be able to say, "Hey, there's a guy with a gun at the next corner." The PD has a gunpoint stop or, "Hey, there's a guy at cardiac arrest. We need-- I know you're walking," [crosstalk].
Context_of_Work - Risk-Safety	EMS	S	Field Responder	26-35	6-10	Male	EMS-S-016	Not in a place that they could-- someone could flee and then attack us. So we were somewhere nearby, we heard that, and then we could get to the scene within 15 seconds. So we cut down on that transmission just by having that radio link.
Context_of_Work - Risk-Safety	EMS	S	Field Responder	26-35	6-10	Male	EMS-S-016	...But it'd be nice to know that in the Metro, radios will always work or in elevators, radios will always work. Because if we were in an elevator and a patient fought us, we would have no way, until the elevator stopped and we could get out, of letting anyone know that we were attacked. So that is a little bit problematic. I mean, after 10 years you can kind of see where calls are going, so I would not get in an elevator with someone who was even remotely questionable. But sometimes you don't know. I mean, they could just have a problem and don't like small spaces and you don't know until you get in there. So that kind of thing gives me a little bit of heartburn
Context_of_Work - Risk-Safety	EMS	S	Field Responder	36-45	11-20	Male	EMS-S-014	...If we feel that our life is in danger, then our first priority is the first responders. If we feel so inclined, we will exit the scene. We will call for a police officer to show up on the scene. We have certain things in place,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								some nomenclature that will say, "Hey, our lives are in danger. Please get police here right now." We would back away, protect ourselves, and then call for police.
Context_of_Work - Risk-Safety	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-015	But the police could be there for 15, 20 minutes, and the assault person be another state away. But while they're doing their reporting and talking to one another, they don't realize that we're sitting two to three blocks away, so it may take me to call and ask, "Hey, are the police there? Did it?" "Oh, yeah, yeah. You can come in." To find out that it was safe the whole time. So there is a delay in that...
Context_of_Work - Risk-Safety	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	[RE: trip reporting] ...Some agencies have ways to track how fast you're going. If you make dangerous turns at high rates of speed, that kind of stuff. And the ambulance, some of them have cameras in the ambulance. Some of them have-- some paramedics have cameras now. No place that I've ever worked, like the cop cameras...
Context_of_Work - Risk-Safety	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	[RE: trip reporting] ...some places have ways to transmit like the EKGs. So you take an EKG of a picture of somebody's heart on the ambulance, you can transmit it to the hospital. The agencies where I work, we don't have to do that because we have a relationship with the hospital that they trust that we can interpret it as well as they can interpret it. What we're saying is happening is what is happening. So I haven't worked in an agency where you have to transmit it before. Some places you upload the EKG into the trip report and then I have had that, and other stuff that you upload. And it's mostly to try to protect you...
Context_of_Work - Risk-Safety	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	...They keep trying to push safety... safety in the ambulances. So ambulances aren't really safe. They're basically... like plywood on a pickup truck chassis. I mean it's really not the-- and they crash, and people die all the time. And they crash on the most routine things. And they crash for the same reason that anybody else crashes. They fall asleep, or somebody runs a red light, or somebody doesn't run a red light, or a tire blows, or patient jumps out of your ambulance in the middle... or something. I haven't had that. That's a career ending call [laughter]...

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Risk-Safety	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	...so they keep trying to do these things, and I think they're trying to do it with safety in mind, but they're not really keeping what really your day-to-day job is in mind. So the safety hinders you from doing your job. So right now, let's say we have 15 ambulances. We might have a little more or a little less. We might have closer to 20. So we have one ambulance that has this newer technology, and everybody hates it. And so it's set up differently. The chair you sit in is different. The place where equipment is is different. The idea is to be safe, and I appreciate that. But moving equipment around messes with your mind memory. So you're like, "Wait, where is the--"
Context_of_Work - Risk-Safety	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	You need stronger ambulances. You need ambulances that don't explode. Not explode, but break apart when you crash. I mean, it's like driving around in a camper. So that would be more helpful than affixing me to my seat better and making me do my-- not be able to do my job as well...
Context_of_Work - Risk-Safety	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	I think also there's a whole side of technology, but I'm sure they can do a study that said if you get to the scene and you realize a patient is sick, and you need to go emergent back to the hospital, then you spend less time at the scene. You package up the patient. You put the patient down in the ambulance. And you start driving, and you never turn on your sirens. You would get to the hospital just as fast as if you get to the scene and go, "Oh, my God," and get in the back, spend 10 minutes or 12 minutes trying to do something with the patient before driving 60 miles an hour through lights. That, I bet, they would show that the time was the same, and the outcome was the same, and there's less crashes when you're not driving emergent. I just think there's ways to-- some people think that the lights and sirens are there to save people's lives, and it really-- there's 1% of the calls, 2% of the calls, where it can make a difference. So that's where maybe people could chill a little bit and use research to prove something.
Context_of_Work - Risk-Safety	EMS	R	Other Public	56-65	31-40	Male	EMS-R-008	[RE: using unreliable technology] They won't do it. I mean, I can't make any of my employees do anything. Okay. They're here 24 hours a day. I've

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Safety Personnel					done their job. It's not easy. If you throw all kinds of harder stuff to make their job harder on top of it, it's not going to work. I mean, I can put all of the sanctions and rules and everything I want on it, but I have to motivate people to want to use this technology and show them the advantage of using it. We get paid faster. We can post statistics that show us what we're really doing, how it's useful. But if it's not to them, what's in it for them [laughter]?
Context_of_Work - Risk-Safety	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	Yeah. They commute to work here. So I don't like that, but I don't have a lot of choice. My people live as far away as [City]. That's 150 miles. [City], we've got a bunch of people that live in [City]. We do 48-hour shifts, and so they can come up for 48 hours and they're off for four days. So they can make that work. And I can buy a house on the [inaudible] for half of what-- or a third of what you'd pay up here. It's just the cost of living and the amount of-- the portion of your salary that it takes to buy a house or buy a car, any of the sort of the big ticket items, has risen so much.
Context_of_Work - Risk-Safety	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	Yeah. The tax payers say, "How much do you get paid to be a [Job title]?" That's how we have people because almost everybody has a working spouse. Well, it's tough to have a working spouse when you're away from home for 48 hours at a time, especially if you have a family. So it's tough.
Context_of_Work - Risk-Safety	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	[RE: frozen towers] we wait until it warms up and it falls off. But in an emergency, sometimes we have to hire a helicopter. Sometimes we go up in a snow cab or the technician does. I mean, that's dangerous, expensive work. And the radio system is kind of like your iPhone. You shut it down and people are like, "Whoa. What happened [laughter]?"
Context_of_Work - Risk-Safety	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	...Because I wasn't kidding about the 50 car pile up that happened. And if we're up there with all kinds of emergency equipment, we can't talk to each other, that's a problem. If somebody gets hit by a car and we can't call for help, let somebody know, that's a huge issue for us. The certain frontier areas of the county, I mean, we're kind of used to. You don't have anything out there so we just kind of go out there ready for that...

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Risk-Safety	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-005	...And then just a lot of conversation with everybody, really, and, first of all, how I can help the officer. And then how can I help the newer member fit in with that role and understand that my job is to kind of know what the officer is thinking so that we can make decisions really quick? Even on an EMS call, if the environment gets hostile, just being aware when to stand up and step away, or when to ask your officer for help. When do we need more help? Things of that nature. Do a lot of-- that's probably my biggest role in the backseat is just bringing reality back to situations because we tend to always win in our trainings. We always come out successful and it's just not the real world, so.
Context_of_Work - Risk-Safety	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-005	...For me, in my perspective, like I said, I'm really based on reality, and been a paramedic for a while. I don't care. All I want to know is, what equipment do I have to wear? Do I need a black coat or EMS coat, or do I need my fire coat? That's really the only thing that matters to me. Now, I need to know if the scene is safe. That would be nice. If there's a hostile party, are we going to-- is it so bad that we're going to wait for police to get there first, even though the call is for a baby not breathing? We have that luxury here. Not everybody has that. Now, some people want to know more. They want to know if it's a adult or a child. Breathing, trauma, they want to know. For me, it doesn't matter because, so often, the information that dispatch is receiving from people is very much exaggerated. "Oh my God. There's blood everywhere." "Well, compared to what you're used to, yes, there is blood everywhere. But it's right here and it's right here. It's not that bad." So that stuff really does never-- I don't have a lot of value in that...
Context_of_Work - Risk-Safety	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-005	[RE: rig flip phone] It has numbers that I don't want on my phone. I don't want me-- or if my kids are playing with my phone, I don't want them to accidentally call the mobile stroke unit, you know [laughter]?
Context_of_Work - Risk-Safety	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-005	...I mean, it went from that to then having computers get dispatch information and with the GPS technologies, able to automatically be on scene within 500 feet of something, which has its own problems of its own. To now, I feel like our department kind of underutilizes technology

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								for that. Yeah. It could be so much sharper. I mean, I get text messages from my ex-wife more than I would like [laughter]. I can't get information from dispatch straight to me that says, "Hey, this is a dangerous--" without having to make it out loud and everybody hears it [laughter].
Context_of_Work - Risk-Safety	EMS	S	Field Responder	46-55	Not specified	Male	EMS-S-006	I think about what it is that the radio system's always has their challenges in different reception areas and different parts of the county or response district. I think, always, at fires it's an issue. And I think with communication specifically, when you have-- let's take a first alarm assignment of firefighters inside of a residence, you could have 16 or 20 folks inside of a residence with radios on, which need to be on for their safety as the incident evolves. When you get all the feedback and the squelching and all the background, the ambient noise, anyways, and communications is always an issue of fires, specifically.
Context_of_Work - Risk-Safety	EMS	S	Field Responder	46-55	Not specified	Male	EMS-S-006	I mean, I've been on structure fires where either it's stabilized or you're asking for specific resources, and you can't transmit out the radio. So either it's a connection issue or somebody's walking all over you. And so, any needs that you need in the short term are not being met because you can't talk to your supervisor. Which 90% of the time, it'll be consequence-free. But we don't live in best-case scenario worlds. So I think we want 100% and I think we won't accept anything less than 100%. So it makes a lot of people's jobs difficult to try and improve the system. And thankfully, we have a lot of people working hard at it, but at the end of the day, it's a matter of life safety that is on the line, so I don't think you should ever get comfortable with that.
Context_of_Work - Risk-Safety	EMS	S	Field Responder	46-55	Not specified	Male	EMS-S-006	I haven't ran any, but we've had a couple instances, one very recently, where one of our paramedics was involved in an altercation in the back where the patient was fighting and biting him, and he was trying to get out on his radio. And I don't know if it was lost in the system somewhere or whatever the case was, but it wasn't until another crew in their firehouse was listening to the radio and pretty much stopped the systemic response and just told our fire dispatch, "Hey, we need police at this location emergent right now for a patient that's involved in an

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								altercation with a paramedic now." ...
Context_of_Work - Risk-Safety	EMS	S	Field Responder	46-55	Not specified	Male	EMS-S-006	[RE: emergency radio communication] ...Because, obviously, the system is in place--which is a good thing, and there's policies and procedures in place, but a lot of times, I think when it's retroactive to the effect of if one of us needs help, we need it now. And it looks good on paper to have these policies in place, but I don't care. I just want the help I want and need right now. So I think there's always a time delay in that... Yeah. So it's not that it's disheartening. It's just frustrating. I think it's frustrating for the end user when you need all that stuff now and it's, I think, hampered a little bit by policy and procedure, which needs to be in place. So it's a Catch 22.
Context_of_Work - Risk-Safety	EMS	S	Field Responder	46-55	Not specified	Male	EMS-S-006	I came from very small single firehouse fire department, mostly volunteer, to start and it was one radio amongst the entire fire truck. We had a county-based notification center that was not a really dispatch center for fire. So it was really self-made. So you live or die by the decisions you make versus when I come here, it's very systemic with policies and procedures and guidelines and very rank-and-file. And the guidelines are all put in place for you to just try and apply those guidelines to your daily routine and incidents you respond to.
Context_of_Work - Risk-Safety	EMS	S	Field Responder	46-55	Not specified	Male	EMS-S-006	I do think drones have a place in the fire service. I think video imaging and infrared, or thermal imaging with drones can be a hugely beneficial, safe, efficient operation. I know they're starting to play with the thermal imaging inside of masks and stuff like that. I think that could be good. I think hands-free wireless communication would be a fantastic thing. But those are just the outside-the-box spitball ideas.
Context_of_Work - Risk-Safety	EMS	S	Field Responder	46-55	Not specified	Male	EMS-S-006	[RE: flip phone] It's a department-issued cell phone for communication. So we use that to call the hospitals. We use that if a patient needs to call somebody to arrange a ride or let them know, so we're not having to give them our personal cell phones and them having our numbers and coming and killing us.
Context_of_Work -	EMS	U	Field	26-35	Not	Not	EMS-	[S4] Yeah. You've seen a lot of that happen, where a lot of the rundown

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Risk-Safety			Responder		specified	specified	U-004	neighborhoods that were located on the east side, the Crip territory if you would, a lot of that is-- I mean, they're still your pockets of gang territory, but at the same time, you're seeing a lot of different cultural backgrounds move into the area and vice versa as well. And I would say that with the part of the neighborhood as well. And so I think that that is one thing that you're saying. I know talking to-- I've only been working for the division for seven months as an ENT, and throughout those seven months, I have heard the dangerous calls and the precautions that were taken in the past and now how those have been sort of put to the side. I would say, a more general feeling of safety, but not every call, you're going to have police attached to it. There's still those flagged, I guess, addresses if you would.
Context_of_Work - Risk-Safety	EMS	U	Field Responder	26-35	Not specified	Not specified	EMS-U-004	[S3] ... Certain things we get is body armor. As the world has gotten more dangerous, we now have rifle vests. We have ballistic helmets. We have gas masks now, and that's a new technology, and we have, they're called, Skeds. It's basically just a plastic sheet that you can put people on in rapid extrication from a tactical scenario, and we had some training in that a couple years ago.
Context_of_Work - Risk-Safety	EMS	U	Field Responder	26-35	Not specified	Not specified	EMS-U-004	[S2] ... So, if something interesting pops up, he doesn't know, so it doesn't get relayed to me. For example, one call I went on was a cardiac arrest. Okay? Sounds fairly simple. Bystander is doing CPR. Fantastic. Great. I heard my CAD system bloop, so I got to look at it. And now it said, patient's awake and kicking the crap out of the person doing CPR. So now, it's an assault. So now, I'm not going to go in there with all of this gear. I'm going to wait for PD to arrive because there's an active assault going on and that scene is no longer safe for me. Had I not had a CAD system, I never would have known that, and I would've walked in in the middle of this altercation and could have been a victim myself. So it's a safety thing also.
Context_of_Work - Risk-Safety	EMS	U	Field Responder	26-35	Not specified	Not specified	EMS-U-004	[S2] ... So, if I can do that in real time by myself, because all I'm doing is sitting there as my partner drives me to the scene, it helps me make decisions like, "Do I need to request PD before I even make the scene?"

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								Oh, my patient is 500 pounds. Let's get fire go into that because I'm not going to be able to lift that person with my partner. Oh, there are weapons on scene? Cool. This develops into a psychiatric situation. Maybe I'm going to go in a little bit more guarded than I would have before." It can be as simple as this is the address you're going to
Context_of_Work - Risk-Safety	EMS	U	Supervising Field Responder	46-55	21-30	Male	EMS-U-010	...I can tell you that for large-scale events, from the command side of things, I would like to see or have some type of a [inaudible] saying, "Okay, you know what? These ambulances are coming from this direction and these ambulances are coming from this direction. Where can I place them so that they don't running into each other or direct them [crosstalk]?"
Context_of_Work - Risk-Safety	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	Just recently in the last couple of months, we've been told that if we do get a subway call we have to get a firetruck or an engine truck, a company with us, for line of communication. So it will be the ambulance, and then it will be the company of the firetruck in the subway station because we have one fireman up at the engine, and then we'll have a channel called fire, and we'll be able to communicate through a fire line. It's a short-distance channel. We're able to communicate. So kind of like telephone, we'll have one channel to the fire station and to the fire channel, and then back to the firemen that's up on top who can communicate to the alarm office, kind of like that. And that's just recently in the last few months we've been told to. If we get a fire call or a medical call in the subway, we have to get a fire truck with us, which is great.
Context_of_Work - Risk-Safety	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	[RE: using radio to communicate with dispatch] We're supposed to use it all the time. There's a memo out there, there's an order out there that we've got to tell them. We have to tell them we're on the scene. We're facing northbound, [company]'s on the scene. I think it's a personal thing. It's my personal thing. I do follow the orders if it's nothing really busy going on. I will say, "[company] northbound. We're on the scene." and I want to make sure they acknowledge. But if it's so busy out there, that's my personal thing. I'm going to make sure I'm going to hit that

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								button. Did they acknowledge? Okay, they acknowledged me. If I'm in the call, whatever, radio traffic has subsided, "Hey. We're on the scene." "Okay. I got you on the scene." Cool. It's a safety thing too, because they're monitoring us. They want to make sure that we're safe. That we're on the scene. And also too, they want to make sure that we've made it to our patient. So they want us to say over the radio. Tell us we're on the scene. But there's only one channel. There's only one EMS channel.
Context_of_Work - Risk-Safety	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	...If I could be in the subway and just know that I could communicate with them if that wave is stronger. I know that I'm in a high-rise and I, "Main, can you hear me?" "I can hear you crystal clear." compared to other places where, "I can't hear you. Can you get a better location?" And it happens. It happens in the subway or a high-rise. I want to know deep down that, you know what, if there's something like some type of technology ways that they could come up with where it's a stronger signal that I know that at any point they're there for me...
Context_of_Work - Risk-Safety	EMS	R	Field Responder	18-25	5 or less	Male	EMS-R-018	At my other job the stretchers on our ambulances are not like here. They lift up on their own and all you do is just pull them out and then you press a button and they go down so you never have to lift which is a huge deal on your back. I mean they'll lift 700 pounds or 800 pounds really so that's huge. I mean you don't have the issue of throwing your back out you know trying to lift a big patient, having to call for extra trucks but it's just you know it's money.
Context_of_Work - Risk-Safety	EMS	R	Field Responder	18-25	5 or less	Male	EMS-R-018	Out here you get taken hostage something happens to you and you can't get out what are you going to do? You going to crawl till you get service somewhere? I mean so it's the communication technology is pretty primitive and nobody seems to want to pay the money to fix it because it's not a big deal to the commissioners. You know they can't just spend the money on it so I fear it'll take somebody getting hurt or a lawsuit of some kind because the crew couldn't get somebody out ended up passing away or having long term effects from a stroke or something like that, the crew was trying to get on the radio, couldn't get out, the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								family sues. I think you're going to see something like that that's going to change this before pleading with the administration to change it.
Context_of_Work - Risk-Safety	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	Rewarding, exciting, stressful, frustrating that's about it. That's all I got at the moment.
Context_of_Work - Risk-Safety	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	It does pose an issue. As far as I know no one has been hurt because of lack of communication but there are definitely calls where you need to be in touch with dispatch. That's your really that's our lifeline. If we get on scene and we have a lot of psych calls so if we get on the scene and there's a psych patient that is planning on hurting themselves, hurting us we're the first people a lot of times that have contact with them and if we can't if they don't know for instance they don't know it's a psych patient, if they do they try to send out the Sheriff's office but if they don't we get on scene and we realize oh, this is pretty bad and we need help if we can't communicate with them they have no way of knowing. And then in that 10 minute timeframe or whatever it is that they go by has to pass before they and they don't communicate with us before they say okay we need to have a deputy check on them and reality ten minutes could be way too late so for us to not have communication is really bad not for just our safety for our patient's safety. If we get on a scene and there's a cardiac arrest or something like that and we need backup if we need an extra set of hands someone my partner and I both need to be in the back of that truck with the patient we're going to need someone else to drive and we tend to back each other up when we have calls like that but if it doesn't dispatch out that way and you don't know until you get on scene and then you can't get out to your dispatcher you're kind of on your own.
Context_of_Work - Risk-Safety	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	We do. There are times when the radio is just really static so dispatch tries to keep a list of who is on the truck each particular day and has our cell phone numbers and sometimes they'll request that we call in because there's information they want to provide over the radio that they don't want the general public to hear especially in a rural area like this everybody listens to the scanner so they know what's going on before

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								we do sometimes and there may be especially a lot of our elderly patients they may keep a key hidden somewhere for us to get access to the house. Those aren't things that they can say over the radio so we'll try to call them on our cell phone if we have service to do that.
Context_of_Work - Risk-Safety	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	I don't mind using my personal cell phone. It hasn't come into play yet but I would assume that there is always that possibility with using my personal cell phone to communicate with dispatch that maybe it could be taken if anything should go to court. It could be confiscated and then I lose my phone and all the information in it.
Context_of_Work - Risk-Safety	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	A better radio would be the biggest thing. If that is the only thing if I could only have one thing it would be a radio that we don't have to worry about not working because there are times when it's just extremely dangerous to not have it.
Context_of_Work - Risk-Safety	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	...When I talk to that person inside, I really need to know who it is, and if something were to go wrong, then I'd be able to ask much better questions. Because if Engine One is in trouble, and I don't recognize that Engine One was the first engine on the attack line and something goes wrong with Engine One I might-- but it just helps me-- well if they're on the attack line, then I know they're probably closest to the fire. That means they're in the most danger and if something were to happen, then I could direct other crews, "Hey, we're missing Engine One personnel, follow the hose line." So I have to keep track of who's doing what.
Context_of_Work - Risk-Safety	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	...So if we had helmet cams on everybody where that was translated into, Here's what's going on," so now not only you're words are telling me but I can see it also, that would be awesome. We're getting to a place where we don't know where our firefighters are inside, really, and they can tell me.
Context_of_Work - Risk-Safety	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	Yes, location detection. So seeing where they are at, I know that our new air packs have the ability but the software isn't there yet. So to send out how much air they have, that's a really big deal because as people get close to low on air, it doesn't tell me where they are in the building, but it

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								tells me how much work time they have left.
Context_of_Work - Risk-Safety	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	So the downside would be your battery runs low, and the thing that I most count on and for them to be able to give me a can report, and if my batteries are dead and I don't have a backup battery, that's bad. Now I'm out of the game.
Context_of_Work - Risk-Safety	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	...Because if we have a notion of, "Hey, this is explosive, it's a gas call," we're going to use the sense set which detects gas and figures out what the hazard zone is so we can make sure nobody gets in, and then go and solve the problem. Because we don't have the ability to do with our eyes or nose, we have to use monitors... And as soon as the fire is out, everybody would come out of there face piece and then they do what we call overhaul or salvage work, and then they go, "Oh, we got this monitor now and it measures carbon monoxide." "Oh wow, carbon monoxide. There is a lot of carbon monoxide here." "Okay. Well leave your mask on until that's zero." Because that makes sense, if it combines with your hemoglobin it could be bad news for you.
Context_of_Work - Risk-Safety	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	"Now it's at zero." "Okay, you can take your mask off." And then they did a hydrogen cyanide monitor, and now we have both. And we go in and go, "Oh, my gosh, now how do we have hydrogen cyanide? Put your masks back on [laughter]."
Context_of_Work - Risk-Safety	FF	U	Field Responder	46-55	21-30	Male	FF-U-002	A fireman get hurt and killed or get lost and I'm lost in a big building and I say, "Come help me, come find me". And they say, "Where are you"? And I say, "I have no idea." Why can't find me off this thing? If it was my cell phone, you could find me.
Context_of_Work - Risk-Safety	FF	U	Field Responder	46-55	21-30	Male	FF-U-002	Okay. So if I'm starting to have collapse, then I have to worry about bringing people out. I have to protect my people now. And I'm going to get them to areas where they're not going to get caught in a collapse. And that's not just the building, that's around the building because the building is going to fall over.
Context_of_Work - Risk-Safety	FF	U	Field Responder	36-45	11-20	Male	FF-U-003	No. I'm afraid to wear one because if it melts in my ear, then—[talking about an earpiece]

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Risk-Safety	FF	U	Field Responder	36-45	11-20	Male	FF-U-003	I have seen a couple guys do it, but it doesn't make any sense to me. I'm not going to have anything melt in my ear. And I have burned my ears before, because our hoods, they're good, but they only last so long and I burnt my ears pretty good a couple of times. So if I had a piece of plastic in there I feel like it would just melt in my ear.
Context_of_Work - Risk-Safety	FF	U	Field Responder	36-45	11-20	Male	FF-U-003	Yeah [laughter]. Well, with the heat index. It's probably 98 in the heat index. It's triple digits anyway so, when you're wearing that gear, you're going to lose weight.
Context_of_Work - Risk-Safety	FF	U	Field Responder	26-35	11-20	Male	FF-U-004	But I'm a little nervous about-- well, it's new equipment. We had some time to play with it. We've had a few times, now, where there's been some issues with a few of the radios, and batteries, and stuff like that. And some of those issues are not known until after the radio's been used for a little while. So like we've had a few radios now, you turn them on, they just turn themselves off. And that wasn't immediate. So I tested the radio. I turned it on and it was working and it was working fine. I handed it off and a few days later, like, "Hey, this radio just stopped working all of a sudden." So there hasn't been any-- it hasn't had a negative impact yet as far as there's nobody's safety was compromised because of it yet, but it does make me nervous that-- and we're currently trying to just figure out what the issue is and if it was just a spontaneous thing with one radio, or is this going to start happening more?
Context_of_Work - Risk-Safety	FF	U	Field Responder	36-45	11-20	Male	FF-U-007	It was definitely a good thing. I remember we had, not long after I started, someone was on the tip of aerial ladder, and far enough away that you can't really holler at somebody or can't be heard very well, just using hand signals and injured himself just on the ladder when somebody moved it, thinking that that's what he was trying to communicate. And so if he'd had a radio in his hand, that probably wouldn't have happened.
Context_of_Work - Risk-Safety	FF	R	Supervising Field Responder	46-55	21-30	Male	FF-R-008	would be probably be the bigger issues. We're very fortunate here that we get call takers that are really good at what they do, and they try and get information and they push it to us. Whereas in some cities, because of the volume and their staffing they may not get the same information.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								It's just, "Okay, where's the call, what's going on?" So I send them resources and then we're done. And then you end up with a shooting, a stabbing, you walk into the middle of something that you really wish that you--
Context_of_Work - Risk-Safety	FF	R	Field Responder	26-35	6-10	Male	FF-R-009	Yeah. And I don't know who's that to blame on because we'll get information sometimes from dispatch just on our CAD that will say, "You got a 60-year-old female. She said she needs help." And then that's it, and then she'll hang up the phone. So we don't know anything else. We don't know if it's an assault or there's a person with a gun, if we need to be staging, stuff like that. That's something, I don't know how you would fix that because they call the people back. They call the number they got the phone and they'll just say they didn't pick up. So that's kind of where that ends.
Context_of_Work - Risk-Safety	FF	R	Field Responder	26-35	6-10	Male	FF-R-009	So calls like that, yeah. I think that's where our protocols come into play. On the way to the call, you can tell them kind of what to expect. You need to be worried about the baby but if the baby doesn't make it, you need to start worrying about the parents. Stuff like that. There's been some calls at, [inaudible] calls, where you get kind of just nervous because they tell you the scene is safe because the cops cleared it, and you get there and you realize this scene is not safe at all. So stuff like that.
Context_of_Work - Risk-Safety	FF	R	Field Responder	26-35	6-10	Male	FF-R-009	So you're already there. So this usually happens-- we have like four rodeos out here. And they're like Hispanic rodeos, where they just bareback ride bulls and just outrageous stuff. They're all on horses. It's like this old country store, people get shot and stabbed, and just crazy things happen over there. So you always know, "Today's Saturday, they'll probably go there. Just because it's a Saturday." So for instance we went there. It's probably three weeks ago I was on the squad and [Event].
Context_of_Work - Risk-Safety	FF	R	Field Responder	26-35	6-10	Male	FF-R-009	So we staged because the cops said, "We don't have the guy yet. So just get back," because everybody was yelling, "He's got a gun." That was on the call text, too. So then they say it's clear and we go in there, and there's probably 10 to 12 horses. People riding them and they were just

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								going back and forth while we're trying to walk to this call because we drove as close as we could. But you get there and nobody cares. I mean, it wasn't safe pretty much is just the bottom line
Context_of_Work - Risk-Safety	FF	S	Field Responder	Not specified	31-40	Male	FF-S-040	...But other times, we find ourselves in very dynamic situations where there's a lot of risk involved. So my job is to try to figure out the best way to mitigate the incident with a minimal amount of risk to my people and the citizens that have found themselves tangled up in the situation. So that's what my job is, is to try to make people's lives better while protecting them and protecting my guys in the process.
Context_of_Work - Risk-Safety	FF	S	Field Responder	Not specified	31-40	Male	FF-S-040	...I'm wearing my self-contained breathing apparatus, I can't see anything. If my radio goes out of range of my trunked radio system and I can't communicate, I can just take my mode knob and rotate all the way until it stops, all the way to the right, and now I'm on a simplex channel.
Context_of_Work - Risk-Safety	FF	S	Field Responder	Not specified	31-40	Male	FF-S-040	The two people always go in. And then if you're in that high rise or wherever you are, and you find you don't have coverage, somebody basically has to walk back out to find coverage, use a cellphone, or pick up a landline phone to communicate what they need, if they need help or whatever. So that's the most challenging circumstance, is when you got those two person crews, everybody goes into the incident, and then they find themselves out of coverage. So that's, from a fire rescue perspective, the trouble scenario.
Context_of_Work - Risk-Safety	FF	S	Field Responder	Not specified	31-40	Male	FF-S-040	...The other thing, even if it does make the cut, it's more wires. And everything that I put on me that involves more wires is just more places for something to snag me and cause me to get entangled in stuff I don't want to be entangled in. And even if it doesn't entangle me, for me just to damage it inadvertently because I get it snagged and then I pull away and I cut the wire or pull it out of the port it's plugged into to or pull the whatever it's connected to off of wherever it's supposed to be.
Context_of_Work - Risk-Safety	FF	S	Supervising Field Responder	46-55	21-30	Male	FF-S-041	Yeah. So one, life safety is our biggest concern. So if [City] is on the phone with the person that's calling the house fire, I hope [City], our communication, and dispatch, tells me, "I'm on the line with the person.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								They're the only person that lives there. They report everybody out of the house."
Context_of_Work - Risk-Safety	FF	S	Supervising Field Responder	46-55	21-30	Male	FF-S-041	No. Instead of me coming to the scene, there's fire in the building, and I say, "Oh, man. There's a car in the driveway. Oh, man. I don't know. All right. Well, people are going to have to make a risk assessment." And if I don't need to make that risk assessment, my life's better because I don't need to injure anybody. So are all the occupants outside of the building and accounted for? Okay. What's on fire and where is it? Are we talking about an outlet that's on fire, or are we talking about a kitchen that's on fire? Okay. Are we talking about, is it in the second floor bedroom? Are we talking about, is it in the basement? Okay. And if it's in the basement, do we have a walkout that I can quickly go into? Or is there no walkout, and I've got to go down that hot steps to fight this fire? So our biggest thing is life safety, incidence stabilization, and property conservation.
Context_of_Work - Risk-Safety	FF	U	Field Responder	26-35	11-20	Male	FF-U-042	And we've actually had that issue on a fire and it was a fire where we burnt some guys up pretty bad too--
Context_of_Work - Risk-Safety	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	..And so they slowed down the train. And first, they told me that all the trains were stopped. I think it was bad terminology because we're sitting there, all of a sudden here comes this train.
Context_of_Work - Risk-Safety	FF	S	Field Responder	18-25	5 or less	Male	FF-S-039	Yeah, definitely. It definitely requires a mutual trust. And I think that a lot of times people do it because they've seen that they can't necessarily have that trust all the time. And a lot of times people would rather rely on the expectation that you can't trust the units because it's probably safer that way, right? So you can't blame them for that. For saying, "Hey, if I don't tell them to do this it might not get done." Versus, "If I tell them to do it there's a little more radio traffic but I know it's getting done." So they have to weigh that in their heads...
Context_of_Work - Risk-Safety	FF	U	Field Responder	46-55	21-30	Male	FF-U-030	So the fire service, we used to be able to monitor-- we used to have annual industrial-hearing testing. And the industrial hygienists were able to find out-- they could tell you without seeing that part of the form, how long you had been in the fire service by where you were on the hearing

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								chart, and how much hearing you had lost... Just again, air horns, and sirens, and chainsaws, and all of that stuff.
Context_of_Work - Risk-Safety	FF	S	Field Responder	46-55	21-30	Male	FF-S-031	And you do not know the risk.
Context_of_Work - Risk-Safety	FF	S	Field Responder	46-55	21-30	Male	FF-S-031	... The other opportunity where there's a problem is if you get so focused on this piece of technology trying to log on, you're missing key information as you're going to the scene or potentially could be missing key information, as well as personal safety. If I've got my head down looking at this thing, and my driver's concentrating on getting through traffic, I'm not able to help him drive because I'm not looking around at potential problems of traffic control. So the reliance on him to be the sole responsible driver, when I've got my head buried, that could potentially be a problem.
Context_of_Work - Risk-Safety	FF	S	Field Responder	46-55	21-30	Male	FF-S-031	Health [laughter]. Basically, safety and health is basically the research that's being done for cancers and--
Context_of_Work - Risk-Safety	FF	S	Field Responder	36-45	6-10	Male	FF-S-032	So typically on large-scale incidents, or typically on any incident where we have a challenge or where we have a significant issue where we harm or kill a firefighter, the communication is almost always identified after the fact as one of the contributing factors to it. So day-to-day, small incidents, pretty routine. Larger incidents, very, very limiting.
Context_of_Work - Risk-Safety	FF	S	Other Public Safety Personnel	36-45	11-20	Male	FF-S-033	...So you got your radio in your breast pocket, and then the cord because that's the speaker. So that we can also hear-- we have to have the speaker close to our face so we can hear and then talk into the speaker. But those cords aren't rated for heat. One huge place where those radios can fail is the cord. If they're exposed to 160 degrees, they could fail.
Context_of_Work - Risk-Safety	FF	S	Other Public Safety Personnel	36-45	11-20	Male	FF-S-033	... Because we're driving a little bit quicker, and we're sometimes going through red light. And sometimes other people would panic when they see us. And that can cause accidents. Well, if a drone can get there and we see, "Oh, it's not on fire," everybody can reduce to non--
Context_of_Work - Risk-Safety	FF	U	Field Responder	46-55	21-30	Male	FF-U-034	...And somebody says something, but I'm not on the right screen. I got to-- it's just very cumbersome that what happens is I'm focused on this,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								and I'm not focused on this. And it's a huge-- I think it's dangerous personally for us. Because a lot of what we deal with here on the streets, deal with assaults. And the scene in one moment can be fine, and the next minute things go bad. And I've got as one less person, especially as a supervisor, I'm not watching this. I'm sitting here trying to peck through this [inaudible] tablet that's frustrating the hell out of me. So that's my biggest frustration
Context_of_Work - Risk-Safety	FF	S	Not specified	Not specified	Not specified	Not specified	FF-S-035	[S4]...And there's a global fire service culture, emergency responder culture, but there's different cultural flavors within those organizations. I would say for the most part, my observation is that we are-- there's a lot of risks. There's humility in our organization, and a lot of respect for that respect that we get. I try to live by-- try to be worthy of the respect that I get from the people - that's my goal - and not take that for granted
Context_of_Work - Risk-Safety	FF	S	Supervising Field Responder	46-55	31-40	Male	FF-S-038	...Or if it's a known problem house that the police have identified as say a drug house of some sort, that can be added as a premise note. So maybe our guys are just going to an aid call to this address, "Oh, look at that. Here's a premise note. This is a known drug house to the law enforcement. We need to use extra caution because of that or stage out and wait for police to get there before we do." So there's a lot of different things we can get through that.
Context_of_Work - Risk-Safety	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	...So it'd be nice to have a program that you can say, "Hey, [app?], let me see all of his certs. And one they're his certs, too. What are his credentials? And how long has he been on? Any injuries? Any exposures? How did he do on his physicals?" So then you can say, "All right. From this guy in [City] compared to this guy in [City], how do they match up?" Same firefighter, but a little bit different elevation. That's when you really start getting-- and you can see trends. Why are these guys in Chicago having heart attacks, where the guys in [City] are not? What's different? Do they fight more fires? Are they not changing out their gear? ...
Context_of_Work - Risk-Safety	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	And so a lot of firemen do the strap because their radios aren't rated to 1,300 degrees like our bunker gear. We had a fire six years ago where

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								the cord melted on the radio... So when the cord melted on the radio, that's what actually put the radio into emergency. And then that's how we knew that somebody was hurt. And so now, a lot of guys are wearing their radios inside their coat to protect the radio and to protect the cord, and then just having the mic sit on the outside. But again, that stops all of the functionality of the radio. You can't change channels. The noise-canceling is now buried in your coat. And so there's a lot of things, I think, that could be fixed with the radio.
Context_of_Work - Risk-Safety	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	Exposure Tracker. We use Exposure Tracker because the CAD and-- the CAD sends us to calls, but the scheduling is what schedules you. And so there's no real direct tie-in between your name and the call that you ran. And so we use a web-based program, which has an app called Exposure Tracker. And it's just on your own. It's your own responsibility. And we track, so we're supposed to go in there and put calls that we run on. So something that you may be exposed to, a hazardous material, you may be exposed to a fire, something like that. So you can actually track your exposures, personally, and then have that information if you develop cancer, or have a problem, or have hearing loss. So there's vision loss, hearing loss, cancer, all these things that you would then want to show your doctor, or human resources, or whoever that these are all the things that you've been exposed to over your career.
Context_of_Work - Risk-Safety	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	[RE: exposure tracker] You're not required to, but it's for your own safety. It's your lungs. It's your body. They said we have an individual that we didn't have a history on him, and he lost his hearing a long time ago and had no recourse.
Context_of_Work - Risk-Safety	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	[RE: exposure tracker] And then we just had a guy that came up with prostate cancer, and it was before all of this. And so he doesn't have a good record of the calls that he ran on, things like that. I would say the follow-through is probably 50/50 on whether guys are doing it or not...
Context_of_Work - Risk-Safety	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	Keep up with the world. Somebody's building something new. We've got a company that just moved into our area that's doing research for-- it's the army. Yeah. They're trying to produce cheap power on an island. And

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								so they're using ammonia-- or no. Ammonia, wasn't it? Using ammonia to heat up a chunk of concrete and use that as a heat sink to then make steam at night. And so you're trying to learn all of these things that-- we don't need to understand the technology, but we need to understand the danger.
Context_of_Work - Risk-Safety	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	Well, we need to understand the danger of what they're doing. And so if there's a leak, and-- but the firehouse is neat. It's fun. It's never the same. You're doing something else every day. Some new company's moving in and you're being exposed to a new idea, a new concept, a new hazard. And now we're learning about the trains because commuter rail's moving into [City]. So we have to learn about how to de-energize it, how to lift it, how to work around something as heavy as a commuter rail train.
Context_of_Work - Risk-Safety	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	Well, there's too many people talking that are 20 feet apart. And they're talking because they're 20 feet apart because of the noise on the fire ground. Because in a hazmat suit, you're wrapped in a giant Ziploc bag [laughter]. So you're trying to talk to each other, and you're 5, 10 feet apart. Which, the technology also exists to communicate 5, 10 feet apart, but it's not integrated together. The stuff that's coming out, with the thermal imaging cameras, it's neat to have it in your mask. I don't know if it's necessary. It might bring a level of safety. But I don't know at that point, do you become sensory overloaded where you're getting information about where you're at, what's going on, when-- focus on the task.
Context_of_Work - Risk-Safety	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	[RE: prams/automated stretchers] I think that's huge. I mean, just the amount of injuries that that prevents. It's worth it... . I mean, you could lift up an 80-pound person and just lift her on and hurt your back. But it's just that there's a cost affiliated with that. And we're gradually getting there...
Context_of_Work - Risk-Safety	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	Or you could attach a monitor to the drone and do air monitoring... so you don't have to put one of us in harm's way.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Risk-Safety	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	SME S3: ...We had a car fire a week ago. Well, we went fast, but we didn't go lights and sirens, because it's not next to a building. It's in the middle of the street. It's a hazard for that person, and a hazard for that car, but it's not a hazard... SME S2: for the surroundings and everything else. And so there's not really a reason to put all the people in danger from point A to point B, because it was a non-issue. The car's already on fire... SME S3: It's already ruined. It's not a big deal. So you show up and you do that...
Context_of_Work - Risk-Safety	FF	S	Manager	46-55	21-30	Male	FF-S-023	...there was one when we actually got on scene and there was a gun in play and we didn't know that, and so... It turned out it was a non-issue but as we're walking in the door-- to get that information it just changes your entire environment...
Context_of_Work - Risk-Safety	FF	S	Manager	46-55	21-30	Male	FF-S-023	...In this particular case, one of the dispatchers on PD got bad information and thought that one of the buildings might have been occupied. We change our operations if we think there's people at risk. We'll very, very, very, very aggressive if we think people are at risk. As it turns out that wasn't the case, nobody was in either building. The PD didn't give that information to fire, but they aired it to a couple of their officers. One of our dispatchers happened to hear that and gave that information out. What they didn't hear was the officer said, "No, I have these occupants here."
Context_of_Work - Risk-Safety	FF	S	Manager	46-55	21-30	Male	FF-S-023	...at that time-- now this has changed, but at that time what happened is two more fire fighters went into the exposure building that was catching on fire, did a quick search but while they were upstairs it blow up on them. A lot of fire came down to the floor. Our more senior fire fighter says, "We got to go," ran outside. Well, he's fine at that point. Turns back and his partner wasn't with him. So he goes back in. Tries to call for a mayday, but his radio melted through. So he grabs his partner who was getting melted to the floor which is part of this too, so he grabs his partner bodily and it's kind of humorous because [Name], who's the hero here, he's only about yay high. He's a very small troll-looking dude, very, very strong. So he pitches out this guy that's taller than I am out the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								door. During that when his radio melted through, one of their two radios did an emergency broadcast and set off alarms. Well, [City]PD at the time just silenced those alarms and didn't tell anybody. So that was information that you might have helped [laughter]. Now, we fixed this, but there are other agencies that are of dealing with that I'm positive...
Context_of_Work - Risk-Safety	FF	S	Manager	46-55	21-30	Male	FF-S-023	...it was just a few weeks ago we had a fire fighter hit the emergency activation button and now I need PD at this location and ran back because his partner in the ambulance was getting beat up... Sort of. I mean there was a fight going on. Well, now those emergency terms come to our center and it went up and they didn't hear what they needed because it beeps it goes, "Beep," and then it shuts and during that beep is when he said I need PD at that location... Our police department didn't hesitate, they went ahead and sent an officer, they started an officer that way and one of our other medics was getting a call at the same time and this was 2 o'clock in the morning, just happened to be scanning, heard that and let the police know what was going on...
Context_of_Work - Risk-Safety	FF	S	Manager	46-55	21-30	Male	FF-S-023	...That was 2011; we almost lost two. 2017, and it all worked out pretty well. But that had to deal with us coordinating those two centers. And like I said, that's our history. I'm sure this is a lot of people's present [laughter], having to deal with that kind of stuff.
Context_of_Work - Risk-Safety	FF	S	Manager	46-55	21-30	Male	FF-S-023	Okay. So here's another set of data that would be awesome. I've taken Uber and Lyft recently, and there's an application out there that will tell them where accidents are, and which roads to avoid. If that's out there, shouldn't we get that? Shouldn't we get that information back to the fire trucks and say, "Hey, look, this road's closed, we know this," instead of us having to it get into the system and type it in, because if we don't know, we don't know. But there's so many cars out there reporting so much information to so many people, road conditions are, I think, known now. It's just we can't get that to the responders. If we can get that road information up there I think that would make their responses more-- I don't think it would make it much faster, but it would probably make it safer.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Risk-Safety	FF	S	Manager	46-55	21-30	Male	FF-S-023	If I could know, as I'm coming into the traffic, one of our most dangerous-- so we lose firefighters mostly medical, with traumatic injuries driving to and from the fires. And then on fire scene is the probably smallest percentage but the most tragic. So responding is one of our most dangerous things. So if I could get traffic information as I'm coming up to the intersection, nobody stopping, we got a lot of people going quickly, warnings beep you got somebody coming maybe help slow them down. Or I've got two apparatus coming together, slow it down, that kind of stuff. So that kind of real-time information, I think that's the key, real-time information that's usable.
Context_of_Work - Risk-Safety	FF	S	Manager	46-55	21-30	Male	FF-S-023	So there's several different facets to that I think. I've been trying to look into the future, my IT administrator is futurist. So we talk a lot. There is technology that's coming, that's going to make us safer. Robots, drones, that kind of stuff actually doing some of the hazardous work. So there's that kind of technology that's coming. And it makes sense, you've got building on fire, it's just like a bomb. We sent robots to go defuse bombs, why not send a robot into a burning building? If it's not something we have to actively go search for somebody. That way if it collapses, what do we lose? ... A million dollar robot, who cares? It doesn't have a family, so there you go.
Context_of_Work - Risk-Safety	FF	S	Manager	46-55	21-30	Male	FF-S-023	[RE: UHU] So we're looking at like 30% during the day and 20% at night. That's kind of where our cautionaries are. Whereas private ambulances look at it, not as cautionaries, but as profit areas. I'm not trying to be negative. That just... --that's how they use it. Yeah, they use that to see their effective force and how it's making them money. We're looking at it as to how we're burning our people out. If we go too high, tired people make bad decisions; bad decisions kill people. So we look at it from that direction. So it's just really time on-scene over overall time.
Context_of_Work - Risk-Safety	FF	S	Supervising Field Responder	46-55	21-30	Male	FF-S-017	Sure. So usually what happens is, say we're going to a shooting, a party with a gunshot wound. We won't go in. We stage a way. Fire and ambulance stage a way, block two blocks away. En route, the officer on the engine or ladder truck will come up on dispatch and go, "Dispatch,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								tell me what PD channel and the officer in charge." And they'll be like, "Okay, go to PD3, Lincoln 27." So we'll switch over to PD3. And, usually, we have an extra radio in there or they'll use their portable to keep the rig radio on whatever TAC channel we're on. And then listen and listen to hear PD say, "Request entry." So they don't tell us it's clear anymore. They just will request entry when it's safe as it's going to be for us to come in.
Context_of_Work - Risk-Safety	FF	S	Supervising Field Responder	46-55	21-30	Male	FF-S-017	But a lot of people have the radio holder. Some people stick them in their pockets. We're trying them with the new microphones that have a higher fire rating, heat rating, trying to make sure that we have them in a place where you can get at them. They're not comprising the seal of your gear but we don't want the cords to burn through. We've seen some of the NIS studies and the line of duty deaths from that. So just trying to address all those through training too.
Context_of_Work - Risk-Safety	FF	S	Field Responder	26-35	11-20	Male	FF-S-018	Yeah. We have a newer fire truck, so it has a screen which shows which doors are open and all that. And it has all the interface to show you. I mean, it's new, it's nice. It has a screen and tells you a lot of information. You can click through that, cameras around the truck and stuff like that, which... It's a separate command zone. [City] fire trucks, they put it in there. And it has the cameras so you can see around the truck. You click your left or your right blinker out. Ambulances have that, too. The screen pops up and it shows just like a vehicle backing up. And then the right and left blinker shows the-- I think it's safer. It keeps us from accidents and all that, so yeah.
Context_of_Work - Risk-Safety	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	And that's just because of the [State] Open Records Act. So within [State] Open Records Act, you can come and say, "I want to see your phone," and [crosstalk].
Context_of_Work - Risk-Safety	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	[RE: DOT] Yeah, we run to the calls. We provide the emergency services, but they're key for keeping us safe. I mean, getting traffic slowed down, putting out boards so that people know that there's an accident ahead. And they're actually responsible because of the way the [Name] tunnel works. It's very unique to this state. They actually have the responsibility for fire protection in a small section of the state.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Risk-Safety	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	[RE: training] And of yourself, you're an asset to yourself and not a liability. You don't want to be going into a fire the first time, and you're still fighting with your helmet or your boots or whatever.
Context_of_Work - Risk-Safety	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	And so whatever we can do to keeping people safe or detection of stuff, things that are bad for us, because we don't know until after the fact. Like asbestos, it's not till a week after or a month after when we've done what we can, and we've found out, oh yeah, the place was full of asbestos. Well, great. Well, we hope we followed best practices. But there's something real when you know, well, the danger's here right now. We can deal with that... So I think just some of that awareness or something to help us be safer...
Context_of_Work - Risk-Safety	FF	U	Field Responder	46-55	11-20	Male	FF-U-020	[RE: LE multiagency terrorism information] ...it could be anything. "Hey, a firefighter had his equipment stolen out of his car." Doesn't seem like a really big thing until, from an intelligence aspect, you start saying, "Well, we have an event coming up over here." And if a firefighter's gear went missing and somebody was wearing that, could they just gain access into this event? So we will then take this information which has been disseminated to key individuals, and we will pass that throughout our organization and say, "Hey, look out for this." Or I might coordinate with the [Name] security to say, "Hey, we have a Knox-Box key," which is on every building. "So, hey, one of our Knox-Box keys was stolen. So you need to--"
Context_of_Work - Risk-Safety	FF	U	Field Responder	46-55	11-20	Male	FF-U-020	Really, I mean, just from a basic level, when I first came on, only the chief and the company officers would have a radio. Now, everybody has a radio. Everybody also has a voice amplifier that's hooked up to the face piece that allows us to communicate face-to-face easier. While I'm talking like this [laughter] I now have the voice amplifier which makes communicating face-to-face easier in a-- what we call an IDLH environment. So--
Context_of_Work - Risk-Safety	FF	U	Field Responder	46-55	11-20	Male	FF-U-020	[RE: hazardous construction features] So they share that information with us. And so there's a lot of-- recently, we had a firefighter fatality two years ago and that firefighter fell through a roof in a warehouse. What

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								we didn't know was that up on top of the roof, a lot of these places were using-- just like a sunroof, they used corrugated Plexiglas that looked like the corrugated tin and they were putting it on top of these roofs to create more sunlight. Well, the firefighter was walking across the roof just like he would on the corrugated metal piece and stepped on the corrugated plastic and went straight through. Yeah. So subsequently after that, we found a tremendous amount of buildings around that had those because we were like, "Holy cow, where are these things coming from?" ...
Context_of_Work - Risk-Safety	FF	U	Field Responder	46-55	11-20	Male	FF-U-020	...So now with that, in addition to looking for that specific problem, one of the things that we did is on our software in a program that we were using called Firehouse, which now we're using a different program, we created a safety hazard box, which is-- essentially, if I go on a call and there is a safety hazard, I can click that box and write in what that safety hazard is. That safety hazard, when I click that, gets sent to the highest levels of the [City] Fire Department. The chief sees it, the deputy chief sees it. The division heads see it and some key other people. And that safety hazard will be immediately looked into.
Context_of_Work - Risk-Safety	FF	U	Manager	46-55	11-20	Male	FF-U-021	...then from there, I'll go to speak with all the rest of the team in administration of what's going on with modified duty because we're in charge of that. So every day, how many bodies do we have broken, who's off, who's not, when do they go back to the doctor's, our paperwork filed properly, am I going to have any problems with risk management? So we try to stay on top of that. And then I'll meet with or get on the phone with risk management because obviously, cancer is something that's, unfortunately, becoming very prevalent now. And we've got quite a few people that have cancer right now. So I kind of give them updates of people having a problem with billing and things in that nature, so we can get that taken care of. And then kind of, just start the day after that, so.
Context_of_Work - Risk-Safety	FF	U	Manager	46-55	11-20	Male	FF-U-021	...There's also a lot of stuff on-- my passion's auto-extrication and there's a lot of stuff out there that are in the form of applications but there's nothing that we're utilizing right now. So to give you an example, the way

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								technology is changing with car stuff either being hybrid or fully electric, there's a lot of dos and don'ts and it's good to know where those components are shutting off the vehicles, the high voltage versus medium voltage versus low voltage. There's schematics that are available in these apps where you can pull up any type of car and automatically know where the high voltage is running, where you can cut it, where you shouldn't, where fuel lines are, things of that nature. So does the car have one battery? Does it have two?
Context_of_Work - Risk-Safety	FF	U	Manager	46-55	11-20	Male	FF-U-021	...So the big thing is in the past, you may or may not have chalked a car whether it needed it. But if you have a hybrid, you don't hear it running. You don't chalk the car and maybe you're just going to put spreaders and move it away from the Jersey barrier to get someone out that doesn't need to be fully packaged and put on the backboard. They can walk, but they just can't-- you don't want them to open the door on the busy side. We've had instances, not here but in the country, where they moved the car away and the car goes driving down the highway because it's silenced.
Context_of_Work - Risk-Safety	FF	U	Manager	46-55	11-20	Male	FF-U-021	Not as much as I would like us to. That's something we teach now to new hires in the academy but just like communication technology, automotive technology is no different. I mean, you had a car with two airbags two years ago. Now you have a car with 20 airbags. So is it a one stage? Is it a two stage? There's capacitors involved, how long do they hold electrical charge? So there's a lot of things that can hurt us as firefighters, and it's something we need to be more diligent about...
Context_of_Work - Risk-Safety	FF	U	Manager	46-55	11-20	Male	FF-U-021	Yes. [inaudible] rescue, repelling off of a high rise building to a window washers that are stuck on the 30th floor. There's communications involved in that, so there's a lot of stuff that you need to be very good at. Rope rescue, high lines, just rigging the system. If you're thinking about weights and thinking about redundancy and how are we going to-- it's easier to get them down there, how are we going to get them back up here. So there's a lot of training when it comes to that because those are things that aren't very frequent and those are the things that are going to

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								get you hurt. So they're very infrequent types of calls so you need to train on then frequently, so then when you do get that incident you're ready.
Context_of_Work - Risk-Safety	FF	U	Manager	46-55	11-20	Male	FF-U-021	...And that's just a good officer showing the new person, "Hey, you got in here, did you catch how we're going to get out of here?" So let's say the front door is blocked, what's our second means of egress? Were there bars on the windows? Is there propane stored here? A lot of things. What can hurt us here? And hopefully that sticks so that way when you're there or maybe you're there with someone else that has never been there, you can, "Hey, by the way, the second floor that's not very stable, we were in there." We have hoarders, so a lot of things that can really hurt you, so that's just important that you pay attention to all the small little things because the small things can add up to make a big difference.
Context_of_Work - Risk-Safety	FF	U	Manager	46-55	11-20	Male	FF-U-021	Is it a risk for flashover, to get people out. Exactly. Construction types, so knowing certain types of construction, obviously there's a lot of lightweight stuff now that's very dangerous, buildings go up quick and they come down quick. So it would be helpful to have stuff like that. A little bit more fingertip knowledge right there.
Context_of_Work - Risk-Safety	FF	U	Field Responder	36-45	11-20	Male	FF-U-010	...And that typically goes well. But if there's kind of a heightened incident, it seems like sometimes, the communication between those two is lacking because they're both trying to catch up on their side of the incident. And there's been cases where we've shown up to a police matter like a shooting or a stabbing and not realize what we were going into until after the fact.
Context_of_Work - Risk-Safety	FF	U	Field Responder	36-45	11-20	Male	FF-U-010	Yeah, like I was talking about, you know some of those incidents where you get there and you find out that this is a police matter or we got dispatched for a small fire and find out it's a big fire when you get there [laughter]. Things like that.
Context_of_Work - Risk-Safety	FF	U	Field Responder	46-55	11-20	Male	FF-U-011	It just gives you a sense of security when you're in there.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Risk-Safety	FF	U	Field Responder	46-55	11-20	Male	FF-U-011	Green, yellow, red. And by the time you get to red, you're going to get your Viber alert, and then you got to grab your buddy. Two in, two out. So you grab your buddy. You let your officer know, and then you report outside. Change your bottle. Go back in.
Context_of_Work - Risk-Safety	FF	U	Field Responder	46-55	11-20	Male	FF-U-011	It's a safety. Yeah. We're not allowed to be-- you always have to have a buddy.
Context_of_Work - Risk-Safety	FF	U	Field Responder	46-55	11-20	Male	FF-U-011	The only example I could give you is Lyft and Uber, because before with a cab, because they were marked yellow or they would actually say, "Taxi," if you're driving code three, you would know that maybe that person might be stopping for a fare or something. But now any other car could be Lyft or Uber and they do that. They're going direct and they just stop, all of the sudden and you don't--you're not expecting that. So in that sort of way, technology has gotten in the way.
Context_of_Work - Risk-Safety	FF	U	Field Responder	46-55	11-20	Male	FF-U-011	Because in the radio-- that dispatch knows that that radio's assigned to whoever's on that roster. So if you go missing-- God forbid you go missing on a call, they will know who's missing.
Context_of_Work - Risk-Safety	FF	U	Supervising Field Responder	46-55	21-30	Female	FF-U-013	Well like with our radios and stuff, sometimes they don't work when you go below grade. They don't work some in the high-rise because the concrete and so then that-- and that for our job realistically, 99.9% of when things go bad is because communications has either been nonexistent or muffled or miscommunicated or something. It's something to do with communication... The basement's a little bit easier because it's usually only so far down and then you have stairs. So that's probably the biggest thing is when our radios don't work and then it's kind of like you're dead in the water because we really need to be able to communicate and orchestrate stuff because that's where the danger is.
Context_of_Work - Risk-Safety	FF	U	Supervising Field Responder	56-65	31-40	Male	FF-U-014	Yeah. So I'm going to say that as a team, because I have somebody that's an operator or driver for me, and so we use an iPad that has technology on there that is sent directly to it from the communication center that tells me everybody that's going to an incident. And we take those units, and we put them into an accountability column so we know

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								where we've told them where to go. And if something was to go sideways, we would know where they were--
Context_of_Work - Risk-Safety	FF	U	Supervising Field Responder	56-65	31-40	Male	FF-U-014	...At some point, there's 120 radios there. And you know that some amount of people are going to try speaking at any given time, so the limitations to the radio system, to me, are dangerous. Especially when we have a-- if we have our earthquake, or when we have our earthquake, because we're sharing that same trunk system with the police department, the sheriff's department, and the department of emergency management." And so lots of busy signals. And the busy signal is just that. You get a bong. A bong, so you can't communicate.
Context_of_Work - Risk-Safety	FF	U	Supervising Field Responder	56-65	31-40	Male	FF-U-014	I mean, I think, just from my perspective, that all of those are firefighter safety issues. And anything that goes along with improving firefighter safety: better ability to communicate, being able to transmit a radio message that gives me more accurate location of where they're at, and not limiting the number of people that could be communicating at any given time. I think those would all be a positive.
Context_of_Work - Risk-Safety	FF	U	Supervising Field Responder	56-65	31-40	Male	FF-U-014	. Being facetious, fires haven't changed, right? Fires start; we put them out. Fires have changed in that they are burning hotter because of what's burning compared to 25, 30 years ago. But the fire service has always been able to get by and skimp a little bit compared to the police department. And so what ends up happening is City Hall and bean counters know that they're not going to give the fire department very much, and so we're always on the tail of the police department and military technologies. And I guess, maybe the other thing, if you're looking for technology, although it exists, is probably better thermal imaging camera technology that would allow us to visualize things more from a distance that was more user-friendly. But that's rapidly evolving. It's happening pretty fast.
Context_of_Work - Risk-Safety	FF	U	Supervising Field Responder	56-65	31-40	Male	FF-U-014	It's a place that I would position myself that has a good visual of what is occurring, and I have control of everybody's-- that's there that's available to get an assignment. So not everybody that goes to a fire is given a job to do. You keep people in the on-deck circle. So I'm in a position of

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								looking at what's going on, strategizing where people go, listening to radio traffic, then I'll turn around to somebody, or an engine, or a truck and say, "You go into that building." And then my operator will document where they're going, and I'll communicate to their boss where they're going, "You're getting this engine company that's going in there." So it's a funnel. It's a pinch-point for managing resources. It's also a place that we account for everybody that's there as much as possible and where I'm directing or managing whatever it is.
Context_of_Work - Risk-Safety	FF	U	Supervising Field Responder	56-65	31-40	Male	FF-U-014	Exactly, and it's just really-- and I'll say the word frustrating. Nobody that's in the fire service will dispute the fact that fires are burning hotter, and with more energy, and more explosive in the year 2017 than they were when I first started. I mean, these chairs didn't exist 30 years ago. This material didn't exist. And you put a bunch of this type of material into people's homes-- go into your home and compare it to what it looked like. What you have - your television, your couch, your chairs, your furnishings - are producing [a sum?] exponential number higher of energy than they were 20 years ago. Yet the fire service is still-- not still. We are so far behind the power curve of trying to keep up with what's burning to the point that the number of firefighters that are dying are still, even though fires are way down-- the number of fires are way down. The firefighters are still dying at about the same level. And so you go, "Well, how is that happening?" Well, because fires are more volatile. There's less experience in the fire service because we're not getting the fires. So you put those two together, you cross those up, and you go, "Yeah, you're not going to fires, so you don't have the experience. And so when you don't have the experience, you're not picking up on certain things. And now you're entering into a more volatile situation."
Context_of_Work - Risk-Safety	FF	S	Field Responder	46-55	31-40	Male	FF-S-015	...Now we have 2000 channel radios. It's just the mindset of how we respond and how we attack each situation. And that's good because hopefully, it's preventing injuries and deaths, and we're taking a better approach to being safe and engaging where we need to engage and understand where it's not safe to engage and say, "It's not worth life or

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								property to engage in this particular issue at this point."
Context_of_Work - Risk-Safety	FF	S	Field Responder	46-55	31-40	Male	FF-S-015	...So they know that repetitive training that they do is they can go and get it. And they know where to reach and it's there. In a smaller cell phone, it's not as big. It's not there that they can reach. This is going to be down in a pocket, probably not as-- it's more sensitive to heat or water damage. And there's a lot of stuff that go into that tactile feeling comfortable and safe. Fire service, pretty funny about that.
Context_of_Work - Risk-Safety	FF	U	Field Responder	46-55	21-30	Male	FF-U-025	So what I'm doing currently right now is we are looking at-- I'm doing a lot of my research right now on cancer research. So I am trying to have a better understanding of cancer biology in metastatic state in reference to firefighters when it comes to constant environmental exposures when it comes to sleep deprivation, when it comes to stress with the calls, as well as when it pertains to our home life with our relationships with our wives and our families as well as side jobs. So that's kind of what I'm looking at, is the whole picture, the holistic look at cancer in the fire service and not just the byproducts of combustion causing mutations, but everything. So which is I think those are the areas that are missed. We focus a lot on the toxins at the fire scene, but what we don't look are our longevity profiles. We don't look at what sleep deprivation does. We don't look at-- we don't look at the stress that's caused by our job with just lack of-- not even just lack of sleep but lack of nutrition, issues with our home life and social structures, and just different things that just actually are major components to disease development in our line of work. So that's what I'm doing.
Context_of_Work - Risk-Safety	FF	U	Field Responder	46-55	21-30	Male	FF-U-025	the big thing that we don't really focus on, and I've been in this line of work for 28 years, when you're out in the field and you're putting the gear on, the tones go off, and you go, you're in what I would consider a-- you're in a soldier mode. You don't want to get rid of that soldier mentality because that's what helps us do the job. We don't want to have in our front set of thoughts, dangers of the job, in particular, to cancer causing ailments and all that kind of stuff or particulates because it would be immobilizing. If we focused on things that can happen once

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								we leave this fire house, then we really kind of run into issues of slowing us down in getting our job done...
Context_of_Work - Risk-Safety	FF	U	Field Responder	46-55	21-30	Male	FF-U-025	[RE: cancer causing ailments in the field] ...Now, I'm looking at those. When you're out in the field, that's all in your periphery. You're kind of not focused on that. But what's allowed me to do - and I've been in this for the last two years now - is I've been able to slow down. I've been able to take a few steps backwards and really look at what it is that is a problem out there. And one of our main things right now is being able to detox. You'll never be able to totally eliminate your exposures. It's just unrealistic. It's nature. It's a occupational hazard. But when we get into detox, how do we get rid of these toxins that are embedded in our adipose tissues? How do we help reduce our exposures? Those are key things. That's where I'm at.
Context_of_Work - Risk-Safety	FF	U	Field Responder	46-55	21-30	Male	FF-U-025	[RE: state of communication technology] I think it's good. I think at first, there was a lot of overtalk. There was a lot of-- everybody had a radio, so everybody felt like they should use it at first. So there's been kind of a transition of learning with that and more listening versus talking. So when you have a radio, a lot of times, it's really to listen to what's happening. Listening to the progression of the fire attack. Listen to what maybe could be dangerous about the building. Are there holes in the floor on the third floor? Are they getting the fire under control below you? Those kind of things, is the more listening when it comes to communications...
Context_of_Work - Risk-Safety	FF	U	Field Responder	46-55	21-30	Male	FF-U-025	...what's really advanced, too, or helped us, too, is that having everybody have a radio, now everybody has the capabilities of transmitting things that are dangerous, whereas, let's say, you and I were upstairs and we didn't have a radio, we may run across something that should be good for everybody on the fire ground to know, and there's no way of transmitting that. So that's really improved. So I think that's improved the safety of fire ground, and it's helped us really stay aware of our environment and the progress.
Context_of_Work -	FF	U	Field	46-55	21-30	Male	FF-U-025	...I think the tablets may have its benefits as long as they're durable.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Risk-Safety			Responder					That's big. That's big. And when you get to talking about us, if I have a radio that's expensive and something happens, I lose the radio or it gets stolen, the officer gets time. So it comes out of his pocket or he gets time with suspension. So that's a big concern, is that, say I'm an officer in engine, we get these new tablets that are easy to break. I'm not going to be happy about it because then now, that's something else I got to worry about. And when you're slinging tools around and your big concern is getting off this rig, putting your stuff on, and getting in there, you're less worried about delicate things. We're not delicate. We're just not delicate people. So when you put something on there that is a level of technology that is where we are today but is not durable, that's a concern for us as firemen.
Context_of_Work - Risk-Safety	FF	U	Field Responder	46-55	21-30	Male	FF-U-025	...now it's getting better with them letting us know that these are dangerous buildings. So that's kind of changed where if it comes in through dispatch that there's a fire in this building and an address, now our main office has addresses that are built into the computer saying that these are dangerous buildings, or abandoned buildings, and those kind of things - Those are good to know - or what may some of the contents in the building be. That's good to know. I think for me, as far as my experiences go, is it's good to know that. But at the same time, what's imperative for us to know are, is it unoccupied or an occupied? Are there occupants in the building? That changes our game plan. It changes our risks versus benefit, which I've talked about before...
Context_of_Work - Risk-Safety	FF	U	Field Responder	46-55	21-30	Male	FF-U-025	...there is a few incidences where we were caught into some pretty scary situations inside looking for potential victims, especially in occupied buildings. So situations where either it's unoccupied or the people calling in saying, "Hey. There's a fire at this address. No one's in the building," there's been a few times where we've been inside and we've been caught up in some scary situations where the people outside knew that there was no one in there, and we never got that information. Those kind of situations are critical because then, we wouldn't have been in those situations, and we wouldn't have been in there to where fires break

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								through the door and starting to fly down the hallway because we're in there looking for somebody. We wouldn't have put ourselves in that situation if we had known that there's no one in the buildings, so I think those are critical pieces of information.
Context_of_Work - Risk-Safety	FF	U	Field Responder	46-55	21-30	Male	FF-U-028	...I've had, again, the whole spectrum or they had from violent people. Caution the gunshot that the shooter may be on the scene. The fighting is still in progress. This person has a communicable disease, which is great information here before you can step foot and even open that door knob or take your first step into this residence, whoever they might be.
Context_of_Work - Risk-Safety	FF	U	Other Public Safety Personnel	46-55	21-30	Male	FF-U-029	Residential is not an issue, we'll supply the water for that. But when you're starting at large structures, number of employees, normal work hours for a building, so that we don't put ourselves in harm's way for no life-- we're not saving lives. Because I'm all for risk a lot to save a lot, but don't risk a lot to save nothing. In the fire service, we have a long history of people getting killed when there wasn't any lives to be saved. And sometimes, just to defend those people who lost their lives, sometimes the information wasn't there
Context_of_Work - Risk-Safety	FF	U	Other Public Safety Personnel	46-55	21-30	Male	FF-U-029	Yeah, and it's always a main concern. So if it was something that was really legible and bigger, but how big can you go? You can't have a 36-inch screen on a dashboard, so it's a catch-22, sort of.
Context_of_Work - Risk-Safety	FF	R	Field Responder	36-45	21-30	Male	FF-R-052	I guess if the prices of the gadgets weren't so expensive and/or if we as government entities did not always have to go with low bid type stuff maybe more people could have, you know, the better technology... and that technology may make the difference between whether somebody comes home one day or somebody shows up at their house to tell their spouse and their children that they're not coming back so.
Context_of_Work - Risk-Safety	FF	R	Field Responder	Not specified	Not specified	Male	FF-R-053	S4: And I mean from stone-age to not the latest and greatest technology but pretty advanced I mean kind of from upgrade and repeater towers and upgraded channels and that we can use and not used; it has come a long way. We can...back when I first started they were parts in the county

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								you got behind a ridge you couldn't get out, you were without communication unless you had a phone and that can be very dangerous in our world especially now.
Context_of_Work - Risk-Safety	FF	R	Field Responder	Not specified	Not specified	Male	FF-R-053	S4: Overdoses, we stage now where we get close to the scene and we park and we wait for law enforcement to clear the scene before we ever go on an overdose because of their medicines and the drugs that are out there, patients can be so violent you know; we don't carry guns but law enforcement guys do so.
Context_of_Work - Risk-Safety	FF	R	Field Responder	Not specified	Not specified	Male	FF-R-053	S3: Yeah we just wait for law enforcement. We stopped at a secure location where they can't see us or know that we have responded until the law enforcement gets there and clears the scene and their dispatch will tell our dispatch it is clear and then we can come in [indiscernible]
Context_of_Work - Risk-Safety	FF	R	Field Responder	Not specified	Not specified	Male	FF-R-054	And they said they were you know checking in, on I am coming on, I am good. At one point they said that there was the fire was completely raging and and all they could do it really just save yourselves, I mean you guys cant use firefighters in that wind; they will say it is unbelievable, and they sent me pictures and stuff of it.
Context_of_Work - Risk-Safety	FF	R	Field Responder	46-55	5 or less	Male	FF-R-055	Because some people are screaming hysterically, some are calm and then the scene is over, they go ballistic and they come after you or they just want to fight and you know and that's part of it, but I think a big part of it is you have to have a lot of heart. I think if you have the heart for doing and seeing people -- my biggest thing is they are on their worst part of their day, what can I do to make them at least relieve the pain or relieve the situation and I mean, just two weeks ago we had a house fire and we saved a cat and a dog, where they dog died but we got the cat and another cat and the people were poor. I mean, you can just tell, but they lost everything and it was like I was right over here in [town].
Context_of_Work - Risk-Safety	FF	R	Field Responder	46-55	5 or less	Male	FF-R-055	And [laughs] and there is fire all around and you are like -- oh, okay. [laughs] So --
Context_of_Work - Risk-Safety	FF	R	Field Responder	46-55	5 or less	Male	FF-R-055	It came too fast because that's what we thought but we were on this one ridge and we got it put out and we turned around and the other side

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								house is on fire. And then we were standing there and we felt stuff painin in the back of the helmet and I was like -- what in the world? I thought it was acorns or something. It was shingles flying off and hitting us in the head, off the roof and then guy that was with us goes -- look out. And that's all we heard and this tin roof went [whoosh] right over the top of us and it was about a 12 ft x 5 ft section. And if it had hit us, it would have -- it would have hurt bad, let's put it that way.
Context_of_Work - Risk-Safety	FF	R	Supervising Field Responder	Not specified	Not specified	Male	FF-R-046	Being a very active community we do a lot of back country rescue and communications again is one of our biggest issues so we kind of look at different ways that we can improve communications and have backup communications for those responders that are going out into the field because especially during winter with avalanches there's so many additional hazards that the responders face out there added on top of it so what we've been using between the radios, hand radio we've also started using [name] units which are similar to the spot units for tracking of our members and our teams.
Context_of_Work - Risk-Safety	FF	R	Supervising Field Responder	36-45	11-20	Male	FF-R-047	The only issue would be like me trying to drive and text or that's my biggest deal and I don't return half the texts you know because if I get here and I'm the first one I'm driving I'm in the truck and I've got it ready to go well then I have everybody texting or calling me I normally just let it ring or go because I'm trying to focus on my driving and getting to the patient or to the fire so I mean that's kind of a drawback you know where that app's a little bit nicer.
Context_of_Work - Risk-Safety	FF	R	Supervising Field Responder	36-45	11-20	Male	FF-R-047	That's something else though as far as technology would be nice to have but it's very expensive is being able to communicate from the driver to the guy on the back of my truck. Now they make the headphones and the mics but I think last time I priced them it was like close to \$3,000 per maybe set for truck but there's times that fire is roaring so hard and fast and loud and cedar trees are blowing up depending on where you're at you know but especially if you're out west on those big task force.
Context_of_Work -	FF	R	Supervising	36-45	11-20	Male	FF-R-047	We had a single cab pickup which I mean no air conditioner no nothing

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Risk-Safety			Field Responder					so I mean it was terrible especially in the middle of the summer but the one way we communicated because you may have your smoke mask on, your helmet, your no match hood and all that is banging on the roof of the pickup (00:41:18) to get me out of here you know just getting way too hot back here so if we had some type of a helmet mic system to where we could still be safe with our gear but have that earbud or something and be able to just be nicely talk to our driver and say get me out of there or get closer or we're out of water or something you know because the new truck that we got built is an extended cab and I got that for the reason was going out there you know a place to put all your gear because that bunk gear takes up a lot of room.
Context_of_Work - Risk-Safety	FF	R	Supervising Field Responder	36-45	11-20	Male	FF-R-047	We've had people spend the night out there before you know so they got a place to lay down in the backseat if they wanted to and then across the front you know and it has an air conditioner because you cannot with the sirens going and the windows down and the wind blowing in [name] you can't hear yourself think let alone the radio you know when you're trying to talk to people especially on the way out or home you know so I said my fireman are going to have an air conditioner I mean I've seen a lot of people get overheated you know and need to cool down so you need to have at least an air conditioner and a place to put an ice chest or water.
Context_of_Work - Risk-Safety	FF	R	Other Public Safety Personnel	26-35	6-10	Male	FF-R-048	First and for most I'd ask I want all my firemen to have brand new gear. I want them safe. I want well we've got a couple of the trucks that we need updated. Those would be the first things and then from there it would be the tools. It would be jaws, it would be just new hand tools you know whether it's [company] whether it's you know just I mean anything you know just seat belt cutters just stuff that you know we could equip all of our guys that way we're not searching in trucks going which truck is out again you know everybody's like okay I've got mine right here we're good you know just that way our new SCBA's, our air masks.
Context_of_Work - Risk-Safety	FF	R	Other Public	26-35	6-10	Male	FF-R-048	Well first off you get them here and second off you keep them here. I mean even a paid department you know just the regulations to drive

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Safety Personnel					these trucks if we were in [city] they ain't a person on this fire department that would be qualified because the amount of driving, training they require to do that. Now do I make sure my guys are safe before they go? Yes and I have a rule if they don't know how to drive it it's grass it's a house as long as nobody your safety is first. Leave the truck. Wait on somebody else to get here don't drive it. You know that's the thing you know if you don't know don't go in but it's just you know the amount of time it takes.
Context_of_Work - Risk-Safety	FF	R	Field Responder	36-45	21-30	Male	FF-R-049	Some people may be having to go to work in the morning I just can't go to that call and you really never know it's like a box of chocolates you don't know what you're going to get out here when an emergency goes out as far as fire goes and Metro [Name] where I work I know exactly what's coming because we have people) on that shift specifically for whatever response needs to be sent out so here it's I would say it's inherently more dangerous being a volunteer fire.
Context_of_Work - Risk-Safety	FF	R	Field Responder	36-45	21-30	Male	FF-R-049	Yes ma'am. As it stands right now when we're paged out to a structure fire the volunteer fire department is we have a fire channel which it is dispatched on which we go in route on which we get on scene and set on command on. Again there is the option of mutual aid channel but the way our radios are setup out here incoming units if they were on mutual aid and they're a certain distance out they wouldn't be able to hear vial information that command is trying to relay so it's you know it's a danger.
Context_of_Work - Risk-Safety	FF	R	Field Responder	36-45	21-30	Male	FF-R-049	It is and I stated maybe antiquated I'm not savvy enough to say how antiquated it is but we've had some upgrades but I think its been band aids. It's not been good fixes. We've been initiated some repeaters for the fire side of our county and you know been limited funding. I've had to climb a fire tower myself and mount a repeater and won't do it again.
Context_of_Work - Risk-Safety	FF	R	Field Responder	36-45	21-30	Male	FF-R-049	Considering I'm pretty sure the fire towers are condemned for climbing but we got it done. It had to be done.
Context_of_Work -	FF	R	Field	36-45	21-30	Male	FF-R-049	Tragedy's not you know just specific to one certain area. Really bad

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Risk-Safety			Responder					things can happen out here.
Context_of_Work - Risk-Safety	LE	R	Supervising Field Responder	26-35	11-20	Male	LE-R-001	Mm-hmm. And so when they're driving down the road, trying to get information via a laptop, it's much more dangerous than hearing it via the radio. And so trying to figure out where the balance is.
Context_of_Work - Risk-Safety	LE	R	Supervising Field Responder	26-35	11-20	Male	LE-R-001	And so, everybody having a device that they carry around is great, but it's also dangerous because if they lose it, that device is out there. And we can remote in, and we can get it stopped or whatever, but it's still the fact that it's out there. They're not going to lose the laptop. It's in the car, secure and stuff. So there's some good-- there's bad with good.
Context_of_Work - Risk-Safety	LE	R	Field Responder	18-25	5 or less	Female	LE-R-002	Yeah. But in the contrary, if they're very busy up there and they don't see that you've gone out on a traffic stop or something like that, it could be an officer safety issue.
Context_of_Work - Risk-Safety	LE	R	Field Responder	18-25	5 or less	Female	LE-R-002	Yes. And if it's a priority call-- here in the city, if they send me to a man with a gun call or something, the city's so small that I will be there within a minute or two, and if they're busy on the phone, they can't give me pertinent information that I could potentially look at.
Context_of_Work - Risk-Safety	LE	U	Field Responder	26-35	6-10	Male	LE-U-006	...I'd also want to know-- I mean just, again, as a course of business, I'd want to know where my backup is, how long it's going to take for them to get there, for my own safety or maybe it will steer how I respond to a call. That's it right now.
Context_of_Work - Risk-Safety	LE	U	Field Responder	26-35	6-10	Male	LE-U-006	I mean, pie-in-the-sky, I would like it to be delivered to me in some form of, I would say, a tiered-alert, meaning certain things should be classified as higher priority. They're assaultive, they've attacked police officers before, they've made threats before. I would want that delivered in some sort of readily recognizable emergency-type alert. Something that maybe is-- and I mean we have to be careful, of course, but maybe a medical condition, like they have Alzheimer's and they're known to walk off frequently and often they end up at the coffee shop. I want to be able to access that information, but that's secondary to anything that's going to get me hurt or someone else. So again, a tiering effect, and then something that's delivered to me instead of me having to request it and

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								wait for that response.
Context_of_Work - Risk-Safety	LE	U	Public Affairs	26-35	6-10	Female	LE-U-007	So I have a hard time trying to fit everything on my belt as required in policy. Especially if you're some of the smaller officers, male or female just depending on your waist size, it's like you don't have enough real estate to fit all this stuff that's required. So a lot of people have dropped tasers or that kind of stuff. Now they're adding the body camera's right here. And you have a radio right here. You have the mic. This is just here. And then you're like-- and then you've got your notepad. You've got your pens and then everything around your waist and your gloves. So I would hope that sometime the technology could help us remove some of all this hardware that we're carrying around all the time. That would be a big deal. I mean health wise for officers too. I don't know very little cops that have back problems or hip problems after years of doing this stuff.
Context_of_Work - Risk-Safety	LE	U	Public Affairs	26-35	6-10	Female	LE-U-007	Yeah. Because it just zips and then you have your wires hanging out the bottom. But you don't want them exposed or hanging out because that's an officer safety issue, too, people grabbing on them and stuff. They're pretty big. I mean their mics are like this.
Context_of_Work - Risk-Safety	LE	U	Public Affairs	26-35	6-10	Female	LE-U-007	If you have somebody in the hospital or something you've got to go sit with them. You've got to lug that thing around or lug it out into the jail. And then you're carrying all this other stuff. And then you got this. And your hands are full again. I mean, if you get in an incident, you're just going to drop everything. But still, that second that you take to drop something. So if we just had something smaller.
Context_of_Work - Risk-Safety	LE	U	Public Affairs	26-35	6-10	Female	LE-U-007	...You did not wear suspenders. It was kind of like not being the cool kids [laughter] if you wear suspenders. And this department is all about reputation. So you didn't want to be seen. But now I think it's becoming because some of the people have back problems. So it's a little more acceptable. The only downside, you can have some that are underneath your vest. But they're tricky to put on. Or you can have the ones that are over. But the downside in that is if you do get in a scuffle or something, a suspect can grab it and now got control over your belt and you. It [inaudible] whatever works for you as an officer. At least we know that's

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								it's there so that you can defend yourself. And be aware of that. Yeah. So light weight is good.
Context_of_Work - Risk-Safety	LE	S	Field Responder	26-35	11-20	Male	LE-S-033	I couldn't give you a specific example as when it has or has not caused problems. I know they frequently request our help with combative people and combative patients.
Context_of_Work - Risk-Safety	LE	S	Field Responder	26-35	11-20	Male	LE-S-033	I don't really care, one way or another. I think that the general public is going to start to see that the majority of the problems we have are the civilians and not the officers. And as a result, I think a lot less officers will find themselves in trouble because instead of a three-second video from a cellphone camera, we've got the entire incident recorded.
Context_of_Work - Risk-Safety	LE	S	Field Responder	36-45	21-30	Male	LE-S-037	Case in point is a lot of times the fire rescue system will stage to make sure the scene is safe. So we have to go in first, make sure it's safe, and then they can come in. So if you're on a scene of a major incident, a shooting, say, we've got to make sure it's safe for them. It makes total sense
Context_of_Work - Risk-Safety	LE	S	Field Responder	36-45	21-30	Male	LE-S-037	...It would be awesome to have that cordless opposed to a long cord that tends to either get caught in something or it can theoretically be used as a weapon against you, strangled with.
Context_of_Work - Risk-Safety	LE	S	Field Responder	36-45	11-20	Male	LE-S-038	I think it's an officer safety issue. I think that-- I know that-- I don't know exactly how the system works but I'm assuming you can't put towers everywhere. So I know that's an issue, but I think it's-- if I need something-- if I need help now, I don't have time to communicate to somebody else and have that person try to communicate what I just said to ECC.
Context_of_Work - Risk-Safety	LE	U	Field Responder	46-55	21-30	Female	LE-U-040	...There were three of us that responded. It's one of the townhouses with the door that's underneath the front steps, and it's an apartment and a house. Girl who her mom hadn't seen her in a while, supposed to be downstairs with her boyfriend, but she didn't know if she was there willingly. So we go upstairs. Do you know if anybody's downstairs? No, we don't know. It's separate. Go downstairs, knock on the door, nothing. Two days later, our SWAT team had to do an emergency warrant. The

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								guy was holding the girl at gunpoint. At the time, when we were standing at the front door, knocking, he was in there loading his gun. And he went to fire his gun and the gun jammed. And I always realize where I was standing, I would have made it, I would have lived. Probably the two people that were standing below me wouldn't have.
Context_of_Work - Risk-Safety	LE	S	Other Public Safety Personnel	36-45	6-10	Male	LE-S-027	Yup. Yeah. To dispatch and then to us. So we want everything we can get to get there, but the biggest concern is safety. So we want all the pieces that have to do with our safety, officer safety and victim safety. Location, where they're at in the house. Of course, how many weapons, I already said. It's one of the most important. Are they separated?
Context_of_Work - Risk-Safety	LE	S	Other Public Safety Personnel	36-45	6-10	Male	LE-S-027	Well, that's the kind of stuff. I mean, having access. The more the better. The more eyes on we can have, the more information we have, the better. Because we want to go home safe. We want the victim to go home safe. We want the citizens around to be safe, and we want to get the suspect into custody.
Context_of_Work - Risk-Safety	LE	S	Other Public Safety Personnel	36-45	6-10	Male	LE-S-027	Yeah, so many woods. So dense. It's hard. I mean, for us to go into the woods at night-- we have night vision and infrared here. We have goggles, which we use sometimes. I mean, I'd rather have the helicopters roaming around safer up there and giving us a more specific location, so we're not-- they can still hide from us, still hurt us, so.
Context_of_Work - Risk-Safety	LE	S	Supervising Field Responder	36-45	21-30	Male	LE-S-028	Yeah. But if I park my car and I get out, I don't know-- I know where that car is but I don't know where that officer is. And so I mean, I'm not worried about that in everyday stuff, but say we go out on a significant incident, and I have to deploy people out on a perimeter, it would be nice to be able to see on a screen where I've deployed those individuals on a personal device. And so that's where it would be nice to see technology in a way that we can then-- I don't think every one of our officers wants to be identified by GPS, but in the certain situation, maybe you can flip on everybody's personal devices to start screening GPS so that I can now see where all my officers are--
Context_of_Work -	LE	U	Supervising	46-55	31-40	Male	LE-U-029	Yeah. So I mean, if there are-- like for us there's what we call hazard

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Risk-Safety			Field Responder					flags on people and they call 911 to make a phone call to call about something and it'll will come up that, "Listen, this person is hazard to law enforcement. They've threatened officers in the past. They've fought with officers in the past. Somehow making sure that that gets to the officer that's going out to the burglary call.
Context_of_Work - Risk-Safety	LE	U	Supervising Field Responder	46-55	31-40	Male	LE-U-029	I think there's a lot of pros but my standpoint, I just don't want people to get overloaded with information. Sometimes you can. So I would love to come up with a way for communications to be able to prioritize on safety issues first. Because now they've got computers, they've got cell phones, they've got so much technology stuffed into the cars. And so I don't want that important officer safety to get lost in the snowstorm of information coming towards them.
Context_of_Work - Risk-Safety	LE	U	Supervising Field Responder	46-55	31-40	Male	LE-U-029	...And then some way to be able to prioritize so that somehow that anything that has an officer safety aspect to it is flagged. So it would be easy to miss it otherwise.
Context_of_Work - Risk-Safety	LE	U	Supervising Field Responder	46-55	31-40	Male	LE-U-029	Yeah. I mean, it's overwhelm-- you have so much coming at you that. For me, there will be times where you'll just kind of freeze for a second and then your training kicks in. Because, like I said, I was in SWAT and all that kind of stuff, that you just go and then you start recognizing, "Okay, listen. Break it down. Officer safety, that's number one. Public safety, that's number two."
Context_of_Work - Risk-Safety	LE	U	Supervising Field Responder	46-55	31-40	Male	LE-U-029	I'll make a quick assessment of, "Listen, is there an officer safety or public safety threat right this second?" And if the answer is no, it's going to be, "Stop," because sometimes people-- it's almost like it becomes almost like a fever of people start going faster and faster and faster and faster and it's like, "Stop." If you can get them to stop for just 10 seconds and it's like, "Listen."
Context_of_Work - Risk-Safety	LE	U	Supervising Field Responder	46-55	31-40	Male	LE-U-029	But from a safety standpoint, I really don't like people looking down. So the heads up would be fantastic. Like I said, in my daughter's car that we're buying her, I never have to take my eyes off the road to know, "Is my blinker working?" All of my dash stuff is right there. It's a Honda

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								Civic. I looked at that and I was like, "That's great." Because you can see the road. You're not looking down to look at your speedometer, or the temperature gauge, or any of that stuff."
Context_of_Work - Risk-Safety	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	...But now we put all this crap in here and when officers have accidents, and they have accidents, nobody has said this is safe or not. I'm sure there's been a lot of injuries from-- we don't look at that stuff when we buy this equipment. We just shove it in there. We just shove it in there and say it's good to go.
Context_of_Work - Risk-Safety	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	So somebody doesn't come out from the call and attack them and they're stuck in their car or they can't get out or get to their gun.
Context_of_Work - Risk-Safety	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	--this would fly out of it if there's an accident. This would become a projectile in the car.
Context_of_Work - Risk-Safety	LE	U	Not specified	46-55	Not specified	Male	LE-U-041	[S4] ...But they introduce other risks to the police officers from an access perspective, from a round-trip, timing perspective, and for the ability for everyone to hear the communication. Again, when you have that many thousands of-- like we said, the amount of radios that we have assigned, plus the vehicle radios, I mean, that's-- it's in the 40-plus thousand, 45,000.
Context_of_Work - Risk-Safety	LE	U	Not specified	46-55	Not specified	Male	LE-U-041	[S3] ...But it would be nice because there are still times a police officer will yell into the radio for assistance. He may be getting shot at. He may be in a very bad-- and we need to get their location, and the dispatcher needs to get their location, and it's still something that has to be said. The location needs to be said because we just can't see, "Oh. That radio transmitted. He's on [Street] and [Street]." Sure. I would--
Context_of_Work - Risk-Safety	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	[RE: apps] There is a DUI app, where it-- I've got it, but I use it more in a teaching scenario. And I tell people about it. But what it'll do is you go through it and you go through all the steps in a DUI process, and it will prompt you [inaudible]. Okay. Did you see it? Yes or no. And then it'll email you everything so you have a lot of stuff already filled up for your report. I like certain aspects of it, but I don't like using it on the street because I think you're too busy. You get dug into your phone and safety

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								issues. One called Units. And that just helps convert times, distance, weights.
Context_of_Work - Risk-Safety	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	Oh, no. I talk. I'm not bashful. My mouth gets me in trouble more than anything. I love teasing firefighters. I mean, I call them American heroes and Band-Aid throwers [laughter]. I don't care. I love having fun with them. And there's a former [Job title] now - he's retired - he and I would just start going at it. And it was all out of fun. But if you didn't know that, and the way we were going at each other, you'd think we hated each other. But it's breaking balls. We're out here doing-- they're different jobs, but they're extremely dangerous, and they're extremely important to society. I've been through training, the narc stuff, where you have to wear the respirators and the air packs and go crawling through smoke-filled buildings and-- no. Shoot at me. I'll take that. I ain't going in no fire...
Context_of_Work - Risk-Safety	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...it's getting to the point of there's so much stuff in the car. You're like Emerson, Lake & Palmer trying to go to a call. There's a computer here. And it's giving you dispatch updates. You've got siren controls. You've got a radio. You may have two or three radios. And then, what burns my ass is when dispatch tells to switch a channel. And you're like, "I'm doing 100... and I'm driving, and I'm dodging man, and machine, and [critters?], and everything. And then I don't blame dispatchers for this or people on the other end of the radio. They don't know what you're going through in the moment as you're trying to hurry up and get to call or hopefully save somebody. But there's tons of technology in the car...
Context_of_Work - Risk-Safety	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	The pain in the ass is the thing is clunky. It's got an old BlackBerry-style keyboard... I got big fingers, I got bad eyes, so little screen, and it's not user-friendly from the physical aspect of trying to look. And you're in a car. It's 2 o'clock in the morning. It's a well-known fact. People don't like cops, especially at 2:00 in the morning when you've pulled them over, and they've probably had a few pops in them. So you've got video in the car. You've got your radio. You've got your computer system, whatever the hell you want to call it. Hopefully, you've remembered to just turn your XM, or whatever the hell you got, Pandora down. You turn that

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								down. But you got to do all of this. You got all that going on in the car. You've got to keep track on your suspect, who's in his car, who knows he's going to county and may or may not want to fight you, and he may have something hidden under his seat. And you're trying to type an e-ticket...
Context_of_Work - Risk-Safety	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	[RE: e-ticketer] So then you're still-- at some point during that contact - and we do e-tickets for warnings and tickets - you're going to have to be focused on this damn thing. It's about the size of the original Game Boy.
Context_of_Work - Risk-Safety	LE	U	Manager	46-55	31-40	Male	LE-U-020	What they did is they've put up a silo because now the officers, boots on the ground, where they had the ability to talk to each other. They back each other up. They knew when each other was in-- that because they went on a different system, even though it's the same system, but it's theirs. And now the two cars can't hear each other. And it's been very difficult on the boots on the ground to say, "We lost this, and we can be right here and this other officer can be getting his butt kicked. And we don't know about it." It's going to take multiple phone calls to-- and then dispatches, and time. And it wasn't a good decision, but it was a political decision that they created our own silo. And that's tough, but that's what I'm hoping that FirstNet won't become as well.
Context_of_Work - Risk-Safety	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	[RE: cell phone use] I'm stubborn. I fought it for a long time [laughter]. I'll be the first to admit. I needed to call somebody back, I would go to the station and make the phone call from there. Since then, I've blocked my number. I understand there's electronic means to counter a blocked number, I just do that any more. Any more, that's just a part of life.
Context_of_Work - Risk-Safety	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	[RE: social media] We get a lot information about how to protect our personal accounts and stuff, so.
Context_of_Work - Risk-Safety	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	One thing that I thought of is-- and I don't know necessarily how to improve it, but you always have the issue of officers looking at the computer when they should be looking out the window. So a way to have a more heads-up display would be great, but I'm not sure--
Context_of_Work -	LE	S	IT	Not	Not	Male	LE-S-015	[RE: vehicle heads-up display] And we explored that technology a while

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Risk-Safety			Specialist	specified	specified			back. It's actually been a lot of years ago, and there was some issues with how you project it onto the windshield and where that camera placement is to project it. And if you're in a collision, you don't want any kind of equipment by your head, and then the other issue is the reflective-- if it's a light that's then reflecting off the windshield at night, it can be an issue too so. To illuminate the officer [inaudible].
Context_of_Work - Risk-Safety	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	... the radio, like I said, the bandwidth is such that we can get busy, and I have to make traffic stops where I cannot call out on the radio because I can handle the stop and be done before they're done yammering on about something... But at some point, you just go. I'm the only one taking care of myself anyway. Radios to have them come clean up. Nobody's going to get there before it's over anyways, so. But yeah, it is a safety issue, and that's just kind of where we're limited to.
Context_of_Work - Risk-Safety	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	We're in the process of-- just kind of rambling on here, but we're going to a regional comm center... It's been a two or three-year process, and they've had to fire the director a couple of times. But when that comes about, it will be the entire team of [county], ongoing CAD system, which is between police and fire, there's like 26 agencies. Which in my mind, is a very big step backwards as to where we are now because our dispatchers now know us. They can hear differences in our voices. They can tell when something isn't right. They have an idea as to how our city is laid out, how it works. And I think we're going to lose that when you go to a comm center...
Context_of_Work - Risk-Safety	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	...one of the deputies was in our city, actually ended up firing shots at a suspect. We got the call from another party in the house, and we were already responding had units on scene, before we got relayed that it was a [county] deputy involved, and then we've got the scene shut down. We're taking care of it when the Sheriff's Department and all their resources start rolling into the scene, and we're immediately screaming at them, "Stay in your car! Stay here! We've got this." We don't want any blue-on-blue stuff because you don't know where we're at. We don't know where you're going. Because in order to switch everybody to a

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								channel, it takes time. You would think that they could hit a button and do it, but it doesn't work and so... We just shut them down, we handled it, and then it was all face-to-face conversation, and it went through that way. And it got taken care of...
Context_of_Work - Risk-Safety	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	[RE: doing reports on tablets] The technology's there. If you could drop the tablet into a keyboard quickly, you could. Touch screening it on that tablet doesn't work very well. And then, officer safety issues. Some people are really old-school. "I can't do anything else. I write on a piece of paper." I don't do that. I mean, I'll do my ticketing with my handheld, and I walk up, and I'll have it in my hand the whole time, and I'll walk right there at the door and have the ticket done. But there's a mentality there that I think is going to prevent a shift in that direction for actually using the tablets like they are designed.
Context_of_Work - Risk-Safety	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	[RE: information from dispatch] A lot of that depends on having a good dispatcher that knows what they're doing is if they have the time to look up locals, if we've contacted that individual before, if we've been to that address before, how come we've been there? We've been there for a barking dog call. Hey, there's a dog there. You might want to watch out. Stuff like that. I know, in most CAD systems, if there's constant problems, you can usually put a flag on an address or a name that'll come up and say, "Hey, this has gang affiliations, or there's known drug-use or this, that, or the other." So that's always good information to have...
Context_of_Work - Risk-Safety	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: evidence system] ...At the DA's office, they may log on and see every agency who feeds them information. And if I'm only blocked down to my agency, maybe it's less exposure for me because I have the same data in another database. They're just kind of thoughts and considerations and all these new programs and devices get rolled out.
Context_of_Work - Risk-Safety	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...I guess that's where I see the differentiation on who's a first responder, someone responding to a scene or in the field versus all the other people who are certainly part of the public safety system and may be on the front lines but don't get that full sense of engagement. To really have

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								those impacts you've-- I've never heard about dispatchers getting tunnel vision or auditory exclusion or all the other things that we're regularly trained on and discussed to recognize in ourselves and in others because it creates a safety situation that can affect others. I think there is a line there and I think it's continuing to be defined... By FirstNet saying we've got to draw a line somewhere, and where is that line, and what could you objectively and scientifically measure and say, "Here's why there's a line." When I thought about it last night, I think that engagement of all five senses and the potential impact it can have to you, in the sense of immediacy and threat and security to you is what kind of creates that.
Context_of_Work - Risk-Safety	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: training] ...some like the videos and some like to read it. Different learning styles. I'm kind of going back to my days of being in charge of the training program and the adult learning classes I went to. As we sit around and think about how are all the different ways we can hit this, some people still need you to sit down with them and walk them through it.
Context_of_Work - Risk-Safety	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: LE paired up] So from a security standpoint, I could stare at the device and not worry because I know another guy was with me doing situational awareness if something were to happen. And so we recognize that in that environment. I think we also came out of that environment recognizing that's a potential pitfall. You can't give people more stuff [crosstalk]-- on my radio, I can talk on my radio and watch and see everything that's going on. We all practice and train for that. Now, you give me something I have to hold and I have to data input. You can't maintain both of those. So that was one of the things that came out of is recognizing you're deploying more and more of these devices that give you the security and personnel. And if it's truly a tough environment, you need to pair people up just for that purpose. Kind of go back to have one person who's running all the devices in communications and someone else who's making sure you're safe.
Context_of_Work -	LE	R	Field	46-55	21-30	Male	LE-R-019	...So how do we take advantage of decreasing the radio time by using

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Risk-Safety			Responder					the computer and what's an acceptable amount of use of just the computer versus here's a hard stop and here's the minimum traffic you have to do. So if we said, "You could build--" we don't want you building traffic stops. That's usually a high risk situation. But if the radio's so busy that you can't get out, we'd rather you build on the MDT, and then everyone can at least know you're a traffic stop, and the location's there.
Context_of_Work - Risk-Safety	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: decrease radio time by using computer] "And then when you get on query, you say--" and let them know you already did it on the computer. So it's MDT traffic stop. Then everyone who doesn't have a computer knows you built a traffic stop somewhere. So that was a process of working through. I'll say it was a little letting go of control from the dispatchers. They disagreed with a lot of this. I think, as a field user, we said, "We don't care. This isn't your decision. We love you guys. We appreciate what you do. The person most responsible for my safety is me. And so if I need to build it on the computer, don't try and give me a policy that says you shall not. It's not going to work. Highly discourage. Make it as strong a language as you want. It's going to happen."
Context_of_Work - Risk-Safety	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...I may not want to call out every time where I'm doing foot patrol at night. I know people have scanner apps. They start talking about apps.
Context_of_Work - Risk-Safety	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	And so we know how ubiquitous that is, and everyone's out there doing it. So rather than trying to hide all our radio traffic, let's take the steps to safeguard ourselves or our procedures to still get our job done but not let anyone think we're trying to trick them, or hide anything, or be the big, bad government that a lot of people suspect we are.
Context_of_Work - Risk-Safety	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...We all joke about the guy driving down the road, talking on his cellphone, typing on his MDT. We've seen it. Certainly, MDT blocks some of what you can see. I think we're getting closer to being overwhelmed. From a liability standpoint, there's too many things that we're telling the guys you have to do, that if they forget to do one of them, forget to use one piece of technology, and it comes back on them in a negative aspect. I guess that's my concern, of keeping it efficient enough and reasonable enough.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Risk-Safety	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: difficult to read driver's license format] ...they're trying to use more security in their driver licenses. The REAL ID Act necessitated that, so responding to the federal stuff. I know some states have now the actual enhanced driver's license. I think there's two or three of them. We're not one of those yet but that may come along, so there's going to be more and more stuff going into the driver's license to get a chip. Yeah, so things to think about if somebody actually has to read this still while talking on the radio and watching ahead of them and that eye focusing thing. I mean, I want to look down at my license to read it but I'm still keeping an eye on the car I got pulled over, so now as I know my eyes are taking a little longer to focus from close to far away, how do I change my work practices?
Context_of_Work - Risk-Safety	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...You can't always pull over... Sometimes you actually are responding to a scene and getting information. I mean, that's what we tell guys. Have dispatch tell a person to hold on, you'll call them back. Pull over to a safe place and then take the call... There may not be shoulder you can pull up...
Context_of_Work - Risk-Safety	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: dispatch] ...they may be giving you information as you're responding to a scene that that issue has come up. Do you have the dispatch center continue to talk to the person and relay information? A lot of guys would rather talk to the person who is calling in themselves. So do you really want to do that when you're driving, especially if it's a hazardous situation? When you get there, we expect you're going to hang up, and then you've lost that person? That's probably not what you want to do. Again, going back to the radio and dispatch training, they're not going to tell you how to do your job, but just think about that, not just transfer the RP to me. It is something you think you are pretty sure you're going to respond to. It may not be the best decision.
Context_of_Work - Risk-Safety	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	A few drones may have gotten shot out of the air. Well, they were a threat at that point. So I understand within the FAA stuff, that's allowed. Just like anything else that-- if they're hurtling a bottle at me, I don't have to just stand there and let it hit me... That was not something I had

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								thought about until the guy showed me the video. And we haven't had protests here for a long time, but we've had them... there was no drones in existence at that time.
Context_of_Work - Risk-Safety	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	So there's been a proposal to incorporate those into the in-car computers, and then we talked about what's the good and the bad. Now you take my computer and ask you to sign the ticket, I can't just do everything at the car on the side of the road that maybe is a safer location that you could stand there with just your device. So we sit there and talk about the pros and cons of here's this technology of an electronic ticket writing system...
Context_of_Work - Risk-Safety	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	[RE: e-ticketers] Some people may like the little ones. Some people may want it on the computer. Some people like to take the plate that's already been run by dispatch and then they can copy and paste all the registered owner information into their electronic citation versus having to scan it or get the VIN and scan the VIN or having a registration. So it comes back to a workflow thing again and what each person is comfortable with. But then keeping in mind, well, how distracting, if you're worried about scanning this and not watching the driver. As we all know, if somebody wants to hurt you, they're going to hurt you, so we have to try and minimize their opportunities to hurt us. So that always has to stay in mind as you're going through these things.
Context_of_Work - Risk-Safety	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	So when we're in training, we have a trainer and a trainee in the same car. Well, if one's using an earpiece and the other one is not, chances are somebody's going to squelch at some point. So I don't know if there's a way around squelching, if there's just not, but earpieces, I think, would be a huge fix to that. But everybody has to accept the fact of, "I'm going to use an earpiece." A lot of people don't use it because they don't want to go deaf and you can easily go deaf...
Context_of_Work - Risk-Safety	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	Yeah. So I'm in light duty or on light duty right now. I had a hand injury... So I'm recovered from it. I'm just waiting for the last little bit of paperwork, so I get to go back to patrol next week... [laughter]. Too much paperwork and stuff. I mean, it's been beneficial and enjoyable, but I like

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								being out on the streets.
Context_of_Work - Risk-Safety	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	I mean, it's not good for you, so if at all possible, I try to take it out. So when I'm in my vehicle, I'll turn it off, I'll turn it or-- I'll unplug it, just listen on my radio. So basically, that's what it is. If I'm in the vehicle, I listen to that radio. If I'm outside the vehicle, I have my ear piece plugged in.
Context_of_Work - Risk-Safety	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	Yeah, so as a [Name] unit-- so we're all assigned our own identification, so I was [ID]. And that's what we refer to ourselves as. So if I call out on a traffic stop or something, it's [ID], and then they respond to me as [ID]... Yeah, so my sector partners would be a [ID] or [ID], and those are the people that I'm with in my sector that I'm trying to back up or just know where they are at all times and make sure that I'm just aware of any situation that they might need help in or something.
Context_of_Work - Risk-Safety	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	It's real as opposed to sitting in a classroom and talking about stuff. There's real danger. They're not blue guns, there's no time frames or whistles or anything to stop stuff, so you're either going to take care of the situation or you're not. There's no do-overs. And it makes it more exciting, it makes it more fun, it makes the job enjoyable. And they do a good job trying to prep you in the academy, but there's literally no way to replicate any of that stuff or just-- they have the scenarios and stuff, but it's not anything even close to real.
Context_of_Work - Risk-Safety	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	... So every officer that I know, ever work with, doesn't arrive on scene and think, "Oh, this is what it is. I'm just going to walk up and be like whatever." We arrive and assume that potentially it's the worst situation that you're going to arrive on, and you need to deal with it in that manner, or else you're not doing your job properly.
Context_of_Work - Risk-Safety	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	we had, just early this week, a deputy-involved shooting where he just went to the door, and the guy was holding a gun in his hand. And he was just going to serve papers, so I mean, he didn't have any knowledge of what that individual was going to do or what was involved necessarily, so he had to respond appropriately and deal with the situation... So I mean, information is beneficial but if you don't have it, you don't have it.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Risk-Safety	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	[RE: MDT lost internet connection] So getting dispatched somewhere, it was basically-- I had a pen-- one of the other officers kind of rigged this system up with rubber bands across-- I think it was on his steering wheel actually, with a notepad so he could just jot stuff down in front of him. I just had mine in my lap, so when they dispatch me to something, I had to take a second and pull over or whatever, write down the address, and kind of a basic description, names, whatever. So it took me a little bit longer, but it wasn't that inconvenient. On a Code 3 run or something like that, it'd be kind of-- because you're higher stress, you're driving faster, you have lights and sirens on, so that makes it more intense. I don't have the time to pull over and write that down, so you just have to function at a higher level, I guess, than you're normally used to.
Context_of_Work - Risk-Safety	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	[RE: code 3 run] Those are essentially if human life is in danger. So one of the most common ones that we have is an unknown injury traffic accident. So say, just over here on [inaudible], we get dispatched, unknown injury traffic accident. It's been reported, and we know at least two cars or whatever have been involved, but we don't know if that person's laying on the ground bleeding out or something, so we have to respond as quickly as possible but still being safe and regarding traffic laws and stuff like that, but. So we're going lights and sirens, and that's when traffic is supposed to get out of the way, and we're able to kind of-- not blow red lights, but kind of not adhering to those, necessarily.
Context_of_Work - Risk-Safety	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	These guys, they would know on the street, because some of these guys have been tased before from other cities, and then they're coming down here and yeah. That's not going to work with the guy that's done PCP or meth. You sat there and said, "Hey, you want to go to Disneyland?" He didn't even hear it. Whatever I tell him, he's not listening anyway. So what the other option, what you do? We can wait him out. But now he's frantically having a knife and he's swinging and now people are filming it. Oh, the cops aren't doing anything. Look at that. I have all the time in the world. I can sit there and wait to Tuesday for all I care. Sit there surrounded, just right? Now I still have an obligation for the other public

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								safety, the people who are calling, "Where's all the cops? They are watching this guy who is sitting there on the corner. He's half naked." So sometimes, we just have to go hands-on. And usually it takes more. Last night an ambulance crew picked a person off the ground who took something. They did an [R-cam?] in the nose. He got up and started punching the ambulance crew. It took us eight cops to get this guy on the ground. So that's eight, that's a lot of weight. You figure each cop at least weighs over 100 pounds. He was still lifting the cops off the ground. What do you do? You can't shoot him right, so you can't even use the carotid anymore, where you constrict the airway, where they pass out. They put handcuffs on them, and they wake up. We can't even do that anymore, so what do you do?
Context_of_Work - Risk-Safety	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	--when I have to go-- when I need additional sources. As a supervisor I won't send more than-- if there's a call in there-- say we've been getting a lot of juveniles going in there and 15 at a time and acting stupid. I don't send two cops in there by themselves. I order the cops, "You stay outside and wait for two more officers." So at least I have four together, than just two. This is an officer safety issue because now I've got this huge mall. Now cops are-- so say they go-- even when they go on foot pursuits we can't find the cop. And hopefully I know who the cop is so we can call him on his cell phone to find out, "Where are you?" We've had cops that have been in doorways, stuck behind-- you know when you go through an emergency door where you can't get back out? We can't find the cop. He can't get on the radio. We don't know where he's at. That's as a supervisor, my heart's going du-du-du-du-du-du-du.
Context_of_Work - Risk-Safety	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Yeah. And it doesn't really matter what the uniform says on it. They're in uniform. I need help. I don't care who it is. Get a cop here. And that's why they're using the CHP channel. They don't care. They call for help. They don't care who it is. It could be a conservative citizen on the street. They're wrestling around on the ground with somebody [inaudible] well, "Thank you for helping me. I couldn't get this guy down." "Where was your backup?" "Well he was coming from [Street] off of [Street]." He was

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								20 minutes away. I'm lucky that when I call for backup that I got backups real quick. But those officers that are way out in the boondocks, sometimes their backup's an hour away.
Context_of_Work - Risk-Safety	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	It's that active shooter that's now in BART, and he's shooting people and I'm asking for additional resources, and the call originally came out as a person with a heart attack victim, so now you got fire who is not armed, they're going down there and they can't scream, or they don't know what you know, and usually is the person who's calling 911 going, "They're shooting down here." Right? That's usually what's going to happen. Westfield Mall, we get all these mall shootings, it's a matter of time something's going to happen, it's going to happen really bad, and they're going to have an active shooter, and they're going to say, "Where aid for a supervisor?" That's my worst fear, it's my worst disaster happening because I'm not going to be able to manage that scene because I'm not going to be able to communicate to the officers that are in there.
Context_of_Work - Risk-Safety	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	And you have an officer safety issue, and then you have a perception issue when you see two officers sitting in the parking lot banging away on their phones, do you think they're working or do you think they're surfing the net? That's what I think.
Context_of_Work - Risk-Safety	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	Yeah, yeah, yeah. There's officer safety issues with being completely fixated on this thing.
Context_of_Work - Risk-Safety	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	And we're in the process. I've been working with them for-- one of my goals when I got here 17 months ago was to get them to the table and get them to put in a BDA system. So certain events there was an officer-- there was a call for service where the officers chased a suspect down into the BART tunnels where the radio was not working.
Context_of_Work - Risk-Safety	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	So you chase the young woman down, under the-- to the mezzanine of [Street]and then she ended up going to the food court and into a stairwell. No comms. Officer and the female. Female fought like she had her life to-- and got complete advantage over the police officer and ended up pepper spraying him. Couldn't get his gun out of the holster,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								tried though. Tore the mic off, disconnected. So his partner couldn't find him. So then the suspect was seen running. She ended up going back down to the BART platform and hit. Once again, the radio's don't work down there. There's a procedure protocol for communications down there that we don't grow and practice enough, and some of the dispatchers have very short memories, and so they don't say, "Hey, this is what you need to do."
Context_of_Work - Risk-Safety	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	It's happened to me. You go over the [City] Bridge. I was in an unmarked car, me and my partner, following what, at first thought, was just an auto-booster, but we didn't have enough for the stop. But as I worked, my private cell phone calling the car rental agency to find out who had rented the car, and then doing some follow-up computer work to realize this guy was a very bad guy that I knew of, who always had a gun with him. And so once we got over the [City] Bridge, got towards the [Name] tunnel. We started to lose comm, so I'm talking to dispatch on my phone. And I'm trying to get them to talk to [State]HP, to get [State]HP to come out because I'm in an old hoopty car, and so it turns into a chase, goes up highway 24 to highway 680, and then all of a sudden, there is 16 outside agency, police cars chasing me. And I have the phone on speaker on the dash, and my partner was driving. And I'm talking to the dispatcher, and I'm telling her, "Okay. Listen. I don't know what you told them, but you got this all fucked up."
Context_of_Work - Risk-Safety	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	Radio. And you might get some of it-- now the driver is going to be depending on the urgency of the run and the response. You're not going to be able to spend a lot of time reading along texts on your screen and safely operate the car. So your passenger is going to be your comms guy, communicating with dispatch and reading the CAD. And whether they need assistance or they want backup units, all that is going out over the air. It's not getting typed up. It's going out over the radio.
Context_of_Work - Risk-Safety	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	Yeah. Before you go in this because you think you're going into battle. You might be going into just an awkward situation. Even if you're going into people's homes a lot of times, it's not a plan to that. But yeah,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								there's those things why the-- but yeah, as far as the day-to-day officers, if they could choose what--
Context_of_Work - Risk-Safety	LE	U	Field Responder	56-65	31-40	Male	LE-U-012	I would say you have to have both. You have to have a base. Dispatch gives you the base. You want to be in communications to know where they are, so you're not walking into something blindly, especially, if this is a repeated offender. He's known to have weapons. So you're out by yourself or with two people, you still have to mentally prepare yourself on the approach on how you're going to confront the individual. If you're a one-man car and there's nobody else, everyone else is out on something, you have to handle it. So you have to make your assessment kind of cautiously prior to getting there. And if you need help, you'll have to call for help, and dispatch will see if they can get another unit from maybe another district to come in to help you if you're not too far away. Yeah. Doesn't pay to be a hero [laughter]. Doesn't pay to be a hero.
Context_of_Work - Risk-Safety	LE	U	Field Responder	56-65	31-40	Male	LE-U-012	... Having more information in front of you where it's not overloaded, but it makes you safer too because everything is right here. You don't have to take your eyes off looking at the screen. If you're giving a ticket to someone, it's transparent anyway. You can see the car in front of you. You're taught officer safety. Your eyes are looking in front all the way around you.
Context_of_Work - Risk-Safety	LE	U	Field Responder	36-45	11-20	Male	LE-U-013	It's hard to manipulate a phone in stressful situations, and you don't want to be looking at your cell phone when there's a guy with a gun. So I would say, radio and MDT. And the reason for that being is when you're responding to a call, you have the computer in front of you, and you can relay that information to your partner who's driving or the opposite.
Context_of_Work - Risk-Safety	LE	U	Field Responder	36-45	11-20	Male	LE-U-013	When I came in, you were taught you should be making good arrests. You should be making a difference in the community. The criminals should go to jail if they commit a crime. That's what we were taught. We were taught to do proactive police work. But my back is messed up. Both my hands are messed up. My shoulders are messed up. My rotator cuffs are messed up. One of my knees is messed up. It's from fighting with suspects. It's from fighting and car-- I've been in two car accidents

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								that were-- and one of them was us responding to an officer needing assistance, and we were flying. We're hauling ass to get there, and now my back is forever messed up. I wasn't driving; I was the passenger.
Context_of_Work - Risk-Safety	LE	U	Field Responder	36-45	11-20	Male	LE-U-013	They're lighter than the older ones, but I have a problem with my-- I'm left-handed. So my radio is on my right side. So whenever I drive, it hits the seatbelt, and it changes the channel. And if I don't hear it, I'm not on the proper station. So I have to flip my radio around to make it work so I don't change the channel, because if I'm in a stressful situation, I don't hear the beep. And I'm trying to track the suspect with running this... No one's hearing me at all.
Context_of_Work - Risk-Safety	LE	U	Field Responder	36-45	11-20	Male	LE-U-013	It's information gathering of who we detain, cite, or interact with. So you have to do this at the end of your shift which takes-- if you're a proactive officer, could take 20 to 30 minutes to prefill all this information in. They try to make it easier with the phones, but a lot of us are getting assassinated sitting on our cars, on our cell phones, not paying attention to our surroundings. So that's another thing where, if you're too dependent on technology, it takes you away from paying attention to your surroundings.
Context_of_Work - Risk-Safety	LE	U	Field Responder	36-45	11-20	Male	LE-U-013	And that's happened to me, where I'm at the corner, and there's a guy with a gun. And I could be standing next to him; I don't know. So more is better with that type of call.
Context_of_Work - Risk-Safety	LE	U	Field Responder	36-45	11-20	Male	LE-U-013	When I talked about earlier, is we have to use certain things now on the phone or on the computer. It takes you away from being observant on where you're at because you're like this. You're not paying attention. And now, they're assassinating us in cars where we're not paying attention. And I think that's why a lot of guys are getting jumps on us, because we're not looking around. We're on our phone, maybe doing--
Context_of_Work - Risk-Safety	LE	U	Field Responder	36-45	11-20	Male	LE-U-013	You're not going somewhere blind. You're not going into an alley blind. You're not going into-- we have a lot of areas that are-- I grew up in a very bad neighborhood by the [Stadium]. A lot of that area is just grass and dirt, no street signs, trees. The criminals know the area better than we

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								do. I grew up in that neighborhood, so I know it. But you're going to go into alleys. You're going to go into areas that are-- it's almost like a lot of the projects in [City], they're built on hills, which is a sniper's advantage. So we have to trek up these hills, when the suspect already has an advantage over us just from the hike. There's areas that are dark. We don't know.
Context_of_Work - Risk-Safety	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	...We have some that are maybe 5,000 people, some 50,000, and others up to 200,000 something people that would be in a street party, in a condensed area usually for the whole day, which kind of opens up a gamut of concerns for us for the public safety in that and how to respond and coordinate that.
Context_of_Work - Risk-Safety	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	My personal opinion is it's a huge officer-safety issue having an officer doing a report, or whatever, on the phone, looking down at the phone and stationary in one particular spot for too long. That's a concern. I know that we-- at some point, we're talking about having an ability to write the reports on the computers. We had laptops in the cars at one point. We could take them out, and you can write them, which was maybe a good idea, but the infrastructure as far as the wireless connections and that were inadequate or weren't working well enough to make that take foot.
Context_of_Work - Risk-Safety	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	Some calls tend to have a little more information and it's as much as good as it is to have, sometimes going to a call and trying to read and drive at the same time. If It's a big block of text and you're trying to fish out the information you need, it can be a little difficult, especially if, for example, if they run a plate and they put all the plate information in, really all I'm concerned about is the plate number, the year and the make and that's about it. But then I have all this other stuff that I don't necessarily need at that moment.
Context_of_Work - Risk-Safety	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: issues using personal cell phones] If I'm saying, "Hey, where are you?" Like we're trying to meet up, it's pretty acceptable. They're trying to turn us away from being on phones at crime scenes or there's always the Gem of the Year where you'll see some agency where somebody

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								took a picture of something they shouldn't have. And obviously the department does not want that.
Context_of_Work - Risk-Safety	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	They've had officers when they had a police shooting, they were using their personal cell phones and they subpoenaed to get copies of the entire cell phone. So there's kind of the whole privacy thing, which is why I think the department's moving to-- here's the department phone. Do not use yours, otherwise anything you have on their, personal, private, it can be shared.
Context_of_Work - Risk-Safety	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: personal cell phone use] we do try and tell people not to take pictures of crime scenes and whatnot because it leads to problems.
Context_of_Work - Risk-Safety	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: using station computer instead of cell phone] Plus it's easier than [laughter]. Especially on days when they work 99 and you have to pay attention to where you're driving, and you still want to run plates. You've got this talking, you're trying to do something here, and you still have to pay attention to your surroundings and the road.
Context_of_Work - Risk-Safety	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: technology impeding work] I wouldn't say in the way, but I think it fogs. You're looking like he said, sometimes you're in the computer or you get sucked into whatever information you're being presented with and you need to be up here.
Context_of_Work - Risk-Safety	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: phone and computer use] You're distracted no matter what. You're not paying attention to your surroundings. I mean, back when I started, we didn't have computers [laughter]. Or we got these fantastical green screens that all you could do it type in a plate. But now, with all the different functions, it makes actually seeing what's going on in the neighborhood harder. And somebody's looking at this box to tell them what's going on as opposed to actually looking at the surroundings and figuring out what's going on.
Context_of_Work - Risk-Safety	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	I came from a department and we had different technology on the computer. And we were a smaller department so it wasn't we didn't really need to worry about walking on each other, but if he got a call and I wanted to go on his call, I could put it in the computer-- we used 10

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								codes there. I would just put like 76 to blah-blah-blah's call. So I never had to go over the air to dispatch or [inaudible]. At least it was on the computer, which I think some people may be a little old school or worried about, "What if I get in a crash. I never said I was on the way to the 10-1, then I'm gonna be in trouble."
Context_of_Work - Risk-Safety	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	On the street, I preferred the radio as opposed to PDT just because you can hear it and you're still paying attention. If you're trying to read it off the screen, you're distracted, you're whatnot and-- if you have a partner, then you have no problem. But when you're alone, it'd be nice if the-- if you got a job and you could hit a button and it-- have the computer read whatever to you, like talk to text almost where it would just say, "Hey." That, I think, would be ideal for some officers especially-- even when you get older, it's harder to take the glasses off sometimes.
Context_of_Work - Risk-Safety	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: radio communication] Hospitals are tough. [Hospital], [Campus hospital], I can hear you, but I can't broadcast out. So if there is an issue, we have a problem.
Context_of_Work - Risk-Safety	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: looking at computer to run plates] I know of supervisors and people that have gotten into car accidents...
Context_of_Work - Risk-Safety	LE	U	Field Responder	26-35	6-10	Male	LE-U-023	When I was out on patrol, I gave my number out, my personal number, out to people. But what I had done is I had created a Google Voice Account, and my number was [Phone_Number] [laughter], and I would give that out. I had it on a business card, and I'd give that out. And it would ring on my phone, but it was a pseudo number. It didn't come back to anything, because I was afraid-- because I have Sprint, and if I run into an offender who has a friend who's at Sprint, the next thing you know, they get all my personal information.
Context_of_Work - Risk-Safety	LE	U	Field Responder	26-35	6-10	Male	LE-U-023	... But when I'm doing surveillance, man, that would be awesome to be close enough, but-- far enough away where they can't see me, but close enough where I can see them, and I can see they're on the camera. I think it would just-- I mean, even from a safety perspective, right now we're just communicating back with SDSC room. I'm on the phone

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								literally the whole time, "Hey what do you see? All right, is he coming out?"
Context_of_Work - Risk-Safety	LE	U	Field Responder	26-35	6-10	Male	LE-U-023	Before my department phone, I was not giving my phone number out as much as I wanted to or needed to because I was like, "This guy looks kind of shady. I really don't want to give him my number, but he may be a good source of information, but I don't want him having my cell phone number." But my department phone, that eliminates that.
Context_of_Work - Risk-Safety	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	... So it's that lap between what the lieutenant is telling you at roll call, and what you retain, like, "Well, be on the lookout. This corner is that--we're looking for this person, that person." It's like every day you're always looking for somebody wanted. Every day something violent happens that they're trying to find the offenders. So I'm off Saturdays and Sundays. So when I come on a Monday, I kind of always go on the computer. And I'll go back a couple pages just to see, "Hey, what's going on here?" I think just from my officer's safety point of view. He said, the lieutenant, "It's pretty violent. We're doing real bad with the shootings recently." So that's just for me. I just want to see what happens. And that's usually every Monday. I'll check it for sure, just to see--
Context_of_Work - Risk-Safety	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	I think that's the issue that I have with the HunchLab. If it could be a little bit more in-depth or a couple more boxes just to click on. Just to click on and see there was shooting [inaudible] blah, blah, blah. They don't want to give-- and just a quick briefing of what was it about. What is it drug related? That's something that when I log in on the computer, I want to find out that shooting, that's what I read. And there would be some from the detective's division saying, "Okay, victim, possible offender information, possible gang problem." And the detective's good with it because they will always label preliminary what they think the justification that shooting was. Was it gang related? Was it calculated? Was it road rage? And they'll say, "Male standing in the corner was approached by blah, blah, blah." And it's a pretty short paragraph like, "Okay. That's what that's about." But that's something that you really can't access on here. I'll have to go back, and here I am, head down in

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								the middle of the worst area in the town district, and now I'm logging in here trying to find it. So I mean, that's the biggest thing. The information is there. It's the problem of accessing it and get the information. Cops are very impatient. We want everything here-and-now, okay? And if it's going to take me too long to try to find it, then why bother?
Context_of_Work - Risk-Safety	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	Well, yeah. Like I said, are you going to do what's in front of you, as far as stopping a car, or are you going to be more-- I think the technology is good when you've got the time to use it. Meaning it's safe to do it. As far as, well I got eight people in the corner, but I'm on my HunchLab looking. I mean, first and foremost, your safety first and using your head. If you got time, and I don't want to say distance, but a safe area where you could access this computer and not worry about somebody taking a shot at you. I think that's my biggest fear. That's me personally is. I know what areas are bad in town. I know where those hotspots are.
Context_of_Work - Risk-Safety	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	Yeah but that would certainly be just from a safety standpoint and a communication standpoint of the deputies can't get out or hear things going on on the radios because we often times have a dispatcher come walking down the hall saying where is so and so and they're like oh they're in the back writing a report and they can't get a hold of them so that's a challenge.
Context_of_Work - Risk-Safety	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	if [Name] comes to me five years from now with his list it's going to be totally different than what's available today, the capabilities and the ease of use, the interfaces that they have the ability. You know we see a lot of head's up displays in certain applications. We'll see high in military and stuff like that. I'm sure someday that officers will have the ability to broadcast information from their vehicle upon the dash so that they're head's up and they don't have to be looking down at their mobile touching media buttons. It's all visible and they're not worried about endangering citizens as they access all this information coming at them so it's all coming, it's all there. It'll be here before we know it.
Context_of_Work - Risk-Safety	LE	R	Field Responder	46-55	21-30	Male	LE-R-052	Compared to when I first started, night and day. I started in '95, we weren't even issued portables. Once you got out your car, you were on

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								<p>your own. They didn't have cell phones. So if you got into a bad situation, there was a time when we got into a fight, or on a foot pursuit, we had to knock on somebody's door to borrow their phone to call the sheriff's office because we were away from our car, you don't have a portable, you didn't have a phone, so it's changed. For me, being an old dinosaur as they call it, I am impressed of like just using our computers, seeing our computers following the deputies on GPS because I can see all this, just on a simple look up at my screen I can see where every deputy in the [County] is. It gives them what you call AVL, automatic vehicle locator that is allowing us to see where they're at. When the computer drops or they have a service go down temporarily, or they're doing an update and you have to sign out for at least, sometimes an hour, you're in panic mode. Like man, where's this deputy, where is he at? I can't see you. Where... it drives you batty. And I never thought it'd be that way, because you always worried about somebody tracking you, big brother watching you. But now, as a supervisor aspect, I couldn't see doing this job without the technology. Without the ability to see where everybody is at.</p>
Context_of_Work - Risk-Safety	LE	R	Field Responder	46-55	21-30	Male	LE-R-052	<p>Most of them like it. Some don't, because they think that's just how they feel that they're being watched. And it's just trying to convince them that look, honestly, I don't care where you eat lunch. I just like to know where you're at in case something happens that way; I know I have a deputy in that area. For supervisory skills, that's what we're concerned about. Where they'll at, who they're, I couldn't care less. It's more about performing the task. And just to convince them otherwise. They feel like big brother's watching them. More technology means more, more ways for us to track them.</p>
Context_of_Work - Risk-Safety	LE	R	Field Responder	46-55	21-30	Male	LE-R-052	<p>We use in-car cameras here. We have discussed going to the body cams, the sheriff is really not a big fan of it just because it wanted the storage. There's no laws for concern--who wears it and when you have to wear it. Does it have to be on 24/7? Because like you said, I could be in a restaurant talking, the next thing you know, someone runs up or</p>

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								something happen as you're in the middle of it, and what happens if I didn't remember to turn it on, now am I going to face disciplinary problems? Is it going to perceive that we were trying to hide something when there's nothing there? We just didn't have time to turn it on. Or if it's on 24/7, what if I go to the restroom; you're going to video me while I'm in the restroom, where the legality? If I'm holding a private conversation with my wife, you want to hear about the bills we're paying?
Context_of_Work - Risk-Safety	LE	R	Field Responder	46-55	21-30	Male	LE-R-052	Yes. The hardest part it become... two ways that has hindered our job is, not hindrance, but like say interference. When I'm driving to a hot call, I find myself looking at my screen because the dispatchers as they're typing it, is feeding across our screen. So I'm responding to a hot call, and I'm looking, and I even type in--trying to respond to their message, then you're trying to send information to them, so you find yourself focused where you should be focused on something else.
Context_of_Work - Risk-Safety	LE	R	Field Responder	46-55	21-30	Male	LE-R-052	I just, for me I think technology is just going to help progress our career and our profession because the more we can get at our fingertips fast will help us do our job. Especially when you're responding to a, again a hot call, or a domestic. A simple thing such as a domestic call which is not simple, however, if I'm on my way there and I can immediately know this guy has a history of violence, he has a history of beating his wife, that we know she's reluctant not to file charges, then we--it gives us not the ability just to be safe when we get there, but we can also serve her better.
Context_of_Work - Risk-Safety	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-053	...I don't know how much you know about the fire service, but right now the big thing in the fire service is that all of these carcinogens and stuff is causing cancer. So the big thing now across the fire service is cleaning your gear and getting the proper gear and making sure you're wearing the right protective hoods because in all of these environments that we go in, it's just so toxic.
Context_of_Work - Risk-Safety	LE	R	Field Responder	Over 65	11-20	Male	LE-R-054	Again, it's a rural area. You're kind of out by yourself. We only run three deputies per shift, and they have a pretty good geographic area to cover. It's boredom, you've got to watch the animals, we have a lot of deer

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								wrecks, and just being a rural area, and a lot of times, our deputies are stuck out on maybe a serious call, sometimes 15-20 minutes by themselves, because their nearest backup may be 15 miles across the [County], so it gets a little boring, but it's pretty interesting, you get paid to sightsee around the [County], so--
Context_of_Work - Risk-Safety	LE	R	Field Responder	Over 65	11-20	Male	LE-R-054	Correct, and that's where accidents occur, deputies get injured, that's where you get a lot of complaints from the citizens. Again, with animals, deer in the wild, hogs and so forth we have up here, when you're responding to a really hot call where you need to get there quick, you really--you're putting yourself out there even before you get to the call, not to--nonetheless, when you get there, what you get into.
Context_of_Work - Risk-Safety	LE	U	Field Responder	36-45	11-20	Male	LE-U-055	But it's still the same. You know the dangers are still there. You're still wearing a badge. You still have a gun. So it's unique but rewarding in the same time.
Context_of_Work - Risk-Safety	LE	U	Field Responder	36-45	11-20	Male	LE-U-055	Maybe personal calls. They may have a question that they don't want to put out on the radio that they need to ask a supervisor. There may be a... if we have a large incident or maybe not even a large incident but an incident where we don't need a lot of radio traffic, I think they use their cellphones to kind of coordinate through that. I think if I go back and listen to our audio recordings for communications there's probably a lot of, hey, what was that you dispatched? What--I quite--I missed that. You know? And so they're going back and pulling that information that way. So yeah, I would think they use them a good bit on a day to day basis.
Context_of_Work - Risk-Safety	LE	U	Field Responder	36-45	11-20	Male	LE-U-057	I think it's changed [inaudible] the years for sure. I mean it used to be a lot of phone calls and face-to-face talking. Now everything seems to run through email. Everything is regarding email, you know responding where I think sometimes maybe things are better relayed person-to-person and in daily conversations. And I think maybe we rely a little bit too much on email. But it's the trend. Everybody wants to cover their behind and make sure that they have these email trails. I don't necessarily think it's a productive way to work, but I understand the reasons why it's done that way, and it's kind of the world we live in now

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								where this is, everything is relied upon email.
Context_of_Work - Risk-Safety	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	We do. It depends on what it is you are looking to be addressed within that policy. We have some restrictions for the use of personal cell phones as far as photographs of scenes and stuff like that; you know, we don't want our officers to expose themselves by taking photographs of scenes and at some time later down the road, that information being foible, so we strongly suggest that, within our policy, that they not utilize their phones for those types of situations. We try to restrict the use of their personal phones while on duty in a patrol car that is in movement, you know, if they have to take a phone call, we request that they pull to the side of the road to do so; those type of things are covered in policy.
Context_of_Work - Risk-Safety	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	Again, you know, it is their personal cell phone, so they will be taking, you know, their personal phone calls but as far as department related, it may be of sensitive nature that we don't want to broadcast over the radio. Now, with the advent of the in-car computers, we do a lot more of that information via - that means versus cell phone any more, but again, there is a time delay there. So if there is critical information that we need to relay that is of a sensitive nature, right now you need this information, the cell phone will be, you know, the first priority.
Context_of_Work - Risk-Safety	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	We have the ability to do it in the patrol cars. Again, you have to weight that with officer safety. Do you really want an officer with his head down in a computer for 10 or 15 minutes while he is writing a report, not being cognizant of his surroundings, or would you prefer that officer to come back into a secure location where they are comfortable and can do that? So you really have to weigh that - excuse me [coughs]. You know, we work in a - basically if it is going to be more than a five or ten-minute report, I want them back in the office. There are advantages to them being out there and being seen, but again, you have to really weigh the officer safety factor there - do I want them, you know, not paying attention to what is going on for that time, or would I rather have them in here? I would rather have them in and off the road where they are

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								comfortable; they can do what they need to do and then get back outside.
Context_of_Work - Risk-Safety	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	No, honestly I think we have covered a lot of different topics. It's - like I said, the biggest thing is, I guess, from an administrative level, is the frustration, you know, knowing that I have officers out there that these communication systems are their lifelines and having that and knowing that system is as fragile as it truly is.
Context_of_Work - Risk-Safety	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	Pretty much. Now, you know, that might change depending on how many reports I have to write or what have you. We have some capabilities to write in the car but, you know, it becomes an officer safety issue and a convenience issue you know; it is kind of hard to type while we are here, plus if I am paying attention to that, I can't watch what is in front of me, so...
Context_of_Work - Risk-Safety	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	Probably unwritten. I don't think there is a written policy on using your cell phone. I know there has been discussion openly that using your cell phone to take pictures and so forth is discouraged just because, you know, [unintelligible] your phone, but it sort of an officer's decision whether, you know, they feel like they want to give their phone up if need be.
Context_of_Work - Risk-Safety	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	Probably I think as it relates to any potential safety concerns we might have when we get there. So is this person known to be combative? What is the nature of the call? So it is, somebody stole something from the store or is it something very emotional where, you know, emotions are high, people aren't thinking rationally and becomes an issue. So anything safety-wise, their anatomy and everything else is just secondary.
Context_of_Work - Risk-Safety	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	We use the Motorola 800 MHz system. Every downriver community has their own separate channel. There is a plus and a negative with that, the plus being you can be a little bit more informal on the radio on your own channel, but you kind of lose unless you are We use the Motorola 800 MHz system. Every downriver community has their own separate channel. There is a plus and a negative with that, the plus being you can

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								be a little bit more informal on the radio on your own channel, but you kind of lose unless you are scanning them, you kind of lose the aspect of what is going on in the surrounding communities. If your dispatcher is not paying attention to an armed robbery or something that happens in [city], potentially your officers could not even know that it is heading their way or it's happening or suspect vehicle, and for the most part we try to - the two of us working the desk tries to monitor all that stuff and let the officers know that there is something going on in the surrounding city but if they are not specifically scanning, the communication between the downriver departments is minimal.
Context_of_Work - Risk-Safety	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	Yup. We got body cameras. I think they are phenomenal. I would like to have some better ones. They don't have any night vision capability and that is a big damper. I have noticed definitely the way officers talked to citizens as my complaints have gone substantially down. So that is definitely a positive impact. On the same note, I don't know if anybody has ever said this, but I believe the cameras have kind of had a negative impact also. I don't believe that they are more - I don't want to say caring, but more open with somebody when they are on call when you used to be able to go to a call and like freely like, listen man, come on, which, you know, you really don't wanna do this, let's do this or do this or maybe- hey, just separate for the night. But now, since everybody is videoed, it's yes ma'am, no ma'am, and they are afraid to make a discretionary call with the fear that you are gonna get in trouble and because you are being recorded.
Context_of_Work - Risk-Safety	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	Night vision, technology like that. God. I mean, I would like to get some less than lethal equipment. I would love to get like pepper ball guns and stuff like that. They are phenomenal tools that save lives and officer safety. Again, we can't afford it. So it all comes down to money but yeah, anything less lethal, anything to help the guys see at night, I mean, I would love to get one of the flare systems just so that the people out there know that we have them and maybe they won't come here.
Context_of_Work -	LE	S	Field	26-35	6-10	Male	LE-S-062	But then you know, certain areas are certainly less friendly, like

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Risk-Safety			Responder					[unintelligible] is a large apartment on [Street]. We have a lot of trouble there. It's just a very problematic place so we go there and, you know, lots of times a very uneasy feeling because you get people peeking out the blinds glaring at you, you get people throw stuff at your cars, screaming and calling you every name in the book and you're not even there to deal with them, they just happen to see us, so it's a little different there.
Context_of_Work - Risk-Safety	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	There is always the concerns of somebody you are calling getting your number but a lot of times I just call from a blocked number or if it is somebody I really dont want to know, I will wait until I get to the station and then I will call from [unintelligible] [city].
Context_of_Work - Risk-Safety	LE	S	Field Responder	36-45	11-20	Male	LE-S-064	The only other issue with the radios would be - I think it would be more beneficial to have like a - you have only so many frequencies on this radio that are programmed into them. Like you got this city, you got [Cities] I think, maybe a handful of other ones in the [unintelligible] area but if we ended up going into [city] for anything, we wouldn't be able to communicate with [City] Dispatch at all, which is dangerous. Like I have gone into [City] and had people coming out of the woodwork and can't get on the right frequency to call for assistance so you are pretty much at the mercy of the other - like [City] usually backs us up pretty and I got in a chase and I crashed in [City].
Context_of_Work - Risk-Safety	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	Well, we did in our jail have the iPads for inmates.
Context_of_Work - Risk-Safety	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	S1: Oh, you do? S2: That they can order commissary, sick call, they can email, they can do visitation on them, and there is a cost associated with that, it is paid through their commissary accounts. But, that technology is bringing efficiencies to us so we don't have to lay hands on an inmate to bring them to a visitation booth, let their people visit, then take them back, you know. It cuts contrabands -- contraband from being brought into our facility and it cuts that office-inmate contact that drives confrontation. So, our inmates love it. Some people, there was 40 or 50

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								people that protested it because they were not getting face to face visits anymore and cost associated with it but you can go down to the jail and visit for free. It does not cost you anything. But if you want to set it at your house and visit, like a Skype -- you can do that.
Context_of_Work - Risk-Safety	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	Five cartons of carbon copy, there's five carbon copies and you got to push hard, it's a pain in the butt and so ISP they literally slide the driver's license, check the box for the violation, spits it out and they're done so it does a couple things for us. Number one it kind of automates the process and number two when you think about it from a safety standpoint when you're sitting on the side of the roadway if I can be on the side of the roadway for 2 minutes less that might not seem like a lot. But you take two minutes over a ten hour shift over you know a 52 week year and that's a lot less time that I'm exposed to a dangerous situation and the same with like the MDT's you know when we have issues or when we were running everything over the air when we do the warrants checks over the air that takes longer than me typing into the computer
Context_of_Work - Risk-Safety	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	In the case of like a domestic violence situation sometimes we'll stay on the phone a little longer depending on what the needs are so what happens what I personally do I know some guys don't do this what I like to do is know what I'm walking into a little bit more than maybe others and so I'll grab the call card and then on the call card there's the person's name and their phone number and I call them when I'm in route. I leave them on speaker phone particularly when we have a barricaded subject or a guy that has made threats. The last thing I want to do is walk to an unknown with a person like that and so that's an easy thing for me to do.
Context_of_Work - Risk-Safety	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	For sure. So call history is really important to us as well. We don't have the ability to lookup call history as far as repeat events so sometimes and this goes for even the full times guys so we're four on three off and then three on four off and then vacations and everything else so there's times where schedules literally you won't work for two weeks which is great. A lot happens in 2 weeks so you may have a neighbor dispute it's

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								an ongoing issue and you know you're getting sent to a call that you think is a brand new issue, you get there this thing blows up in your face and you're like I wish I would've known what was going on.
Context_of_Work - Risk-Safety	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	People know that. They come to our county and they run from us and we chase them. People are going to get hurt and we don't know why they're running and we don't know what you know so we use a lot of discretion and common sense. We don't always chase them. If they're doing ten over yeah I'm not going to get in a pursuit over that but a way to shut down that vehicle something I don't know you know that's kind of a pie in the sky thing for me.
Context_of_Work - Risk-Safety	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	I'm not going to sit on the side of the way and statistically that's where I'm going to die on the side of the roadway is where I'm going to die. I'm going to be hit by a drunk driver, I'm going to be sideswiped by a vehicle or something like that for what? For a speeding ticket? I do care because I know that that event speeding kills people and that's what I want to try and do is prevent that and I care because of that because I want to help, I want to prevent that but it will wear on you over time around making \$28 to \$35,000 a year to go stand on the side of the roadway to try to help somebody that doesn't care about that doesn't show any respect or care about what you do or why you're doing that for them and I think it's part of that focus is on education and why you don't speed you know so it's complexed because it's you get these different emotions.
Context_of_Work - Risk-Safety	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	And so that's tough that's an industry issue that is really tough and from my perception trying to be safe as safe as we can and minimizing that risk helps with that from my side and don't misunderstand me I'm not saying that I wouldn't do it or I'm going to stop doing it. It's a challenge in the industry I have a wife and two little kids. I want to be as safe as I can by helping somebody else on the side of the road but I know statistically that's probably where I'm going to die if I die on the job and so it's tough so whatever we can do to bridge that gap is really kind of where I think we need to go as an industry.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Risk-Safety	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S2] We have to go to every call with non-prejudice, non-biased opinions and try to make a justified in a justified perception of what exactly we're dealing with because people lie to us all the time so it really you have to be able to maintain a clear head with every call you go to. It could be something from a disturbance could actually turn into a domestic by strangulation you just never know what you're walking into which is where the excitement comes in as well.
Context_of_Work - Risk-Safety	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S2] The people that watch those videos they don't see the full story. They don't actually understand well that guy had a knife or he had a gun or whatever he may be intoxicated and tried to fight one of the bouncers and we said hey you need to go and he starts to fight us. They start the video after everything's already begun. They don't start it from the very beginning of what happened.
Context_of_Work - Risk-Safety	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S2] ...If they get a hot call, an emergency call it's going to take them a little longer to get there which is not only unsafe but I mean it's uncomfortable this is our main communication and it's got its problems.
Context_of_Work - Risk-Safety	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S3] ...You're not able to get out so if you're in a fight and you're trying to call out and you can't get to your emergency button because all of this stuff when I get into a fight every single thing on my vest is going to be on the ground by the time it's done. Hopefully the only thing that's going to be left is going to be my gun still on myself but if you can't get to an emergency button and this thing has a call receive data message that's an extra five seconds that you got to wait and try to get out on top of if there's other radio traffic out there because there is no overlap it's all digital so when it was analog we could over (INAUDIBLE 00:16:50) people, we could step on people especially with emergency stuff but now that it's all digital it's only the person that's talking nobody can overshoot.
Context_of_Work - Risk-Safety	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S2] Yeah absolutely. There's been times like you said you know whether we get into a fight that I remember one particular time I got into a pursuit I went to key up and it was sending that data and it all does is it sets a big long pause and just a long tone that's all it does and then you

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								know you get into fights and stuff. There was one guy his emergency button didn't work and it's a little yellow button on your microphone and he was hitting it and he was in a fight but it wasn't going off and people were still talking over him so it's always something.
Context_of_Work - Risk-Safety	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S3] It's been something that we've been able to overcome I guess. We haven't had luckily we haven't had anything really bad happen or anything like that due to the radios but the possibility is definitely still there.
Context_of_Work - Risk-Safety	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S2] What I think it really is you know we do live in [town] and I can't say my wife thinks we're here you know. I tell her about some of the things that could possibly happen. She says well it's just [town]. Like it may just be [town] we may have grown up here but you know it's still a town of 60,000 people. There's still people that hate us, there's some people who don't want us to be around and you know when we have our radios that don't work properly it's almost to like we adapted to adjusting to the fact that well our radios aren't going to work so we're going to have to do this on our own so and there's times where that does happen and that's pretty sad that as a law enforcement agency where we're supposed to have people that can help us that we have to use the fact that we adjust to well I guess I'm on my own here.
Context_of_Work - Risk-Safety	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S3] And even if it's not a local thing we are a pit stop from the west and east coast. If you're south of [state] if you say you come from [states] something like that multiple homicide felon just on the run you're coming through me. You're taking [Street].
Context_of_Work - Risk-Safety	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S2] ...It'll either tell them to smarten up or it's going to get them it's going to take the badge off their chest which should happen. As far as social media goes it's got it's positives and negatives. I mean we've lost over a hundred officers due to social media in the last couple of years. Just outcries and stuff like that and caused people just go out and ambush us. It's hard to cover that one up. It's true but we've also identified certain bad shoots and stuff like that because of technology and identified that either A) they need more training B) they need not to

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								be cops anymore or C) they need to go to jail. I mean they're human, we're all human.
Context_of_Work - Risk-Safety	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S2] Used to hearing that number because that's the bar right from now on it's never going to be said anything on that radio other than that number so if you don't listen to your number and you get sent somewhere and another officer goes and you don't show up and he gets hurt that's on him. That's on that other officer so listening it's bad. They're hiring a lot younger guys which I can't say a whole lot I'm probably only older than two people on our PD so my first day was my 21st birthday so 21 my first day of work I went out that night with my parents I had one drink went home went to bed and had to wake up again at 6 a.m. and come back.
Context_of_Work - Risk-Safety	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S2] I mean it's I agree but I think we've also become so good at it that it's if a civilian got in the vehicle with us they would be amazed at all the things we have going on. I mean yes, I wouldn't recommend it it's probably dangerous but steering with your knee and typing it's amazing how much we can do in our vehicle.
Context_of_Work - Risk-Safety	LE	U	Field Responder	26-35	6-10	Male	LE-U-051	... But any sort of call that you think might dictate most coming from a big agency we send more people doubled up to calls then we did at the agency that I came from but I don't have any objection to that because it's a safety thing so yeah you're definitely going to be interfacing with officers there and telling them what's going on and find out what's going on, asking them to go do something for you, asking them to you're dealing with one person you turn to the officer and say can you go tell this person that you know so it's nice having that kind of built in network.
Context_of_Work - Stress-HW	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S2] So that's going to be an interesting dynamic to an already stressful job.
Context_of_Work - Stress-HW	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S2] They haven't really started talking about it. They will as soon as they know it's starting to head in that direction and I would imagine when that day comes those positions will be more specific so call taking will

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								change in that way. I think the day that's going to get driven is going to be handled differently as well so I don't know I don't think anybody knows what the real picture is going to look like.
Context_of_Work - Stress-HW	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	... Coming here to a major metropolitan fire department overwhelmed me because I was just a small mountain guy coming here.
Context_of_Work - Stress-HW	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	Kind of a transition in between those two questions. Stressors, for a lot of people, are the language barriers. In [County], the other people that we speak with, we have a large Ethiopian, Ukrainian, and Vietnamese population in [County]. And they don't speak a lot of English. So when someone calls on the phone and they speak Ethiopian, Ukrainian, or Vietnamese, we need language line assistance. So we have a language line that we can call immediately and it has close to 100 different languages that are available to us. Yes, we have the more common French, German, Spanish, things like that but we have a lot of unique-- even a lot of the diplomats that move here, and they have their little foreign embassies in [County]. They have the African embassies and all these crazy countries that the dialect is so specific that the language barrier is horrible. So when you're receiving a call it's a huge stress trying to figure out what language they're speaking. And then there's a delay in service, because you got to get the language line involved...
Context_of_Work - Stress-HW	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	[RE: language line] It is a real person and on our phone system when you click the language button it has about 12 preselected languages. Chinese, Mandarin, Portuguese, French, German, all of the main ones that we kind of use. Then if it doesn't fit into any one of those we just have the generic operator and then they're trained to kind of decipher what geographical area in the world the person comes from and then we kind of hit or miss. Sometimes you go from Vietnamese to Cantonese to Thai. There's all those little things, and you kind of get bumped around. So then this person is still waiting on the phone this whole time. We do the best we can, and then it could be anything from my smoke detector battery needs to be replaced to my house is on fire to my infant child is having a seizure to I think I have stomach pains but I don't know what it

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								is. So it could be a variety, and we don't know until we go through the language line with our pre-set medical questions that we have, and then we send the call over. So from a call taking perspective that's a high stress, because you add in the regular stress of, "Help. Help. Help. Help. Help," to, "Tell me exactly what happened," and then we have our policies that we have to verify the address, we have to verify the phone number.
Context_of_Work - Stress-HW	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	So you call 911 because your roommate, spouse, family member, neighbor falls down, split their head open, they're bleeding, they're unconscious, and I'm asking you what the address is. Then I have to ask you, "Can you repeat that for verification? What is your phone number?" And then someone will say, "Well, just give me the ambulance." What is the phone number for verification? So you have to duplicate that, then we get into our medical questions. They don't understand our medical protocols that are nationally based, and that it's [State]'s state law that we have to ask. It's the EMD, or the emergency medical dispatch and emergency fire dispatch and then emergency police dispatch, so all three disciplines have protocols we have to ask the 911 caller, that helps pinpoint exactly what type of help that they need because of all those variables. And some of the public doesn't quite understand that, and they range from, "Just send me help," to the belligerent people that just go off, and they're calling for help but then you get this verbal assault and abuse of F-you, and they just start cursing at you, "Just send me the help," click, and they hang up. And all you want to do is help them but you need to calm their stressors down. So that adds to your tension and your anxiety and your blood pressure because they're angry at you and you have to get through your protocols, to the person that's a little child that says, "Help, help. Mommy won't wake up," so then you got to talk to a little child, and then you get to talk to an elderly person who can't hear, "Sir. You're in the hospital [laughter]. Hit the nurse button."
Context_of_Work - Stress-HW	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	So we have a lot of stressors but every once in a while you just get that feel good call where the person legitimately says, "Help me," and then they pause and whatever you say they listen to you, "Okay. What next?"

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								And you go through your protocols appropriately, the protocols work because you know them, you're asking them and the person is receiving them. And you actually make a difference on the phone before the first responders arrive, because you can control the bleeding, you can help out with the seizure, the person's having a diabetic emergency, and we have protocols. Or the person's having a pregnancy problem and you're able to actually able to help them, or they're in a serious car accident and you're able to keep them safe until someone comes because they're listening to you.
Context_of_Work - Stress-HW	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	So you feel kind of good about that. Although you still absorb all that stress from them because that's still the nature of the job with the 911 emergency. For us, we get complacent because every phone call is an emergency, and we deal with four to five hundred calls every day, and so for us, it's just another phone call, another phone call. For them, it may be the only time they call 911 with an emergency in their entire lives.
Context_of_Work - Stress-HW	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	...We have a lot of resources that other people don't. We have our own paid psychiatric doctor that's just for the fire department full time. We have our full-time medical staff. We have our own doctors and nurses and everything, in our own medical facility, just for us. So we have a lot of resources, we have our own health and wellness division that specifically caters to the family well-being, the spousal support, the child support, the financial education for retirement, everything like that. And then the stresses. If you need time off, if you need life adjustments, if you're addicted to anything they kind of help you with coping mechanisms for all of those things.
Context_of_Work - Stress-HW	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	I've actually had this discussion and I've actually argued in favor of both because there are certain firefighters up here that will turn around when a call-taker is crying and they're upset and they need a moment off the floor because they took a call that was hard, and then the firefighter, insensitive bastards that we are at times, with our unique humor [laughter], they say, "Oh, that's nothing, you don't see it, you don't deal with it, you're not there. You don't see the blood and guts, that's just

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								<p>nothing. Come one, do your job, it's only on the phone." So certain keywords like that don't help. And they're not being empathetic, they're not being understanding, and it causes coworker divides and some bad times for supervisors, because it divides and then people argue and then you have internal affairs involved. Then you have a disgruntled work environment and all that. So that's been a problem up here because of that, but there's been a lot of training and the good thing is the longer that some of these firefighters have been up here from the field, that's one of their transitional things they have to learn about, is understanding these people that work up here that are now on call takers aren't EMTs. They don't respond out in the field. They don't know what it's like to be in your shoes, as much as you don't know what it's like to be in their shoes. And once they kind of grasp that, they may not agree with the responses but at least they shut their mouths [laughter]. At least they're a little bit empathetic, of-- okay because I've been on both sides of that. I've taken phone calls where I've heard the person's last breath because they strangled themselves. I've heard a gunshot over the phone, a person committing suicide over the phone. I've heard the joy of having a baby born over the phone. I've heard the joy of someone saying, "It worked," because they were completed obstructed with air, because of a piece of food and they were choking. And the person, I gave them Heimlich instructions over the phone and the person did it.</p>
Context_of_Work - Stress-HW	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	<p>And I can hear the person talking. Or the CPR over the phone. I've heard those things and it's great. I've also been out in the field where I've rushed into a door, and I've taken a 13-year-old off of the back of her bedroom door because she hung herself from her metal coathanger. And I've had to see that. I've seen a 12-year-old transgender boy who was having a hard time in school, and went home and slit himself up the arms. His mom came home to a bathtub full of blood and her son dead. I've seen a husband who was divorced, took his three children into the woods and hung his three children, and then called his wife, and as soon as she showed up he shot himself. I had to jump up in the tree and cut those children down. I've actually gone to a car accident where a</p>

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								<p>teenager girl was drunk and she was trapped and the car was on fire. And we were able to get the passenger out. But here I am inches away from this girl who is on fire screaming, looking at me, and I'm pulling her friend out. But by the time we get her friend out, she's dead. So I've seen that. And that's very traumatic. And I've heard those things on the phone. So it's like apples and oranges. They're both traumatic according to what you need. And certain people don't have coping skills because of how they were raised. Other people have highly functional lives. I count myself very blessed with having a very stable faith, of religion that I was raised in. And my wife and I still continue that same religious practice. We have five healthy children.</p>
Context_of_Work - Stress-HW	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	<p>But I don't have any vices because with my religion I don't smoke, I don't drink, I don't go to the bars, I don't go to the clubs, and I don't have those negatives that I can go to and get caught up in. So I have a very highly functioning way to relieve my stress. So it's very healthy. It still has an effect on me, but I-- besides the insomnia, the night terrors, the not being able to sleep, that's probably the worst of it. But I'm still highly functional. So when other coworkers are divorced two, three times over, they're drunks, they show up to work addicted to something, or they overdose in their own homes. I even had another fellow dispatcher, seven years ago next week, he committed suicide because he couldn't handle the job.</p>
Context_of_Work - Stress-HW	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	<p>And he showed up to work, prepared some things, and then he left. And then he went and he shot himself. And that was very difficult. In fact some of the guys that I work with up here had to-- one of them left the department entirely. Two of them had to leave the communication center and just go back out in the field because they just couldn't be in this building anymore. And so those are a lot of major stressors you have to deal with. Your own firefighters, your own coworkers, and stuff. So you can't compare 911 call takers to field.</p>
Context_of_Work - Stress-HW	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	<p>Yeah. We all get along with one another, just like anywhere else. I mean, some people get on people's nerves now and then. But yeah, we try to</p>

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								stay close because, like I said, there's only--
Context_of_Work - Stress-HW	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	Q: Do you have a lot of people that think that they want to do this and then say, "Ugh, it's too much for me." SME: Yep, quite a few, actually.
Context_of_Work - Stress-HW	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	I guess when it gets really busy, I think my stress level goes from a zero to a two when I walk in the door, right off the bat. And then once we get really busy and we have a fire going on and there's a lot of things for me to do, I have a lot of notifications to make. I have to make sure that if there's big area coverage issues, I mean, that's my job to make sure that I move resources in to cover the big gaps, the big holes, so that can be stressful. Not getting calls dispatched in a timely fashion, that drives me crazy.
Context_of_Work - Stress-HW	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	To me, it's less than a minute. But sometimes it's just unavoidable. It's going to go over a minute because of the technology. So just some personnel, just working with them gets my stress level up just because of who they are.
Context_of_Work - Stress-HW	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	Yeah. As a supervisor, your stress level is a little elevated because you know you have to deal with this person today.
Context_of_Work - Stress-HW	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	--a minute waiting for the station alerting to cycle through. Then dispatch the call. Then go back and dispatch--
Context_of_Work - Stress-HW	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	If you don't want to listen to me, that's fine, but that's where a lot the frustration and stress come in with the call takers.
Context_of_Work - Stress-HW	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	Right. It's less busy. But I know I've been on duty working during two or three unplanned outages. Yeah, just all of a sudden, it just stops working.
Context_of_Work - Stress-HW	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	It's very stressful. It's more stressful for others. For some people, they can't separate the personal feelings from the job and that's hard for them, dealing with a bad call [inaudible] [that?] goes with them. I think that's just being human, but I think some of us are able to-- right, that's what we do... move onto the next thing. Other people, they just can't do that. So that's hard for people, but other than that, it can be a pretty wild

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								ride when you come to work in the morning. And there's other times, like I said earlier, man, it's so boring [laughter]. There's nothing going on. And then literally five minutes later, right, you're just hit with 10 calls.
Context_of_Work - Stress-HW	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	--or if we have two alarm fires going on at the same time. That will definitely tax our resources. We had a wildfire in [name] a few years ago.
Context_of_Work - Stress-HW	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	So [name] sent help and then they got used up down on a brush fire down in [name]. So I had nothing to work with. That was stressful.
Context_of_Work - Stress-HW	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	I would say it can be very stressful and I would say that it can be very emotionally taxing and I would also say that it's incredibly rewarding and very fulfilling.
Context_of_Work - Stress-HW	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	You need to be able to listen and you need to be able to multitask. Multitask is probably the most important one. Attention to detail and the ability to remain calm and professional under stress.
Context_of_Work - Stress-HW	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	Right. So even just one person is a massive difference. So and a lot of things contribute to the lack of personnel. Partially it's retention, partially it's recruitment and then also it's just you know when you have people that work like overtime all the time sometimes they get really over taxed so got to take a break and stuff so yeah so and again the only reason why we're at our minimum above our minimum today is because half of the people that are on our shift today are working overtime.
Context_of_Work - Stress-HW	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	Yeah a lot of their real true emergencies are going to be medical and those can get pretty stressful but you know a lot of it is elderly people with chronic conditions and then they flare up and so they need assistance from medics and then outside of that I exclusively communicate with other agencies and police officers and so those are my main people that I speak to. Police officers I would say public, police officers and other agencies.
Context_of_Work - Stress-HW	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	...I know how I want to get a description of a person and we're trained on that and then I've added my own flair to it you know and so once you learn that stuff it becomes a lot easier to process a call even if it is a high stress environment and then also that being said we also work you

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								up to that you know we start you off on phones. You take really basic calls and then you take the non-emergency line and in the non-emergency line you are going to need to use some of those skills you know in a trespassing person or a disorderly subject or something like that. You still need to get a person description but you don't need to get it as high as important as you might need for like a hot call or something like that's really active.
Context_of_Work - Stress-HW	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	Mmhmm so I would say there's a lot of emphasis in this job in all of public safety on my ability excuse me so I would say we're constantly reminded of liability and we I mean there's the obvious stuff which is your life can go from zero to sixty in like 10 seconds. You know you never know what's going to be on the other end of the phone you know I was having a really slow day one day and like nothing was happening and then I took a double stabbing in the parking lot outside. So it can just go and you'll be taking calls all day and you'll think they're kind of you know kind of silly you know like parking complaint after parking complaint after you know this guy just doesn't look right you know that type of stuff. You take those calls all day and then right in the middle of your day you can just have I just saw this lady stab this lady and now she's stabbing someone else while I'm seeing it in front of me. Can you get somebody out here right away blah, blah, blah you know screaming on the other end of the phone you know and then you could go from that and then the next thing is help my wife is having a baby and I don't know what to do. You know it just it could it's that unpredictability that makes it fun but it is also very stressful.
Context_of_Work - Stress-HW	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	And so there's always this baseline level of tension that you never know what's going to happen and then the other part of it is too once you become more experienced in this job and you do start doing other things like police dispatch and stuff you know I'm starting to recognize the officer's voices and I know some of the officers you know now that I've worked here for a while because we do ride a long a lot, we work with them, we meet them in teletype and stuff like that and so I know

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								them as people and if in addition to me being nervous for perhaps the person on the line because you do get invested in these people even though you don't know them you're still worried about them you care you know. You'd be talking to them you stress for them and then on the other hand you're also stressed for the officers because or the paramedics or whoever's responding you know because we're all kind of one family and we all care about each other and your job and this is how we think of ourselves our job is to keep them safe and make sure they get the resources they need. Make sure that they are prioritized you know and we're sending them into these crazy situations and we want to make sure that they're going to be okay. So there's a lot of stress about just again the unpredictability just don't know what's going to happen and then in addition to that the liability that if anything that goes wrong you are responsible.
Context_of_Work - Stress-HW	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	There's a lot of emphasis on that and it could be for anything. Could be something simple like teletype where you're entering a warrant and then you put in the wrong information and then that person gets let go because you didn't put in the right information right? So or you could put in the wrong information and the wrong person could get arrested right? So you know you have a situation where somebody is getting stopped and then you get a hit off of this person and then the information in there has something that says for some reason this person is a white female 200 pounds or whatever when in actuality it's an Asian female who is the same descriptors, same similar name and instead it's an Asian female it's one letter right? You put an A or a W and the officer could arrest the person because they're like this is an Asian female fitting that description and they arrest this lady and she's never done anything wrong in her life.
Context_of_Work - Stress-HW	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	Because sometimes you know sometimes it could be a simple problem right or it could be something really dire but you just your biggest concern is you cannot send help until you know where they are.
Context_of_Work -	COMMS	U	Manager	26-35	6-10	Female	COMMS-	So then you got to make sure you find them to put them in your order

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Stress-HW							U-007	and so it just makes it kind of difficult when the technology that you buy does not take into account both the technology and the operations side where they merge in almost seamlessly. You're just as good on the technology side as it is for training and getting your operations folks on board with it because if you don't have their buy in on the technology you're going to add more stress, you're going to add more people quitting, you're going to add you know and it's a ripple effect so you really have to take into account how all this new technology is coming out is being integrated for your operations folks.
Context_of_Work - Stress-HW	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	So we did a very soft launch with it. We were concerned about our staffing levels and not being able to really be able to intake a large fluctuation of texting so we did a soft launch with it of call if you can, text if you can't.
Context_of_Work - Stress-HW	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	Yes to add additional steps they need to do because you thought something looked really fancy on the backside right they have a great demo, it looks really cool, it's easy for you to do stuff, if it's not good for them, it's not good for anyone because they're the ones that have to use it on a regular basis and they're going to be your biggest advocate. So pulling in all of your stakeholders when you're purchasing something our current CAD system was purchased by our CAD manager and his supervisor and his supervisor.
Context_of_Work - Stress-HW	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	It does post some challenges because in situations like that we may not have someone paying attention to their phone while we're texting them so the slow is very slow the response is slow and we also don't have an initiating text capability so someone can initiate a text to us and we can reply back to them
Context_of_Work - Stress-HW	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	Or yesterday it was that today would have six. We've had five is our bare minimum and we've worked with five on midnight shift often and we have structure fires and we have robberies and we have to do all of this plus the additional technology that the citizens want with---
Context_of_Work -	COMMS	U	Manager	26-35	6-10	Female	COMMS-	We have people who ask us almost like we're a 411 call information

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Stress-HW							U-007	center and that adds an additional burden onto the dispatchers which is something that we do have to be careful with the new technologies that the county that the citizens want with photo and video to be able to come into us. Our dispatchers have never had the expectation when they were hired that they would have to view someone who was just hit by a car or view a vehicle accident or view someone who may have been injured or view robbery suspects you know what have you...Those types of crimes are very pushed down so when we do have them which we do you know they happen everywhere it now that our trying to expect our dispatchers to try to view those and now deal with them adds another aspect of the job that they may not have signed up for.
Context_of_Work - Stress-HW	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	We have had a little spike in some of the more severe crimes lately but because of the demographic here [county] has pushed out a lot of the crime so our gangs are way down, our we at one point had gone almost 3 ½ years without a single murder. Those types of crimes are very pushed down so when we do have them which we do you know they happen everywhere it now that our trying to expect our dispatchers to try to view those and now deal with them adds another aspect of the job that they may not have signed up for.
Context_of_Work - Stress-HW	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	And they may not want to view those things so we're working really hard on making sure that they don't have to view them. Do we need to have additional bodies hired that are paid and they know and they're trained how to deal with what they're going to view? It's one thing to hear it on the phone it's another thing to view it and hear it on the phone. So those expectations from the citizens have to kind of be managed and then we have to then put it into place but also protect our people.
Context_of_Work - Stress-HW	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	Yeah put it into the call where it's just a link and they don't have to view anything. They can attach it to the link whoever wants to view it can view it but it at least protects the dispatcher from having to see it. Yeah. Because we do have a high rate of suicide actually in this industry because there's a lot of mental health and there's a lot of physical health issues that aren't necessarily recognized because we're looked at as

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								secretaries but we have high obesity rates, we have sleep deprivation at high rates, we have suicide at high rates.
Context_of_Work - Stress-HW	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	A lot of jurisdictions their dispatchers work 12 hours a day and they work 4 to 5 days a week and so when you're having someone here from 7 p.m. to 7 a.m. and you are constantly giving them the worst of the worst now you're wanting them to view the worst of the worst but we're not getting the support and the resources that we necessarily need to deal with those kind of things and because you're here for 12 hours somedays when we have only 5 employees on shift we can't give you a break.
Context_of_Work - Stress-HW	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	You might be able to go and go to the bathroom or go grab food but you are sitting in your position for 12 hours a day and that's all you're doing so we're unfortunately that leads you to buy carry out food that's not necessarily healthy so we have high obesity rates, we have high cholesterol rates, we have heart condition issues like I said suicide all this kind of stuff because we're not viewed in the same light as someone who physically goes out and does the job where they're putting their body in harm's way but it can be just as detrimental mentally to be giving someone CPR and then the medics arrive and that's the last you hear.
Context_of_Work - Stress-HW	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	...We've had we hired someone in March they heard a call for an infant CPR 10 month old I'm sorry a 10 week old? Ten week old baby and they did CPR. The baby lived but we didn't know that at the time because the medics got there they took over our phone line disconnected. He could not return back to work. He decided this wasn't for him, he could not handle a call like that, he could not take those calls and we were actually concerned about his mental wellbeing because he became very reclusive almost instaneously so we still touch base with him to make sure that he's okay but when you still categorize us as secretaries but yet we deal with you know stress levels, we deal with I mean you're locked in a room for 12 hours with the same people...
Context_of_Work -	COMMS	U	Manager	26-35	6-10	Female	COMMS-	...if you don't like someone you're stuck in a room with them for twelve

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Stress-HW							U-007	hours so... Under stressful conditions so it makes so you're short staffed, no one can get breaks, people are getting hungry, we're not getting caffeine, we're here for 12 hours, you don't like this person, you don't like that person, an officer or a firefighter is doing something that you know upsets you on the radio then you've got a structure fire, you've got someone who is being stabbed, it's just the culmination of a day or a shift or a night isn't just the calls that come in. So for us having the citizens expect one thing but not know what reality is like in the 911 center we're kind of just the forgotten public safety realm I would say.
Context_of_Work - Stress-HW	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	Now we need to make sure that identifying information goes home to the families so the families can now identify if the dispatchers are having issues at home that we can then get them assistance with. We've had we hired someone in March they heard a call for an infant CPR 10 month old I'm sorry a 10 week old? Ten week old baby and they did CPR. The baby lived but we didn't know that at the time because the medics got there they took over our phone line disconnected. He could not return back to work.
Context_of_Work - Stress-HW	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	...Our fire department were the ones there day and night pulling people out and you know dealing with everything from that and our 911 center is who handled all those calls including the influx of calls from the family members. Where's my family? Where's this person? Where's that person? And you know having to deal with that. We actually had a couple dispatchers who now work for us again but they left for about 10 years after 9/11 because of the stress level of it.
Context_of_Work - Stress-HW	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	We can't do anything but the expectations are there that we will do something. Some of that is not necessarily ECC's fault but [county] jurisdiction government as a whole where we have also kind of fed into those needs and wants of our citizens versus saying no.
Context_of_Work - Stress-HW	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	We'll leave together, yeah. But probably my biggest concern with our workforce is mental health and PTSD. And I've done some work with the [University]. They're doing a study right now on PTSD in next-gen 911. And we managed to get ourselves-- I managed to get ourselves

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								weaseled into that study so that when they get that package done, their self-care kit that they're-- are you familiar with this?
Context_of_Work - Stress-HW	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	...And if you pooled them all and made them as one dispatcher, they wouldn't have PTSD. But if you look at the results individually, a lot of dispatchers probably do. And some of them are diagnosed as having full-blown PTSD. So I'm worried about that. These young kids, especially, when you get old like me, then you worry about other people. So we're trying to promote health in our center. Mental health and physical wellness. That's all part of it.
Context_of_Work - Stress-HW	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	Yeah. That's probably my biggest push for me, personally, in workplace and our workforce. And one of my goals is to-- it's all part of retention, I think. So I just want to make it a good place to work. Kind of my goal.
Context_of_Work - Stress-HW	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	[RE: mental health] Well, I kind of am a little bit concerned. And the professor in [County] isn't-- they don't have any conclusive results yet. But she's not that sold on the idea that it's going to be worse for dispatchers because call-takers are trained to insert themselves into situations that they can't see. Well, how do you do that? Well you use your imagination, and you build a little living room, and you build the people, and you put yourself in there when you're talking to someone. Basically, it's like you're in their house... you create that scene in your head. It's not really that easy to get rid of that because you created it. It's your creation, and you know exactly what it looks like. Whereas, if you see a video - I've seen video clips, ISIS doing stuff - that's horrible. But it doesn't really bother me because I just looked at it and then out it went. And I think that this could be kind of the same way. I mean, you don't get-- most people, I guess, I should say, don't get PTSD from watching a horror movie, because you just watched it and then it's gone. Whereas, if you create that in your own mind, I think that could be even more damaging, So I don't know. I really don't. I think it'll be less of a stress on most of our people, anyway, than people are thinking it will be...
Context_of_Work - Stress-HW	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	I don't know. I would like to see some way to quiet things down in the center. Even with our-- we are a small center. [name] has 85 consoles.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								We have 8. And I can't imagine the noise in the place like that. Because ours gets pretty loud sometimes, and people yelling back and forth, and radio channels, and phones going off, and that stupid alarm always pick the wrong time to go off. But I have no idea how you would do that maybe better, wouldn't even be high tech, just better headset.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	For here you have to be I would say, patient, somewhat tough or thick-skinned, just for what you deal with. You have to be willing to work with the public because you're dealing them on phone and in person. And you're dealing with-- I mean, for example, the sex offenders or the probationaries. I mean, sometimes those people are the utmost wonderful people of society, but you have to-- at least in my book, you still treat them with professionalism and kindness. I always treat other people as I would want to be treated no matter what the circumstances are. You have to be compassionate. You have people calling who may have just lost a loved one, or could have a loved one that it's not doing well and is on their way to the hospital and maybe not expecting to make it, or someone's calling in to say that their child's been raped. I mean you could get a lot of different things that you have to be able to deal with. So you've got to have not so much a thick skin that you're not-- hold on.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	...So you're [hustling?] around doing 10 things at once. But it is unique in the sense. And that could be any dispatcher. You have to be able to deal with whatever's thrown at you which sometimes is crazy.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	... So everything goes through central dispatch just for midnight to 8:00 because generally, that's a slower time. And it's not as crazy as-- for example, during the day, when we have the business calls coming in.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	... But some days when you have-- if a small child dies or even when-- if somebody comes to check on an elderly parent and they've lost a loved one. Like the other day when the child got hit by the car, I mean, I'm not heartless so I think about those things. You think about the family and you hope that the child's okay. If somebody comes in here and says, "I lost my son last night to a drug overdose," I mean those are the things--

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								and when someone comes in and says, "My daughter's been raped by her uncle," or whatever. I mean, I'm not going to say those things don't affect me because you feel for the family. Even if someone comes in here and says, "I found my mother dead this morning," I mean, that's still, that family's just lost someone and they're grieving. I had an incident, it was a few years ago, but a gentleman came in here about a gun and said he was going to take up hunting. And I did a purchase permit and I did everything and he walked out the door and he went and bought a gun. Well, he went home and shot himself. And it affected me. I felt terrible. Even though I had no part in it, he pulled the trigger, he bought the gun, but it still, there's just things that bother you.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	But you have to kind of let them go to the back of your mind because they would eat you up. But I think that I have feelings and I have thick skin but I'm not completely heartless because you do feel bad sometimes when you hear of-- and I guess you get discouraged because our society is so messed up.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	... Not everyone that works in law enforcement is bad, because I consider myself to go above and beyond for anybody who walks through the door. But there are departments that are big, and they have bad apples, and those bad apples give us a bad name. But it's hard too when you turn on the news every day and you see all the police shootings. And you think of the families and the senseless act that someone can just take a life.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	But I mean, I guess those are some of the things that sometimes eat at you.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	...They say, as long as just one line's ringing at a time and they only have to do one thing they're okay. But if four lines light up, and then a [PB-teer?] comes in, and somebody comes to the window, they just want to get up and run. And they would tell you that they'd rather deal with a barricaded gunman than sit here and deal with all this nonsense.
Context_of_Work -	COMMS	R	Manager	36-45	6-10	Female	COMMS-	Sometimes challenging, very challenging, 'cause it's a bit much when I

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Stress-HW							R-010	took on a task as a supervisor and knew I would be monitoring and watching over or helping out more. But sometimes it's a bit much. If we're short, and I have nobody else, it falls on me. So I'm always available, ready and available. And it's time-consuming. A lot of time-consuming, sometimes I have to break away from okay, I have to break away from work so I can have at least some home time with my kids.
Context_of_Work - Stress-HW	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	Yes, that's a big part of the challenge. Learning the ins and out and the different programs, the different systems that we use, the radio, reporting programs, and the different schedules of each shift, that's the easy part. The challenge is when you get a call, a certain call, or we call them hot calls. And you have to handle that accordingly to make sure that that person that's on the other end that dialed in, get the help that they need, but also that officer that's responding or the firefighters that's responding have the knowledge and know just what they're walking into, so they can give that person the assistance that they need.
Context_of_Work - Stress-HW	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	... So when the girl that we was doing the reports with, she gave me the address, and I said oh, yeah that's the house fire. We couldn't get her out. She said you remembered that; that was like last year, the beginning of last year in 2016. You seriously remember that. I said some calls you don't forget. And those calls you don't forget, I said I can tell you a couple of them that it's very, very vivid in my memory, and I could give it to you call by call, play by play. That's a plus, because in the event that they need anything, any information, I can give it you off the top of my head. I know where to go and find that information. And it's not a problem at all.
Context_of_Work - Stress-HW	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	And when they call in, you're going to get that group, that one person that might catch an attitude. They might want to curse. They might want to say different things. But you've just got to know how to handle them. You handle them, and you forget about it. Don't take anything to heart, because that isn't making you a better dispatcher. It's not making you a better person.
Context_of_Work -	COMMS	R	Manager	36-45	6-10	Female	COMMS-	So that you don't take all of that to heart.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Stress-HW							R-010	
Context_of_Work - Stress-HW	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	That's a stressor. That's a big stressor, because if you're busy, and they're on that traffic stop or they're doing something else, and it's one of the officers that, okay well [inaudible] I gave you this information, I need this information back. I understand that, but you have to take into consideration that hey, I was on another call, I was trying to help somebody else. So getting them to understand is a major stress. That's a major stressor.
Context_of_Work - Stress-HW	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	I would say some manning right now. Being short-shifted right now is causing, it causes a little problem with us, because sometimes you can't find, as I said, we can't find anybody to work that shift, and it's short, and we're already short. So myself and another dispatcher would have to split the two shifts. And it'll be 18 hours or 16-hour, 17-hour shift that we will work, which is, our 12-hour shift and half of the other shift. So that would be the, I would say that would be the most difficult part.
Context_of_Work - Stress-HW	COMMS	R	Manager	36-45	11-20	Male	COMMS-R-011	Not really because I think the boundary lines if you will, the areas of jurisdiction are pretty clear-cut. There's no gray areas. So I think that that really plays a key role. The two municipalities, one's a little bit smaller than the other, so naturally would not have the funding sources the bigger one has. So it's a little hectic sometime on the dispatchers insomuch that the smaller municipality does not always have a sheriff's, a law enforcement officer on call, and it may have to be the [County] backing up the municipality. So it can be frustrating at times, but I have to say they hold their own, and they do their best.
Context_of_Work - Stress-HW	COMMS	R	Manager	36-45	11-20	Male	COMMS-R-011	... So lots of time, it is very, very, very stressful that people are not trying to help themselves. And I didn't grow up in a culture like that. And it's, granted, times change. But at the same time, it's like folks, we cannot buy 9,000 tarps for 9,000 residents in [County]. [Inaudible] residential structures. I mean it's just, can't do it. Right now is the time to prepare in February 20, whatever we are today, not June 1st when hurricane season starts. I try to preach as many places as I go, if I talk to a civic group or some kind of group or something, have a plan for hurricane.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								Have a plan for tornado. Have a plan for cold weather events when the roads are closed and you can't get to the grocery store. We're not used to that like you are in your part of the world. But that's really the most stressful thing, really is.
Context_of_Work - Stress-HW	COMMS	R	Manager	36-45	11-20	Male	COMMS-R-011	Correct. And it's just deadlines of trying to get whatever needs to get out in a timely manner or God forbid we need to put an extension on something.
Context_of_Work - Stress-HW	COMMS	R	Manager	36-45	11-20	Male	COMMS-R-011	... Number two, what about the trauma on the dispatcher God forbid something goes awry? If the dispatcher sees the law enforcement officer doing something wrong, that's blatantly wrong, that's malfeasance in office, that person's just as much on the hook as the, I think it's going entirely too far.
Context_of_Work - Stress-HW	COMMS	R	Manager	36-45	11-20	Male	COMMS-R-011	... There was a push sometime back for the cameras in the schools to be monitored by our dispatchers, and we just can't. We just can't do it. There's too much, why you didn't answer the radio in time, why you didn't answer the telephone in time? Well, I was too busy watching the camera. I mean you have to draw a line somewhere. That line has to be drawn somewhere. As good as it is, it's good in the back end, but not in the front end, for a lot of it.
Context_of_Work - Stress-HW	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	It can be, especially if the name sounds familiar, someone that we dealt with before. Like especially, I think a lot of the times what bothered me the most is like people you know that they're on the wrong, they fell on the wrong side of the track, they're having a rough life, they're on drugs, and you get the call, and they're passed out dead in their home. Or not passed out dead but like passed out, possibly dead in a home. You kind of wonder where did everybody fail that person in getting them help, which sometimes they're not, they're not passed away sometimes. They're very much alive. They just, they were almost...
Context_of_Work - Stress-HW	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	I think sometimes it's just the call volume. I think that's the main stressor. That sounds strange 'cause that's what we do. But when you surpass 300, 400 calls a day, and that's all you do is picking up a phone,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								you can't do your other tasks, it definitely stresses you out 'cause you feel like you're not, you didn't do your job to the fullest, or you didn't pay attention to your deputies or your fireman as closely as you could've, because you were picking up the phone.
Context_of_Work - Stress-HW	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	..And then as soon as you said it, they start over again. So that could be stressful for sure, 'cause you got, your phone's ringing, you're trying to do your job, and you have somebody on the line that just, I know they just want to be heard. And you tell them that I hear you, I'm sending help to you, and they still want to make sure they're heard
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	It takes a certain person to work in a dispatch center. You know you have those people that get that call and they want to go out there and do it. It takes a certain person to sit behind a desk during that call and manage all that chaos that's going on with it and be able to sit there and hold it all together and do your job.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	Over here, we work 12-hour shifts on the station at terminal one. So you day starts with that station and it ends with that station for the most part unless someone needs to switch during the day for whatever reason. I don't know that it starts and ends the same. If you're on day shift it starts really, really slow. 6:00 o'clock in the morning not a lot of people are up for the most part. But by the time you get off at 6:00 p.m. it's [Laughing] extremely chaotic in here. And then if you're night shift you're coming in at 6:00 p.m. So you're starting it off on your busy time and you're ending at 6:00 in the morning really slow.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	I think sometimes the hours in itself gets to you. You know some people aren't cut out to do a 12-hour--it can get mundane at time even though you're not knowing what you're picking up on the next telephone call it can still be mundane in a way. And I think sometimes being cooped up in a building for 12 hours is enough, with 2, 3 or however many people you have on shift at the time and you just need to walk away from them. It's kind of like family every now and then you need a little break. Sometimes that's what needed [Laughing].

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	Q: Okay. And if you were going to use adjectives to describe that, how would you describe it? SME: Stressful.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	Enjoyable at times. Good feeling. Serious. Absolutely serious at times. And... hmm. It can be tedious also.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	So yeah. And it makes working here and doing what we do a lot easier to deal with when you have someone that you can--you know, kind of destress with after something stressful happens. So.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	It's good. It someone who can relate to what you're doing through.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	Well just recently I had a caller, a daughter who found her mother had passed away in the bathroom. And you know just trying to--well you can't calm someone down in a situation like that but just trying to talk to them and get them to kind of calm down and just trying to keep them from... from getting too upset, too, you know, emotional, you know it's impossible to do and then trying to keep yourself in check as well because that's just a hard situation for anybody. And then you're on the phone and, you know, it's just real hard especially when you know the people 'cause I've had those situations, too
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	So you just try to, you know, talk to the person, you call it through and just stay with them until help arrives and then after they get help and you disconnect you know you just take a minute to just kind of bring yourself back down and calm yourself down.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	[Chuckling]... hmm. It's entertaining. Sometimes it's fun. Sometimes it's stressful. Sometimes it's difficult. It is... it's a lot of stuff [whispering] [chuckling].
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	My partner is fun [Laughing]. My partner is one of my dear friends now since we have started working together. So that helps also. I mean you can work with somebody that you--I mean you have to be here for 12 hours, like you're basically here just as much as you're at home. Like sometimes I feel like I'm here more than I'm at home [chuckling]. So it--that helps, too, being able to have a partner that's good and, you know,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								does her part as well and then you can talk to her and whatever after that.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	Hmm. I, huh, honestly the most stressful thing about my job is the people that I work with. It's not even the people in the public 'cause I actually love to work with them and I love the--you know be able to talk to them and solve their problems and even just listening to their stuff, like I said, it's entertainment [Laughing] it's like it's really entertainment to me. But I think the most stressful part is the people that I work with. And sometimes you kind of feel like, especially in communications, like you're not valued I guess 'cause you're not the one that's going out and doing it. But I'm like, well baby, 'm the one that sent you so [chuckling], you know, my job is important also. That to me is the most stressful part.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	The whole time I'm sitting here anything could happen within a second, like every--it's not like I'm sitting here relaxed. I'm sitting here like if that phone rings there's no telling what's on the other end. So. Yeah.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	It is sometimes, yes. 'Cause it's kind of like... I don't know like... I can't--I don't know a good way to explain it but like every time it rings it's kind of like you get a little extra beat to your heart like let me see what's going on with--especially now, I'm like the 911 line can be scary sometimes. 'Cause it's like what do you need? And when people start screaming on the other end that's like the worse 'cause you're trying to calm them down enough to get the information from them and it's like then you get excited when you get--but you can't sound excited, you still just got to sound calm and everything.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	[Laughing]. And the ones that are not so perfect, those are the ones that you have to--the main thing that stresses me and the main thing that we worry about is making sure we know where you are because I mean once they get there, even if it's something a little different like you tell me they took, like if it's a death call or something, we had one of those this morning, let's not think about that, but they told me, oh, he took my gun. But then when the officer gets there you say, well he took my gun

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								and he took my money. Oh, that's little. But my main thing is always am I sending you to the right place?
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	So in a non-ideal call it would be, okay, well can you walk outside and tell me, you know, do you see a number on the house or a mailbox or anything like that? So that's my main stressor like I always want to make sure I'm at least getting somebody to the right place. And also that whenever they get there the officers are going to be safe also.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	It is a little more stressful because sometimes like if we have a 911 call, sometimes I can sit there on the phone with you until the first responder gets there. But if we're very busy I can't do that. I just have to take your information and get off the phone and just hope you're okay and you'll call me back if you need something else. But I kind of like when it's a little slower so I can just on the phone and listen.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	Sometimes it is, yeah, especially if it's like somebody you sat on the phone with for like 10 minutes or so. Like 10 minutes can seem like a lifetime in an emergency. So it's like well, I wonder what happened. But you never know [chuckling].
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	And I'm seeing that coming about from some of that in the military. Being able to help them with recovering from PTSD because I don't think that's taken seriously enough in the dispatch side of things.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	Busy, something new all the time. Challenging. Challenging just to wrap my head around and even to get my arms around the technologies but the personnel issues also because it... with Next Generation 911, with FirstNet, with any of these technologies, it's... we see it from the line level. We see it as something that's far off but in reality at my level we see it as it's just around the corner. But it's a blind corner in many cases that we don't know what it's really going to be from there. So I know what its intent is. I know what it's supposed to be. But what's it really going to be when we get there and we're staring at it and saying, okay, implement it.
Context_of_Work -	COMMS	R	Comms	46-55	21-30	Male	COMMS-	[Sighs]. Busy. Many times overwhelmed with... with the amount of

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Stress-HW			Personnel				R-016	responsibilities that they have. They are expected to do so much with... with not just the technology but with learning new things, keeping up with multiple policies and procedures and being able to apply them in a situation that is very, very fluid. An emergency situation is not just, oh, it's the same old thing. Every one has its different challenges. And...I don't think that it's a job, I think it's a career and I think it's a specialized career. There are many, many police officers that walk into this room, firemen that sit here and go, God, I never thought it was like this. I mean I thought you were just a secretary. Just answering the phone. And I couldn't sit here all day and do that. Well it's a specialized job.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	[Sighs]. I think it's probably multifaceted stressors. I think one of the biggest ones is that they don't get the closure that a responder gets to see. And me being coming from both side of it, I've been behind the radio but I've also been that responder in the field and being able to look at that person and say, wow... what the dispatcher did, what the call taker did that made a difference. They don't hear it. They don't get to see that difference that they made whether it was calming someone, whether it was giving them instructions or whether it was just being there to listen to that person made a difference for them. For other things, just the change, the day to day change in how busy they are.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	They may go from--they can take 2 calls in the last hour to taking 30 or 40 calls in an hour. And those 30 or 40 calls may have been some really significant events. And it's the adrenaline rush that we're really busy, we're not doing anything, is a big stressor. The lack of understanding of what those responders look at and see and feel and hear and smell and taste and everything in the field, we don't get to see that from the communications side so often. So I think those are probably the biggest of the stressors is the actual work that they do, not having any closure is probably one of the big ones.
Context_of_Work - Stress-HW	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	Crazy is bland, doesn't even remotely cover that. It varies day to day. It's always, it's ever-changing. It's never the same. I would say wild some days. Some days it's very easy. It's fun. It's exhilarating at times, very

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								stressful at times. I don't even know. Exciting at times. Could go either way.
Context_of_Work - Stress-HW	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	Stressful is like today. My computer does not work, so my co-partner, if she's here, which is usually two of us at all time, but if one of us is gone, we have to handle everything from traffic stops, phone calls, we field everything. That can be so stressful. My computer being down, I can't really do anything but answer phones. I handle walkups. So that's also different from other departments. Most, I think we're one of the very few departments that actually have walkups to our window. We're not really supposed to interact with people. We have a bulletproof glass for that purpose. So I guess you could say that's the stressful part. I like dealing with just police stuff. I don't really like dealing with, I wouldn't say the public, not face to face. I can deal with them over the phone; I don't really like face-to-face contact with the public. So that's kind of stressful. Having to do office stuff in there, that's kind of stressful, 'cause I'm more call-oriented. I'm more, I like that kind of stress, not office stress.
Context_of_Work - Stress-HW	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	Not people listening. Language barriers could be. But I've really learned to just be like I understand you're kind of new here too. I get that. We're new to each other; we need to listen. But that can still be stressful. You have people that are rude. I don't deal with rudeness well at all. You have people who might be a little mentally off that I have to deal with. And I've recently taken courses to help deal with that. Not all of us have taken them, but I have. That has helped a lot, to really understand like the mental side of that, of this field, which there's a lot more of that coming on, you see. And so that's a stressor, because I don't know how they're going to act. And I guess those kind of things.
Context_of_Work - Stress-HW	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	I get more stressful. I try to get more information as quick as possible so I can get them off the line. Lately on day shift you usually have back to back to back calls. Some days like Tuesday, I had five, six calls the whole day, 12 hours. It was [inaudible]. The day before I had 22 case numbers. And that's back to back to back to back. So that got a little stressful. Sometimes it get stressful with your partner, and they're,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								you're like hey, you're miscommunicating with me. I do that too. Sometimes I'm miscommunicate a lot. It happens.
Context_of_Work - Stress-HW	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	... It's not like other dispatch agencies where I've worked where 911 has its own phone, and it's hooked up to a map. We don't have that at all. That gets stressful, but we do have Shield, which is the paging system.
Context_of_Work - Stress-HW	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	I mean, I wouldn't necessarily say stressful, it's just that you want to make sure you get all the pertinent information to give to the officers. It's just sometimes, trying to talk to people, like, we're trying to get-- especially, like I said, it keeps going back to this, you get a hot call, and you're trying to get information, and you're trying to relay the information from the person that's telling you to the officers to make sure that they have all the calls, I mean, that's kind of stressful when you're trying to get information, and you know, they may not know everything that we need to know, but other than that, I mean, it's not--it's not bad. It's definitely not as bad as other agencies, so I definitely enjoy it here.
Context_of_Work - Stress-HW	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	Just sometimes it gets hectic, but I mean you've got to love it. 'Cause it just is what it is.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	Well I would say that you know again sometimes it's boring and I was a little surprised by that when I started here. Nobody kind of prepared me for that and yeah it's there are times when we just don't have a whole lot of stuff to do and there's a lot of sitting so that's sometimes hard but I'd also say you know we deal with the public and we deal with the public when they're having problems and so that sometimes I'm going to say it's painful. That might not be the right word. I don't know what the right word is there but I think you know people call us when they are in their time of need. They call us when they have a problem and so that's hard I think to be able to respond appropriately and in a way that can calm them down and make them feel better even though you're not there and that's I think is another hard piece of all this but being a dispatcher especially is that you're not there. You're on the phone and so you're kind of once removed from the problem but you're still trying to help with the problem and I think that that's hard too so I would say that it's a hard job

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								some days. Some days it's easy, it's boring, it's you know you've got to just kind of go with the flow but it can also be really painful sometimes and mostly when there's a call that's you know that is really difficult. We get those calls sometimes medical calls or accident calls and you know that it's bad there on the scene and you want to do everything you can to help but part of it is you're not there and you're kind of this middle person so you're kind of limbo almost.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	Well that's the biggest one I'd say that yeah that's hard. You want to help and sometimes when you're not there physically you know I know we're helping, we're helping but you're not there and so yeah I would say that that's hard. Like I said it's complicated sometimes when you're on the phone with multiple people that can be hard but otherwise it's not a real stressful job. Maybe sometimes it's stressful to be bored so and to you know keep alert but that's about it.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	Oh our responsibility is about getting the information from the person and communicating that to the right people so they can go and help with that situation. That's our responsibility. Sometimes our responsibility I won't say it's really our job responsibility but I think maybe we feel a sense of responsibility to stay on the phone with people and keep them calm and keep them focused. You know if there's been an accident sometimes the person who is calling is the person who is not hurt and they're seeing their loved one in pain and they're then in pain too so part of it is for you to stay calm as a dispatcher in those situations and stay on the phone with those people so we can kind of be the anchor we're the anchor then for those people.
Context_of_Work - Stress-HW	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	S2: Stressful at times. [when asked to describe work]
Context_of_Work - Stress-HW	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S3]: Type A. That's probably the best; it's like the type A personality makes the best dispatcher because there are the go getter. They want, they will research everything to make sure that like it's done and done correctly and they would go above and beyond mostly.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Stress-HW	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S2]: Work load. Like, if you are getting calls back to back to back to back. That's -- I will say this and I know we are being recorded, but the Police Chief would love for me to be saying it -- we take calls at a certain rate. If we have a policeman or fireman ready to take every call that comes in -- it would be great.
Context_of_Work - Stress-HW	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S3]: I guess, the next biggest would be the bad calls. The ones nobody wants to hear. The ones you should never have to hear. Yeah. So those -- and then on the other side of dispatch, you know, when you get an officer shot and you are responsible for it, you know, that's -- that's high stress. Well, we teach them downstairs, you know, what to hear, what to listen for, (not what to hear but what to listen for), things like that. We don't see what the officers in the street are seeing. We just, we hear it and we maybe get a picture of it, you know, what we think it might be, but if we start getting video, I don't know how that will handle.
Context_of_Work - Stress-HW	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S2]: Right now, we can still keep it separate because we are not really seeing it, you know, we have heard it, not to say, you know, we have got several people in there and somebody calls and will say "I'm going to kill myself" and then you hear Boom. You know? So, you are the last person they talked to. What if -- you know, and that's -- that's bad.
Context_of_Work - Stress-HW	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S3]: But still not seeing it is different than when where we are going to able to see what is [crosstalk].
Context_of_Work - Stress-HW	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S2]: That's the first in a while somebody out as far as coming out of the training coming into the centre, you know, that could be on there, some people just don't want to have to deal with, you know, " my baby is not breathing" and dealing with a screaming mother or something like that. When we are going to lose the first one, that's where we lose them.
Context_of_Work - Stress-HW	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S2] ... You know, I am just talking about the whole mental viewing that -- I don't think that that should something that when we answer 911, that there is something that pops up in front of somebody's face. The locations, I would very much love to see the locations and not have to use a third-party app on phones, that that is something that is more

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								streamlined that we are able to get that that better location, you know, being able to get the X would be awesome.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	That's a good question. The first thing that comes to mind is hectic.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	It's very stressful, it's very busy and to someone that's never done it, it's very hectic. It's -- once you get into it, it makes sense; it's a system that works. Just stand on the outside watching, it's very stressful and very hectic... It's so tedious... It's the same things over and over and over, you know, the tedious part comes in to we build -- all we do is -- so the basic job of our tele-communicators is they receive a call... they have to code it correctly: emergency / non-emergency. Build it very quickly; as quickly as they can, with as few questions possible to get that right: emergency or non-emergency; get the ambulance dispatched or the fire truck dispatched as quickly as possible; and then keep up and maintain that the crews are safe, and it's that same repetition, that's the basis of what we do. There's a lot more into it, there's a lot more record keeping, all those things; but that's the basis of our job...
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	... So our supervisor steps in, takes -- so when they have a fire they're supposed to stay on that fire and let everything, all the rest of the work load is supposed to go to the other people and that 99% of the time works, but we can have other major events like a hurricane or a tornado that's come through. It's just chaos.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	Stressors. There are some and it ebbs and flows, so most stressors...all stressors are tied to money. Well there's a stressor for the employee, there's stressors for me, there's a stressor for the system. It's usually because we don't have the money to fix something real quick that we need to fix. Not that it doesn't get fixed or taken care of, but if it's more than \$10,000 it's a capital request. If you don't get capital approved the year before, you don't get it, so then you have to declare an emergency and you have to go before the board and you have to do all this stuff to get it done. So that takes time. AMR is a lot better with this new company. The radio system as well is unbudgeted, totally unbudgeted

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								and we got to a point I couldn't get a part, I called them and said I can't get parts for this, one other failure and I'm in trouble, we do. They found the money, so they're really keen on keeping technology and stuff up to date too. It's not been as difficult. Right now, it's probably the workload for them; it's a stressor for them.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	The workload's high because the flu is running rampant, so we're short on ambulances for short dispatches. The guy that went out today has probably got the flu. He's like I can come in - absolutely not. We're in a closed locked in building, once the flu gets in here it'll run to that end of the building and then it'll run back and we'll keep it for an extra month that it shouldn't be in here. So no, don't come to work. So, we're on our second round of flu.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	And it's more a stressor probably for our new people than it is for our old people. What I mean by that is when I said earlier, so one of them went through the whole training program got a child CPR call, had to give the mom direct instructions on how to give CPR to a 2-year-old, went through all that, that was it, she quit, can't do it. So if you're a parent and you have a 7-year-old and you have the 7-year-old call that day, it's close to home, it's a huge stressor. It's the same when I was on the fire truck and the ambulance, you know there are many times I've walked up and seen the back of a kids' head in a car wreck and it looks just like your kid and it triggers that in your mind. The longer you do this, the more callous you get to those things, the more cold you become, which can also be a stressor for other things at work, so it is, and its different triggers for everybody, just like people are motivated differently. And employees that - money, I'll cut your overtime off and I'll get your attention quickly, but the other guy could care less and never works any overtime, so I can't use that to motivate him.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	So the same as what motivates people will also have the differences in what triggers people, or what's going on in their life you know. They could be going through a divorce, their mom and dad could be going through a divorce, they had a sibling die, they had or grand...you know

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								you just never know what those stressors are outside of here.
Context_of_Work - Stress-HW	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	I'm telling you it's just insane. And then you have calls that are legitimate; now the true measures are unconscious- I'm calling, he's not breathing. Those are the easy ones. The hard ones are those that, is it a kidney stone or is it an aortic aneurysm?
Context_of_Work - Stress-Overload	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	I mean, obviously, there are some [spin-up?] costs, and training costs, and just getting to know your job. Likewise, same with a canine officer, or a detective supervisor, or something like that. So it is a very unique challenging place to work at. There's lots going on.
Context_of_Work - Stress-Overload	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	We host fire academies, police academies, EMT academies. It's just a lot. There's a lot going on.
Context_of_Work - Stress-Overload	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	We are seeing hotter fires. The turnout gear is heavier. Our bottles allow us more breathing time on air. Our work duration cycle is longer than it used to be--
Context_of_Work - Stress-Overload	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	But that means you're exposing your people to more heat stress. When we rotate out of an operational assignment, we go from operations group [until?] we go to a rehab group. Okay. And so that formal rehab process includes kind of a cool-down period. And then we have a standby paramedic unit that's going to monitor them for pulse and blood pressure, and if they're not within the normal limits, they'll notify somebody. And then they will start looking at heart rhythms, and they have EKG, and all that good stuff. So from there, once you clear rehab, you go back to staging. But in that rehab section, we're very good at providing water, shade, rest, a little bit of food. We always laugh because the cookies [laughter] they give you--
Context_of_Work - Stress-Overload	LE	S	Not specified	Not specified	Not specified	Male	PS-S-002	Because it makes us uncomfortable. We feel we're dealing with so much change within society alone that you start changing the way we do business, it's sensory overload.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Stress-Overload	LE	S	Not specified	Not specified	Not specified	Male	PS-S-002	I think everything going on in society. I think it's just-- whether it's drug behavior, whether it's mental health behavior, criminal behavior, society perception, I think all of that right now has become kind of a sensory overload for officers. And what's sad is I think that the stress that we saw in the '80s and '90s which got the strong retirements for law enforcement, that got taken away recently and weakened those retirements, I think the stressors that officers are going under, I think it's going to increase again. I think we're going to see the shorter lifespan. I think we're going to see-- the only good thing is, is the health of officers is up.
Context_of_Work - Stress-Overload	LE	S	Not specified	Not specified	Not specified	Male	PS-S-002	And they were. And what happened was is when they took it to 12 hours they weren't recovering again. So they found kind of the sweet spot. And the 8 hours they showed that-- because what happened was, was the stress of the day was 2, 3 hours beyond the shift, so they were already in it for that. With the 11 hours, there was, with a little bit more overlap than the work schedule, there was more downtime that allowed them at the end of the shift to decompress a little bit before they went home. And then for 12 hours for some reason they said it just seemed like they weren't getting enough sleep. The sleep pattern was disrupted. Again, I think it's overall sensory overload with just society. I think it's the workload. I think it's the-- the volume of our calls is not going up. We're not seeing a huge increase. I mean, we ebb and flow. But I think the work product, or the work that our officers are dealing with-- I was just on patrol for the last few, four or five months, and I was riding around with some of my patrol officers watching some of the calls for service. And I don't remember 20 years ago dealing with the mental health issues that we're dealing with today.
Context_of_Work - Stress-Overload	LE	S	Not specified	Not specified	Not specified	Male	PS-S-002	And then the news media. So you run into-- I think that stress on officers right now is probably the number one thing. I think it's not under-- and it's hard because I think-- and I think there's some credibility, and I would say a small amount of credibility, to the fact that as a profession we've needed to adapt better. There's been times when we needed to adapt

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								better to things.
Context_of_Work - Stress-Overload	EMS	S	Field Responder	26-35	6-10	Male	EMS-S-016	And then they say, "Oh, they're at the loading dock." Which means we now have to drive around. It would be much better to have that information.
Context_of_Work - Stress-Overload	EMS	S	Field Responder	26-35	6-10	Male	EMS-S-016	Yeah. Exactly. "What's your birthday?" We'll ask it. Registration will ask it. And then once they get seen by the nurse in their room, the nurse will ask just to confirm the identity. So in the first 20 minutes they think we're a bunch of goons with no memory when in reality it's just separate silos.
Context_of_Work - Stress-Overload	EMS	S	Field Responder	36-45	11-20	Male	EMS-S-014	Typical communication, for the most part, is by cell phone... This is my county-issued cell phone. This is my personal cell phone... I carry them both with me. This county-issued cell phone-- when I get off in the morning, I hand it off to the next guy... This is a shared phone. And the county also gives us a county-issued personal cell phone so that we can take it home and be available for calls as needed... This is my personal personal cell phone [laughter]-- in which-- I typically don't carry my county-issued personal phone, but I call-forward to my personal phone... So if my boss calls me from his phone to my county-issued phone, it will go to this phone and I'm good. So I'm not managing three, four, five different phones at any given time.
Context_of_Work - Stress-Overload	EMS	S	Field Responder	36-45	11-20	Male	EMS-S-014	SME: ...But it's well over a million people that we serve. Q: And at any point in time, you serve half of that? SME: Yes... And on particular instance like this little meeting we're having today, I know my counterpart, EMS704, he's covering the whole county right now. So if any significant issues occur, he's going to be the one-- he or she will be the one that would be handling all those issues...
Context_of_Work - Stress-Overload	EMS	S	Field Responder	36-45	11-20	Male	EMS-S-014	Yeah, absolutely. I mean things do happen throughout our day in which we won't be available for calls. It's typically for a short period of time, an hour or two whether we're attending a class or we also operate on calls for long periods of time so that EMS supervisor knows that he's going to have the whole county to cover and also we'll help each other out on big incidents. If we really have a significant incident where we are caring for

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								20, 30 people at any given time, he or she may need to come up and support what I'm doing or what the battalion chief needs.
Context_of_Work - Stress-Overload	EMS	S	Field Responder	36-45	11-20	Male	EMS-S-014	Sure. In our old system, which has kind of gone away now, let's say we're on a house fire assignment, by the time we even jump up into the rig we may have like 12 updates on a call. And we don't even know who the dispatch is anymore. So there can be information overload. And we understand why our communications center has to push it out, but certainly some things can be too much information, just because there's no way I'm going to comprehend it by the time I get to the scene of the-- excuse me, by the time I get to the scene of a call.
Context_of_Work - Stress-Overload	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-015	...I am not embarrassed to say of the amount of information that I am required to know and utilize very much outweighs how often I use it...
Context_of_Work - Stress-Overload	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	So I mean, I've spent my whole career literally standing up in the back of a-- well, moving around during the call in the back, and it's not like I'm running around, or there's drama, or whatever. It's just like, I got to grab this, then I got to grab this, then I got to grab this. And there's railings on the top. So you're kind of holding on the railing, grabbing this thing. You're looking at the traffic, and you know where you are. So you're like, "Is it going to be bumpy," or, "There's going to be a stop." And your partner is also trying to tell you like, "I got to stop fast," or, "There's train tracks coming," or, "There's a bunch of traffic ahead," or whatever. So all those things are happening...
Context_of_Work - Stress-Overload	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	...You learn how to use something, you get used to using it, that's obsolete, next generation, or that company just went out of business. I just got an email today saying that our scheduling program, which is very complex and I schedule 65 employees, they're discontinuing it... Now I have to go research all kinds of new schedule programs, what's going to work best for us, how it connects with payroll, how is-- you see what I mean? ... So one little change suddenly creates enormous amount of work... Everybody else in the agency has to now get used to doing this right. So it has payroll implications, over time implications, it's just-- in EMS, they say there's three things you don't fool with, the three Ss:

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								schedule, salary and spouse [laughter]. You don't mess with those three things.
Context_of_Work - Stress-Overload	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	So messing with people's schedules, even if it's just to go to a different technology platform, is stressful...
Context_of_Work - Stress-Overload	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	They won't do it. I mean, I can't make any of my employees do anything. Okay. They're here 24 hours a day. I've done their job. It's not easy. If you throw all kinds of harder stuff to make their job harder on top of it, it's not going to work...
Context_of_Work - Stress-Overload	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	They commute to work here. So I don't like that, but I don't have a lot of choice. My people live as far away as [City]. That's 150 miles. [City], we've got a bunch of people that live in [City]. We do 48-hour shifts, and so they can come up for 48 hours and they're off for four days. So they can make that work...
Context_of_Work - Stress-Overload	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	The tax payers say, "How much do you get paid to be a [Job title]?" That's how we have people because almost everybody has a working spouse. Well, it's tough to have a working spouse when you're away from home for 48 hours at a time, especially if you have a family. So it's tough.
Context_of_Work - Stress-Overload	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	That's probably one of the most difficult parts of my job, is adequate staffing so that they're not getting just beaten to a pulp in a busy season, and there's not a bunch of people standing around getting paid for nothing in the off-season...
Context_of_Work - Stress-Overload	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-005	SME: ...we just talk, and everybody can talk. So it's really kind of-- you got to get used to that because you and me can have a conversation, and then the other two people might be having a separate conversation, but it doesn't drown out the sound, so they're all right here...And dispatch... Everything... S1: And is it just when dispatch is talking to you or just you hear everything?

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								SME: No, no, only when they talk to us. And then the same thing goes for us. We can say whatever, but then the front seat, the engineer, and the officer has a button they can push and then they'll talk to dispatch. But they can only hear what comes out of that microphone correlating to that button they push, so.
Context_of_Work - Stress-Overload	EMS	S	Field Responder	46-55	Not specified	Male	EMS-S-006	So on paper, a firefighter paramedic and a firefighter EMT are paired together, where on a month-to-month basis, those two partners stay together and they rotate to an ambulance for a month, which is five 48-hour sets. And at the end of those five sets, they'll go to the engine for a month, and back and forth. So they have a partnership opposite of them, as well. And the reason for that is-- I think most people enjoy it because it divvies up the responsibilities between fire and EMS more equitably, and the EMS units typically are busier with longer utilization hours. So I think it helps paramedics with the fatigue and burnout of the EMS side of the system...
Context_of_Work - Stress-Overload	EMS	U	Field Responder	26-35	Not specified	Not specified	EMS-U-004	[S2] And I worked for another service where they would give a tone out before they dispatched a call so that you didn't really have to pay attention to every single word that's being said on the radio because they're talking almost every minute of every day. So we could be doing something, and then we hear that tone, "Okay, now I have to pay attention because they're about to call an ambulance. Could it be me?" Then once they say it's a different ambulance, okay, I can go back to not being as attentive.
Context_of_Work - Stress-Overload	EMS	U	Field Responder	26-35	Not specified	Not specified	EMS-U-004	[S2] Yeah. Trying to standardize that so when there's a big event. But at the same time, for me, I've done that so often, that was just refresher, but for my trainee, that might be his very first experience, so he's going to pay a lot more attention and might be more overwhelming.
Context_of_Work - Stress-Overload	EMS	U	Field Responder	26-35	Not specified	Not specified	EMS-U-004	[S4] And I was sort of promoted into this realm. During that time that I was in the garage and doing the VOC position until I was actually getting that promotion for those two months, I think that there was a lot of questions that I had sort of popped into my head, and I would say that yes, there was some overwhelming factors that came along with that as

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								well. Gosh, academy had a lot of information that was very important, but it was a lot. Probably I would say maybe six or five different sessions for the first week every day.
Context_of_Work - Stress-Overload	EMS	U	Field Responder	26-35	Not specified	Not specified	EMS-U-004	[S3] Nothing can really prepare you truly for the field. That's why it's field-training. The first couple of shifts in first week or two are generally a little on the rougher side.
Context_of_Work - Stress-Overload	EMS	U	Supervising Field Responder	46-55	21-30	Male	EMS-U-010	...they do seem a lot of trauma. As a matter of fact, I went out to the field just last week and within an hour, I saw how much trauma our young paramedics witness right now. So you have to be able to take that in and either talk about it and/or just keep going. So in order to be a paramedic in a fire department, you have to have a strong character because not everyone's going to approach you in a nice way.
Context_of_Work - Stress-Overload	EMS	U	Supervising Field Responder	46-55	21-30	Male	EMS-U-010	The AEDs, they're bulky. They're heavy.
Context_of_Work - Stress-Overload	EMS	U	Supervising Field Responder	46-55	21-30	Male	EMS-U-010	...when they get an opportunity, they need to put their head down because you don't know what the night's going to bring. And that's the most difficult part of the whole 24 hour shift. Any time after 3 o'clock, if you haven't gotten any rest between the time that you start your day and then 3 o'clock in the morning, you're not going to get any rest for the rest of the night. So you know it's going to be a 24 hour, up all night kind of thing. And that's actually the most difficult time because you're exhausted, you're hungry, or [laughter] cold, or hot, and so.
Context_of_Work - Stress-Overload	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	...I'm able to listen to EMS, fire, and PD in my zone. I will listen to that... A lot of people don't like to do that. It's too much information to them...
Context_of_Work - Stress-Overload	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	...if I'm already hearing it on the PD side, I'm hearing it at PD-- someone's calling 911... Something critical like that and I'm hearing it, at least I'm ready... A lot of paramedics don't like that. It's just too much information, too much going on.
Context_of_Work - Stress-Overload	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	I know a lot that goes on at the OEMC and they're very busy and they get a lot of calls. I can just imagine them sitting there and get all these calls,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								and I understand the call taker, they're trying to get all this information. But I think the information they give us is limited because I think it's just a lot of work... They'll let us know what we need to know. Because it's so busy in there. I just know it's just so busy in there.
Context_of_Work - Stress-Overload	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	...So you could have a big incidence up north where there's six ambulances and they're all trying to talk at the same time. And dispatch will say, "Okay. Hold on, guys." He'll triage via, he'll "Let me see what's going on first, okay? Ambulance 10, go ahead with your message. Okay. Now ambulance 15, go ahead with your message." So he has to triage that over them all... In the field if there's a lot of things going on at once. He'll, "Hold on, guys."... And when it's summertime, it's so busy. Dispatch is trying to send ambulances and send them here, send them there...
Context_of_Work - Stress-Overload	EMS	U	Other Public Safety Personnel	46-55	21-30	Female	EMS-U-009	[RE: too much technology or information] I think that people might say that as far as like the heart monitor, [LifePad?] 15, it's a lot. That device does an awful lot. Just the recording alone and what you do and send those runs over Bluetooth and do all kinds of stuff with that. I think that the addition of having such intense technology is intimidating to those who were maybe skating by or the thought that now they might be of the mind-set where like, "Oh my God, well I could get caught for what if I didn't do that or--?" And it makes them fearful. So now that technology is causing anxiety because they're wondering, "Oh, am I going to get in trouble? I didn't send that run. They're going to know." We download the runs from a distance. We can do that like anytime we want.
Context_of_Work - Stress-Overload	EMS	R	Field Responder	18-25	5 or less	Male	EMS-R-018	At my other job the stretchers on our ambulances are not like here. They lift up on their own and all you do is just pull them out and then you press a button and they go down so you never have to lift which is a huge deal on your back. I mean they'll lift 700 pounds or 800 pounds really so that's huge. I mean you don't have the issue of throwing your back out you know trying to lift a big patient, having to call for extra trucks but it's just you know it's money. I mean it's a \$30,000 system.
Context_of_Work - Stress-Overload	EMS	R	Field Responder	18-25	5 or less	Male	EMS-R-018	... If you can't communicate think about the firefighters in [county name] County that were taken hostage in 2010 I believe. If they didn't have

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								<p>radios that worked I mean how would anybody have ever known? Out here you get taken hostage something happens to you and you can't get out what are you going to do?</p> <p>You going to crawl till you get service somewhere? I mean so it's the communication technology is pretty primitive and nobody seems to want to pay the money to fix it because it's not a big deal to the commissioners. You know they can't just spend the money on it so I fear it'll take somebody getting hurt or a lawsuit of some kind because the crew couldn't get somebody out ended up passing away or having long term effects from a stroke or something like that, the crew was trying to get on the radio, couldn't get out, the family sues. I think you're going to see something like that that's going to change this before pleading with the administration to change it.</p>
Context_of_Work - Stress-Overload	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	<p>They are. I love my job. It's very rewarding. It's great to help people when they're in need. When they're having the worst day of their life but it can be stressful because not every day, not every shift ends well and there are times when you just can't help someone as best you want to you can't.</p>
Context_of_Work - Stress-Overload	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	<p>It is. When you can't do when you're limited to what you can do or when you've exhausted everything that you know and given every treatment that there is and it's not enough that can be frustrating. It can be stressful at times. You deal with not only your patient but a lot of times family members especially if it's a bad call.</p>
Context_of_Work - Stress-Overload	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	<p>... It took 2 to 3 times as long to do your report which when you have a day where you only have 2 calls it's not that big of a deal because you have plenty of down time to get that report done but when you're running back to back calls and you're on a second call and you haven't even gotten to finish your first report it's very frustrating and they shut down a lot especially when these things depend on internet and we are so you get out here somewhere and then the information the things that you need won't load so then you just kind of got to wait until you head toward [City] and pick something up and go from there.</p>

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Stress-Overload	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	... They may not be angry at me but I'm the person they're going to take it out on because regardless of how fast I move or how efficiently I'm doing their job all they can see is that their family member is hurt and no matter what I do it's not going to be fast enough or good enough at that moment so those are the ones when psych patients and things like that those are the ones that it's scary not to have a working radio because if I need help I know I'm not going to get it because they don't know so I think if there was a way to take the general public out of being able to hear our traffic and us be able to communicate easily and efficiently with each other without all of the areas that we don't have coverage it would be much better.
Context_of_Work - Stress-Overload	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	Because if you take this table and cut it into eight pieces, I have one eighth of it, but my team is a little different in that most of the teams are in their geographical piece of pie, so there's a battalion chief, a coach, with his team. But I have a piece in almost every part. So the whole city is my domain, because hazmat could happen anywhere.
Context_of_Work - Stress-Overload	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	So if I am sitting here upfront and I miss something, there is no such thing as multitasking. We can only focus on one thing at a time, be fully engaged. It's a life. You think you can do two. It's just those. So if I'm focused on this and something comes up, and I'm talking somebody and they say, "Command, I need blah, blah, blah," I could totally miss it because I'm auditorily excluding. And dispatch comes in and can say, "Command, the inside crew just asked you for some help. Thank you." And we also bring other people to bear at our command post to help us listen and to be a second set of ears, too. But it takes time, of course. The bad part is that most emergent things happen in that first 10 minutes and you may not have that help quite yet to hear.
Context_of_Work - Stress-Overload	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	Right, earlier. Just overwhelm with information because if it's really big and you've got, let's say, 100 people to evacuate, the building is half on fire and the water supply is jacked, not very good. You have 30 things to do and you've got 4 people to start. And so what you pick and how you start to act and operate, just that whole communication stream is--

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								somebody else isn't on the page as you, it could just be muddled. Because we don't have the luxury of, "Hey, I fly there," and I'm their first as a coach and say, "All right, let's bring in a couple of the fire attack and backup and let's make it smooth.".... . So if you're emotionally connected to what's in front of you or it's just too much, that will shut you down too. It's like we're a cup, and once that cup is full, anything new just bounces out. You don't hear it or see it even with your eyes open and your ears open. You won't.
Context_of_Work - Stress-Overload	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	And I'm reflecting back, because when we play back the radio and listen and watch, the after-action, I'm like, "They totally set it." So all I could think of was, "Was I turning left? Was there a car coming? And suddenly all my energy and effort, I'm driving, now suddenly focused on this thing outside the car and I just missed it? What is it?" So that's definitely a barrier. Someone walks up to the command post, you say, "Hey, I've got my baby in there." I just missed everything that was said to me in this ear right here. I missed it all.
Context_of_Work - Stress-Overload	FF	U	Field Responder	36-45	11-20	Male	FF-U-003	Q: this is gear as physical overload? SME: Well, with the heat index. It's probably 98 in the heat index. It's triple digits anyway so, when you're wearing that gear, you're going to lose weight.
Context_of_Work - Stress-Overload	FF	U	Field Responder	36-45	11-20	Male	FF-U-005	Absolutely, people I know and myself [laughter]. And depending on what you have, it can be very overwhelming. That just goes down to just being there and doing it, getting the experience, and practicing. The best thing you can do is when you are overwhelmed-- everybody's going to be overwhelmed in a big two-story apartment fire at 3 o'clock in the morning where people are still in there. But the best thing that person can do is not let that show over the radio. J
Context_of_Work - Stress-Overload	FF	U	Field Responder	36-45	11-20	Male	FF-U-005	I think the most times that people, and I'll say I get overwhelmed, like when we go to a high-rise alarm and I'm the leader of the fire attack group. I'm in charge of three to four units inside and we're going up the stairs to the 18th floor. And command shows up, all the other logistical units show up outside. We're all on one channel initially. So on a high-rise alarm, we have like eight trucks and two chiefs on one channel and

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								<p>everybody is showing up about the same time because we're all pretty congested. Everybody starts giving their radio reports and then there's little boxes that people have to check. "I'm going to check the fire pump. I'm on hydrant supply. I got these tools. I got these keys." And command is always harping on me because command wants to know what's going on inside. They say, "Inside truck, can you give me a report? Can you give me a report?" And a lot of times, I'm trying to get out on the radio. There's many times, on these high-rise alarms, many times where I'm trying to key up and it's not because someone else is talking about their hydrant supply or they're talking about building occupants. And then command's getting frustrated with me because I haven't answered back. And rightly so because when command is outside and didn't know, trying to talk and I'm not answering, command's thinking, "What's going on in there?" So it's very overwhelming in the first 10 to 15 minutes. I don't know what can be done to remedy that other than maybe reducing some of the little check boxes everybody is supposed to say.</p>
Context_of_Work - Stress-Overload	FF	S	Field Responder	Not specified	31-40	Male	FF-S-040	<p>Today, we do that to make sure the inventory is still up on par. In theory, if we did our jobs perfectly, each time we run a call, we'd come back and we would get all that stuff back right every time, but through the course of a week, as we're running incidents, things get distracted. You run back-to-back calls, things get missed, people leave in the middle of the shift for some reason, forget to do something.</p>
Context_of_Work - Stress-Overload	FF	S	Field Responder	Not specified	31-40	Male	FF-S-040	<p>Now, the challenge with that stuff is providing it in a way that is useful but it doesn't saturate the user. Because if you provide too much stuff, the user gets too distracted and they forget what they're supposed to doing and it actually becomes detrimental instead of helpful.</p>
Context_of_Work - Stress-Overload	FF	S	Supervising Field Responder	46-55	21-30	Male	FF-S-041	<p>So, when I first started this position, I was a little bit overwhelmed. As a unit officer in the station, a captain, lieutenant, you really just listen to [County]. If you're on the border, you may listen to [Name]'s. [City], you may listen to [City], [County], [City]. You may listen to [County], right? But that's about it</p>
Context_of_Work -	FF	S	Supervising	46-55	21-30	Male	FF-S-041	<p>Own purpose. And when I first started this job, it was a little bit</p>

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Stress-Overload			Field Responder					overwhelming.
Context_of_Work - Stress-Overload	FF	S	Supervising Field Responder	46-55	21-30	Male	FF-S-041	Well, information overload can occur by listening to all the radios. Someone told me that your train of thought should be on concentration on one channel of focus, but sometimes, my job, it makes me listen to different ones.
Context_of_Work - Stress-Overload	FF	S	Supervising Field Responder	46-55	21-30	Male	FF-S-041	...So information overload I suppose is listening to the different types of channel. The emails, we at times are a Internet fire department. We do everything on the Internet. We document based on the Internet. We email upon email to verify that they receive the email, we read receipt things and it sends more emails back to us. We are a Internet fire department. Sometimes we lose focus of sometimes what happens on a basic station level because we're busy answering emails. So those two things are the biggest ones that come to my mind.
Context_of_Work - Stress-Overload	FF	S	Supervising Field Responder	46-55	21-30	Male	FF-S-041	Yup. I do. Yup. Yeah. It's a lot of stimulus going on. It's a lot of stimulus. So again, it's overwhelming. I guess you get used to it.
Context_of_Work - Stress-Overload	FF	U	Other Public Safety Personnel	26-35	11-20	Male	FF-U-045	...I think another, I guess because everyone of us has a radio, every operational person has a radio, a lot of times that incidents there's people talking over each other. And then that's our own internal issues because we should be able to really teach our people to practice better radio discipline. To only go through one source and not-- if you don't have a new message that's important, just [crosstalk]. Yeah. Exactly. But yeah, that every once in a while, you're like, "I really want to say something right now and I keep honking out and--" yeah. So that does get quite frustrating.
Context_of_Work - Stress-Overload	FF	S	Field Responder	18-25	5 or less	Male	FF-S-039	...So if you have eight people on the rescue squad, you can accomplish a lot, but it's a little bit harder to keep track of as the officer just because... So you've got seven people riding behind you. Then the officer is responsible for seven additional people plus the driver, and that's definitely outside of their ability to manage... So they usually divide it up

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								into two teams.
Context_of_Work - Stress-Overload	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	...there's 50 vendors. And there isn't one vendor that's done everything very well. And even at that, the vendors, the 50, or 100, or whatever, they've really focused on one area. And they try to do the other two or three things, but they never do them well. And so we've created work-around after work-around to try to get everything to work, but it doesn't work well. It creates a ton of work on our side to be able to make all of this work.
Context_of_Work - Stress-Overload	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	And then there's just the compatibility issue... And so, finally, they just said, "Okay, we're going to buy Excel for everybody." But then you could buy one for every desktop and then still continue a cloud-based service, which is now buying two programs. Or they just buy Microsoft 365, which gives you the web version, but then also gives you five free licenses, or desktop, or whatever. Then, that creates a whole nother problem for our IT department because... you have to support them, and you have to load it on the computer. And then access and all of that, so.
Context_of_Work - Stress-Overload	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	...The stuff that's coming out, with the thermal imaging cameras, it's neat to have it in your mask. I don't know if it's necessary. It might bring a level of safety. But I don't know at that point, do you become sensory overloaded where you're getting information about where you're at, what's going on, when-- focus on the task.
Context_of_Work - Stress-Overload	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	There's a huge cost issue. And so I think that a lot of things can be done on a lesser scale. You can give one guy the \$10,000 TIC, but then give him \$50 worth of communication that he can now more freely speak and be able to communicate to get out what he needs to do that doesn't take over precious radio time. Because we're getting dispatch. We're getting command. We're getting all of these things that-- it's turning into a lot right now. And I think we're just trying to figure it out.
Context_of_Work - Stress-Overload	FF	S	Manager	46-55	21-30	Male	FF-S-023	[RE: data link built in-house] So that's probably the biggest key, is do they have the capacity to get it done, the work capacity? Because we still have to keep the trucks maintained and all of these systems... So yes

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								and no. Not really. If I had more staff, it would be quicker. Unfortunately, now it's becoming a higher priority, so I might have to kick the can on some other stuff, and try to bring this together. So I have the talent, but not necessarily the work capacity... So it's a big undertaking, and it's heart-palpitating [laughter]...
Context_of_Work - Stress-Overload	FF	S	Manager	46-55	21-30	Male	FF-S-023	So there's a lot of emails...And quite honestly, that's a highly overused medium. We find that most of our emails are for trying to educate or inform through email, don't go out to the masses. It's just junk. In their head, it just goes away...
Context_of_Work - Stress-Overload	FF	S	Manager	46-55	21-30	Male	FF-S-023	...So I have a radio in my car, I have a portable that I have on the desk. So listen in on that. If I'm out and about, and a call drops that I'm closer to, I'll go to that. If it's a fire or something, I'll go to that. So it's all part of the gig. So radios, email, Skyping, or the video stuff, telephone, that's primarily how we communicate. I mean, face-to-face. But a lot of face-to-face stuff too, but. And then I try to to get out to each one of my locations frequently, and each one of those stations frequently, so that I can talk to people and try to get what's going on. Kind of that management-by-walking-around stuff... But it's exhausting... Eight stations and also we have-- so there's the eight stations. We have a maintenance facility. We have central supply and a training center and we have one storage building as well... Getting [them trained?] [crosstalk] maintenance, yeah and all that stuff. I try to get to one station every-- I try to get to every station once a month... And then my people, twice, three times a month. It's tough. That's exhausting.
Context_of_Work - Stress-Overload	FF	S	Manager	46-55	21-30	Male	FF-S-023	...They set up programming, and then we have to go through and touch every radio with a programming. We have to touch each console with programming. So it's a pretty heady and very time-consuming process. So we don't usually do like, if one person wants to change or if one little thing wants to change we don't do much. We wait, get a big change together, and go out.
Context_of_Work - Stress-Overload	FF	S	Manager	46-55	21-30	Male	FF-S-023	So the unit hour utilizations came from the ambulance community. And what they try to do is if they can get there-- what it is is how many hours

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								you are on calls over available hours. It's just a percentage... We're looking at it as to how we're burning our people out. If we go too high, tired people make bad decisions; bad decisions kill people...
Context_of_Work - Stress-Overload	FF	S	Supervising Field Responder	46-55	21-30	Male	FF-S-017	[RE: dispatch] ...We used to have free standing fire dispatchers years ago, and they were really good at free-think. I mean they'd be like, "Have you thought about this? What about this? Do you want this resource? Should I be calling this?" That's just not the way our comm center works right now. They're super busy. They crank out a ton of calls and try to process a lot of information for us. And with priority dispatch, I think it's really increased that. I mean, the demand on them is tremendous, I think. Just trying to keep a full workforce for them, I think, is a battle, let alone teaching them how to be advanced in free thinking for the fire department. I just don't think they have that opportunity right now.
Context_of_Work - Stress-Overload	FF	S	Supervising Field Responder	46-55	21-30	Male	FF-S-017	...TAC four is almost always fire... If there are two simultaneous fires going on, house fires, then they'll open four and five. The biggest issue is the comm center has to have certified or trained people to function on those channels. And a lot of times, we can't get extra channels open. They just don't have the staffing to-- either the people trained or the people period to open extra channels for us, and that's where it becomes difficult. And you can hear-- they'll open it, but you can hear a dispatcher working multiple channels and trying to handle the call volume that's going on...
Context_of_Work - Stress-Overload	FF	S	Supervising Field Responder	46-55	21-30	Male	FF-S-017	...Yesterday, we ran with [City], so we went over to [City]. So now they were trying to monitor [City] and we had a working fire going and tons of medicals going on and a dispatch channel going on. So, it's interesting to watch them try to manage our call load, especially when we hit a peak, when we just get busy...
Context_of_Work - Stress-Overload	FF	S	Supervising Field Responder	46-55	21-30	Male	FF-S-017	[RE: working in arson] ...we struggled back then trying to move to some kind of automated-- we really wanted a tablet back then, when I was in there, where you could do your sketches, and you could take your pictures, and you could do your notes. And we really struggled back then trying to find something that could meet our needs and could be

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								supported by not only the organization money-wise, but by the IT department who already has a ton of stuff going on. And then here we are going, "I want this, it's special." And they're going, "Right. You're not special. We need to meet the whole need of the whole city." ...
Context_of_Work - Stress-Overload	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	We also live in a resort community, and we have a lot of transient population. And so as a volunteer comes in here, and the society expects them to have the same certs as a paid individual, even though they're volunteers. And we live in a high-cost area, so they have two or three jobs in order to maintain a minimum standard of living. On top of that, they're now required by the public to have the same certs as a paid guy, which takes time away from their job... the life expectancy of a volunteer to maintain that internal and external standard is really, really difficult.
Context_of_Work - Stress-Overload	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	[RE: apps for volunteers] Really, they need to interoperate, or if you could have some sort of single sign-on where it covers all of them, that would at least take some of the burden off.
Context_of_Work - Stress-Overload	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	I mean, gee, I have logged into-- between all the government stuff I have to do, I have 25 different web portals we're supposed to do something on.
Context_of_Work - Stress-Overload	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	I have 78, as a [Job title], to log, 78 different log-ins. This one needs characters. This one needs capitals. This one needs numbers. You can't just have one log-in for all this stuff either because they're all different... It's a nightmare... I enjoy the corner fetal position, a lot of tears [laughter]. No.
Context_of_Work - Stress-Overload	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	...My wife works at the 911 center, and her concern for the dispatchers is there's a lot of stuff they don't want to see. So they want to see where you can get end-to-end information, but they don't necessarily have to be in the middle of it because they're worried about what happens when people start going, "I'm suicidal, or I'm going to videotape it so that everyone can watch me off myself." So it's those things that are unintended consequences there. So, just like anything else, information's

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								good, but too much in the wrong way can be bad. So how do we control that?
Context_of_Work - Stress-Overload	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	...It's careful what you wish for, right? I would love to have everything--radio, everything into one thing. That's why we used to love our Nextels. When Nextel existed back in the day, the iDEN format, that was awesome because you had the cell phone. We could use them as radios. And then that technology kind of became unsupported and went away. But we really kind of miss that. But the challenge to us is then everything's in one thing. I lose the one piece of equipment, and now, I've got nothing. Or there's so much information coming into it that I can't sit there. It's just like when you're trying to type a text and things binging you, email here, calling here. It's like, "All I want to do is send a text. Knock it off." ...
Context_of_Work - Stress-Overload	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	...But it would be nice to find a better mechanism of not so many different things. I mean, right now, on an incident, I'm carrying usually two 800 radios, a VHF, and two cellphones when I'm running an incident. And that's ridiculous... It's also too much information...
Context_of_Work - Stress-Overload	FF	U	Field Responder	46-55	11-20	Male	FF-U-020	...Our call volume has increased tremendously. We're reaching a place where, as we're looking and staffing and we're trying to track and trend the data that shows, okay, this is how our call volume has increased, and here's a direct correlation to population increase and some of the other various factors like marijuana. And so there's a direct correlation between the population increase and our call volume...
Context_of_Work - Stress-Overload	FF	U	Manager	46-55	11-20	Male	FF-U-021	...I've got an iPad that I can link in from home. So I can just log on to my computer from home see if I need to look at any files or folders on my computer things of that nature. So it's good and bad, it's good because it's convenient, but it's bad that you never get away from work.
Context_of_Work - Stress-Overload	FF	U	Manager	46-55	11-20	Male	FF-U-021	...just like everything else, we're running 40% more calls with the same amount of people and we have 40% more inspections. So you kind of hit a place to where you only have so many hours in a 24-hour shift...
Context_of_Work -	FF	R	Supervising	36-45	21-30	Male	FF-R-024	[RE: switching to new IC tool] Yes. We have an IT. So we had a battalion

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Stress-Overload			Field Responder					chief who sent us down this road and then left to go work somewhere else. So now one of our engineers, our drivers, is trying to keep it afloat, which is great. I'm glad he stepped up, but it's too much. In my opinion, it's too much responsibility to put on someone who drives the engine and is paid a certain amount and is already busy doing a whole bunch of other things. So we will see how it pans out.
Context_of_Work - Stress-Overload	FF	R	Supervising Field Responder	36-45	21-30	Male	FF-R-024	...The other thing about station alerting is right now someone answers the phone, they start taking information, who, what, where, why, what's going on, and then they hit a button, whatever their procedure is, and then it goes to the other consoles. Then the person who's dispatching sees the call, they read the notes, okay. They start building the calling CAD, and then they have to go to this other screen and they have to choose which radio channels need to be awoken, if you will. Then they use a button, they make the noise, and then they send out the dispatch... So we want them to get this done in under a minute, and there's no way... There's a lot going on...
Context_of_Work - Stress-Overload	FF	S	Field Responder	46-55	21-30	Male	FF-S-031	My daily routine is very hectic because as the training division we're required to manage training curriculums, provide evaluation processes for probationary firefighters, to disseminate and deliver required training by the [State] Administrative Code, the National Fire Protection Association, as well as manage budgets and funding so we can provide those training with all our personnel.
Context_of_Work - Stress-Overload	FF	S	Field Responder	46-55	21-30	Male	FF-S-031	Yeah, it can be detrimental. With human nature and how you perceive your learning curve so to speak, if you're given this piece of paper to read, most people can read it. If you're given a tablet, "Okay, tomorrow morning we're starting on the tablet," and you don't have any technology background, it's going to be difficult. Whereas others look at this tablet and go, "Oh, no problem. I have one at home. I'm just going to log on and do this, and this, and this." The other opportunity where there's a problem is if you get so focused on this piece of technology trying to log on, you're missing key information as you're going to the scene or potentially could be missing key information, as well as personal safety.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								If I've got my head down looking at this thing, and my driver's concentrating on getting through traffic, I'm not able to help him drive because I'm not looking around at potential problems of traffic control. So the reliance on him to be the sole responsible driver, when I've got my head buried, that could potentially be a problem.
Context_of_Work - Stress-Overload	FF	S	Field Responder	46-55	21-30	Male	FF-S-031	. So that's an extreme example, but sometimes there's information that we just don't get by the time we get to the call because the call-taker is still intaking that. And he or she may have three or four more calls they're trying to send out. So we're not the only agency that they deal with. So if there's a fire going on in [City], and there's a car wreck going on in [City], that dispatcher has to manage both those incidents.
Context_of_Work - Stress-Overload	FF	S	Field Responder	46-55	21-30	Male	FF-S-031	And in many times, almost daily, you're constantly bombarded, especially as a first responder, from an email to a phone call to a radio dispatch to an overhead page. All of that information has to be processed. And some people can do it. Others struggle with it. And that's where that information chain breaks down. So small increments of miscommunication lead up to a catastrophic failure.
Context_of_Work - Stress-Overload	FF	S	Field Responder	46-55	21-30	Male	FF-S-031	I think the problem with it would be too much information. And what someone perceives, what the general public perceives as a dire emergency threat, we would perceive as well, it's not really a priority incident.
Context_of_Work - Stress-Overload	FF	S	Field Responder	36-45	6-10	Male	FF-S-032	...But, inevitably, the other thing that's kind of a challenge is in those situations where there's a lot going on, the level of stress or the level of uniqueness to that call for us is also elevated, which kind of jeopardizes our ability to stick to that very short, succinct radio traffic, right? So typically on large-scale incidents, or typically on any incident where we have a challenge or where we have a significant issue where we harm or kill a firefighter, the communication is almost always identified after the fact as one of the contributing factors to it. So day-to-day, small incidents, pretty routine. Larger incidents, very, very limiting.
Context_of_Work -	FF	S	Field	36-45	6-10	Male	FF-S-032	It's a very stressful environment oftentimes, and so your capacity to

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Stress-Overload			Responder					think through complicated things diminishes.
Context_of_Work - Stress-Overload	FF	S	Field Responder	36-45	6-10	Male	FF-S-032	Yeah. I would say almost like any significant response that's not routine for you, everybody, to some degree, is overwhelmed whether they admit it, or whether they don't, or how they-- some people are much better at handling that than other people are. But, certainly, even if you didn't have any technology and you just showed up to a house that's on fire and you've got house that's burning, you might have some people inside. You've got five other apparatus coming that want to know how to be assigned. You've got neighbors screaming at you. You've got the news media, whatever. So there's certainly a lot of outside things on any significant call that can be coming at you.... But yeah, there's lots of stuff moving very quickly and coming at people. And it seems to just be, I think, experience, training, and just some just personal ability, I think, are the things that allow some people to filter that and make the right decision and some people to become just completely overwhelmed by it, so.
Context_of_Work - Stress-Overload	FF	S	Field Responder	36-45	6-10	Male	FF-S-032	there's probably a trend with the ability to process and not get overwhelmed comes with more time and more training being in those situations where you are overwhelmed, you get better, but I don't think it's directly tied to that, or we don't see that it is, it doesn't seem. Some people are really good at it and some people aren't.
Context_of_Work - Stress-Overload	FF	S	Field Responder	36-45	6-10	Male	FF-S-032	but our city's IT department is strained with other items on there, right? So we kind of got a little bit of help and then it just kind of fizzled. And that kind of model is not the most conducive to long-term success or adoption [crosstalk] because you kind of get it close enough and then it kind of has a bunch of bugs that don't quite work. So that kind of same model about how you'd make any technology, right? "Here are the things that we need help with. Here's the technology that I think is out there that could help better facilitate this. We need a better way to capture. We need a better way to display this information." Kind of going through the city's IT department is one kind of way to do it, but it has a number of issues.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Stress-Overload	FF	S	Supervising Field Responder	Not specified	Not specified	Male	FF-S-036	[S3] Does it emotionally wear? I mean, when you work-- if you spend three to five years in this area working this station, you see probably the worst of the calls. And I will hear from people when they go to-- end up going to in [City] or [City] for a while, that it is a-- it's a different-- it is different. And you realize sometimes, if you work in just one spot you can start to get jaded. If all you're seeing are drug calls, you can start to let that wear on you. So we tell them they're not supposed to-- everybody's the same. But it can slowly wear on you, but I think in general, most people deal with it well.
Context_of_Work - Stress-Overload	FF	S	Supervising Field Responder	Not specified	Not specified	Male	FF-S-036	[S2] One of the biggest problems we have up here, too, is we're pretty much a medical provider to a lot of people. A lot of homeless and heroin overdoses and fentanyl overdoses. They go multiple calls a day now, homeless here, too. And that kind of wears on them. And 99% of those calls are somebody sleeping drunk. And we wake them up, and we leave. There can be call after call like that, so. That's probably more of an issue than the diversity and minorities, and other stuff is dealing with the homeless and the opiate issues.
Context_of_Work - Stress-Overload	FF	S	Supervising Field Responder	36-45	21-30	Female	FF-S-037	...So, I mean, it kind of creates an added step, but I also don't want to carry two phones and have two different phone numbers. That's really hard to manage and track, and it just creates more headache for me to have two phones.
Context_of_Work - Stress-Overload	FF	S	Supervising Field Responder	36-45	21-30	Female	FF-S-037	And just the fact that information is really at your fingertips too. You got to take the good with the bad. There's some frustrating parts to it, but there's a lot more positives than there are negatives. Having all of that information right at your fingertips.
Context_of_Work - Stress-Overload	FF	S	Supervising Field Responder	46-55	31-40	Male	FF-S-038	So the actual work itself, how does a person feel about it? Okay. Yes, it's very challenging work and rewarding, and sometimes it's very demanding at times. I mean, our crews work 24-hour shifts. So depending on how things go, it can become physically and mentally demanding on the person, individual folks.
Context_of_Work -	FF	S	Supervising	46-55	31-40	Male	FF-S-038	Yup, exactly. So it's challenging.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Stress-Overload			Field Responder					
Context_of_Work - Stress-Overload	FF	U	Field Responder	36-45	11-20	Male	FF-U-010	So I think there's always room for improvement and communication. But that's just-- I think things like that are bound to happen, especially when you're behind an incident and trying to catch up. But it does happen.
Context_of_Work - Stress-Overload	FF	U	Field Responder	36-45	11-20	Male	FF-U-010	I wouldn't say it's sensitive. It's just that everything we have is so big and bulky, that it just pushes it, you know.
Context_of_Work - Stress-Overload	FF	U	Field Responder	46-55	11-20	Male	FF-U-011	So we are expected to be here at 8 o'clock in the morning but most guys come in earlier, around 7:00 so they can relieve the people that are here. You can imagine if you've been here 24 hours, you're dying to get out of here. Some of us. So we show up at 8:00 and then our day really doesn't start until 8:30. From 8:00 to 8:30 there's our coffee break
Context_of_Work - Stress-Overload	FF	U	Supervising Field Responder	56-65	31-40	Male	FF-U-014	...I know the technology is there in our radios, but it's the fact that we don't practice it very often. And so I'm just trying to find it so, at 3 o'clock in the morning when your mind isn't working as sharp as it should be, that it's easy to get to that place. Yeah.
Context_of_Work - Stress-Overload	FF	S	Field Responder	46-55	31-40	Male	FF-S-015	What I find after doing it for 15 years now is the relationships, and who your point of contacts are, and how you maintain those relationships. Because you don't always have a lot of time to start trying to figure out who's who in the sandbox when you need to make decisions and get mission-critical communications backup.
Context_of_Work - Stress-Overload	FF	S	Field Responder	46-55	31-40	Male	FF-S-015	And to get them off and talking to somebody else, it makes them nervous if they're missing something over here on their primary dispatch channel. So trying to get that-- I want to say it's challenging to get the law enforcement to come over to the inter-op side of the world. They're learning ICS. As of 10 years ago, they couldn't spell ICS. Now through grant funding and kind of through Department of Homeland Security, it's becoming the norm of communications, clear text, and the structure of how we run incidents. It's using ICS. So it's becoming easier, but there's still that gap of having them come over to one of our inter-op talks to share information without going through the dispatch centers. I'm sure

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								it's better in other parts of the country than it is other places,
Context_of_Work - Stress-Overload	FF	S	Field Responder	46-55	31-40	Male	FF-S-015	The cell phone is one thing because trying to make a phone call while their driving code three. I mean, that's not always advisable. But sharing information on a screen is focusing on the screen and having your awareness of what's around you as well. So it's multitasking, and it goes back to how much can we actually do in multitasking, and what do we have available to us.?
Context_of_Work - Stress-Overload	FF	S	Field Responder	46-55	31-40	Male	FF-S-015	If you have a good training program and, people understand what you're training them on, and they don't get information overload, it's better. But we have 48 zones in radio that we've developed so we can guide them to a specific zone for a specific incident type.
Context_of_Work - Stress-Overload	FF	S	Field Responder	46-55	31-40	Male	FF-S-015	I don't think anybody really likes change. And then when you put the stressful situation of life safety, and somebody's life is on the line to be able to communicate or declare mayday or call for help, that's a pretty substantial action. And they're used to having something.
Context_of_Work - Stress-Overload	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-016	I went away on vacation for the last week or two, 200 emails. And I still have to answer my phone, be available 24/7, because I'm a senior command staff person in the fire department.
Context_of_Work - Stress-Overload	FF	U	Field Responder	46-55	21-30	Male	FF-U-025	...I think it's a rewarding job for sure, and it's certainly a stressful job...
Context_of_Work - Stress-Overload	FF	U	Field Responder	46-55	21-30	Male	FF-U-025	...if I have a radio that's expensive and something happens, I lose the radio or it gets stolen, the officer gets time. So it comes out of his pocket or he gets time with suspension. So that's a big concern, is that, say I'm an officer in engine, we get these new tablets that are easy to break. I'm not going to be happy about it because then now, that's something else I got to worry about. And when you're slinging tools around and your big concern is getting off this rig, putting your stuff on, and getting in there, you're less worried about delicate things. We're not delicate. We're just not delicate people. So when you put something on there that is a level of technology that is where we are today but is not durable, that's a concern for us as firemen.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Stress-Overload	FF	U	Field Responder	46-55	21-30	Male	FF-U-025	...one thing that can be overwhelming would be-- they would call them mayday situations. So where a fireman's trapped or injured or there's an incident and a mayday is called. So when a mayday's called, then there's a lot of-- there's a lot of things that go through your mind. What's happening? What's wrong with the situation? Why was there a mayday? And so for a brief moment, the situation gets chaotic and very uncertain. Those are situations that they can pose those stressful uncertainties...
Context_of_Work - Stress-Overload	FF	U	Field Responder	46-55	21-30	Male	FF-U-025	...And then other ones would be emergency evacuations. So when you're inside and you're fighting the fire, you're doing what you need to do, and then they tell everybody to get out of the building, they start blowing horns outside to let you know you need to get out, there are times where we're not real sure why they're pulling us out. So through time, we've learned that when you have somebody outside telling you to get out of the building, just get out. Get out and ask questions later versus being in there getting on the radio, "What's going on? We got it." There's been a number of situations where, I myself included, are guilty of that, slowed getting out because we thought we had it knocked. And we thought we had it under control. "We got this. We got this." I mean, that kind of thought. And then you finally back out slowly and then you turn around and look and you notice that the roof's getting ready to come in or the building's getting ready to-- and it didn't seem like that inside...
Context_of_Work - Stress-Overload	FF	U	Field Responder	46-55	21-30	Male	FF-U-025	...That can be an area of where it can be overwhelming. Sometimes even our radios, and I think the more features you add to something which is considered a tool, the more complicated it can get...
Context_of_Work - Stress-Overload	FF	U	Field Responder	46-55	11-20	Male	FF-U-027	I don't know. Some of it's nice. We get it on the print-outs and the mobile data terminal. Like I said, they have to be on something that you can digest quickly. It may be too much information to put on any one thing, or it may not be able to process it as quickly as you'd like. But some of it would be nice to have on the screen. You could scroll down. We do have it on some of those where-- how many floors, because I go to high rises all the time. I don't know how many floors are on there. I mean, so I've got hundreds of buildings in my [inaudible] district of high rises. I don't

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								know each one how many-- what the floor is. Be nice to have that either on the printout or on the screen so you could access it.
Context_of_Work - Stress-Overload	FF	U	Field Responder	46-55	21-30	Male	FF-U-028	Yeah. I'm going to say this, but this is my explanation. I'm looking at a view of a first-end or a first-line company officer, is depending on the incident, you'd be task-saturated. So you have not only that incident that you've to contend with. You have to look at the fire, or whatever the emergency is at hand, and process a lot of data mentally in your brain...
Context_of_Work - Stress-Overload	FF	U	Field Responder	46-55	21-30	Male	FF-U-028	...But also the reliance and also these components that we've talked about. The computers or radio system that has some degree of complexity. Of course, you will get used to it. On the fire drum, there's a million things that are going through your head. There's a million things that must be observed to come up with the solution. Any incidents giving you the problem, it's your job, again, to come up with the solution. And it's not something that's just, "Let me go back to the fire truck and think this one out real quick." It doesn't happen that way.
Context_of_Work - Stress-Overload	FF	U	Field Responder	46-55	21-30	Male	FF-U-028	So I call that saturation overload. And that happens a lot on incidents that are kind of beyond your scope. Obviously, a medical call is within your realm or your scope. It's easily handled. Bigger the incident, you're dealing with the human factor, the mind at the process. But if you coupled that with more degrees of difficulty with today's technology, you run into a-- it's like two trains running into each other. I have to go and get data from here, or from this computer, I have to listen to this radio, this channel has 20 different frequencies, 10 different-- there is a point that says keep things simple and you do have to-- because of the task at hand...
Context_of_Work - Stress-Overload	FF	U	Field Responder	46-55	21-30	Male	FF-U-028	...Again, what I talked about was the task saturation. You're overwhelmed with the incident itself. That's why today's technology, it should be very user-friendly and it should not require a huge degree of brain energy or expending mind-thought, when you have to actually use some of that, at an incident, and calling your plans, and your shots, and what you're going to do for successful outcomes. Everything we do is successful. It requires a lot of mind-thought. I would rather dedicate it

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								here than as opposed to technology or using things at hand. It might have it because there is an issue of complexity.
Context_of_Work - Stress-Overload	FF	U	Field Responder	46-55	21-30	Male	FF-U-028	I can either want to do and too much-- remember picturing yourself in a conversation with five people talking to you, or you had to-- or being overwhelmed or being overloaded with stuff? If there's a way to just funnel one aspect, if you're receiving from one, maybe two, you might be able to handle. I think that's all you're able to handle as your brain is going to process. It's the biggest technology. Your computer is your brain that you're using. Funnel or filter or triage messages. What's important, what's crucial, what is information that we can actually hold off on for right now, what is crucial for the incident, what can we hold off and funnel it, keeping it simple. I keep going today. Keeping things on a simple basis...
Context_of_Work - Stress-Overload	FF	U	Field Responder	46-55	21-30	Male	FF-U-028	...Gaining complexity is the real killer of simplicity from my perspective. And how to improve that? A lot of face-to-face communication, maybe having one guy operate the radio. Giving messages instead of everyone having radios, and all this talk and garble. I have to be responsible for listening to all this, because it may apply to me. So funnel. So you take your five people in a room. You tell them all be quiet, one speaks. So that would be just a suggestion for that, just not being in a position where you're going to be overloaded with, where this technology has become rather burdensome in your decision making or thought processes right now.
Context_of_Work - Stress-Overload	FF	U	Field Responder	46-55	21-30	Male	FF-U-028	...And a big concern to me is I'm thinking en route of this thing, too. You're listening to your radio for any updates, looking for any updates from the MDT or further information. It's where, again, technology plays in your favor in that case until you arrive on the scene. There's so many things that go through your head. Not only that, you're responsible for driving, looking out for other cars. You're a second set of eyes. Managing a radio, a computer terminal. Now the mental process, four-story building: is it flat-roofed, is it pitched roofed? What's the construction? How many people are in this unit? Time of day, it's a

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								Friday. Everybody's home from work possibly. You're thinking, is this a kitchen fire? Ask people, eat dinner at 5:30 PM. Maybe it's burnt food. Perhaps, it's a stove fire extending into the cabinets. You're processing all this data as well. And you talk about hydrants. Where's your closest hydrant? Who's my second truck? Who's my second engine? Who's my first truck? The companies that are invited to the party. And there's more. Road construction. Scene size-up begins, it's a never-ending process. But getting on to the fire, putting ourselves on the scene now, obviously, life safety is number one. Making sure that the people of that area or origin are out of that building, too, when this occurs.
Context_of_Work - Stress-Overload	FF	U	Field Responder	56-65	31-40	Male	FF-U-026	I guess chiefs could be overwhelmed. I mean, because they're talking [on main?], and then people are calling fireground. Still on the high rise, you have all these-- people are calling the alarm office and the alarm office calls the van and says, "Check on apartment 1023," and then they have a list of handicapped people to check on and they're sending people, so they're waiting for eight different people to get back to them, and I mean, I think that could be overwhelming. But to me, it's not about the technology, it's about trying to get the job done. So if the technology's not helping me I ignore it.
Context_of_Work - Stress-Overload	FF	U	Other Public Safety Personnel	46-55	21-30	Male	FF-U-029	...in the near future I'll have a lot more information available to me en route, which is nice. We do have an enormous amount of information in a high-rise building given to us on a run sheet when we're en route from the firehouse... But the problem is, how about when we respond from another call? Now we don't have access to that. Now it will come up on our display, the same information. But it's much more difficult to get through and sometimes doesn't scroll right. And you're manipulating traffic and weaving it, you know what I mean? So you're moving and the lighting conditions may make-- you've got sunlight. There's a lot of obstacles to read it en route like that. Unless our displays change and it makes it a lot more easy to read or look at, or is legible from everybody instead of just the company officer. Because he has a lot going on in his head, he or she, and to have to en route, try to concentrate on everything

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								that's [laughter]-- it's a lot of information...
Context_of_Work - Stress-Overload	FF	U	Other Public Safety Personnel	46-55	21-30	Male	FF-U-029	there's all these responsibilities that are general orders that can be followed up with discipline. For instance, if I'm trying to concentrate on all that information, I'm also responsible for the way this guy drives. For instance, if he's not driving right, I'm supposed to correct him. If everybody else on my piece of apparatus are not seat belted, I'm supposed to correct, I actually should instill that before we even leave. And that's just a tip of the iceberg for what's the onus that's put on the company officer. So if I have all that going on, how much am I going to concentrate on trying to read this? I'm not. The honesty of it is, if I got that run sheet before I left, I would try to scan it, and look to see if anything popped out at me, and then, I would throw it on the dashboard, I have other things to worry about. I have too much to worry about that I can't worry about that, I'll encounter it all when I get there.
Context_of_Work - Stress-Overload	FF	U	Other Public Safety Personnel	46-55	21-30	Male	FF-U-029	...if I'm being honest here, which I am, I can't read so much information on a small screen like that, not while I'm en route. It's not going to happen. I mean, I may try, if I have a moment or two to glance at it, but it's too much, yeah. And I have a lot else going on. In high-traffic times when we're responding, I'm actually helping the driver. I'm always scanning because he may not see somebody... He may not see things that he normally should see at a time of day where the traffic isn't so heavy; kids running off the sidewalk, or what have you, or somebody going through a red light. I'm always trying to help with that because we've had some line of duty deaths in the last 20 years. I think we've had three or four that were just accident related... and it's always a main concern...
Context_of_Work - Stress-Overload	FF	U	Other Public Safety Personnel	46-55	21-30	Male	FF-U-029	Too much communication. I would say, yes, you can have too-- I'm not trying to dwell on anything specific, but you definitely can have too much at once, depending on how many players there are in the process. As a chief running a fire event, I've many times had to tell people, "Standby, because somebody's breaking in," maybe. And so, there's a problem there, too. I would have to wonder, "Why are they breaking in?" They

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								should be able to hear me having a transmission already, so possibly on their radio, they weren't hearing. So, you have to wonder. But then I would have to stop, contact that person, transmit a message to them, standby so that I could finish what I have going on here. But it becomes a juggling act because I have to decipher in an instant, is what he's trying to tell me more important than me finishing my communication with the person who I-- you know what I mean? So yeah, it could be a little hairy sometimes. So can there be too much? Yeah. I've had incidents where there was too much at once. But I don't know if too much is a word you should use with communication, because the more, the better, right? I mean, the more, the better.
Context_of_Work - Stress-Overload	FF	R	Other Public Safety Personnel	26-35	6-10	Male	FF-R-048	Yeah well we had a [Event] just west of town here and I was first on the scene in my personal pickup because it was between my house and the station. I knew we had guys in route I didn't know how long. I had a guy I'm not trying to be graphic here but he was basically it chopped the cab off the semi-truck. We're talking an oil field tanker truck and the truck was on its side and his legs were pinned underneath the dash and he was literally dangling, screaming. I'm there helping there was 2 bystanders that had called it in and that's a helpless feeling.
Context_of_Work - Stress-Overload	FF	R	Other Public Safety Personnel	26-35	6-10	Male	FF-R-048	You got a helpless feeling that you can't help you can't do anything. I mean yeah we can support and kind of you know our EMR's can you know get the guy stabilized. Yes the guy survived I mean we may have flighted him out and he did survive but I mean that's seconds, seconds matter you know and what makes it harder in this area I didn't know him personally but when you're on a scene and it's involving your friends who people that you know and treat like family it makes it harder and everybody knows everybody you know ...
Context_of_Work - Stress-Overload	FF	R	Supervising Field Responder	46-55	21-30	Male	FF-R-051	And really you have 12 stations because the town fire department is on our radio system. So we can do different tones for each of those stations. The problem we run into is that that system, like I say, it's up for dispatch purposes, it's not necessarily up for radio or portable to portable communication. That's--we've got an antenna to replace. The

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								700 system has 3 tones. That's it. Or 3 toning capabilities is my understanding. It's limited in what it can do dispatch-wise. So we're currently carrying multiple radios or multiple systems to get alerted because like this one does not work in this building. The 700 system does not work in this building. I cut it off 'cause it was beeping tell me it didn't hear.
Context_of_Work - Stress-Overload	FF	R	Field Responder	Not specified	Not specified	Male	FF-R-053	S1: Okay, so it is a hop and jump then. S4: Kind of thing yeah, which is kind of crazy. So as far as that goes then, we have what we call hand held units or walkie-talkies so to speak with portables. They have same capabilities usually but now it is away from the truck and we have it in our pocket or on our hips or on a chest strap of some sort that we carry with us so we can stay in constant communication. And then obviously we have our cell phones and iPads and laptops, things where we do write reports on and medical reports on that kind of stuff and it is all monitored through a lot of company especially this stuff when we do a medical report you know the big leagues and the CEOs of our company can monitor and watch it, they do what they do quality assurance and things like that to make sure they are done right and are following protocol.
Context_of_Work - Stress-Overload	FF	R	Field Responder	46-55	5 or less	Male	FF-R-055	Oh Lord. We help the people that need the help on their worst days of their lives. So, usually we see people when they are at their lowest. House burned down. Child dying. Car wreck. You get a parent that runs up and screaming at you, let my kid go and you can't, you've got to restraint that parent, and sometimes you get parents that their kids are pregnant and you got to sit and hold that girl down because she is trying to run to her mom and dad, I mean, it's --
Context_of_Work - Stress-Overload	FF	R	Field Responder	46-55	5 or less	Male	FF-R-055	It's physical, it is a lot of mental -- it's a lot of mental especially when being a volunteer, when you go home. I help my kids a lot and I play with them a lot. They are older, they are teenagers, but I still nag them. It shows a caring side. I mean, sometimes you got to pick up a little kid or take care of them, caring, loving, I hope that is --
Context_of_Work -	FF	R	Field	46-55	5 or less	Male	FF-R-055	Primary stressors. Oh, there is a lot. [Everyone laughs]. Well, sometimes

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Stress-Overload			Responder					you get too many chiefs and not enough Indians sometimes, and you are like who is in charge. And you want this one guy to be in charge because he has got more experience, but this other guy knows what he is talking about, so you are kind of like -- okay, y'all decide, y'all figure it out and I will be over here, you know?
Context_of_Work - Stress-Overload	FF	R	Field Responder	46-55	5 or less	Male	FF-R-055	And I mean, we have got a couple of guys there -- they are on it and we try to save the building or whatever is in it. But sometimes you know the older structures hold up -- like this house would hold up 10 times better than the new one. The new ones burn like paper -- like toilet paper because of the building materials and I mean, you -- sometimes the stressors in family life, you've got to be able to get up 24x7. If I'm not at work, I am usually listening for the pager. Because if it is going to go off and I know someone else is at work, there are so many guys at work, I am the only one down at [City] and I will have to go get a truck if I have to get a truck. Most of the time, there is a guy there that usually gets a truck and he is gone and I am behind him. If he will call me and go -- where you at? I'm like -- right behind you dude, let's go. But sometimes, you get people that want to fight you. I had a guy who wanted to fight me one time.
Context_of_Work - Stress-Overload	FF	R	Field Responder	46-55	5 or less	Male	FF-R-055	You know, I have trying to help him. He [Event]. And sometimes there are numerous stressors and sometimes the communication is the problem with as far being in the fire, you can't hardly hear sometimes, you got to yell on the radio or, down here is a big problem. We need a repeater down here.
Context_of_Work - Stress-Overload	FF	R	Field Responder	46-55	5 or less	Male	FF-R-055	You are like [laughs] Oh, err. Especially if it is somebody you know, because in this area, a lot of people grew up together, lived here for years. Like my wife has been here since she was born but sometimes it's -- it was so and so. And you are like, oh my God -- are you serious? And they are like, Yeah. Yeah, they passed. And she is like -- oh crap. That's like got off the road here, [Event]. Well like, it felt like 30 minutes. It was probably 10 minutes. But they got there and [Event] and I'm like oh crap -- and he knew who I was and I was like, ugh -- I'm sorry. He was like --

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								no, no. You did what you could. You did what you could. And I am like --.
Context_of_Work - Stress-Overload	FF	R	Field Responder	46-55	5 or less	Male	FF-R-055	Yeah. But however they were doing it I don't know if it was but we would be sitting there, we got 15 minute breaks to sleep and that was a 15 minutes and you got maybe a banana and you would sleep for 15 minutes and the next thing they would say is [City], you know, you are going back in. You know, you are up -- go. And you are like -- oh man, 15 minutes, I just felt asleep.
Context_of_Work - Stress-Overload	FF	R	Field Responder	46-55	5 or less	Male	FF-R-055	They are supposed to be. [Organization], the air tank company, they come out and personally fit and give you a test to make sure you had your breathing. That's how ours is. Because that's your most important piece of equipment right there besides the water and the hose. [laughs] So, this -- it's a lot different. I mean you've got a lot of people that -- oh, you are just a volunteer, you know, you get all the time and you are like -- okay, let's see you get up 24x7 hours a day, you leave the dinner table when you are eating dinner, or if you are wet, tired and you have had no sleep for three or four days and people don't understand that. A lot of people are like -- I want to be in this. I want to do that. It's like, I tell some of these new guys, you got to pay your dues. And they are like -- why you get to do that? And I'm like -- because I've done it for a while [laughs].
Context_of_Work - Stress-Overload	FF	R	Field Responder	46-55	5 or less	Male	FF-R-055	I don't want us to you getting hurt because of something stupid that you did that I don't want to get hurt because I want to go home, you know? I mean, it is a totally different world and I think a lot of people like I was saying -a lot of people don't see it until they -- I'm trying to.
Context_of_Work - Stress-Overload	FF	R	Field Responder	46-55	5 or less	Male	FF-R-055	And she was like why don't write this stuff down? Write it down. I'm like, I'm writing it down but I don't want to think about it, you know, because we had a bear run beside us one night. He was on fire. His butt was on fire.
Context_of_Work - Stress-Overload	FF	R	Field Responder	46-55	5 or less	Male	FF-R-055	It came too fast because that's what we thought but we were on this one ridge and we got it put out and we turned around and the other side house is on fire. And then we were standing there and we felt stuff painin in the back of the helmet and I was like -- what in the world? I

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								thought it was acorns or something. It was shingles flying off and hitting us in the head, off the roof and then guy that was with us goes -- look out. And that's all we heard and this tin roof went [whoosh] right over the top of us and it was about a 12 ft x 5 ft section. And if it had hit us, it would have -- it would have hurt bad, let's put it that way. But, there was all kinds of -- I was with [city] for that night. They assigned me to go with [city] Fire Department -- and those guys -- one of the guys, I will never forget his name, [name], fire fighter [name] at Fire Station #9 over their downtown. He's like -- you are volunteers? Yes sir. And he goes -- awesome, come on. And he took me under his wing and he is like -- my dad has volunteered for 30 years, come on. And I was like -- oh, this is awesome. So, we were -- he was from Detroit --
Context_of_Work - Stress-Overload	LE	U	Field Responder	26-35	6-10	Male	LE-U-006	I don't know that overwhelmed is the sense I get, but certainly flabbergasted or-- it's more of a sense of, "This again." As opposed to, "I can't handle it," it's more like, "Why? Why do I have to have two hand-held devices?" We had talked about rolling out an iPod or a phone with our cameras. We're going to have a Windows device, mobile device, that could be a phone. It is a phone. You could just turn it off. And a phone for our camera, and again, we're talking extra logins, more stuff to charge when we get home. You have officers have to run these banks of charging bays so they can charge everything every night. So I don't know if it's overwhelmed, but definitely, there is a sense of exhaustion, maybe. Just more of the same.
Context_of_Work - Stress-Overload	LE	S	Field Responder	26-35	11-20	Male	LE-S-033	Now, EJustice, it allows folks to communicate better, but we spent five years and spent hundreds of millions of dollars on a program that was inadequate. And it didn't do the job that it needed to get done. Again, we're a day late, a dollar short.
Context_of_Work - Stress-Overload	LE	S	Field Responder	26-35	11-20	Male	LE-S-033	...So in one of the richest counties in one of the richest states on the East Coast, we were using outdated equipment and outdated report writing and information sharing capabilities while other folks had been using these programs for years and years and years. Now, I don't think that has anything to do with dollars and cents. That's bad policies and

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								that's bad politics. That's administrators not being able to do things and all that other sort of stuff. But as an agency, [City] uses the same stuff that [County] uses. And [County] has no excuse to not use the latest and greatest technology because of the money that we have here in this county and in this state. So that is a glaring example of why that report writing system, in terms of the technology, we couldn't even search a name.
Context_of_Work - Stress-Overload	LE	S	Field Responder	26-35	11-20	Male	LE-S-033	No. I mean, even the radios, for example. I mean, post-9/11, the fact that we can't immediately switch to a mutual A channel immediately-- I'm sure our radios have the capability of doing it, but we don't know how to do it. I don't know how to do that. I mean, I've got an \$8,000 mobile radio that I have on my belt. Technically, I can dial a number on it and I can call you on your radio and we can use it like a telephone.
Context_of_Work - Stress-Overload	LE	S	Field Responder	26-35	11-20	Male	LE-S-033	Yeah. Probably. Probably less than that. I mean, it's an \$8,000 radio, you know what I mean? and you turn it on, turn the thing off.
Context_of_Work - Stress-Overload	LE	S	Field Responder	26-35	11-20	Male	LE-S-033	No. I can't think of anything off the top of my head. Like I said, the information is there. It's just a matter of how much of a nuisance it is to go find it. But there's a lot of databases that we can gain lots of information from folks.
Context_of_Work - Stress-Overload	LE	S	Field Responder	26-35	11-20	Male	LE-S-033	If technology could do whatever it wanted? I think in our region, I think an ability to identify folks, whether it would be using the new retina scanners or the fingerprint scanners. We have fingerprint scanners.
Context_of_Work - Stress-Overload	LE	S	Field Responder	26-35	11-20	Male	LE-S-033	Go to software engineers, go to the folks that are developing these programs and say, "What are you working on in the future?" and "Is this compatible with that so we're not wasting hundreds of millions of dollars on all of that sort of stuff?"
Context_of_Work - Stress-Overload	LE	U	Field Responder	26-35	5 or less	Male	LE-U-036	Because we have a [City] court system you have to log in for. There's a national system that you can check. I mean, it's ridiculous how many passwords we have for everything.
Context_of_Work - Stress-Overload	LE	U	Field Responder	26-35	5 or less	Male	LE-U-036	Well, that's the biggest thing with a lot of the stuff is you make it, but you never test it out on the real person who's going to use it. And then will it

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								get lost in translation, and then it becomes useless because--
Context_of_Work - Stress-Overload	LE	S	Field Responder	36-45	21-30	Male	LE-S-037	And they're wanting to do their job and just waiting for it to be safe to come in. It's just a matter of getting around that circle to get to it.
Context_of_Work - Stress-Overload	LE	U	Field Responder	46-55	21-30	Female	LE-U-040	But it's not when you go to other portions like our-- unless you make it a single sign on system with your, how you set up your ID and things like that. But when you log into the mobile data computer, it's different than it could be log in for the body camera system on your phone, or it could be different than the one you have for your desktop. And patrol district personnel don't have a specific desktop assigned to them, so they're always using group computers. So you can never-- like I can, in my own office, I can have stuff right on my desktop where I can access it very easily.
Context_of_Work - Stress-Overload	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...But it's getting to the point of there's so much stuff in the car. You're like Emerson, Lake & Palmer trying to go to a call. There's a computer here. And it's giving you dispatch updates. You've got siren controls. You've got a radio. You may have two or three radios. And then, what burns my ass is when dispatch tells to switch a channel. And you're like, "I'm doing 100 and I'm driving, and I'm dogging man, and machine, and [critters?], and everything"... But there's tons of technology in the car.
Context_of_Work - Stress-Overload	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...you're in a car. It's 2 o'clock in the morning. It's a well-known fact. People don't like cops, especially at 2:00 in the morning when you've pulled them over, and they've probably had a few pops in them. So you've got video in the car. You've got your radio. You've got your computer system, whatever the hell you want to call it. Hopefully, you've remembered to just turn your XM, or whatever the hell you got, Pandora down. You turn that down. But you got to do all of this. You got all that going on in the car. You've got to keep track on your suspect, who's in his car, who knows he's going to county and may or may not want to fight you, and he may have something hidden under his seat. And you're trying to type an e-ticket.
Context_of_Work -	LE	R	Field	36-45	11-20	Male	LE-R-017	...we do e-tickets for warnings and tickets... put it on my phone, so it's an

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Stress-Overload			Responder					app... I still have to go back to my car to get the ticket, which unless-- and they have a thing we can wear, the printer, hook it onto our belt but it's a pain in the ass because you've already got gun, taser, bullets, handcuffs... You got utility belt...
Context_of_Work - Stress-Overload	LE	U	Manager	46-55	31-40	Male	LE-U-020	In the process of doing a CAD upgrade. So my week started Sunday morning at 2:00 AM... we were doing the CAD upgrade and we're supposed to be done by 8:00. I didn't leave till 6:00 in the evening, and it's been going since.
Context_of_Work - Stress-Overload	LE	U	Manager	46-55	31-40	Male	LE-U-020	RE: checking email ...I have so much... I'm doing them constantly... I have to keep up or else there's no way I can come in at 8 o'clock and just start from scratch.
Context_of_Work - Stress-Overload	LE	U	Manager	46-55	31-40	Male	LE-U-020	...you're down 50%. So then your scheduling becomes a problem... and initially people like over time because you're getting the money and then you get to the point where, I need a day off. I don't care how much you pay me.
Context_of_Work - Stress-Overload	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	And really from my perspective what's happened over the last probably five years is that there've been so many advances in technology that's related to law enforcement that it's, I guess, I don't know if overwhelmed is the proper term, but it's overwhelmed some officers that worked for years with really the only real technology they had was the laptop in the car, the MDC, but really nothing else, and now with the advent of the body cams, the surveillance cameras, the license plate readers, we have our motorcycle enforcement team has hand-held e-citation devices. Or exploring now, putting printers in all of the patrol cars, so we can do more electronically and print in the cars...
Context_of_Work - Stress-Overload	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	...So I think particularly a lot of the younger officers that don't have that history of doing a lot of the paper, it's probably not affecting them as much as the officers who have been around for at least 10 years, and they're getting hit from all sides of okay this is all being changed now, and we're making things-- this technology is going to make things easier for you, and really, it's not. From their perspective, it's, "Gosh now I've got

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								to make sure all my video from all day long is tagged correctly." And so it's creating a lot of--
Context_of_Work - Stress-Overload	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	I think we have over-- like it's already said, we have over the last few years any of those things about as fast as we possibly could because of all the new advances and stuff. A lot of the officers-- I don't think I want to go any faster, and I don't think the officers out there would want to go any faster because it's about all they can take.
Context_of_Work - Stress-Overload	LE	S	IT Specialist	Not specified	Not specified	Male	LE-S-015	...A lot of agencies move a lot slower than we do, and some of that has started to detriment. I mean, I think kind of like these guys said, we've introduced so much so fast that I think sometimes that gives officers on the street kind of overwhelming feeling using it. They just hit me with this, and now they hit me with this, and so. I mean there's some stuff that I'm actually kind of putting the breaks on. Okay, let's make sure that this stuff is working before we now take a leap on the other things anywhere...
Context_of_Work - Stress-Overload	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	...Technically, our printers are not mounted in the car. So I got a little belt clip. If I wanted, I could carry it on my belt... it's not very comfortable. It's cumbersome...
Context_of_Work - Stress-Overload	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	...Like you said, we carry a lot of crap. And I think technology is fantastic, but finding one thing that does everything, I don't see that ever happening. You have some things that do something very well. And when you try to combine that stuff together, then you have one thing that does everything kind of half-assed. So I don't ever like that. We'd had a deputy chief here for a while that he didn't like the one-trick pony. He didn't like our etickers because that's all it did. But our taser, that's all it does. And so I think if you try to combine everything, you're not going to get the best use of anything. So the more things I can put together, that actually are the same thing, I think you're better off. But trying to combine a lot of stuff that doesn't naturally go there, isn't going to work.
Context_of_Work - Stress-Overload	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	...I'm trying to think. I think my biggest gripes are that e-ticketing machine and just the fact that it's not well thought-out for the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								application. I don't think there's any reason why it couldn't be done on the phone that I already carry or the computer that's already in the car. So integrating technology with stuff that we already have, that we already carry. Because when I'm on patrol, I carry 30 extra pounds of stuff, which doesn't count the two bags which are probably 30-pounds each of stuff that I keep in the car. So adding more stuff to all my stuff is more weight and redundant. So I think finding ways to use what we already carry...
Context_of_Work - Stress-Overload	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...I've never heard about dispatchers getting tunnel vision or auditory exclusion or all the other things that we're regularly trained on and discussed to recognize in ourselves and in others because it creates a safety situation that can affect others...
Context_of_Work - Stress-Overload	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...You can't give people more stuff [crosstalk]-- on my radio, I can talk on my radio and watch and see everything that's going on. We all practice and train for that. Now, you give me something I have to hold and I have to data input. You can't maintain both of those...
Context_of_Work - Stress-Overload	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...So that was one of the things that came out of is recognizing you're deploying more and more of these devices that give you the security and personnel. And if it's truly a tough environment, you need to pair people up just for that purpose. Kind of go back to have one person who's running all the devices in communications and someone else who's making sure you're safe.
Context_of_Work - Stress-Overload	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...this time of year is when we get all our new cars that are coming in so there's been a lot of driving to [City] to pick up the new cars as they're getting outfitted at the electronic shop. The duties that someone has to do and you can pull guys in for overtime, but they can get burnt out on that.
Context_of_Work - Stress-Overload	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	We all know who likes to ramble on the radio. As we said, if you have to say break when giving notes about a call, you probably should have typed it to your computer by yourself. That's just a little much for the dispatcher to be hearing and typing and doing everything...

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Stress-Overload	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...We all joke about the guy driving down the road, talking on his cellphone, typing on his MDT. We've seen it. Certainly, MDT blocks some of what you can see. I think we're getting closer to being overwhelmed. From a liability standpoint, there's too many things that we're telling the guys you have to do, that if they forget to do one of them, forget to use one piece of technology, and it comes back on them in a negative aspect. I guess that's my concern, of keeping it efficient enough and reasonable enough.
Context_of_Work - Stress-Overload	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...let's not ever try and forget the human factor and the great things we can do as we keep bringing in more and more technology or making it so burdensome that they feel they can't do their job. So I don't feel we're there yet, that they're overwhelmed...
Context_of_Work - Stress-Overload	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	Well, technology was great because we had a tracking device that the bank teller had given the suspect. So we're trying to track through that but here's your problem, is you have the Feds that are doing their Safe Street program for the bank robberies, they have the tracking device. We also have a tracking device here or a tracking system here, [County] has one, I don't know if [City] does or not, but all of them are looking at their systems. They're then all calling up to our dispatch, so our dispatchers who are already handling two channels are now handling three different people calling into them to give them information instead of that source coming straight to the officers on patrol. So if they could just air up with us and then give us the information straight, that would be great...
Context_of_Work - Stress-Overload	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	[RE: tracking device / suspect] ...And then there's the relay to the dispatch and then our dispatch has to relay to us while they're trying to maintain the channels and then also provide the information that we're giving to them to other people. So then they have to run a third channel, MetroNet, so they're relaying out all of our information to the rest of the metro area...
Context_of_Work - Stress-Overload	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	...When you go through the academy, there's just certain things you can't replicate until you're actually on the streets and working. So you have to really focus on a million things at once. And if you're not good at

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								communicating and you're not listening to what other people are doing, then you're going to be lost...
Context_of_Work - Stress-Overload	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	[RE: vehicle internet connection loss] ...On a Code 3 run or something like that, it'd be kind of-- because you're higher stress, you're driving faster, you have lights and sirens on, so that makes it more intense. I don't have the time to pull over and write that down, so you just have to function at a higher level, I guess, than you're normally used to.
Context_of_Work - Stress-Overload	LE	S	Other Public Safety Personnel	36-45	6-10	Male	LE-S-027	So it's challenging. I think the biggest thing that's challenging is I get pulled in a lot of different ways, and there's a lot of different problems. Not all the problems are the same in our job. So challenging just that you face new things. Everything is new. It may seem the same, but it's not the same. It's a new situation--
Context_of_Work - Stress-Overload	LE	S	Other Public Safety Personnel	36-45	6-10	Male	LE-S-027	Yeah. Some people say too, "How do we do it?" Like we're heading to a high-risk violent call or something and we have our MDC with all this information popping up, we're trying to read it, and we're dealing with stop lights, and we're dealing with pedestrians, and we're trying to get there. I mean, we're running cold. How do we do all that? And people think we're crazy, and we're not safe. You learn to be safe. You learn to do it properly, and you multitask. We learn to multitask. I mean, we have to. But we don't want to add anymore crazy technology necessarily to that scenario. But what we already have, if you can take and just deliver the right pieces to us at that time, I think is the key.
Context_of_Work - Stress-Overload	LE	S	Supervising Field Responder	36-45	21-30	Male	LE-S-028	Q. Got it. So if you had to put an adjective describing your job, what would you use [laughter]? SME: Exhaustive.
Context_of_Work - Stress-Overload	LE	S	Supervising Field Responder	36-45	21-30	Male	LE-S-028	Well, I mean, technology, in and of itself, is always a blessing and a curse because you're expected to be able to do more, and more, and more, and more things, and more things more efficiently with technology, so.
Context_of_Work - Stress-Overload	LE	S	Supervising Field	36-45	21-30	Male	LE-S-028	Some information overload there. So you can see underload and then overload.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					
Context_of_Work - Stress-Overload	LE	S	Supervising Field Responder	36-45	21-30	Male	LE-S-028	Yeah. We just have to be able-- there has to be a [funnel?] point in there at some place so that my dispatcher isn't completely overloaded with videos of what is nothing or could be communicated in a phone call, and now they're trying to figure out what's going on. And does it create a concern for more seriousness or less seriousness? There's a lot of moving parts, so it will be interesting to see how that will mix.
Context_of_Work - Stress-Overload	LE	U	Supervising Field Responder	46-55	31-40	Male	LE-U-029	...So the difference between then and now is significant. I mean, there you were metered out a certain amount of information and now it's almost like drinking from a firehose for the new officers because they have information coming at them from so many different sources.
Context_of_Work - Stress-Overload	LE	U	Supervising Field Responder	46-55	31-40	Male	LE-U-029	I think there's a lot of pros but my standpoint, I just don't want people to get overloaded with information. Sometimes you can. So I would love to come up with a way for communications to be able to prioritize on safety issues first. Because now they've got computers, they've got cell phones, they've got so much technology stuffed into the cars. And so I don't want that important officer safety to get lost in the snowstorm of information coming towards them.
Context_of_Work - Stress-Overload	LE	U	Supervising Field Responder	46-55	31-40	Male	LE-U-029	Yeah. I mean, it's overwhelm-- you have so much coming at you that. For me, there will be times where you'll just kind of freeze for a second and then your training kicks in. Because, like I said, I was in SWAT and all that kind of stuff, that you just go and then you start recognizing, "Okay, listen. Break it down. Officer safety, that's number one. Public safety, that's number two." And you can start breaking it down. But yeah, there will be times when you have so much stimulus coming towards you in the form of people coming up wanting to talk to you, your phone's going off, you're getting called on the radio, the texting. All of this stuff will be going on that you don't have time to actually just stop for a few seconds and think.
Context_of_Work - Stress-Overload	LE	U	Supervising Field	46-55	31-40	Male	LE-U-029	I'll make a quick assessment of, "Listen, is there an officer safety or public safety threat right this second?" And if the answer is no, it's going

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					to be, "Stop," because sometimes people-- it's almost like it becomes almost like a fever of people start going faster and faster and faster and faster and it's like, "Stop." If you can get them to stop for just 10 seconds and it's like, "Listen." And people can kind of slow down, kind of recalibrate their heads a little bit of, "Okay. Listen." And then you can start giving direction. But for me, the big one is we have so many different ways to communicate that it's easy to kind of get overwhelmed.
Context_of_Work - Stress-Overload	LE	U	Supervising Field Responder	46-55	31-40	Male	LE-U-029	And then I will, generally-- as the incident commander, I'll be trying to pay attention to what's going on there. And I'll start getting a lot of phone calls whether it's from my bosses or other people. And so, again, trying to figure out, "Okay. Can I talk on the radio or do I talk on the phone?" I mean, you kind of get overloaded with people asking what's going on.
Context_of_Work - Stress-Overload	LE	U	Field Responder	56-65	31-40	Male	LE-U-030	It's both fascinating and challenging to provide police services because not only do individuals expect different things from the department but specific neighborhoods expect different things. And so it's a bit of a challenge to deliver the services that those neighborhoods asked for in a consistent manner.
Context_of_Work - Stress-Overload	LE	U	Field Responder	56-65	31-40	Male	LE-U-030	Yeah, in broad terms, I think it consists of keeping a clear vision of what you're trying to accomplish and then trying to filter out information that is not useful in obtaining that objective, right? But then you always run the risk of ignoring something that actually will help you, and so I think you have to develop the skill of assessing and analyzing what information truly is useful and what is just white noise, and I think if you could develop a way to teach that to people, you'd be a millionaire [laughter]. But because there is just so much information being pumped out, I mean if-- I can easily conceive of a scenario where you're trying to get information, reading the information on the screen on the in-car computer. You're listening to information coming over the radio, and you have a citizen or two or three telling you things all at the same time, and it is. It's sensory and informational overload, but you just have to, as best you can, not get overwhelmed and snowed under by that and just, again,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								keep a clear vision of what you're trying to accomplish and which pieces of all this information, which pieces that are coming your way are going to be of use to you and which are not? And I don't know. It's neither an art nor a science. It's just the reality of the situation that police officers find themselves in very chaotic situations, and you have to be able to bring some level of order to that chaos.
Context_of_Work - Stress-Overload	LE	U	Field Responder	56-65	31-40	Male	LE-U-030	Yeah, I mean it's not every day is a running gun battle with car chases and foot chases but even just sorting out an accident scene. An accident scene at a major intersection during rush hour, there's just going to be so much going on that it's easy to fall victim to the information overload.
Context_of_Work - Stress-Overload	LE	U	Field Responder	56-65	31-40	Male	LE-U-030	...and I have all their numbers into my phone, but it also means that they can reach me at any time [laughter], which in the huge majority of cases is absolutely necessary, but sometimes it would be nice to be able to just turn off the phone and not worry about it. So yeah.
Context_of_Work - Stress-Overload	LE	U	Field Responder	56-65	31-40	Male	LE-U-030	--reciprocal conversation now. But if we're in the midst of chaos, we might not even be able to understand one another just because of the impact of stress on both of us. And so that's far too broad a question for me to answer cogently.
Context_of_Work - Stress-Overload	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	Long, hard, tiring. It sounds like I'm old, doesn't it [laughter]? It's just not easy. It's hard work, and you have to have an aptitude for it and hone your skills, and--
Context_of_Work - Stress-Overload	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	Fatigue is an issue but nobody will look at that. Anyhow, I don't know how I got off on that.
Context_of_Work - Stress-Overload	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	Well, as I'm preparing for roll call, that's exactly what I'm looking at is-- I'm looking at information that I think is important to the officers but if I give them too much, they're not going to remember it all, or--
Context_of_Work - Stress-Overload	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	Certain categories, some really just pretty serious felonies, and then some larcenies, and thefts. But these, for the most part, are all felonies. I'm down here in the weeds and most of the stuff that starts, starts as misdemeanors. So when he sends me this information about these

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								crime trends in my precinct, about robberies and-- well not robberies - that's not exactly true - but some of these other crime trends, it's like, I can't control those. I can't control trends. I can control specific incidents. Anyhow, so he shoves that information down to me. He sends some other information down to me and I've even turned to the other sergeants, I said-- I've asked them, "How do use that information you get from the captain? What do you do?" and they go, "We don't even read it."
Context_of_Work - Stress-Overload	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	So I know that if we had those devices what I would tell my officers is, "We need one person just watching while somebody else is doing something." So that's why I would go back to my desk to pull that information. I wouldn't want to do that out in the field.
Context_of_Work - Stress-Overload	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S2] And [Name] and I-- I think that I can speak for [Name], too, because we've kind of talked about it and it's a little frustrating because there's all these initiatives and things happening all around, but the number one thing that we have to remember that is the most important is keeping the lights on at that com-center, answering those phone calls, getting those dispatched and keeping the officers safe. Sometimes it can be challenging to try to brain in everything happening around us.
Context_of_Work - Stress-Overload	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	Q: That was a nice lead in actually to this next question which you mentioned the day can be very routine sometimes and then just-- [S2] SME: Explode.
Context_of_Work - Stress-Overload	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] Not only the day-to-day stress of answering people's phone calls who are more than likely having the worst day of their lives, and we do over a thousand calls a day, anywhere from 1200 to 1500 sometimes during the summer. So that's a level of stress in its own regard.
Context_of_Work - Stress-Overload	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S2] Yeah. I've heard that we have-- it was staggering to see the lack of service time. It was something like 80% had been here less than I don't know three years or something. That just was mind blowing to me, yeah. A lot of turnover.
Context_of_Work - Stress-Overload	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] So, yeah. I've seen, yeah, a lot of retirement. Has been some attrition naturally because people leave or whatever else. But again, overall,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								tough and resilient. No matter what, they get the job done. But you're going to-- in a high-stress environment like that you're always going to have some fireworks potentially in relationships. Not the good kind.
Context_of_Work - Stress-Overload	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S2] And I was a dispatcher, so I mean, I'm right there too. I understand that there were certain things that really were a big deal to you because of the environment you're having to work in, so.
Context_of_Work - Stress-Overload	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] That made me think of something too. I might be interfacing for example with somebody in the dispatch center, and they could have just had a horrible experience with whatever they were just dealing with, and I asked them something simple and they snapped back at me. I've just been in that job long enough and worked also as a dispatcher to know I don't snap back at them, I just give them their space and then we'll talk about it later on, and usually everything's okay after that. So it's the stressors is what you said that cued me into that.
Context_of_Work - Stress-Overload	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] ...Every day it seems like we're adding more stuff into the dispatch center. More responsibility, more technology. And you do. You see that kind of fatigue or burn-out already happening.
Context_of_Work - Stress-Overload	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] You're right. The parameters have not changed but the body of work is almost pushing those parameters at the edges there.
Context_of_Work - Stress-Overload	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S2] Yeah. I mean, we argued as trainers and things like that in the comm center a long time ago. "Hey, they're going to be doing more. They've got to make a callback on all these cell phone calls now, and they have to triangulate almost and on and on and on," and it's just not the same. It is not the same anymore. It's changed. It has to change.
Context_of_Work - Stress-Overload	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S2] Well the thing that keeps me up kind of at night wondering about next generation 911, I think of-- okay, so this video comes in and we're watching this crime happening in front of our faces, right? So you've got a call taker, you've got a dispatcher. Let's just say that I've got some technology that's allowing me-- all of us to see it at the same time, the call taker, the dispatcher, the police officer on the street.
Context_of_Work -	LE	U	Not	46-55	Not	Male	LE-U-041	[S3] Sure. Sure. It's a stressful job, but they're given very, again, very

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Stress-Overload			specified		specified			generous breaks. And we have, basically, a policy, where if anybody is stressed out, we have an employee assistant unit, and we can understand. Say they handled a very bad call with a child, a victim, or any bad call you can think of. Somebody dies on the call, somebody attempting suicide..... It's a stressful job, and we do our best to help them. And they have a very active union here that they can also speak with the union or get tips or pointers.
Context_of_Work - Stress-Overload	LE	U	Not specified	46-55	Not specified	Male	LE-U-041	[S3] Yeah. There's one zone that's so busy that I assign a backup dispatcher every day. Every day, every single tour. And that zone's so busy, it's the busiest zone in the city that that backup dispatcher is to look at the radio runs, the events, the 911 causes, and make sure everything is being done correctly, and help out on callbacks when they call back a complainant.
Context_of_Work - Stress-Overload	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Most officers at this station, they normally don't even get off, say they work a 10-hour shift, they don't get off at 10 hours because they're writing police reports. It's not like TV where you're going to make the arrest, and that's it. Now, you have to dot your I's, cross your T's, and then the sergeants have to read the reports to make sure everything, you know, all the elements there. Because once it goes to court, if it's not there, it's thrown out.
Context_of_Work - Stress-Overload	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Exactly. What do I tell that new cop? Say, "Sorry that's the way things are, but go out there and keep on doing that good work. You got 30 more years to do." Right? Or the burnout that they get some of the cops that they're on video, part of it and so departments have a jerk reaction. Pull that cop off the street. Get him off the-- the cop thinks he did something wrong. He didn't do anything wrong. He's just in that part of the video, and by the time the investigation is done, six, seven months then they go and tell that cop, "Oh, go back there, you did everything fine, go back out and do the police work you used to do." You just ruin-- he's done. How can you get that [inaudible] to go out there again? So that's where you get the burnout. [inaudible] some of the cops filter out because you see so much here and after a while--

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Stress-Overload	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	The people that do the child porn and stuff. How they could do that, you know? And then they're done, they're just like-- they quit, usually, they quit early, and we do have advantage where you can go to other stations, you can put a transfer request in to go to other stations. Specialize [usually on the horses?] but it's like a waiting list to get on stuff like that.
Context_of_Work - Stress-Overload	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	Especially once you're out of your car. Once you're out of your car, there's no MDT. If you're going to run a subject or you have the parties separated, all these things. And that puts a lot of stress on the call-takers and the dispatchers, people operating the channels because they're doing all your queries.
Context_of_Work - Stress-Overload	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	Yeah. The dispatcher that someone's called and says, "Hey, my son is--" because the call taker is only going to listen to so much of your input before they have to get the thing up. So they're not going to listen or they don't have the capability to process the nuances of what you're telling them so they can type it, answer the little questions that come up on their computer-generated checklist, whether they should dispatch who.
Context_of_Work - Stress-Overload	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	...But when they have a robbery or a suspect or something that is now in pursuit at our direction, that once it starts to get to an automatic area, it should automatically notify the next district that this is coming. And currently, it's when dispatch gets a break because they're multitasking trying to communicate with the supervisors, notify the officer that's in pursuit, notify somebody else, and at the same time, they may have a call taker on the phone that's trying to give them information. So those dispatchers are kind of inundated with information.
Context_of_Work - Stress-Overload	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	...Some calls tend to have a little more information and it's as much as good as it is to have, sometimes going to a call and trying to read and drive at the same time. If It's a big block of text and you're trying to fish out the information you need, it can be a little difficult, especially if, for example, if they run a plate and they put all the plate information in, really all I'm concerned about is the plate number, the year and the make and that's about it. But then I have all this other stuff that I don't necessarily need at that moment.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Stress-Overload	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	... Especially on days when they work 99 and you have to pay attention to where you're driving, and you still want to run plates. You've got this talking, you're trying to do something here, and you still have to pay attention to your surroundings and the road.
Context_of_Work - Stress-Overload	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	[RE: using body cameras] ...sometimes you're figuring out your route and you're doing a lot of other things in your head and you get to the call and you're like, "Oh, I forgot."...
Context_of_Work - Stress-Overload	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	...at this point, I mean, they're signing out [laughter] a radio, they're signing out...a phone...a taser...their car keys, and then everything else that's on your vest. It makes it 10 pounds of equipment is now 15 pounds and you have to make sure you don't lose anything because if you do, it's on you.
Context_of_Work - Stress-Overload	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	On the street, I preferred the radio as opposed to PDT just because you can hear it and you're still paying attention. If you're trying to read it off the screen, you're distracted...
Context_of_Work - Stress-Overload	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	And the computer where it's at, it's not really comfortable. I mean, I would hate to have to write a report in the car. My back would be killing me because you have to turn, and lean, and type, and it's not-- it'd be nice-- it's supposed to be a portable data terminal but it's not. It's fixed in the car.
Context_of_Work - Stress-Overload	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	...Around the 4th of July, you get 3,000 calls of disturbances with fireworks. And we'll tell the dispatchers [not to?] call them unless there's a caller that wants to be seen because, literally, you can't handle-- you're going to be in a back log all day...
Context_of_Work - Stress-Overload	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	Between the computer making noise to you hearing, like you said, you listen to the radio, but not always, it's just kind of it almost becomes chatter some days, and then if you turn the talk show radio on and then you hear this thing go, "Boop, boop,"...
Context_of_Work - Stress-Overload	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	Sometimes we have problems with dispatchers, and they're the ones who are relaying the information. For instance, somebody is chasing somebody outside and we can see it on the cameras. The dispatcher

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								doesn't always acknowledge the people in the room. She'll purposefully not listen to them. Or if ShotSpotter goes off and, "Hey, there's nine rounds here. Now there's seven rounds," you can clearly see people are shooting at each other with the way that it's going off, she'll purposely not answer. Just disregard, "I have other things to do. You need to wait."
Context_of_Work - Stress-Overload	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	...Logging in is a big deal. Yeah, it's very difficult for some people. They have all this stuff going on in their personal lives and now I need them to remember more passwords.
Context_of_Work - Stress-Overload	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	Q: How would you want to get that information? SME: Via the radio and via the PDT... Because I could be driving, if I'm 99 I may not hear everything she says but I can read it on my PDT.
Context_of_Work - Stress-Overload	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	A lot of the time we focus on always the bad guys, bad guys, bad guys, but I think cops here, they say, "Oh, this neighborhood's shitty. I hate working here." But it's not all shitty. I think a lot of coppers lose that perspective where, yeah, you're dealing with the 3% of the population that are bad. That little kid walking on the street nobody ever-- do you wave to him? Do you say hi to him? Most of the time they're going to wave back. I think they look up to the police. Even if they get a little wave from them, that makes their day. So I think that's kind of lost nowadays. The cops has become jaded for the communities that they serve.
Context_of_Work - Stress-Overload	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	[RE: SSO] I think obviously that would be helpful. I tried to put one or two passwords the same for everything. I know that's something that IT guys don't like. They want real long passwords with numbers and letters and commas, but for functionality, the average officer doesn't want it. They want the simplicity of using one or two passwords only. And then e-learning on the computer, that's a different username and password. I mean, it just kind of gets-- I could see how officers get overwhelmed by having different usernames and user passwords to access all these different systems and that's why I think a lot of them don't take advantage of it.
Context_of_Work -	LE	U	Field	26-35	6-10	Male	LE-U-023	...we came up with something called SDSC Live [laughter]. We want to

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Stress-Overload			Responder					call it SDSC Live, and it would be a PCAD-based software which we could push real time-dynamic data to people. Data is dangerous. Big data is dangerous. Too much data's dangerous. Data's powerful, but data dosage and delivery is the key to data being used. Otherwise, if it becomes too much, it's as good as not having it.
Context_of_Work - Stress-Overload	LE	U	Field Responder	26-35	6-10	Male	LE-U-023	I think we have a problem with that now. I think we have a problem with too much data going out. We need actionable intelligence. We need actionable data. Someone in the department needs to be responsible for analyzing the global data picture, absolutely. All that data, again, disseminated down, it just creates data confusion, if you want to call it that. It's too much. You need to figure out-- you need to vet that data. You need to then send it to the right people in the right format. That's the other thing. You need to send the right information to the right people in the right format...
Context_of_Work - Stress-Overload	LE	U	Field Responder	26-35	6-10	Male	LE-U-023	[RE: visual information from dispatch] And that visual has to be pushed. The push is important, how it gets to the officer. Flying, ping, and you just see a big picture, "This is the car we're looking for." That's awesome. If it's an email that they got to open up or this and that, it's not going to work. The format's wrong. It's a dynamic situation. They can't get to it. It needs to be boom, "Wanted vehicle for this," boom, and just the picture of it. Simple, bold writing. That's the key. Now, if you give them too much information, if it comes up in a format where, "Year 1997, Ford Taurus, VIN number." I don't need all that. Let me see the car. Let me know what well, now I know what I'm looking for... Give it to me so I can digest it. If you eat too much, you can't digest it [laughter]. If you can't swallow it, it does you no good. That's kind of what happens with that information, the way it gets sent out.
Context_of_Work - Stress-Overload	LE	U	Field Responder	26-35	6-10	Male	LE-U-023	[RE: over-communication] No, I don't find that problem on the radio. The radio, through the limitations of technology, it actually serves as-- it has its own discipline mechanism built into it [laughter], into its limitations, yeah. So it's good. One person speaking and everyone's listening, and that's the nice thing about it. On the mobile phone, which we've done this

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								when we're doing surveillance and stuff, and we're in multiple cars, and we're following people, it gets crazy. So-and-so's talking, and they feel like the most important thing that needs to be said is what they're saying right now. They're saying it, and now you're saying it, and it's getting confusing.
Context_of_Work - Stress-Overload	LE	U	Field Responder	26-35	6-10	Male	LE-U-023	It can. That's the most important thing I would like to leave you with, is if you have too much data going at people, it's almost as good as no data going at people because they're just tuning it out.
Context_of_Work - Stress-Overload	LE	R	Other Public Safety Personnel	36-45	6-10	Male	LE-R-043	... How's that? Because you know some days it's a lot, somedays it's all meetings, someday like you know you're off doing training for whatever especially since I just started the position I've been doing a lot of training with the emergency management side or even you know webinars for the GIS for the technology you know for that stuff so software updates and things so yeah I don't know. Webinars, updating data, updating plans, going to meetings, eating lunch.
Context_of_Work - Stress-Overload	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S3] Stressful, demanding and I say that not necessarily because of what exactly we're asked to do it's you do your job but you also have to really take care of the people that you're working for and understand trying not to pick a side.
Context_of_Work - Stress-Overload	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	[S3] It's never the same call. You know you can go on four or five domestic calls a night and they're all going to be different you know one can just be yeah we drank a little bit, we argued a little bit that's it. You know the next you go on it could be running lights and sirens doing a hundred miles an hour you know kicking in a door and walk in and seeing someone physically assaulting their wife or husband and it gets to the point where it can be pretty wrecked. There's so many different situations that we walk into that a lot of people don't see and they also don't know how to see that through our eyes because they've never dealt with that. There's so many different situations.
Context_of_Work - Stress-Overload	LE	R	Field Responder	Not specified	5 or less	Male	LE-R-045	And body cams have been it's been an ongoing process. It's new to us. We've only had them for about 2 ½ years or so. So they're going the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								company that they go by and we use two we only have a couple of Taser Axon body cams the main company that they use is Wolfcom. Wolfcom has had their troubles as far as position and stuff. They pretty much based on policy we have to wire them on our heads. Comfort is a bad thing because it's a one size fits none type headset. I got a big head. I don't my Taser one was uncomfortable and it wasn't adjustable at all but as far as the quality goes when it worked awesome. The battery life was really short for the most part. You'll see all the ones that have their body cams when they turn them on before their shift is done they've already had to timestamp their body cam out of service so battery issue (00:46:25) is a big thing. The video quality is usually really good. Getting it to actually turn on there was a couple of problems but that might just be due to normal wear and tear. I wouldn't necessarily put it on the product itself it's just the stress that we have to put on it because when we take somebody to the ground we're falling on all this stuff so my radio gets smashed, my Taser can get wet these things are subject to break. The only thing that's really going not get hurt is going to be a mag and that can actually still pop out but and my cell phone. I go through screen protectors almost monthly.
Context_of_Work - Stress-Overload	LE	U	Other Public Safety Personnel	46-55	11-20	Male	LE-U-049	So these are notifications that are coming in to dispatch and popping up so they have to be able to be trained, keep up on the changing technologies or the advancements in existing technologies and then of course as new tools are implemented they're trained on those so for a dispatcher it can be somewhat overwhelming. Those individuals it takes a special breed.
Context_of_Work - Stress-Overload	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S3] We have so many responsibilities here we just get so spread thin because there's so many things that we're tasked to do in this division.
Context_of_Work - Stress-Overload	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[RE: typical communication] [S4] It is beyond multi-tasking.
Context_of_Work - Stress-Overload	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S2] I cut it off on my way here because it's too much.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Stress-Overload	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S4] Well and for instance like if he was in his car by himself okay and he's on the laptop and talking on the radio and probably has his Bluetooth thing in his ear okay it's nearly impossible for him to even think about concentrating on driving okay so if both of us are in the car I can concentrate on driving while he's working that. I can work a radio while I'm driving but he's typing in talking on the phone you know and listening to other radios so I mean I think doing it by yourself with all those lines of communication and attempting to drive it works a lot easier if we have somebody that is stationary sometimes to be able to look at all this stuff and not worry about that outside environment of you know what's driving you know so I think for him to be able you know somebody to look at a computer what's going on, relay information at the same time it's a lot easier when you're not having to deal with driving.
Context_of_Work - Stress-Overload	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S3] Yeah I mean as far as accomplishing our tasks in our job I think it does but along with the hectic thing has become with so many lines of communication in ways of receiving information is has become a lot there's so many different things going on you got to pay attention to 20 things rather than just listening to the police radio.
Context_of_Work - Stress-Overload	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S3] ...you're getting lists like this daily from other jurisdictions along with our list of stolen cars so you go down the list of 15 different cars you know what I'm saying it's an overwhelming amount of information you know so you're not just looking for that one red truck now you're looking for 15 from [City], 10 from [County].
Context_of_Work - Stress-Overload	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S3] It used to be like you said look for a red truck and that was easy every red truck you'd be like oh, there's a red truck. Now you've got everything from a Toyota to a Land Rover to a Hyundai. There's 6 silver cars on the list. I mean how do you decipher which car is where?
Context_of_Work - Stress-Overload	LE	R	Field Responder	46-55	21-30	Male	LE-R-052	... So when you have about 18 or 20 people, and you start getting phone calls and you only have three supervisors, it starts to get a lot of phone calls. Because under me I have two sergeants that run also help the shift. But you start getting those phone calls.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Stress-Overload	LE	R	Field Responder	46-55	21-30	Male	LE-R-052	... So it's no boredom, other than your early mornings but that's normally when they spend time writing most of their reports. They'll knock out as many reports as they can in the morning because they know come lunchtime when people start moving and getting up and about, were going to get hammered.
Context_of_Work - Stress-Overload	LE	R	Field Responder	46-55	21-30	Male	LE-R-052	Most of them like it. Some don't, because they think that's just how they feel that they're being watched. And it's just trying to convince them that look, honestly, I don't care where you eat lunch. I just like to know where you're at in case something happens that way; I know I have a deputy in that area. For supervisory skills, that's what we're concerned about. Where they'll at, who they're, I couldn't care less. It's more about performing the task. And just to convince them otherwise. They feel like big brother's watching them. More technology means more, more ways for us to track them.
Context_of_Work - Stress-Overload	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-053	Well first of all it's demanding. Very, very, demanding. I mean my phone goes off 24 hours a day, there's always something going on. I mean the city never sleeps so as far as that. Prior to my job, as being in charge of Special Operations I was in charge of detective division, which was, that was a very big burden on me. I mean that was a never stop job, so I just kind of, I did that for a couple of years and I got kind of burned out on that.
Context_of_Work - Stress-Overload	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-053	Well I teach at the academy here and I can tell you this that law enforcement and not just say law enforcement, but first responders throughout America, throughout the country, deal with things on a day to day basis that the average citizen deals with once in a lifetime and considers it a tragedy. I'll give an example, the police department especially when I was in detectives; we dealt with death every day. There wasn't a day go by that some--not everything was tragic, natural causes and stuff like that expected, but every day we dealt with that. And I mean look some of the hardest things that I've had to do in my career has been involved in that, showing up at somebody's doorstep, and telling them that their loved one is not coming home today, or working a case

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								where a father cut his baby up in pieces. So we do things on a day to day basis that the average citizen deals with once in their lifetime, and considers it a tragedy. So it takes special people to be able to do these things and to keep going.
Context_of_Work - Stress-Overload	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-053	I think it's, I mean they always say that first responders kind of like a paramilitary type organization whether it's the fire department, ambulance service or the police department you kind of have that bond and I guess you kind of understand what the next person goes through. Like a lot of times, a lot of times you go to a real horrific scene and you see the officers on the side and they're laughing and joking and it's really not good for the public to see that, but what they don't understand is that's the way that we deal with them problems. We laugh and joke about it because when you see that every day, it's not that you become kind of demoralized by it but it's a way to relieve the stress. Because I mean look, just recently we had an incident where a guy shot his neighbor, and then he set her on fire in the front yard and I was on my way home, responded over there, we actually had to stomp the lady out. I mean she ended up dying, but I mean how do you try to deal with that? How do you--if you don't, if you don't somehow just get it off of your mind, and talk about it amongst your peers, people that understand, you've got to live with that. So once again I think it's a real, it's a tight bond, it's a tight bond among first responders and they kind of really, everybody has an understanding of what each other goes through each and every day.
Context_of_Work - Stress-Overload	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-053	...they're putting more, more and more on you. They're putting more and more on the fire department. They're putting more and more on the first responders. We're having to do cross training things, like years ago when I was growing up when my daddy was the fire chief, the fire department had no responsibility on medical emergencies. The ambulance service takes care of that. Now, across America, when the ambulance is dispatched, the fire department is dispatched. So now what you did is that you've taken this guy that may have to leave work

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								one or two times a day where now he's starting to have to leave work five and six, seven times a day to respond to calls that when I was younger we never had to go to. We never had to go to. Or fire department backing up the police department for certain things. You get a big incident; they're calling out the fire department to use the lighting equipment. They're calling out the fire departments at major scenes, washing off the roads and stuff like that. So it's putting a strain on the volunteer fire service. Now, across America, when the ambulance is dispatched, the fire department is dispatched. So now what you did is that you've taken this guy that may have to leave work one or two times a day where now he's starting to have to leave work five and six, seven times a day to respond to calls that when I was younger we never had to go to. We never had to go to. Or fire department backing up the police department for certain things. You get a big incident; they're calling out the fire department to use the lighting equipment. They're calling out the fire departments at major scenes, washing off the roads and stuff like that. So it's putting a strain on the volunteer fire service. Like the other day, they called the Sheriff's office, called our fire department out there for a big scene that they had. We spent five and six hours out there lighting up the scene and helping them out, and then at 7:00 in the morning, we've got to get up and go to work. We've been out all night. So it's things like that I think... it hurts the volunteer fire service.
Context_of_Work - Stress-Overload	LE	R	Field Responder	Over 65	11-20	Male	LE-R-054	It's--how would you describe it? It's probably 90 percent boredom and 10 percent of--just panic sometimes, so it's interesting, it's--you never get the same thing twice, it's pretty interesting.
Context_of_Work - Stress-Overload	LE	U	Field Responder	36-45	11-20	Male	LE-U-055	Demanding, stressful, hmm... rewarding... there's a good one I'm trying to think of, I just can't think of it I guess. But I think the easiest way is high stress, high responsibility, high reward, you know, at the points where you feel like you're making an impact on what your agency's doing.
Context_of_Work - Stress-Overload	LE	U	Field Responder	36-45	11-20	Male	LE-U-057	I kind of stay in my office most of the time unless I'm meeting with my guys. I have a lot of paperwork to do, so I don't really get out and talk to the officers too, too much. I kind of worry about my detectives and the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								people under my command, and I take care of my paperwork and the reports. So I would say I don't interact with everybody in the station as much as some of the ranks do here, other officers.
Context_of_Work - Stress-Overload	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	Oh, that's an interesting question. I have never really considered that. Hmm..I am not sure that there is really one or two that honestly encompasses everything; you know, certainly it is difficult, sometimes tedious, how do you wanna, gonna..
Context_of_Work - Stress-Overload	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	Yeah, I have never really considered it. It certainly, I would go rewarding, it's certainly something that I would do, would describe, again; you know sometimes, it encompasses a lot of different things. It's very rewarding at times but again, you know I use the word 'tedious' at times because it is so, I wanna - I guess I don't really know how to encompass everything in just a couple of words. It really runs the gamut from, all the way from rewarding to days that, you know, are dreadful, quite honestly.
Context_of_Work - Stress-Overload	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	You know, for us being successful in accomplishing our mission and that being, being able to help somebody in need, you know, having proper resolutions to criminal cases where people were victims of, getting that satisfaction for those people, if you will. Satisfying is a good word to utilize to describe the position; it can be very, very satisfying, but then again, the flip side of that is sometimes it can be struggling, and like I say, sometimes very mundane, dealing with some of the personnel issues - it can be very, very difficult because it's like a family and you know as well as I do when you have to discipline somebody in your family, it's never an easy thing. So that is some of the things that I would describe as maybe tedious or, you know, certainly not desirable, those type of things, but you know, as far as day to day you know, it's a lot of paperwork and that is where maybe some of the mundane comes in.
Context_of_Work - Stress-Overload	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	It's very challenging because of the limited amount of experience we have in our department because it's younger. We have to constantly guide and change officers' behavior by how they do things because again with the FTO program, I have such a young department that now I have got guys who have got 2 to 3 years on - these guys are my FTOs,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								and before when I started, they wouldn't even look at you until you started having 15 years on to start training people.
Context_of_Work - Stress-Overload	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	So one of our biggest obstacles as far as challenging is making sure that guys are trained properly because you lose the experience and training as the younger guys are teaching the newer guys - I don't have 20-year veterans like I used to, so my experience is gone, so that is very challenging. Very challenging because -and relates to I don't have much assistance because the younger guys, they don't understand what it takes of all the behind-the-scenes stuff. So they don't know that I gotta do, you know, all the inventories and the grant work and everything and ordering stuff to keep the department running; they just are - so, police work, you get in a car and drive around. So that is challenging. I mean, overall, it's rewarding; the detective bureau part is the rewarding part because you get to follow through on cases and stuff like that. But I don't believe it is as rewarding as it used to be because such a negative impact from the cops [unintelligible] now; I see the guys, they get burnt out quick, they get jaded and you know, whether it is political or if it is from the public, they feel like they are getting it from both ends.
Context_of_Work - Stress-Overload	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	with everybody leaving, it caused - it did the opposite of what the city wanted to do. Instead of saving money, we just spent \$ 400,000 in overtime, because now we had to cover the road. Guys got burnt out because you didn't know when you were going to go home and that contributed to guys leaving. They didn't want to work 70 hours a week.
Context_of_Work - Stress-Overload	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	Yeah. I carry two extra magazines of ammo in my firearm, my pepper spray, taser - I don't have it on me now, it's in the car, but flashlight, I got my keys. I generally carry gloves with me, notepad and pen, extra handcuff key, and in my work bag in the car I got a lot of gear too, but as far as just one me, I try to limit it as much as I can because it's just so heavy.
Context_of_Work - Stress-Overload	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	No. No, we have done more with less than at any other time in history. [Inaudible] you know, the toughest economic down time in modern day history. We have done more with less. We've had things shoved upon us

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								though we have had now in position since 1998 law enforcement. We've double bunked two pods out of the [inaudible] facility without hiring a soul. So --
Context_of_Work - Stress-Overload	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	But now, we are very, very stretched, very stretched. Closing [City], we take all of the mentally ill that are up for evaluation to [inaudible] in [City] now, did that on our own.
Context_of_Work - Stress-Overload	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	Yeah, incredible. And we do it all with, you know, we used our reserve unit, that are people that volunteer for our agency to work for free and to do the mental transports. We lost 21 reserves this year. I think a lot of it was -- some of it was attrition, some of it was, you know, I've done this long enough, I want to do something else and but I think some of it, you know, this isn't what I signed up for. You know, I am not Uber for, you know, the mentally ill, you know, and they are spending their volunteer time doing that instead of doing other things they could be doing. So, I think that was a big part of losing some of our reserves, but just can't continue to -- we were just talking in here already. We have not had any -- although our budget has increased but it is we picked up juvenile or because we picked up, you know, animal control or other things have been handed to us to do and it comes with that budget increase but as far as us getting law enforcement positions because we have more people, we need more policeman on the street, we haven't. We just went from five shifts to four shifts so we could put more officers on the street. These guys are working 12 hours a day now and we got to stop that.
Context_of_Work - Stress-Overload	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	know, I get 70 phone calls a day plus text and email and so it just gets sometimes I didn't breathe and you can't you know.
Context_of_Work - Stress-Overload	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-058	No, I mean it's hands on, it is weapons, it's you know as batons, chemical spray, it's the taser, you know, it's the cellphone, the body camera is either it is on glasses or it can be on your lapel, your collar, or we have some that have a magnet in there, about that size right there, you know.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Types_of_Calls	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S2]: 90% of those are wireless. [I am sticking into 700 -- around average 700 dollar calls a year, that's --
Context_of_Work - Types_of_Calls	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S1]: Yeah, yeah, yeah. Yeah, or a lot about AT&T too. [Everyone laughs]. I will write you are not many people's first choice. But, and the calls are mostly Fire, EMS, Police or equally?
Context_of_Work - Types_of_Calls	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S4]: I think EMS is running around 13%, and Fire Department is probably roughly the same.
Context_of_Work - Types_of_Calls	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S4]: Police Department, Sheriff's Department and then Fire and EMS.
Context_of_Work - Types_of_Calls	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S2] ... On Fire there usually is, because we don't get that many, you know, calls at one time. But on Police, it is nothing unusual about "I don't have anybody to send." Or "I've got to stack this call." Some officer would be one call, have another one stacked, and they got to get to next and maybe even have another one stacked on. So, what we have to do is we -- we are not allowed to hold the call without permission. So, I get a call from the call taker. I pull it up. There is nobody to send. I've got to call the Sergeant or Captain, you know, whoever the supervisor is and say I've got so and so call here, permission to hold. And he really doesn't have an option other than say -- "Go ahead and hold it," because there is nobody to send.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	So I also have the third party compliance software called First Watch. We worked with them and we built a lot of triggers, we also built triggers for the health department. So there's things they watch during the year, such as heat emergencies during the summer, cold emergencies. Right now it's narcotic overdoses we're looking at, anytime those things come up, and they'll trigger in First Watch and they'll be able to go in and get that data out of our CAD immediately and by going through that third party there's no HIPPA data exchanging, all that stuff's clean, and I also pull my daily reports, hourly reports, compliance reports, because we have a county contract. We have to be at all emergencies in 10 minutes or less, 90% of the time. If we don't, we pay fines. We have another thing

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								set up to where we have first response for ALS engines in the county. So if an ALS engine gets there in 10 minutes it bumps the ambulance time up to 17 minutes, so we still got Ucare in 10 minutes, and if we don't make that in 17 minutes it's a fine of \$250 and in a minute it's \$500 and then in three minutes, it's \$1000 and it goes up, to be allowed to do that; so there are economic reasons for us to be efficient
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	And it's more a stressor probably for our new people than it is for our old people. What I mean by that is when I said earlier, so one of them went through the whole training program got a child CPR call, had to give the mom direct instructions on how to give CPR to a 2-year-old, went through all that, that was it, she quit, can't do it. So if you're a parent and you have a 7-year-old and you have the 7-year-old call that day, it's close to home, it's a huge stressor. It's the same when I was on the fire truck and the ambulance, you know there are many times I've walked up and seen the back of a kids' head in a car wreck and it looks just like your kid and it triggers that in your mind. The longer you do this, the more callous you get to those things, the colder you become, which can also be a stressor for other things at work, so it is, and its different triggers for everybody, just like people are motivated differently. And employees that - money, I'll cut your overtime off and I'll get your attention quickly, but the other guy could care less and never works any overtime, so I can't use that to motivate him.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	So yeah, we had APCO cards for a long time, so you ask the same questions: where are you calling from, the number you're calling from and what's your location? That way if we get disconnected we can at least or help that way and then try to re-establish to find out. And then the next thing is so in the medical field, it's very difficult when you want to talk to someone that has no medical training, to give you enough information to know if it's a life-threatening emergency or not because we get calls for '[indiscernible]' for 3 weeks, I need an ambulance'. We get calls for 'I called the doctor and I let him in, so I need an ambulance to go to [Hospital] to get meds'.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	I'm telling you it's just insane. And then you have calls that are legitimate; now the true measures are unconscious- I'm calling, he's not breathing. Those are the easy ones. The hard ones are those that, is it a kidney stone or is it an aortic aneurysm?
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	Similar answers to similar questions. Those are the cards we...so, I mean, for instance when I took over up here, I started to pull data and look at things and we were having - I say a lot- it might be two or three a month before we send an ambulance to non-emergency, and the ambulance transported emergency to the hospital because it ended up being an MRI or a stroke. Now that still happens occasionally when we review it, it's because the call taker is a third party, they got to call there or somewhere else, they're not with the patient.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	The family's [indiscernible] so he's taking care of you, he's frantic, he calls one of your kids, your kid calls us, I don't know, they don't know the answer to the question. So anytime we have anything that's a flag like that, an emergency to the hospital, we look at every one of those calls; two reasons, one is the medic new and should've been an emergency to the hospital, did we code it correctly, so anything that we could learn from any of those calls we do. So we don't have those much anymore, rarely have those types of calls and then we really, we went from the cards to the software on the screen, so it pops up because the cards are hard, you got to know where the card is...
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	[RE: call-taking software] ...We found out there were some issues when it first got set up, anything that is an extremity fracture is automatically a non-emergency, that's a national standard. I don't agree with that... Now if it's a femur fracture, that's an extremity fracture.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	And there are a lot of older people in our community right now that have, especially in their 70s and 80s that's have spontaneous femur fractures, they'll have a foot turn and snap their femur. Now that we know that's what it is on the phone though, so if we want to ask pertinent questions without talking to you for 30 minutes to figure out what's going on.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	We'd get Narcan because we give directions so we had the direction cards: how to give CPR, how to control bleeding; so if those things are going on we will give those instructions to the layperson on the phone. So we will ask, he's not breathing and I can't wake him up - do you want to do CPR? - I don't know how - I can walk you through it, do you want to do CPR? And we walk them through to do CPR on the phone. So we had to add Narcan administration because we've never done that before, so it's really simple with them. It's easier with that; with cards, you had to pay money and print out all the cards. With the new, we will pull off a script, we write out what we want it to be, how we want it to flow, we send it to our medical director, he approves it, same as we do with our policies and procedures for standards of care and then we send it to APCO, and they add it and we load it into the software.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	But if you don't know when you call a cell phone, you say road, but you're on trail, it may not trigger, and we may go to the wrong address, may go to the wrong street.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	Right, so instead of, instead of finding the root cause, these are going to happen in our community. My biggest are these medical one's, I hate them, oh yeah because only 2% of all those calls are true calls.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	And we get so many calls, you get to them and it's "oh I didn't push the button."
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	The federal government I guess, there's nobody that regulates it. Now we have put in ordinances that says if you're having an alarm and you sound it so many times, we could start going after you for a penalty or a fine, or whatever, but until that happens there is no regulatory. It's a call. I can't say let's send a non-emergency and then well the first time I do it's going to be a cardiac arrest and then we treat everyone of those as an emergency. Because all it is an alarm.
Context_of_Work - Types_of_Calls	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S2] ...In the winter we handle a number of ski calls injuries, motor vehicle accidents just because of slick roads and that sort of thing some avalanche calls. I guess exposure calls would be other ones and

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								then the typical you know vacationers and that can be at any time either summer or winter with the bar fights or the things like that so during when summer is more outdoor we have a lot of tech rescues that happen in remote areas of the county that often have to have extra different types of apparatus to get to the location and sometimes swift water rescues so a variety. Many people don't know where they are so our interest in technology that helps us to find people is important.
Context_of_Work - Types_of_Calls	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S2] Summer it goes up. There's two months in the summer it pretty much doubles which is July and August and then winter so our average is about a hundred calls for service a day and so in the summer it's you know 200 calls a day. Some winter we will get it in the winter at certain holidays like president's weekend is a big ski time so everybody you know have a bump up in calls then so certain if there's certain events going on so it's very driven it's driven by tourism.
Context_of_Work - Types_of_Calls	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S2] Yeah I mean if they have somebody that is maybe not breathing and you know what I don't know if they're breathing and they have to go straight into determining is it trying to get the caller to focus long enough to actually say no this person is not breathing so they can give them the next steps to start CPR or whatever the case may be so they just have to be ready, ready for anything.
Context_of_Work - Types_of_Calls	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S2] We get a lot of 911 hang ups mostly off the mountain. Now with the smart watches doing 911 hang ups. They move their wrist. That's a real pain. That's worst than the pocket dials.
Context_of_Work - Types_of_Calls	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S2] Yeah it's because their doing that and it just dials 911. So we get a lot of those off the mountain. The wildlife we get calls on those everyday or livestock. If it's a sheep we run sheep from spring to fall. They go back and forth and it just becomes just people calling in you know one lone sheep will get left and people don't like seeing lone sheep out.
Context_of_Work - Types_of_Calls	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S3] And the ten administrative lines are mentioned all of the law enforcement agencies in the [County] don't have staff in the evening until all of those standard DID calls roll into dispatch as well as all the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								administrative calls in this facility. So somebody calls at 9:30 to report a dog barking or something that's going to roll onto a call on dispatch and maybe that's a fair volume after hours.
Context_of_Work - Types_of_Calls	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S2] ...we actually had a 911 call where we used the app to help the rider get back because he was like I don't know if I should turn here because you end up (00:46:48) with like four different choices of forks in the road or whatever to go so he wasn't sure where to go so we were able to use that app based off of what other riders had done to go okay well you're trying to get back over to [town] okay don't turn left there, don't take that one, go this way so we've used that one before.
Context_of_Work - Types_of_Calls	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	It's not. We would like to have them do Spanish, but-- And it works in different situations. We're actually looking into now that a lot of people will answer a text and they won't answer their phone. So we get a lot of butt dials here - a lot of 911 butt dials - and about 30% of our 911 calls are butt dialed, so we call them all back. Every single one of them.
Context_of_Work - Types_of_Calls	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	So we're looking into that. But our gen also doesn't text out. So we have a cell phone in the center that we sometimes use to text out and try to initiate contact with people. Once we've got contact then we're good. We had one kind of high profile call that went early when we first got text to 911. And I don't think anybody else in [name] had it or not anybody in this area. And we got a text from a woman whose boyfriend was suicidal, and he had a gun. And they were in a car. And he was driving. And she had called 911, but he overheard her, and he got mad. And she didn't want him to get mad. He wasn't threatening her or anything, but he was threatening to kill himself in a car.
Context_of_Work - Types_of_Calls	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	And she was traveling westbound on the interstate. And we had vehicle description, we had a couple state troopers behind the car, and we just kept with her, and the call-taker just kept talking, and talking, and talking. Finally, down by [name], she texted that she had taken the gun and thrown it out the window. And so we got the troopers to pull them over then, and everything ended peacefully. But two hours away and it's about 115 miles I guess. So that was a very good success story. And we

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								promoted that through [name] and APCO both. And it made [Name] national website for a while. So it was a pretty cool deal, and it made a lot more sense to a lot of us to say, "Oh, this is something that could be handy. It's needed."
Context_of_Work - Types_of_Calls	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	... So we have 53,000 people that live here, but in the winter time, the population of our county is closer to 85 because of all our skier visitors. And a lot of those people call 911. They're lost. They're hurt on the ski mountain. They've crashed their car because it's snowy. All that stuff, and so, a lot of that impacts our business. But their surcharge goes to wherever they live. So we don't get that funding from them. That's one thing. Location information sometimes is difficult to get from a cell phone. And again, we have a lot of visitors here. And they never know where they're at. Had no clue.
Context_of_Work - Types_of_Calls	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	Don't have a clue. We do get phase two data from most of them, eventually. And we can usually track people down just by talking to them and asking them questions. But not always. And so that's difficult for all of us and for our customer, too.
Context_of_Work - Types_of_Calls	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	I like it because not all calls are the same. Some calls are boring, typical sick person that is in their mid-twenties and just doesn't know how to take care of themselves [laughter], that you really think, "Why are you calling 911 for this?" But regardless, they're calling 911 anyway, all the way up to the person who's gasping for breath, or someone who's screaming and you don't even know what they're screaming about...
Context_of_Work - Types_of_Calls	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	Yeah. It's funny because time of day, in the morning you have all your car accidents here in the [City] area, between like 5:00 and 9:00, you have a lot of that. And then you get a lot of the medical facilities...Or their blood pressure's too high or something, and the doctor feels like they need to go to the emergency room. So they call an ambulance for that.
Context_of_Work - Types_of_Calls	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	...And then also at the end of the workday it seems like kids are out of school, there's a lot more activities, so there's a lot of kids with accidents on the playground, at different sports fields, depending on the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								time of year, soccer, football, baseball, swimming, all that other stuff. You have accidents after school... Summertime, school's off and they drink a lot, and so you get a lot of drunks, drunk driving accidents, people hurting themselves because of alcohol-related injuries, anytime during the week. But then when school starts it's usually only on the weekends... So any Friday night, because of our geographical location, because of the local gangs that we have, Friday night we always have stabbings and shootings.
Context_of_Work - Types_of_Calls	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	...Always, always, always we're going for stabbings and shootings every Friday night...
Context_of_Work - Types_of_Calls	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	... So this massive river that is very fast and very dangerous, around a lot of people who may or may not know the dangers. And there's people that unfortunately drown every year in the [name]. And we do all the rescues and all the body recovery and everything else.
Context_of_Work - Types_of_Calls	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	... and people call 911 only if they've shot themselves or there's a hunting accident or they're missing a [inaudible], like a legit crazy call.
Context_of_Work - Types_of_Calls	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	So you call 911 because your roommate, spouse, family member, neighbor falls down, split their head open, they're bleeding, they're unconscious, and I'm asking you what the address is.
Context_of_Work - Types_of_Calls	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	I've also been out in the field where I've rushed into a door, and I've taken a 13-year-old off of the back of her bedroom door because she hung herself from her metal coathanger. And I've had to see that. I've seen a 12-year-old transgender boy who was having a hard time in school, and went home and slit himself up the arms. His mom came home to a bathtub full of blood and her son dead. I've seen a husband who was divorced, took his three children into the woods and hung his three children, and then called his wife, and as soon as she showed up he shot himself. I had to jump up in the tree and cut those children down. I've actually gone to a car accident where a teenager girl was drunk and she was trapped and the car was on fire. And we were able to get the passenger out. But here I am inches away from this girl who is on fire

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								screaming, looking at me, and I'm pulling her friend out.
Context_of_Work - Types_of_Calls	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	Most of them we get medical calls.
Context_of_Work - Types_of_Calls	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	... So we deal with a lot more medical than fire and within that medical realm, we deal with a lot of just typical things. People in their 40s, 50s, and 60s have chest pain, trouble breathing, stroke. So any sort of cardiac, breathing, stroke, diabetes, seizures, those are our main ones that we run a lot of. Then you have this massive group of just generic sick people. Everything from headache, fever, nausea, to stomach pains and just simple little-- and then we have a traumatic injury card that goes to anything from they stubbed their finger, to an amputation. So we don't run those too often, but I would say the majority of our calls are the sick people and then you have the chest pains, trouble breathing, strokes, seizures, diabetics.
Context_of_Work - Types_of_Calls	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	I think I would describe my job as making sure that-- someone needs help and they call 9-1-1, it's my job to ensure that they get the right help and that the right help gets there as quickly as possible.
Context_of_Work - Types_of_Calls	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	Let's see, well, I talk to the public if they have a complaint, for example. That will immediately come to a supervisor. So I will get their name, phone number, what the gist of the complaint is, and I will forward that information to my boss who will then figure out who it belongs to and distribute it to that chief.
Context_of_Work - Types_of_Calls	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	... And then if we get a fire call or a big major incident, that will go on a separate talk group, and I'll listen to that as well. So there's times when I have nothing but chatter in my ear from four different radio channels, and I'm trying to decipher--
Context_of_Work - Types_of_Calls	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	Usually so for a perfect example would be one that I took a couple days ago in which a person kind of expressed that they didn't like the look of a vehicle and there was nothing that they could express about why they found the vehicle to be concerning.
Context_of_Work -	COMMS	U	Comms	18-25	5 or less	Male	COMMS-	...So my main interactions are with the public obviously is the biggest

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Types_of_Calls			Personnel				U-006	group of people that I speak to mainly taking calls and things like that and with the public I would say most of the calls we receive are non-emergency even if they come in on a 911 line most of them are not emergency
Context_of_Work - Types_of_Calls	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	... You know suspicious vehicles, suspicious person, minor vehicle accidents, accidents with injury that sort of stuff
Context_of_Work - Types_of_Calls	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	Right, right and then of course that's also not counting the actual emergencies and then I would say for emergency calls most of the time we're taking calls for medical and I think any piece app will tell you that that's--
Context_of_Work - Types_of_Calls	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	Yeah a lot of their real true emergencies are going to be medical and those can get pretty stressful but you know a lot of it is elderly people with chronic conditions and then they flare up and so they need assistance from medics and then outside of that I exclusively communicate with other agencies and police officers and so those are my main people that I speak to.
Context_of_Work - Types_of_Calls	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	Okay so let's say I'll use a domestic because a domestic I think is a pretty good example of a regular call that we take so the most important question that we ask always is the first question we ask is what is the location
Context_of_Work - Types_of_Calls	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	...you know if there's type of whatever they say you know say like arguing with my boyfriend or you know my girlfriend just hit me or my wife is you know doing whatever I'll enter that information and then I'll get them started. That usually takes maybe 30 to 45 seconds for me to get that call in and depending on the cooperation of the caller, the clarity of the information they're giving me and then I'll go straight into my main officer safety related questions
Context_of_Work - Types_of_Calls	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	... You know you never know what's going to be on the other end of the phone you know I was having a really slow day one day and like nothing was happening and then I took a double stabbing in the parking lot outside. So it can just go and you'll be taking calls all day and you'll think

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								they're kind of you know kind of silly you know like parking complaint after parking complaint after you know this guy just doesn't look right you know that type of stuff. You take those calls all day and then right in the middle of your day you can just have I just saw this lady stab this lady and now she's stabbing someone else while I'm seeing it in front of me. Can you get somebody out here right away blah, blah, blah you know screaming on the other end of the phone you know and then you could go from that and then the next thing is help my wife is having a baby and I don't know what to do. You know it just it could it's that unpredictability that makes it fun but it is also very stressful.
Context_of_Work - Types_of_Calls	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	Right or if you get the first chunk of it wrong then it's just not you're not going to be able to find it so the other part of it is too we have a so there's a in the cemetery in the national cemetery there's a visitor's center we get a lot of calls from the visitor center especially in the summertime medical usually, elderly people who are out there at the cemetery visiting family members, gravesites or if they're just there to see the cemetery or whatnot heat stroke, a lot of people fall down because they don't realize that there's a lot of walking involved you know we get a lot of people with basic injuries and then we do have a few very rarely but sometimes we do have some police calls out there as well...
Context_of_Work - Types_of_Calls	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	Exactly. You know I had a call one time from a woman this was like the worst scenario. A woman had received a call from her father who is having a diabetic emergency in [City].
Context_of_Work - Types_of_Calls	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	He's having a diabetic emergency. I don't know what's going on. He's in a white truck on the side of the road.
Context_of_Work - Types_of_Calls	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	And then with that we have received somewhere in the range of two hundred and thirty texts. A good probably 80% or more of that are accidental texts to 911.
Context_of_Work - Types_of_Calls	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	Of the actual calls that we've gotten that we've placed a call for service in a few of them were medical, some of them could have been phone calls but we did have some we had someone who thought someone

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								was breaking into their home so they were able to text 911 and we were able to have a conversation with them and then we also had someone who their friend was overdosing on medication and he didn't want his friend to know that he was contacting 911.
Context_of_Work - Types_of_Calls	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	...We've had-- five is our bare minimum and we've worked with five on midnight shift often and we have structure fires and we have robberies and we have to do all of this plus the additional technology that the citizens want...
Context_of_Work - Types_of_Calls	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	We have lots of non-emergency calls stuff that during the day other county departments instead of knowing where to transfer them they're like we'll just transfer you to the non-emergency number and then we are then tasked with trying to figure out where this person who this person really needs to talk to. We have citizens who call upset because there was Canadian bacon on their pizza and not American bacon on their pizza.
Context_of_Work - Types_of_Calls	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	We have people that call and ask us what time it is. We have people that call and ask us what the animal hospital in [name] phone number is. We have people who ask us almost like we're a 411 call information center and that adds an additional burden onto the dispatchers which is something that we do have to be careful with the new technologies that the county that the citizens want with photo and video to be able to come into us.
Context_of_Work - Types_of_Calls	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	So you kind of know certain times of the year when you're going to start getting influxes of certain types of calls but it really goes up and down. We get more calls during the day that are less severe. We're getting the parking complaints, we're getting the barking dog complaints, the dog is off a leash, we're getting referral calls where someone calls us and asking us you know who they need to call that kind of thing. At night we may have a slower call volume most of the time but they're usually the more severe calls.
Context_of_Work -	COMMS	U	Manager	26-35	6-10	Female	COMMS-	We know we're going to get those calls and unfortunately there's nothing

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Types_of_Calls							U-007	we can do. If there's a big storm and trees are being knocked down and wires are being knocked down we're going to get a ton of calls of people calling in trees are on fire. There's nothing we can do. If the wires are live all we can do is wait until the electric company comes out there turns off those lines, can't move the tree, we can't put water on the live lines to put out the fire, it's raining so the fire will go out, it'll go back up, it'll go out, it'll go back up. If it approaches your house call us.
Context_of_Work - Types_of_Calls	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	We've had people call with a tick on the toe. She refused to pull it off herself, she refused to drive herself to the hospital, she wanted a medic, she refused to let the medic to take it off, she wanted to go to the hospital and have a doctor take the tick off of her toe. So we've kind of allowed those expectations to also hold true so we've kind of also perpetuated this [name] kind of view on life.
Context_of_Work - Types_of_Calls	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	If we need to give lookouts for a vehicle that we're in pursuit we can get on to that radio channel and blast it out to the area and everybody gets the same information at the same exact time versus making individual phone calls to each jurisdiction. So we do have some of those resources to us to contact each other. We also can call each other on the non-emergency line and things like that but again you're having to verify who you are.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	... You have people calling who may have just lost a loved one, or could have a loved one that it's not doing well and is on their way to the hospital and maybe not expecting to make it, or someone's calling in to say that their child's been raped.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	Well, generally my customers-- I mean probably 90% of the time-- I shouldn't say 90, but usually it's someone that needs some type of police service.... I mean, you still get-- that phone call was somebody that is starting a new business, and is applied for a liquor license, or a beer and wine license.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	I mean we have a lot of domestic violence. So someone might call screaming saying, "My boyfriend's beating me up." Or I mean it could be

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								a parent. It could be a child saying, "My mom just hit me." I mean, we have another sad situation in our society is the mentally ill out there. We have a lot of people that are living out on their own that are severely mentally ill. I mean we had a lady a couple weeks ago. She had just moved to town... she was calling three, four, or five times a day. And then we had another one that lives here in town, same thing. Somebody was out to get her. And again, you get to know all these people. Even if they're here for a short time you know their voice as soon as they call, you already know where they live, you already know their address. And that's the beauty I guess of a small town. But we get a lot of unlocks, a lot a lot of private property crashes, a lot of crashes on the streets. But we get a ton of unlocks and I think we're still the only agency in [County] County that does unlocks. We carry the tools in our car and that's a service that we provide for free, so we do get a lot of calls for unlock. I think I had two yesterday. You'd be surprised how many people lock their keys in their car.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	...Some days it's easy, it's boring, it's you know you've got to just kind of go with the flow but it can also be really painful sometimes and mostly when there's a call that's you know that is really difficult. We get those calls sometimes medical calls or accident calls and you know that it's bad there on the scene and you want to do everything you can to help but part of it is you're not there and you're kind of this middle person so you're kind of limbo almost.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	Well we've got the public certainly. Sometimes they come in here so sometimes they're in here and we're just talking but usually they're calling in and so they'll call if they got a problem. This time of year it's a lot of we get a fair amount of accidents this time of year so generally the public... We do dispatch all the 911 calls in the county so usually we're talking to law enforcement, we're talking to the Sheriff's deputies but sometimes we might have to send a call out to fire and so each of these small communities have their own volunteer department but they'll all be notified when something's going on because often times they'll have to

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								send trucks from different towns to help in the case of a fire and here we've got a lot of wild land fires, we've got a lot of brush fires and so often times it's bigger than just one town can handle so fire and we've got also got an EMS.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	Is there anything else we need to know? If it's a situation where somebody's called in with a robbery for example we need to know if the robber is still there or if the person is gone. Was there a weapon involved? And again these are really rare situations for us but they do happen occasionally so that's information we're going to ask about. Sometimes we'll get off that call with the person unless you hear that they really need you there or it's the type of call that really means you need to stay on the line with them until somebody gets there. And again we'll have dispatch to either the deputies or fire or EMS sometimes all three depending on what's going on and that location.
Context_of_Work - Types_of_Calls	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	... The challenge is when you get a call, a certain call, or we call them hot calls. And you have to handle that accordingly to make sure that that person that's on the other end that dialed in, get the help that they need, but also that officer that's responding or the firefighters that's responding have the knowledge and know just what they're walking into, so they can give that person the assistance that they need.
Context_of_Work - Types_of_Calls	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	... We do have them, and we have had issues where we would have those hot calls. And we have to make sure that we get all the pertinent information, such as how many weapons they have, is that person still armed, can you see him, are they irate? If they are, can you put yourself in a different area? ... You have to deal with, we have a lot of accidents. So being that we have [Street], which runs off of a river, it's a very, not as big as the [river], but it's big enough, and we have lost a lot of people that'll lose control and go into that river. Those calls there, me myself, I've worked three that we actually saved, and two that we actually lost.
Context_of_Work - Types_of_Calls	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	...And we know how to handle that call, those classes. Because we know how to talk to them, and it makes it easier, rather than we get a new dispatcher in, and we have to train them.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Types_of_Calls	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	Mm-hmm. Sheriff, fire. We have the two police departments, which is [department names]. We dispatch for both. For EMS, we transfer straight to their dispatcher. Now we do assist their dispatcher in getting that information. If they lose the call or if they couldn't hear the caller, and they call back, we already got that information, so we'll in return give it to them and make sure they have the assistance if they need any assistance going in. Then we assist them in doing that also.
Context_of_Work - Types_of_Calls	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	... How we deal with it, when one of them is not busy, not on their busy days, or they have to go on light duty, you come and sit in with us. So that way you can see how hectic it can get in less than five minutes. It doesn't take long. It doesn't take long at all. Another is some of the calls, those that you can't help, it's just like you just have to sit and try to be that calming voice until somebody gets there, or even if it's down to the last, that's the only thing you can do. Those are stressors.
Context_of_Work - Types_of_Calls	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	... So once you have your location and what's going on, you can get that deputy or the fire service or EMS headed that way. I don't have a caller's name at this point. I know it's a female, it's a male. I know there's kids involved. I know the basic. The rest of the information can come afterwards.
Context_of_Work - Types_of_Calls	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	We're one of the [County] that still go and unlock vehicles. So we have the services of unlocking vehicles if we can. If we can assist you, we'll do it. We have, like I said, we transfer to EMS. So we have those. We have the EMS calls that we transfer to them. We also, we build the report for those. So that way when we transfer, we have our tracking system on it also. We don't just transfer it to KD [phonetic] and then hang up. If, in the event it's something that happens on [Street] or something in reference to troop, we transfer to state police. So we have those calls that if you need state police, we have those that we generate also.
Context_of_Work - Types_of_Calls	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	EMS is a bit, it's a bit difficult. It's not all bad, but their system, their mapping system isn't the same as our mapping system. So they have a, older version. So sometimes we have to, we can't disconnect that call. We have to stay on that call to make sure that they have the correct

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								addresses, to make sure that they're going on the current highway. 'Cause in some calls, some instances, they'll pass it up. Because in their mapping system, it's showing a little ways down the street. It's on the same street, but it's showing somewhere further down. So EMS is I would say the most difficult rather than our sheriff or our fire services. Our fire services would be second because we dispatch to them in the event of a residential fire, which is a structure fire, you have a house. We have two on the east bank and two on the west bank. So normally for a structure fire, if your house is on fire on the east bank, we dispatch both departments. Now monitoring both departments is kind of hard, so we set up a channel for them to all switch over to, and they don't always switch to that channel so we can monitor all of them at once. They'll talk on each other's channel, and you have to flip back and forth and also flip to the sheriff office to the main dispatch channel. So it's three channels that you're trying to monitor. And so that's another task on that one.
Context_of_Work - Types_of_Calls	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	With state police, it's mostly on [Street] that we normally have to call them out for, or if we have an accident that happened on our highways, that it's multiple vehicles, and the deputies will say we're going to let state do this one because it's multiple vehicles. So normally getting in touch with state police is very, that one is very easy. We don't have any complications with them.
Context_of_Work - Types_of_Calls	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	We kind of strayed away from that. Sometimes the deputies will call us and ask us can you send me, because they're, in their units their laptops go out all the time. So they mainly work off their phones. Can you send me a picture of the subject? Can you pull this information, send it to me, text that information? So we can't stray directly away from it. So yes, we do use it, and we're trying to minimize it, use mostly the computer, but sometimes it's hard to do that.
Context_of_Work - Types_of_Calls	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	Our call volume goes up. Our call volume goes up extremely. And it's like the phone is nonstop. That's when we bring in our three laptop positions, which are call-taking stations. So that'll be the biggest difference in the event of a natural disaster, the call volumes.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Types_of_Calls	COMMS	R	Manager	36-45	11-20	Male	COMMS-R-011	... We have a population of right over 22,000 people. We average about 16,000 911 calls a year, and probably close to 12,000 calls for service a year. Our dispatch center is a little unique in that we have a consolidated dispatch.
Context_of_Work - Types_of_Calls	COMMS	R	Manager	36-45	11-20	Male	COMMS-R-011	...It's something we kind of, sometimes the only thing you do is laugh at some of these phone calls you get or phone calls that come in the radio room. And it was a group of guys in my office at the time. And I came up with that word, and it's pretty much stuck, and I'm not one to get on my soapbox and say how great [inaudible]. But at the same time, we use it every [inaudible], and we have to be careful how we use it.
Context_of_Work - Types_of_Calls	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	Correct. So a lot of calls that we take that can be handled by phone, mainly child custody issues or civil matters, anything that can be handled on the phone with like how a deputy would handle it, we would basically handle it.
Context_of_Work - Types_of_Calls	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	So definitely being able to listen, but at the same time you have to be able to multi-task while you're listening because not only are you talking to somebody on the phone, but you have deputies asking you for information, calling out traffic stops, or you have a fire department talking to you. Or you have to dispatch the fire department while you're on a call.
Context_of_Work - Types_of_Calls	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	No. They just kind of, like a probability, basically what you pick out the hat is what you get. I mean some days, like certain times of the year you'll get the same calls. You get your you're not happy [inaudible] calls towards the end of the year or during the holiday season.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	It can be officers from our agencies. It could be other agencies. Citizens that call in. It's such a wide range of people that they talk to. You know you can be on the phone talking with someone at... wanting a legal advice of what should they do and of course they get referred to contact a lawyer because we're not going to give them legal advice. You know and the next call you pick up is, you know, someone needing a dire emergency going on. So I mean it bounces from one thing to another. It

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								could be someone calling in to see--get connected to tickets because they need to pay whatever the ticket they have or fine or a warrant check. It just... it ranges from everything you can think of.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	Like why is my power out. Sorry, you need to call energy [Laughing]. But.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	It starts with the people... we of course immediately ask is there an emergency. Because whether you're dialing 7-digit or 911 it could be either/or if it's coming in on. And once they've identified whether it is or isn't then, you know, there's a procedure after that. But a routine call is normally not an emergency per se. It may be an emergency to that caller, it's just not an emergency to the actual police. But they take that information. They figure out what's going on. Where can we send the deputy to, to speak with them? Take down their contact information in the document, who we're speaking to and what's going briefly in the call.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	But the fire department, you have to do that before each and every call. All of our fire departments are volunteers. So you're calling them out of their house or their vehicle or their job. Some of them actually are able to leave and go. So it's a little different. The deputies you're telling them to go there. And this is where you need to go. It's not exactly an option, huh. Whereas the fire department sometimes you--they don't go en route fast enough or what you feel would be fast enough so you're setting a second tone off trying to figure out where they're at. And you have to remind yourself that they volunteer. They don't get paid. You know they do this out of them wanting to help their community. So. It's different.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	I answer 911 calls and dispatch out fire, EMS and patrol as needed.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	Okay. Well we get all sorts of callers during the day. People call about tickets and, not so serious stuff, and we get people who call about pretty serious stuff also. People who are scared and, you know, are looking for help. Who some people can be agitated and, you know, pretty nasty. And we get other people who, you know, sometimes we get people who just

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								want somebody to talk to. So. Yeah. And the people during the day from the, like the guys, the road patrol they're pretty easy to talk to some of them.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	It's not very high. Like I say we're small. We don't see as much... as many calls as other agencies do. We actually did some training, where they took us to a larger facility [city] and we saw their call volume compared to ours, oh my God [Laughing], oh my God. Yeah, so we maybe get, on a slow day we'll get anywhere from 2 to 3 calls. And on a busy day it could be anywhere from 10 to 15 calls.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	Now that's emergency calls. That's not including like ticket information or report stuff like that, yeah.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	Well just recently I had a caller, a daughter who found her mother had passed away in the bathroom. And you know just trying to--well you can't calm someone down in a situation like that but just trying to talk to them and get them to kind of calm down and just trying to keep them from... from getting too upset, too, you know, emotional, you know it's impossible to do and then trying to keep yourself in check as well because that's just a hard situation for anybody. And then you're on the phone and, you know, it's just real hard especially when you know the people 'cause I've had those situations, too.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	Your location. And depending on the type of call it is, if weapons are involved. If they need--what type of help they need. Whether it's fire or just patrol or just EMS or, you know, just that. But, yeah, location is the most important.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	--I mean it's supposed--it should be like we have--we're trained that it should be, you know but [Laughing] everybody's different. So you just never know how a call can go.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	Mostly are police related. And, huh, we send police on animal calls, on just public assist, I need this done or, you know, not--it's not always like legal, like real legal issues, it's just, you know, yeah, but it's mostly police calls. Yeah.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	Absolutely. Absolutely. I had a lady call who her refrigerator door was stuck she needed her refrigerator opened.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	[Laughing]. I would say I'm a 911 operator so I take emergency calls from the public, emergency and non-emergency calls and I talk to police, fire, and EMS via radio and just relay basically everything I'm told to them. And I have to talk to the public a lot.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	Okay. Basically on a, just a regular day, on most days, we just--our main focus is the public and so basically keep them happy and keep their needs met. So if it's something that they call in for, there could be a dog barking to somebody stole something from me last night. We have a lady that always calls us about... she thinks somebody came into her place which we know she doesn't but I mean basically just on a daily basis--we just take calls from people and... try to not be... I guess mean or have an attitude, things like that. Basically talking to the public is what we do all day. Then we'll talk to the officers and get them where they need to go. We do NCIC entries like putting in people and stolen property and things like that. We talk to EMS and the fire department every day.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	Well if it's a--I mean I don't ask that on every single call but if it's a call that's like a fight or a disturbance or something like that, I'll say, well, did they have any weapons or are any weapons involved or do they own any weapons, you know, something like that. I'll just say, well make sure all your weapons are away and let the officer know if you have weapons or are in possession of weapons.
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	Well I would say that first of all I am the director of operations for all emergency communications for the [County] first responders. For police, law enforcement, and fire, we handle all of the operations of their dispatch systems. So we answer the calls, the 911 calls, my division answers the 911 calls, administrative, non-emergency calls, and then we take those calls for service, put them into our computer aided dispatch and then dispatch the appropriate services for any particular event whether it's unlock of a vehicle or it's a mass casualty event, whatever it would be.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Context_of_Work - Types_of_Calls	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	They're going to talk to a wide range of people. They're going to talk to anywhere from callers having medical emergencies to fire emergencies, to law enforcement. Things that they're going to interact with: deputies, administrators of the sheriff's office, and so forth. They're going to... we don't do emergency medical dispatch. We transfer medical calls to the private ambulance service. So the emergency medical dispatch instructions and pre-arrival instructions and things are given by the private ambulance service. They will talk to firemen, different municipal police departments. We have I believe it's 7 municipal police departments here in the [County]. We dispatch for all of those. And so the dispatchers will talk to those people.
Context_of_Work - Types_of_Calls	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	We always have some fun calls. I like dealing with the people. I like dealing with officers. When I can get them all their information, and the call is easy, and it's set up, and we can do the steps that make it successful, that's when it's exhilarating. It's exhilarating when I can catch the perp, when we have someone, that we're behind someone chasing them, or we're dealing with possible bomb threat or something, we're able to take down that individual through protocol, properly, without any things being crossed, that's the most perfect, exhilarating day.
Context_of_Work - Types_of_Calls	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	... I love night shift because the more serious calls happen at night, and I'm more serious-oriented, not as office-oriented. So I guess you could say that we alternate, and we've put in votes for who could get I guess, if we wanted like straight shifts. But I guess it kind of works rotating.
Context_of_Work - Types_of_Calls	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	Mostly unless it's, unless there's radio traffic, it should be given over the radio like if it's not serious or if it's, their wife is calling 'cause they can't get a hold of them. That's rare, but I do get those. Or someone's looking for them, but we have a call going on. So I'll either tell them to give me a 21 or a phone call, or I will contact them myself.
Context_of_Work - Types_of_Calls	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	For example, on an alarm call, I will have Complete Wiring and Security contact me. They're one of our many that we use.
Context_of_Work -	COMMS	U	Comms	26-35	6-10	Female	COMMS-	Q: Okay. So what do most of your calls have to do with? What are they

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Types_of_Calls			Personnel				U-017	mostly about? SME: Either thefts or wrecks. Thefts or wrecks.
Context_of_Work - Types_of_Calls	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	We take phone calls from people around [inaudible] college campus, we take phone calls about--you know, if there are thefts or any kind of emergencies, we dispatch officers, if there's a medical emergency, we get in touch with EMS, which EMS would get in touch with Fire and have them sent out. There are a lot of different things that we send officers to do. We'll send them out to motorist assists, if it's somebody who needs a jump or anything like that, or we can also send an officer to do an escort, like if a student wants to get from one location to another on campus.
Context_of_Work - Types_of_Calls	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	Okay, so let's say if we have a subject that is--let's say they're breaking into a building, or they're going inside the stadium. We usually have the cameras pulled up, we'll have those pulled up, we'll try to locate them, we'll get as much information from the complainant as we can, you know, get their race, what they're wearing, if they have any accessories, like if they have a book sack or anything like that, we'll get that information, and we'll send the officer out there. Now, if it's a theft case, we'll send--we'll get all the information from the person, and usually, I mean, the usual theft cases we have here, sometimes it's usually technology, iPhones, it's computers and stuff like that, so we'll get all the information from the person that--you know, if they're on campus, and sometimes, they'll call, and they won't be on campus, so we have to tell them, you know, call back when they get on campus, or to come in here, and then they can make a report that way.
Context_of_Work - Types_of_Calls	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	Well, we get their name, whether they're involved or if it's third party information, if they're calling for somebody else, we get all the--basically, all the information that we can, like if it's--you know, if it's a person that we're looking--that is out doing something, we get their race, what they're wearing, all that information. If it's a wreck, we get the vehicles that are involved, make sure that the vehicles are still there, make sure it's not a hit and run, then, you know, we give all that out to the officer, whether they're in the roadway, whether they have injuries, if they have

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								injuries, then we contact EMS and get EMS and Fire out there, so I mean, every call is really different. There's no real perfect call, so--
Context_of_Work - Types_of_Calls	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	It's very simple. Basically, what we do is like, if we get a fire alarm, see, this is the Celtron [phonetic] right here, and we get fire alarms that come through there, and they'll ring like an alarm through here, so it'll show up where the--whatever--let's say it's the [Team] Stadium, so it'll come up, Tiger Stadium, say the fire alarm is going off.
Context_of_Work - Types_of_Calls	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	...We tell them, and if our officer gets out there, and they say it's a false alarm, to cancel the fire, we'll call them, let them know that it's a false alarm, and then they cancel them. Now, if it's a medical emergency, it's the same way.
Context_of_Work - Types_of_Calls	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	I mean, like, the other day, we had a couple of officers that were on their way home from work, and, like, they'll come up on a wreck, like, I had one of my officers on the Interstate, calling in, saying he was at a wreck on the Interstate, and it was going to be for city police, so I called them, let them know, got the vehicle information, all that. One of them was still in the roadway and wasn't able to move, I let him know all that. My officer stayed out with them until City got there. There are cases where students will call up here, let's say they have, like, a--they need, like, a motorist assist. Sometimes they'll be right off of campus, like, if you go north up here, you have businesses and restaurants and stuff, and they'll be parked out there. Well, that's technically off campus, so it goes to city police, so usually, we'll transfer them over there. Sometimes, we have vehicle pursuits that lead into City's jurisdiction, we'll call them, let them know that we have an officer that's behind a vehicle, or if they're on a foot pursuit, and sometimes they'll send officers out there to help, but yeah, that's usually when we call them.
Emotion	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	So he got passionate about that because of a call that we had where a fellow died because he didn't know he could call 911 because he didn't speak English.
Emotion	COMMS	R	Manager	56-65	11-20	Male	COMMS-	Q: So your dispatcher's pretty happy with that? [talking about new

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
							R-002	console furnitute] SME: They are. And these are-- our dispatchers are-- our centers' pretty fit, pretty active bunch, young kids and these grow up-- we've got a guy that's 6'5, he can stand, and it comes up high enough for him. And then some little ladies like to sit on the floor like cross-legged, and so we got some cushions, and these will usually go down far enough to take up and sit. Sit on a pillow and work. So it's yeah-- it's really positive and be a good thing.
Emotion	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	.... I'm a little scared about when some of the old timers start going, and it's all people that are new. Then I think that might be more of an issue but right now, no. I don't really think we have a communication issue between me and my staff, anyway. And we're trying to iron it out.
Emotion	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	...And if you pooled them all and made them as one dispatcher, they wouldn't have PTSD. But if you look at the results individually, a lot of dispatchers probably do. And some of them are diagnosed as having full-blown PTSD. So I'm worried about that. These young kids, especially, when you get old like me, then you worry about other people.
Emotion	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	Well, I kind of am a little bit concerned. And the professor in [County] isn't-- they don't have any conclusive results yet. But she's not that sold on the idea that it's going to be worse for dispatchers because call-takers are trained to insert themselves into situations that they can't see. Well, how do you do that? Well you use your imagination, and you build a little living room, and you build the people, and you put yourself in there when you're talking to someone. Basically, it's like you're in their house.
Emotion	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	...In 911 of the CAD administrator [name] has been there for [number] years. You don't want to sit there and watch her do what she does because it just makes me crazy. So it's all in the backside of the database, Awful.
Emotion	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	Well, I think that-- not necessarily but the thing that worries me about technology and our vendors, bless their hearts, they are for profit

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								businesses. They want to make money, and you can't blame them for that.
Emotion	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	So you have to-- there's a fine line being empathetic and being stern, I guess. You can't take it personal. "My mom's not breathing," "okay, what's the address?" The caller thinks that they've given you the address, they're good. They can hang up now. And that's not the case.
Emotion	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	...Then we got to go into PAIs and take them off the bed, and get them on the floor, and people get really frustrated with that. They start to yell into the phone, and for me, I'm the totally opposite. It's not my mom, so I really don't care.
Emotion	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	--call. We have something called condition red, which means that We have so many calls to answer that our resources are very limited so We go on condition red and that means that I can send whatever I want to a call. so, I love condition red.
Emotion	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	Yeah a lot of their real true emergencies are going to be medical and those can get pretty stressful but you know a lot of it is elderly people with chronic conditions and then they flare up and so they need assistance from medics and then outside of that I exclusively communicate with other agencies and police officers and so those are my main people that I speak to. Police officers I would say public, police officers and other agencies.
Emotion	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	Right so and again and the reason is that because I had really good training and the other stuff will come with time but those core competencies and that's why I was saying moving to a core competency model is I think where we should go but like being able to get I think of it like blocks yeah so I think of it as having like little blocks. Being a call taker gets really easy once you learn like kind of your own scripted information and if it makes sense to you and you're able to take control of the call. Once you're able to take control of the call and you have certain questions that you're able to ask about certain topics the nervousness and everything goes away because you're just going to the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								questions and you know what you're dealing with. You know I ask the same questions that I ask every single time about people.
Emotion	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	And so there's always this baseline level of tension that you never know what's going to happen and then the other part of it is too once you become more experienced in this job and you do start doing other things like police dispatch and stuff you know I'm starting to recognize the officer's voices and I know some of the officers you know now that I've worked here for a while because we do ride a long a lot, we work with them, we meet them in teletype and stuff like that and so I know them as people and if in addition to me being nervous for perhaps the person on the line because you do get invested in these people even though you don't know them you're still worried about them you care you know.
Emotion	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	Even if it's a very non-emergency they expect a certain level of response. So it's hard for us to keep up with some of those expectations. Some of them are very disappointed that we don't have certain applications that are out at the moment.
Emotion	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	Have downloaded it and it's not cheap for the jurisdictions to pay for. So we do have citizens who are upset that we that [name] County is not purchasing it.
Emotion	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	So they'll eventually be working towards trying to integrate it into the firefighters current equipment and gear versus having a pager that they need to clip on to their belt yeah it could be lost, it might be damaged because of fire so they're trying to find ways of course that's going to be well off in the future because once it's available then jurisdictions have to buy it so we're pretty excited about things like that.
Emotion	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	...Where you may have something that's really cool on the operations side but really lacking on the technology side so that's something that I am really passionate about.
Emotion	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	...It's kind of like an integration of the tiers so it's kind of a fun time to be on the technology side of this scenario because within the next five or

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								ten years it's going to be completely different in this area.
Emotion	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	... Well, he went home and shot himself. And it affected me. I felt terrible. Even though I had no part in it, he pulled the trigger, he bought the gun, but it still, there's just things that bother you
Emotion	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	Well I would say that you know again sometimes it's boring and I was a little surprised by that when I started here. Nobody kind of prepared me for that and yeah it's there are times when we just don't have a whole lot of stuff to do and there's a lot of sitting so that's sometimes hard but I'd also say you know we deal with the public and we deal with the public when they're having problems and so that sometimes I'm going to say it's painful. That might not be the right word. I don't know what the right word is there but I think you know people call us when they are in their time of need. They call us when they have a problem and so that's hard I think to be able to respond appropriately and in a way that can calm them down and make them feel better even though you're not there and that's I think is another hard piece of all this but being a dispatcher especially is that you're not there. You're on the phone and so you're kind of once removed from the problem but you're still trying to help with the problem and I think that that's hard too so I would say that it's a hard job some days. Some days it's easy, it's boring, it's you know you've got to just kind of go with the flow but it can also be really painful sometimes and mostly when there's a call that's you know that is really difficult. We get those calls sometimes medical calls or accident calls and you know that it's bad there on the scene and you want to do everything you can to help but part of it is you're not there and you're kind of this middle person so you're kind of limbo almost.
Emotion	COMMS	R	Manager	36-45	11-20	Male	COMMS-R-011	To its own demise. It's its own worst enemy. Lots of things that we, let's take social media. I hate it, especially in emergent situations.
Emotion	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	Depends on what day, I guess it depends on what day, 'cause some days it's aggravating. Some days it's easygoing. It's a roll of the dice. You never know what to expect. So I think that's probably the reason why I'm still here after so many years. It's ever-changing, so I never expect the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								same thing every day.
Emotion	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	... And the computers are much up to date, so they move a lot faster, and we don't have to worry about officers being in danger 'cause our computer is frozen, we forgot where they were, or having to go to paper and then back, back and forth from the computer to paper.
Emotion	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	... So when he and I worked together, I knew what he wanted to work, which is the radio. That's his favorite thing. But like it wasn't I had to worry about whether he covered his job duties while he's sitting at the radio. Now that I have new people I have to worry, are they doing what they're supposed to be during each situation, so now I go through, and I replay the calls that are dispatched and the calls that are taken to make sure that they are operating on the level they're supposed to versus under, I guess under with at least an okay...
Emotion	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	It can be, especially if the name sounds familiar, someone that we dealt with before. Like especially, I think a lot of the times what bothered me the most is like people you know that they're on the wrong, they fell on the wrong side of the track, they're having a rough life, they're on drugs, and you get the call, and they're passed out dead in their home. Or not passed out dead but like passed out, possibly dead in a home. You kind of wonder where did everybody fail that person in getting them help, which sometimes they're not, they're not passed away sometimes. They're very much alive. They just, they were almost...
Emotion	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	Like if you have, you have some employees that will get, not disgruntled, but like just aggravated, 'cause you're sitting in the same office with the same people for 12 hours. So you tend to get, I wouldn't find a single dispatcher that wouldn't get irritated. So like you got that. Like me, I come in at 6:00 in the morning, I'm happy. I don't need coffee. I don't need, I am a morning person to the T. Like no matter what time I wake up, 3:00, 4:00, I'm awake. I'm probably the only one in this building that does that though.
Emotion	COMMS	R	Field	18-25	5 or less	Female	COMMS-	So I come in, and I'm happy. You got the same people you're working

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder				R-012	with, and they're all like I cannot deal with you right now, I am not awake enough, I need coffee. I'm ready, I'm ready to have conversations. I'm ready to talk. How are you? How was your weekend? And they're just like leave me alone. But they don't want to say that. They just end up getting snappy, you know. So it does tend to, I think that causes a problem is people failing say to hey, can you just give me my space, we'll talk in a little while.
Emotion	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	Hmm. It is... I never thought about that. Hectic.
Emotion	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	Enjoyable at times. Good feeling. Serious. Absolutely serious at times. And... hmm. It can be tedious also.
Emotion	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	It's--sometimes it can be difficult but you just have to stick with it and try to be as patient as you can, try to be as understanding as you can, and as calm as you can be. And try to keep your emotions down to, you know, so you can get the information that you need.
Emotion	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	Just know that I love it. It's very rewarding and it takes a special type of person to do it, what we do.
Emotion	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	But I got the job years later and I just--I love it. I do. I love helping people. I love talking to people so [chuckling].
Emotion	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	I think the--I think it's the in--an in-house thing. I think it's like first responder type of thing. Like I think it's like either they think like we don't give them enough information or we didn't ask or something like that but it's like how could you not get enough information. Like I understand you're going but there's no way for us to sit there and tell you every little thing. All we can tell you is what we were told. And we have questions that we ask. We know the questions to ask. So sometimes it feel like belittling, like well I'm the one that's doing this and you just sitting there all night. Like they'll say stuff like that. Like you just--I mean you just sit there all night. But I'm not just sitting here like...
Emotion	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	It is encouraged but it is limited. Because we don't want people just packing in here and having a social hour in here when these guys are

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								really taking 911 calls and dispatching real emergencies, the background noise will get there. But they try to encourage people, as you're in the courthouse, stop in and see dispatch and stop in and say hey to these people that you hear all the time but you can't put a face with the voice. So I think that helps both sides realize that that's not just some animated voice, it is a person that's sitting there who is really--they have feelings and if you're ugly to them on the radio... then, hey, you know... that's a real person whether it's the dispatcher being ugly or it's the responder being ugly or short or snippy on the radio or even the phone. They're real people up here.
Emotion	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	It's basic. It's not, the ones that I've seen over, I guess you could say at the bigger location, which I don't know if you've been there yet, they've got some amazing stuff. It's basic compared to what I've seen. For example, I like the idea of the patrol car showing up on a map, on campus. I love that a lot. That way if we don't hear from them, I see where they are. I love the idea of our Motorola radio system, how it can go to different agencies,..
Emotion	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	Computers failing. That is probably, I do know that every now and then, the few times that we have had the radios go down, we had to work off of portable, like the ones over there on his desk. I'll have to pull up the radio itself and key up like that. That's annoying, 'cause I need my hands free.
Emotion	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	Just sometimes it gets hectic, but I mean you've got to love it. 'Cause it just is what it is.
Emotion	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S3]: Misunderstood.
Emotion	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S4]: Neglected.
Emotion	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S2]: It's in your blood to -- you got to, you learn to love it, you don't necessarily do it for money, if you know what I am saying, and I could say it because [name] used to a dispatcher, you know. He started out

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								and came up through the ranks [Crosstalk]
Emotion	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S3]: Yeah. And so, that really does tie us for emergencies. My fear, and I don't know whether it can be fixed. I've got 62-year-old women and men both in their -- how are they going to handle a text call from a 14-year-old girl with TBT and just all the abbreviations and all that. Yeah, I think it is going to create a lot of in a bad way -- actually I think it is going to put a toll and take a toll and run off a lot of people because they can't.
Emotion	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	And it's more a stressor probably for our new people than it is for our old people. What I mean by that is when I said earlier, so one of them went through the whole training program got a child CPR call, had to give the mom direct instructions on how to give CPR to a 2-year-old, went through all that, that was it, she quit, can't do it. So if you're a parent and you have a 7-year-old and you have the 7-year-old call that day, it's close to home, it's a huge stressor. It's the same when I was on the fire truck and the ambulance, you know there are many times I've walked up and seen the back of a kids' head in a car wreck and it looks just like your kid and it triggers that in your mind. The longer you do this, the more callous you get to those things, the more cold you become, which can also be a stressor for other things at work, so it is, and its different triggers for everybody, just like people are motivated differently. And employees that - money, I'll cut your overtime off and I'll get your attention quickly, but the other guy could care less and never works any overtime, so I can't use that to motivate him.
Emotion	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	...I mean if you have a relationship with somebody that they like you and they somewhat trust you, or do trust you, it's much easier to conduct business than 'oh crap, here comes that guy again.' So I'm really big on that, so I take time to meet with [City]PD leadership outside of here, same with the communications liaison for [City]PD, he and I talk all the time. If an issue come up, I shoot him an email, 'go ahead and check into this', because I'm not first blush and there's personalities in there. It could be a personality conflict. But I look at everything as so we do adjust culture within EMR which is how I've always done business. I

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								don't headshot people or go yell at everybody when we have an issue. So I look at it as a system issue, is it a training issue? Is it a personnel issue? And I look through that. I end up at personnel last so by the time I get to the person I pretty much know the answers before I ask the questions and if it's a personnel issue I'll deal with the person. But a lot of the times you find out that 80% of things gone wrong, you find out it's a communication training issue. We taught it and it didn't stick, we taught it and it didn't hear right, we didn't teach it at all, or we taught it wrong, or we changed some things and missed that one, we didn't update them on the training. So you have to look at all that. You know they get upset sometimes, so if we don't get to that call in 10 minutes, we review that call; and it's either distance because they just couldn't make it in 10 minutes.
Frustration	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	Going back and retrofitting it, and getting it tested, and all that probably takes months, and months, and months, but we're not at that solution yet. So you can imagine everybody's frustration.
Frustration	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	It's just I've noticed over the years, we are way more heavy of, "Okay, you got to go to this policy update thing, training or webinar." And I'm like, "Well, that's not the same." It's not the same. Talking about interior firefighting or talking about a tactical stop, it's not the same as actually getting out and doing it.
Frustration	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	And it's because the technology is so bad that it's not realistic. And for what it's worth, it's not-- when we see that on the agenda, we're like, "Okay. That's a check box." And that gets in the way to where you're like, "That's a waste of my day," because we don't have too many days that we can really either go train or do something that's very station-specific--
Frustration	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	But it's frustrating, right, especially when you're working with kind of the Type-A personalities that gravitate toward law enforcement or firefighting. When you have good training, everybody's rocked, right? They're like, "Wow, that was awesome. I mean, that was excellent. We worked hard." We had training--

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Frustration	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	But the minute you take that same group and you put them into that simulator, they're going. It's just a joke. And it's a joke because they already know how to drive well, and they do it almost every day. And in this department, because we have a whole bunch of unfilled positions right now, we do a lot of mandatory overtime on both bureaus. So these guys will be working here today, and then tomorrow, one or two of them will go work on patrol shift for 8 hours to 12 hours.
Frustration	FF	S	Other Public Safety Personnel	36-45	11-20	Male	PS-S-001	It's amazing. Technology is amazing. It looks really neat. But with a \$100 smoke machine and a tower that I can lock down, and train with zero visibility, and then use a thermal imager in their hands, I can do the same thing. And so I couldn't afford VR, even if you discounted it to a point where you weren't making any money. And it's frustrating, right? Because everybody goes, "Oh, this is so awesome." [Jet fighter?] [inaudible]-- yeah, but the helmet on the Raptor is like 3 million bucks.
Frustration	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S2] I'll say Windows 10 has gotten in my way. I do not like Windows 10 and I know other people love it but I hate it and that's another special--
Frustration	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S2] We get a lot of 911 hang ups mostly off the mountain. Now with the smart watches doing 911 hang ups. They move their wrist. That's a real pain. That's worst than the pocket dials.
Frustration	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	We've had two people leave, one of them stayed within-- well, they both stayed within the town of [City], they just took different jobs. It takes us so long to hire somebody because it's a law enforcement job, so you have to go through the background check, but people that want to be dispatchers don't really want to be cops, and they don't understand that. That that's necessary so when I-- we do applications through the town, and then I have a dispatcher who calls those the first time, and she goes through and checks if they'd done everything right, or if they don't have a driver's license or they felonies, or they have whatever.
Frustration	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	They started July, January 3rd, which is way too long and the reasons are varied why their particular training took so long. But we added some stuff in, and we're going to take some stuff out, and we'd like to see-- I'd

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								like to see it in about five months, four, five months.
Frustration	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	[RE: training] It's a long time. One of these girls is 24 I think, and she's just tired of it, and she wants to be out on her own, and I'm glad she hasn't quit...
Frustration	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	... But for the government to say, "No, you can't spend this because of this amendment, because we don't trust your judgment." That kind of gets in my gourd a little bit, because now all my fire departments in the county want to get station alerting, and we can't afford it because it costs-- it takes another radio console. And the fire departments can't all afford it either because some of them are volunteer and some of them are this, and some of them are that. And the way that it works is it's hooked up through dispatch, so they have to have this equipment in order for us to dispatch for them. They don't want me to-- I can't pay for it because if I pay for it, I have to go ask them for the money anyway, and they just don't have it.
Frustration	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	... And in 10 years, I'm going to need a new one, which is stupid to me because we found another company called DSS. And they make a voice recorder that is very similar to NICE. It runs on a server. It's web browser-based and never sunsets. You pay a maintenance fee, though. So every year, you don't never buy another \$167,000 purchase.
Frustration	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	I like it because not all calls are the same. Some calls are boring, typical sick person that is in their mid-twenties and just doesn't know how to take care of themselves [laughter], that you really think, "Why are you calling 911 for this?"
Frustration	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	Yes and no. Socially, no. Financially and retirement wise, yes. Socially no, because once you come up here, you're locked in, and the chance of getting out to ride fire trucks and ambulances and things are just here and there. It's not regular. Especially with this transition of the police taking over all the positions, we have very few numbers up here, so the few that we have up here are stuck here, until they get more staffing on the police side. It's coveted once you come up here and you know there's

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								a lot of overtime.
Frustration	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	...so anytime we have a jurisdictional call that one of their units is closer, or when we need to go over into these other jurisdictions, we call either on the mutual aid radio channels or on our phone system, we call them directly and ask for mutual aid. And we have mutual aid agreements with everyone except for [name], [name]. They're the only jurisdiction around here that doesn't play with anyone. They're their own little sandbox.
Frustration	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	Very minor things like, "I have a headache." "Okay. What were you doing?" "I was drinking." "Okay, how old are you?" "18." "Okay, first of all, you're underage." And they call 911 for these--
Frustration	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	And behind the scenes, we look at the ambulance and they're running some of these low-priority, minor accidents when a real emergency comes in. And we're like, "Sorry. We have to send the next closest." Fortunately for us, we have a large resource of ambulances, medic units, and every single one of our firefighters are EMTs.
Frustration	COMMS	S	Comms Personnel	36-45	11-20	Male	COMMS-S-003	Yeah, we should have the face to face type of phone calls but we don't. So we have-- it's a very large disappointment to us. The phone system is horrible. The mapping system is also a major disappointment, because before there were only a few hands that used the mapping system.
Frustration	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	It's all of that. Boring, exciting at times, stressful, empathetic, maddening, frustrating, I think all of those - [asked to describe their work and says is it boring, exciting, or-?]
Frustration	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	--they don't speak any English at all or what they do speak is not clear. And that can be very, very stressful and frustrating sometimes on them. Yeah, just all kinds of different socioeconomic backgrounds in this county.
Frustration	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	...But going back to the dispatch times, we have a station alerting program called PURVIS. And when we dispatch a call, the station alerting in the station, it starts out real low. So a tone will go off and it's low, and then there will be a voice which says, "Ambulance respond to

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								this address." Then it will do it again at a higher decibel. That takes time. So they tell us not to dispatch calls on top of one another. So if we have three calls and are pending queue to dispatch, we could be dispatching the one call and we just sit there for a minute waiting for the station alerting to cycle through. Then dispatch the call. Then go back and dispatch the next call. Well, by the time you get to the third one, it's been in there for over two minutes. That is stressful... what we do is we just dispatch them all at one time... Our job is to dispatch calls in a timely fashion. To me, it's not right to just let it wait. So we dispatch all three and we wait until all station alertings are done cycling, and then we'll dispatch all three at the same time vocally. So the technology, just because it's newer, it's definitely not better. That's one thing I've learned... That's frustrating.
Frustration	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	They get frustrated because they want an ambulance. They don't know the difference between advanced life support and basic life-- they don't care about any of that. They don't care about our response packages. They just want someone to show up at their door. So that can be frustrating, because I know I've dealt with it before in taking 911 calls. My philosophy on that is I don't care. It's not my emergency. If you're not willing to give me the information that I need, address and phone number, and tell me what's going on, then you're going to wait.
Frustration	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	--right, are they breathing? Then we got to go into PAIs and take them off the bed, and get them on the floor, and people get really frustrated with that. They start to yell into the phone, and for me, I'm the totally opposite. It's not my mom, so I reall
Frustration	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	If you don't want to listen to me, that's fine, but that's where a lot the frustration and stress come in with the call takers.
Frustration	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	... So that is great and that's something that's been expressed to the county but one of the frustrations I feel like that we have here is we do feel like they don't the county does not prioritize public safety as much as you know maybe we should and so when we've expressed that we need a geodiverse separate building for public safety specifically for the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								piece app they're like you know interested. They don't want to pay for it because it is expensive to set up and they just don't really see the value because they don't think the way that we have to think.
Frustration	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	...so you have to start with [abbreviation] and then its visitor center. Okay? So everytime you enter the information when someone says I'm at the visitor center at the cemetery we say okay [abbreviation]-visitor and then it pops up and you can select it. Okay but if I type in visitor it's not going to come up. You have to type in [abbreviation] and I think you even have to type-- I have to go back and check but I think it's like [abbreviation]-visitor center because that's just the way that it's in there. So there's a lot of locations like that right, and some places like-- So, and again because it's all based off of how you put it in the system. It's verbatim how you put it in the system so we have a lot of giant food stores right so some places are put in as giant-[location] right? giant-[location]. Some others are some other places are giant-[location], giant-[location] so it's very much so it's basically like searching an excel spreadsheet right? It's very specific to what you're looking for and not only do you have to you basically have to learn how the common place is put in for that specific location if you want to use that.
Frustration	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	Right and also it would be extremely helpful to have that I don't know if crowd source is the best way to put it in but some type of system where we can easily search for a business even if that business has only been there for like a day or two or if it was an old business right and someone says I'm at the old Mister [Name] right and I'm like I don't know what that is right but if they say oh it existed there in you know 1960 I guarantee if you Google Mister [Name] and it was like a big place then they're going to be oh did you mean [Address] which is now blah, blah, blah? It's going to pop up you know so we don't have that ability so that can be quite frustrating.
Frustration	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	So it's a lot of even bridging of SOP's and also setting the expectations for the city and council so they know what the expectations will be if we are put into one of those situations. You know we're not going to be able

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								to provide it would be impossible for us to provide exactly what the citizens are expecting us to provide if we're in one of those last ditch effort evacuation type of situations.
Frustration	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	Yeah. It's unknown territory because we've never gotten to that point. I mean there was even issues when they told us on that July 4th incident you need to leave the building and we said and where do we go? And who answers the 911 calls because even though we're having an emergency in this area the rest of [name]County is still having their emergencies so how who do you expect to answer these calls? How do you expect to get them help? Where do you expect us to go to do this?
Frustration	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	So it's kind of hard because we have to really start getting down on our builders to make sure that they're doing the right thing. Being a county it's harder for us than it is for like the City of [name]. We are for us we have to work with the state government. Our roads are state roads not county roads not city roads so we have to really work with the state government to be able to do some of those things and regulate. We can do some things but we can only do it to a certain limit before it's regulated higher than us because of the county aspect of it.
Frustration	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	So it has been deemed not by us necessarily but by those who live in [name] as [name].
Frustration	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	...There's not many people that know both of them and that's where my interest in this world comes into because I want to take both of those aspects and worlds into it to make the best for both sides. So I think that's where we're kind of lacking in our technology right now is integrating those two sides together and making sure that if you're buying something for your folks you're not hindering them or adding extra steps for them to do because that just adds to the frustration.
Frustration	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	I guess I just-- for me it's just part of life. I know when the officers have to sit here they don't like it. They say, as long as just one line's ringing at a time and they only have to do one thing they're okay. But if four lines light up, and then a [PB-teer?] comes in, and somebody comes to the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								window, they just want to get up and run. And they would tell you that they'd rather deal with a barricaded gunman than sit here and deal with all this nonsense.
Frustration	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	So you take all those things into consideration where you get into some of the bigger departments and they have beautiful stations that adjust, you can stand, and that's one of the other crappy parts of this job, is you sit in crappy chairs and your back and your neck and you leave here at night and you're like, "Oh my God, I feel like a truck hit me."
Frustration	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	...but then the guys have to go back into [name], which is a completely different program and then they have to write their reports and do all that documenting, so there's like all this duplicating of work because it's so expensive to get the whole system. It's frustrating for everybody because they think, "Well, the dispatchers should do all that." But then the dispatchers are sitting in here dealing with other stuff that we might not be able to get to that.
Frustration	COMMS	S	Other Public Safety Personnel	36-45	11-20	Male	COMMS-S-001	[S3] Yeah, you've got to follow chain-of-command. Some things have to be formal, some things can be informal, but you just need to inherently know that. And so I think culture really is our biggest inhibitor to having better communications. One of the things that on the incident side right, out there, cost of technology is a significant inhibitor to-- not everybody can have a radio. Right? Even though they really need it for their job. To spend \$7,000, 8,000 on a portable radio is just, it's wrong.
Frustration	COMMS	S	Other Public Safety Personnel	36-45	11-20	Male	COMMS-S-001	[S3] It's wrong, [laughter] just to be honest. To spend \$70 million dollars on the infrastructure is just mind-boggling to think about it. But there are other technologies emerging. Software applications that you put on your phone, integrate with those. What's inhibiting from that happening is, we really wanted to have a completely independent radio communications infrastructure from the internet. We don't want to open that Pandora's box from a security perspective. And so in order to facilitate that you stuff you actually have to have networks converge. That would make it more cost advantageous. And then people don't like to carry big bulky radios anymore. They'd rather have it on their phone. Now you spend a

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								bunch of money to give all these people radios and now they're just going to use their phone. So it's cultural but it's also cost. And grant funding has been the primary stream for all that. Most if it didn't come out of budget. Once this starts to need to come out of budget because grant funding isn't available or needs to be for other things, then that becomes kind of a challenge. A tug-of-war over what gets priority.
Frustration	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	Sometimes challenging, very challenging, 'cause it's bit much when I took on a task as a supervisor and knew I would be monitoring and watching over or helping out more. But sometimes it's a bit much. If we're short, and I have nobody else, it falls on me. So I'm always available, ready and available. And it's time-consuming. A lot of time-consuming, sometimes I have to break away from okay, I have to break away from work so I can have at least some home time with my kids.
Frustration	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	Sometimes with the sheriff's office, we have to get them to understand the way it is out in the field and on the streets. It's not the same as in dispatch. So you may be on a traffic stop or responding to a call, and you can just do what you need to do, give out that information, give that person's information. But you have to take into consideration your dispatcher is 90% on the phone. If we're not on the phone, there's two of us, if we're not on the phone, we may be [inaudible] on other calls. So we need you all to monitor your radios.
Frustration	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	That's a stressor. That's a big stressor, because if you're busy, and they're on that traffic stop or they're doing something else, and it's one of the officers that, okay well [inaudible] I gave you this information, I need this information back. I understand that, but you have to take into consideration that hey, I was on another call, I was trying to help somebody else. So getting them to understand is a major stress.
Frustration	COMMS	R	Manager	36-45	11-20	Male	COMMS-R-011	Because with so many moving parts, if I get frustrated, not say frustrated, but if something, if something gets the best of you on one project, you could easily swap over to another project, work on that for a little while.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Frustration	COMMS	R	Manager	36-45	11-20	Male	COMMS-R-011	So it's a little hectic sometime on the dispatchers insomuch that the smaller municipality does not always have a sheriffs, a law enforcement officer on call, and t may have to be the [County] backing up the municipality. So it can be frustrating at times, but I have to say they hold their own, and they do their best.
Frustration	COMMS	R	Manager	36-45	11-20	Male	COMMS-R-011	...Man, you don't have too much going on right now, huh? What you mean? What, no hurricanes this year, nothing else going on, huh? And they don't realize what actually goes on behind the scenes. Yes, our normal working hours are 7:30 to 4:30, and 7:30 to 11:30 on Fridays. I'm here at 6:30 every morning and usually don't leave 'til 5:30, quarter to 6:00. Yeah, I'm salaried, but so what? There still is a lot of work that has to be done, that needs to be done behind the scenes when the phone's not ringing, the email's not coming through, to where you can have that zone, that trance if you will of trying to get something accomplished.
Frustration	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	The responsibilities are definitely to ensure that the call taker's safe or any victims are safe. And that tends to be frustrating too because you'll tell them if you're near this person, try to get away from them. And you have individuals that are like I'm not going anywhere, this is my house. And you tell them this is for your safety. You can always return to your house. You can't come back to life if this person is a danger to you.
Frustration	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	We typically call them. We don't have challenges communicate with them, but sometimes we do with other agencies 'cause they have different policies on how they work. Like I can call one agency and ask about a warrant check. They'll give it to me. But if I call another agency, they'll say send me a teletype, which is also ran through NCIC. So like you have to get off the phone and then type up, which takes, it takes a minute to type it up, 'cause you've got to make sure it looks professional. You've got to make sure, hand it off correctly. That way they know who sent it, where it came from, and who is it addressed back to. Which that's typically not a problem, but if it's a subject that the officer is potentially in danger from, like we're dealing with somebody that's like a murder suspect, we don't know, we got an agency saying oh, you've got

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								to send me a teletype. So that tends to be frustrating. And other times you have other agencies, if they're calling for a warrant, before they even handcuff the guy, even if they're in danger from this man, they want the warrants in their hands, when we're trying to express you're putting your officer in danger. It's just different ways, different agencies communicate, which this agency, we tend to be more, best way to describe, I just described it to one of my trainees. You have siblings?
Frustration	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	... Whereas the fire department sometimes you--they don't go en route fast enough or what you feel would be fast enough so you're setting a second tone off trying to figure out where they're at. And you have to remind yourself that they volunteer. They don't get paid. You know they do this out of them wanting to help their community.
Frustration	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	So. The amount of programs is... quite cumbersome sometimes because of the computers and the systems and logging in and keeping track of what's going on. That's why they range for 6 to 8 monitors on their screen and sometimes it's not enough.
Frustration	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	Yeah, because there are people who have access to our radio channels that shouldn't so yeah.
Frustration	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	A lack of listening, a lack of understanding... a need to want to be right about situations. Pigheadedness. Stubbornness.
Frustration	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	Yes. Huh. Just recently this weekend we had an accident, a lady flipped over and we were trying to check on one of our officers and because of the area he was in he couldn't hear us but he was fine but then we had to send another resource to go check on him and make sure he was fine when if the radio had worked we would have known he was fine. But that gets really, really frustrating. I know it gets frustrating for the officers, too. Because they think we're asking them something repeatedly because we're not listening but really I'm asking 'cause you sound like trash on this radio...
Frustration	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	So the relationship is really a positive relationship. Yeah, dispatchers are generally thought of as that... that entry level... position but I don't think

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								of them that way and I don't think our sheriff does.
Frustration	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	They may go from--they can take 2 calls in the last hour to taking 30 or 40 calls in an hour. And those 30 or 40 calls may have been some really significant events. And it's the adrenaline rush that we're really busy, we're not doing anything, is a big stressor. The lack of understanding of what those responders look at and see and feel and hear and smell and taste and everything in the field, we don't get to see that from the communications side so often. So I think those are probably the biggest of the stressors is the actual work that they do, not having any closure is probably one of the big ones.
Frustration	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	Yeah. It's becoming a bigger--we've had calls where, hey, this large drone is flying over the interstate and we get 30 or 40 calls on it because people are seeing this unmanned aircraft flying. Nobody's told us. It ends up being, hey, it's a survey company for the Department of Transportation who's flying the interstate to get good pictures of the interstate but no one let us know. Mosquito control. We don't have a mosquito control plane here but we do as a [County] hire [City]'s plane to come and spray certain times and then all of a sudden somebody forgot to just let the local 911 center know, now we've got a bunch of people calling that there's this low flying plane spraying stuff in our neighborhood. We probably know it's a mosquito control but nobody's told us and they're supposed to.
Frustration	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	... They may not give us all the information when transferring a call. It's not always possible to get that. So it kind of gets frustrating. But most of the time, you are going to get decent information. I have enough to work with.
Frustration	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S2] Now, at that rate, what does get frustrating is you got all these calls coming in, nobody to send them, so you get kind of a little traffic jam there and that gets stressful on everybody. But there is really no good way around it, you know, so --
Frustration	COMMS	R	Comms	46-55	31-40	Male	COMMS-	We are and I've been going to those meetings. I've been really keeping

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Personnel				R-020	up. I've met with AT&T and I beat the crap out of that when I first talked to them because they are like, hey, we are gonna be the company and I go why? Your crap sucks.
Frustration	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	And they go like oh we know, we're going to put all this money in there and I'm like why are all the 911's suing you for money if you've got all this money? You know, it's a long story, but...AT&T here locally, it's terrible. I have seen huge improvements. We did a study when we did the ALLs. Those are off of SIM cards, just like you have in your phone. So we put AT&T, Verizon and...
Frustration	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	I don't know, didn't make the media and it was a psych patient that had been released from [City]. Turned out onto the streets. None of that hit the media, but we're going to talk about stupid crap, and you know it's just and I so -- why would we not talk about what the real problem is? I'm a root cause person. I don't care what happened, let's figure out what the root cause of the problem is and let's fix it and then it fixes all this other stuff, but let's know when out there, when we fix it, we don't undo three other things.
Frustration	EMS	U	Not specified	Not specified	21-30	Male	EMS-U-001	But technically, I know there have been labor issues with if you're calling me on my cell or making me do something on my cell phone, but you're not giving me a stipend or giving me-- people get [inaudible]. It depends on the person, but some people get upset about that.
Frustration	EMS	U	Not specified	Not specified	21-30	Male	EMS-U-001	and we're doing the same things over and over and over again, so we want those to be as efficient as they can be. Sometimes the software needs to be tweaked, sometimes I hit this button and it's supposed to do X, and when it doesn't that creates more work for me and I've got to do-- and it's gets frustrating
Frustration	EMS	R	Field Responder	26-35	5 or less	Male	EMS-R-002	Yeah, they (dispatch) could call and hang up. Yeah. So yeah, absolutely. I mean, my one thing would be with dispatch, but most of the time they're awesome so.
Frustration	EMS	R	Field Responder	26-35	5 or less	Male	EMS-R-002	I think for a while we showed our MDCs because when they were updating them, I think sometimes they were having bugs. So we would

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								drop our wireless connection and it was super frustrating because you're trying to go to a call and you're responding to a call and your laptop crashes. And you're like, "Whoa!"
Frustration	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-015	But the police could be there for 15, 20 minutes, and the assault person be another state away. But while they're doing their reporting and talking to one another, they don't realize that we're sitting two to three blocks away, so it may take me to call and ask, "Hey, are the police there? Did it?" "Oh, yeah, yeah. You can come in." To find out that it was safe the whole time. So there is a delay in that. I think we've gotten better with some time, but I also don't know every officer that's in my area. I don't know their first names. I don't have their cell phone numbers. I don't know their radio identifiers. We don't have that relationship to communicate that personally, I guess.
Frustration	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-015	So it's not, it's just frustrating and then we-- I just don't listen to the call, what's going on. And it's just being, I guess, situational awareness. I'll even use the word just nosy. To just hear what firefighters are doing and the types of calls. We all try to see what other agencies are doing during their calls, from a tactical standpoint to evaluating it. Self-critique. If I was in their shoes, what would I do? So you try to listen what's going on to hear the calls, and sometimes you can't. And if they switch to another channel that we don't have in our radio bank, then you're done.
Frustration	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-015	...Technology getting in the way of if I utilize my phone and one of the applications, FireApp, to use that to get directions to a call, if the address isn't an updated address, or the mapping software, Google, or apps, or whatever browser you're using doesn't know it, it defaults to a generalized location. So I'll be honest when I say that, embarrassed as I may be, that I didn't realize it and that the app was smarter than me and took me way out of the way... Rerouted me to another location, and that I need to be smarter than the software to know that was in a complete different station's area, and that there was no reason for me to be there. So it failed me. It made me look bad, and I've learned from that.
Frustration	EMS	S	Field	26-35	11-20	Male	EMS-	So I get the basics of it's a sick person, it's a troubled breathing person,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder				S-015	but it's all very vague. So it could be trouble breathing, but the person also has been outside doing gardening work all day or playing basketball. Well, of course they're going to have trouble breathing. It's not a trouble breathing asthma attack. It's not a trouble breathing call. It's a heat-related injury. So I guess more specific type questions, or I feel like we guilt people into-- when the dispatch, guilt people into, "Are you sure you're not having chest pain?" "Well, I might be," and then they code it as a chest pain call and it's really not. It's more of a indigestion at a restaurant.
Frustration	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-015	SME: So that being said, it's not a ALS or a paramedic call. It's a BLS basic call to just go to the hospital. It didn't need to take an ALS unit out of service for-- and the way we call it is if anybody has any pain from their belly button up, it's classified as chest pain. Couple more questions should be-- Q: Can clarify. SME: Yes.
Frustration	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-015	...I wish that the GPSs were more accurate and more dependable in the sense of I knew that it wasn't going to take me to a wrong location. That it knew steps and updated along the way, so if you're familiar with the traffic app Waze-- People drive around all the time know more than I know in public service, and I'm trying to get in. So if I know that we're getting close to 3 o'clock and traffic on [Street] is going to be increased and I need to get to the trauma center, my computer should auto populate-- something to give me the best route and think for me. And it's funny that - excuse me - it doesn't do that, but yet Waze does for the consumer trying to leave work. It just updated information along the way. Just being able to get that message out...
Frustration	EMS	S	Field Responder	26-35	6-10	Male	EMS-S-016	And they may work in the building so they know their address, but they're actually going to exit the building on some other street side and if they forget to tell the dispatch center that, we will show up to the front entrance, which is where we were dispatched. But then we'll say, "Can you call back to the calling party? Where are they?" And then they say,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								"Oh, they're at the loading dock." Which means we now have to drive around. It would be much better to have that information. And they do a good job and sometimes callers are not great. So the Beltway is a good example of people don't know if they're on the inner or the outer loop.
Frustration	EMS	S	Field Responder	26-35	6-10	Male	EMS-S-016	Yeah. Exactly. "What's your birthday?" We'll ask it. Registration will ask it. And then once they get seen by the nurse in their room, the nurse will ask just to confirm the identity. So in the first 20 minutes they think we're a bunch of goons with no memory when in reality it's just separate silos.
Frustration	EMS	U	Field Responder	36-45	11-20	Male	EMS-U-017	I mean, yeah. A lot of it has to do primarily with the patient care reporting software. A lot of it's just software configuration issue stuff. A lot of times, the information I'm looking to put in there, it's not available to put in or it can't be put in the way....
Frustration	EMS	U	Field Responder	36-45	11-20	Male	EMS-U-017	...And a lot of the issues that I brought up-- I was actually one of the 5 to 10 years they were using when they were pilot testing the new tablets with the new version of the software. A lot of the issues that I reported, that I told them, "Hey, look. You need to add this in there or we need to do something about this." A lot of this they couldn't do because of the way the software is tied to NEMESIS, which is the national EMS reporting thing, and they said that NEMESIS didn't allow certain things in there to be put in the way we would like....
Frustration	EMS	U	Field Responder	36-45	11-20	Male	EMS-U-017	...But a lot of that, I think, it still seems to be just general configuration issues that could be changed, but just hasn't been done very well. And how much of that configuration can be done by the department themselves and how much requires the software vendor to go and change the programming, I'm not sure either, but.
Frustration	EMS	U	Field Responder	36-45	11-20	Male	EMS-U-017	Well, I guess, the one thing I can think off the top of my head is oftentimes, asthmatics, we are giving nebulized albuterol to. The [stuff?] that I realized albuterol is in there, but of course, any kind of breathing problem, the software requires you to document that you gave oxygen, but nebulizer is not in the oxygen administration allowance. So you can't say that gave an [inaudible] nebulizer. I always end up working around it

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								by just putting blow-by or something else that's on the list, and then in the comments, I put the nebulizer and I just put no in my narrative. Hey, unable to document proper route. See comments. Yeah. So I can work around it but it's frustrating.
Frustration	EMS	U	Field Responder	36-45	11-20	Male	EMS-U-017	Yeah. Right. You're right. Exactly. It's frustrating and especially when they're trying to get us to finish our reports and get back to the service from the hospital as quickly as possible. It's like they want us to get all this done real quick, but they don't want to provide us the tools or can have them configured so that we can do it quickly.
Frustration	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	... So and then the radios have gotten smaller and lighter throughout the time that I've been doing this. I mean, they used to be like-- you could them as a weapon if you had to [laughter]. And now they're as big as old cell phones. It's happened so slowly that-- I can't really think-- I hated the chirp-chirp thing because I'd like to know what other people are doing, and where they are, and that kind of thing. That was the biggest reason why I hated it. And I also thought it was just-- they only did it for financial reasons. I mean, it was cheap, so that's why they did it.
Frustration	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	...it's all about billing. It's because Medicare, specifically, likes to deny. They look for ways to deny billing. So they have all these codes, and all these different patient types, and all these different things that they want everybody to fit into, and it doesn't work that way. People aren't numbers. So there's a lot more drop boxing stuff into stuff in order to make it successfully billable. And less focus on just making it something that I can do that's accurate, legal, but also concise. And I can get it done in 15 minutes instead of 25. It makes a big difference...
Frustration	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	...So we have one ambulance that has this newer technology, and everybody hates it. And so it's set up differently. The chair you sit in is different. The place where equipment is is different. The idea is to be safe, and I appreciate that. But moving equipment around messes with your mind memory. So you're like, "Wait, where is the--"
Frustration	EMS	R	Supervising	46-55	11-20	Male	EMS-	Especially when you're trying to work on a sick patient, or trying to direct

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Field Responder				R-007	your partner who might be new or hasn't worked on the ambulance very much. You're trying to tell them where something is, and it's not in there. So that's stupid...
Frustration	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	...they think that they've tried to set this up so you never have to stand up. And so basically, they've tried to design it with you can be harnessed in like with a sort of four-point restraint seatbelt, sitting on one chair that's like this big, on a patient where you're sitting right about up their waist. And then they've tried to set up equipment around you so you don't have to stand up and reach for it. Even though there's 40 cabinets in the ambulance, they've tried to think, "Well, this is just things that you use 90% of the time, so we're going to try to shove them all right here next to you." ...
Frustration	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	...when you're running 120,000 calls as a system a year, you need to kind of-- spending an extra 10 minutes on every call makes it that you're going to need more ambulances, and that costs you millions of dollars a year. And the more ambulances you have, the less calls you're on. That makes your paramedics not as good as the ones that are on more calls. And so it's not like-- they're trying to solve a problem, but I don't think they're doing it in the right way. And some company came, a couple years ago here, they were all excited about this thing that they had with, "Let me show you how we can do this," and it was the beginning of this. I saw it coming, and I was all like, "Oh, no. Here we go."
Frustration	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	...we used to have a technology here that would, you had fog and you would beep it in when you would drive, and it would keep track of your driving, your speed, around the curve thing. I'm sure it had some kind of driver scope inside the ambulance to tell you if you're taking the turn, all that stuff. Everybody hated it and the day it got uploaded every month. And they didn't really use it punitively. But it made noise. So it clicked when you come around a turn. And if you take the turn too fast at all, it would alarm. It was so annoying. And even if you were hitting this at a normal speed, it was telling you you were taking it too fast. Let alone when you were actually going fast, then it would just alarm the whole

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								time. So everybody hated it. We kind of mutinied. And when we merged, we got rid of it... The goal is safety, but it doesn't really seem to make it safer.
Frustration	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	You need stronger ambulances. You need ambulances that don't explode. Not explode, but break apart when you crash. I mean, it's like driving around in a camper. So that would be more helpful than affixing me to my seat better and making me do my-- not be able to do my job as well.
Frustration	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	...I just think there's ways to-- some people think that the lights and sirens are there to save people's lives, and it really-- there's 1% of the calls, 2% of the calls, where it can make a difference. So that's where maybe people could chill a little bit and use research to prove something.
Frustration	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	I mean, we have to, and there's technologies out there that I'd love to use right now but I refuse to implement because we don't have the-- I don't have the bandwidth, the personal bandwidth, to manage it. For instance, driver monitoring software and hardware is a big deal on the EMS industry. How fast are people going? How are they braking? How are they cornering? Are they having near misses? All those kinds of things. In fact, it's being mandated in [State]. If you get grant money for an ambulance, you have to have some kind of driver monitoring system in it. Well, all those things are connected technologies. They all have to be downloaded. They all have to be analyzed. They all have to-- and that's just one technology. That's not the radio system. That's not our patient care reporting system. That's not our scheduling system. It's a whole nother system that somebody has to deal with.
Frustration	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	No, it's just through one of our vendors who we get our software from, and it's actually online, but it's a-- I don't know if you're familiar with [Name]. It's a database and analysis program, but there's tons of proprietary stuff out that's not Microsoft Office [laughter]. And each one has to be learned, and you have to learn all of the little intricacies of them. And lots of times, that's not a big user base because we're not

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								that big an industry, and so it's very sort of-- what do I want to say? It's very specific. You have to learn very specific things to run a certain vendor's safe software platform.
Frustration	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	[RE: tech support] Well there's 1-800-HELP-ME [laughter]. And a lot of the training we do is find the help files and learn them. It's on you. My experience in most software companies, if it's a big install, they'll come out and they might spend a half a day or a day with you and they're like, "Here you go, good luck [laughter] it's all yours. And then as you use it, you go, "Okay, so how does this work, how does that work?" And this is not my full-time job, I've got things to do [laughter]."
Frustration	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	...So it becomes a-- technology becomes a huge time suck and I mean, I just keep saying over and over the promise of technology is awesome but that actual performance is so much less most of the time... I mean, I waste as much time as my technology saves me every day, I think... I mean, and it's-- there are so many connections. Is it your computer, is it the connection, is it their website? Where's the breakdown? ... It's often impossible to tell. Okay, so I rebooted my computer. What do I do [laughter]? ... It gets to be very frustrating... Especially when you can't, like I said, pick up the phone and say, "Hey, get up here. Something's not working."
Frustration	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	[RE: electronic reporting] ...it's a hit or miss slow process because there's no one person who is the expert on that cause we got so many different technologies working at once. So it's a big source of frustration for the staff cause they can't go back to bed at 4:00 in the morning unless the report's complete because the computer won't let them close that report until all the information's entered. And if there's a software glitch or it can't connect to the server or something-- they can't close their report and they're just... They just want to toss that thing right out the window.
Frustration	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	I find often, technology drives us in directions that we aren't necessarily ready to go yet as a small organization.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Frustration	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	...You learn how to use something, you get used to using it, that's obsolete, next generation, or that company just went out of business. I just got an email today saying that our scheduling program, which is very complex and I schedule 65 employees, they're discontinuing it... Now I have to go research all kinds of new schedule programs, what's going to work best for us, how it connects with payroll, how is-- you see what I mean? ... So one little change suddenly creates enormous amount of work... Everybody else in the agency has to now get used to doing this right. So it has payroll implications, over time implications, it's just-- in EMS, they say there's three things you don't fool with, the three Ss: schedule, salary and spouse [laughter]. You don't mess with those three things.
Frustration	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	So messing with people's schedules, even if it's just to go to a different technology platform, is stressful...
Frustration	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	[RE: troubleshooting] And a lot of times you give up. I'm like, "I don't have the time to waste on this anymore." I'm just going to set it aside and maybe tomorrow it'll feel better [laughter]. That's the frustration of technology to me. Because there are so many questions and there's not always an answer.
Frustration	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	...Like I say, the promise of technology is always overshadowed by its faults or its unintended consequences or whatever. I mean, I think the whole AI thing, these things are going to kill us off in the long term. I'm serious. They're going to get so smart and then pretty much we're going to have hell. They're going to lock you out of your house. They're going to [laughter] make your plane crash, whatever. It's spooky.
Frustration	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	I don't care if you're government, industry, whatever. If it can be hacked, it will. It's just a matter of time. So I use online banking because it's so convenient, but I understand the risk. I mean, how many times have you replaced your credit cards because somebody hacked it? I mean, who hasn't? What's the cost of that? ...

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Frustration	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	...I mean, certainly, you access programs that say, "Okay, you have to change your password. It's the end of the month" or something. It's like, "Great. How am I going to remember this one?" Write it on my hand or use something stupid that everybody can figure out. I mean, I use a password manager, and we encourage our employees to, and we help them learn how they work, and stuff like that. They're not foolproof either. And it's just like, if you make it hard enough, people won't use it. And I'm dealing with mostly college-educated people who are smart enough to be paramedics. But even they reach their level of frustration. I mean, they're millennials. They'll go so far and [laughter] it's, "Screw it. I'm not using this."
Frustration	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	Even what we have now, so our little Toughbooks, they have two jobs. You write your patient report, okay, that has to connect to our internal server to download that information so the billing people can get it. And then it's their mobile data terminal as well. So it has to connect to dispatch over the cell network and get that information. It just has such a hard time some days [laughter].
Frustration	EMS	R	Other Public Safety Personnel	56-65	31-40	Male	EMS-R-008	[RE: MDTs] It's just like, "This shouldn't be this hard! How can it be?" It's like, "Oh, well, the cell is fighting with the network connection." Reports go missing and the staff gets yelled at, and they're like, "Where is this report?" ... I wrote it. It wouldn't download. It was 3:00 in the morning. I got frustrated. I just shut it down. Or they will type all kinds of information in their report and they'll hit download and it'll just, poof... Yeah, not often. But how many times does it take to do that before you park that laptop underneath the rear wheels of an ambulance and say, "I don't know what happened to it." I mean, technology can create terrorists, and by that, I mean internal terrorists. If you frustrate people enough, they'll find a way not to use your system.
Frustration	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-005	...how much time does it take to get the ladder down because we have a hydraulic lift for our ladder rack. It actually takes 10 seconds for it to get down to where we can take it off. So if you got a family that's yelling at you, "Hurry up! Hurry up!" and you're just holding the button, waiting, it's

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								kind of nerve-racking...
Frustration	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-005	...so my wish list, by far, is an iPad for those rigs. An iPad mini would be perfect. Put it in an OtterBox case or whatever and it's going to be fine. I mean, the doctor's office that I got to go to, they have an iPad just to tell me how my visit was. That's how cheap they are. It's ridiculous that we don't have something like that that is more reliable, doesn't need a strong IT group to manage and function. As you probably know, Apples are really easy to use. We don't use it for a lot anyways and for what we use it for, I think we could do our inspections right on that thing. We could do our EMS call all on that. Because as it is, we've got the CF-19 or whatever it is. That's our MDC up front. And then we've got another \$2,000 computer in the back that we use for EMS calls to do logging, to do one thing. A \$2,000 computer to do one thing. Just when we could have a \$300 tablet and do the exact same. And we don't store anything on the hard drive. Everything gets sent. You don't even need a big one as far as memory goes. So that's my wish list, for sure. And we would only need one, hypothetically, mounted where the officer goes and the officer just hands it to the firefighter behind him or the engineer, actually. Our engineer is the one who does the documenting on our EMS calls because we're fortunate with staffing that it would be so easy, for sure.
Frustration	EMS	S	Field Responder	46-55	Not specified	Male	EMS-S-006	...Because, obviously, the system is in place--which is a good thing, and there's policies and procedures in place, but a lot of times, I think when it's retroactive to the effect of if one of use needs help, we need it now. And it looks good on paper to have these policies in place, but I don't care. I just want the help I want and need right now. So I think there's always a time delay in that... So it's not that it's disheartening. It's just frustrating. I think it's frustrating for the end user when you need all that stuff now and it's, I think, hampered a little bit by policy and procedure, which needs to be in place. So it's a Catch 22.
Frustration	EMS	S	Field Responder	46-55	Not specified	Male	EMS-S-006	...we are so enthralled with technology, and we use it so much to become more efficient that when plan A isn't working, we are so deficient in our job responsibilities because everything was tied into plan

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								A. So if plan A is down, we get so backed up with reporting or trying to get back in service or whatever, which is frustrating to the end user. And obviously, the bosses do a good job of trying to understand that, but their company line is still just figure it out and move on. But when plan A fails and plan B is so negligent in trying to bridge that gap, I think it's tough and frustrating. I think that's where people get frustrated the most.
Frustration	EMS	U	Field Responder	46-55	21-30	Male	EMS-U-003	...Box, the one that really irks people is they made it so that you can't download anything to a local mobile device. So you have to be in continuous contact with the internet in order for it to function. And, of course, when you need stuff like that the most, when you're trying to move maps and stuff around, is the big incident at the football game and the cell sites are hopelessly oversaturated and you lose connectivity, and all of a sudden you can't rely on it anymore because you couldn't preload that information onto your device. That's the really big one that gets us there.
Frustration	EMS	U	Field Responder	26-35	Not specified	Not specified	EMS-U-004	[S3] And some of the things that we field-tested a few years ago with the two channels were a near disaster. They were incredibly trying and everyone, including dispatch and command staff, were immensely frustrated.
Frustration	EMS	U	Field Responder	26-35	Not specified	Not specified	EMS-U-004	[S2] And not my phone. I hate that I have to use my personal phone at work [laughter].
Frustration	EMS	U	Supervising Field Responder	46-55	21-30	Male	EMS-U-010	I guess technology is constantly getting upgraded. As a matter of fact, we're in the process of upgrading our mobile computers, our patient care computers to newer versions, so they have to relearn it. Even if you've known the system for a while, even though we've kept the same company, it's still a new program. You're going to have to relearn the whole thing. So that may frustrate some people.
Frustration	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	SME: ...if the system's down, the alarm office will tell us, "We had a system failure or system's down," then it has to be done by hand. So that's when I would do it manually on the Toughbook.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								Q: Creates a frustrating situation would you say? SME: When I have to do it by hand, it does
Frustration	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	...The biggest thing here is that they still don't pull to the right. They don't. They don't pull to the right. I'd say about seven or eight years ago, we did a campaign here. I think CFD did a campaign, pull it to the right. That was great. We had stickers. We had billboards. And I noticed that worked out great. And we haven't done that in a while. So lately, I've noticed that the community has failed on that because we could be stuck on traffic and everyone's pulling to the left. And we got to zigzag especially in downtown.
Frustration	EMS	U	Other Public Safety Personnel	46-55	21-30	Female	EMS-U-009	[RE: radios] Well, I think for me I'd like to just keep it simple. I'd like to have a device that I can communicate without having to turn-- go to so many frequencies, or try and push a button on this front face of the radio in the dark. And I'm trying to change zones and that to me, I don't care for that at all.
Frustration	EMS	U	Other Public Safety Personnel	46-55	21-30	Female	EMS-U-009	[RE: cell phones and social media] This is a very dangerous thing. It's extremely dangerous for anybody under the age of 18 to have one of these. And if they do have one of these, it should not have access to the Internet. It should be locked. It should be "Call Mom/Dad" "Text Mom and Dad." Do you know what I mean? Because these poor kids these days are-- their lives are changed from what they do with these phones. You try and tell the kids-- you take a picture, you send it, it's out there. I mean, it's scary is what it is.
Frustration	EMS	U	Other Public Safety Personnel	46-55	21-30	Female	EMS-U-009	It's advanced far beyond us. Especially us older people where you see sometimes jokes on the Internet like, "Thank God I didn't have cell phones when I was younger." All the stupid stuff that we used to do as kids. But I find that to be very sad. And millennials again. I have a class of 42 paramedics in here right now. They're millennials. I cannot tell you how hard it is to educate them. Because they come in here, they've been on some sort of iPad or gaming device for their later part of their life, they're in their 20s. So for the last 10 years, they've been gaming, they've been on the computer, they're on their phone, they're not disciplined.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								When you get in their face to discipline them, they shrivel up. They're freaking out because they don't do that. I mean, there's no-- my last candidate class, I asked a girl, I said, "Have you ever been yelled at?" She said, "Never." Never in her whole life.
Frustration	EMS	R	Field Responder	18-25	5 or less	Male	EMS-R-018	It's all plea to the public for money you know so it's frustrating but you know every day when you go out there you need to keep that in mind. These people are the ones that are paying for you so when you go out there you know you can't say oh you're an idiot you called 911 for this? You have to like I say solve the problem, fix it that's what they're calling you for so you know that helps you in the long run. They think back on that and say oh man, I think I'm going to vote yes for this cause because it helps the ambulance.
Frustration	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	Rewarding, exciting, stressful, frustrating that's about it. That's all I got at the moment.
Frustration	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	It is. When you can't do when you're limited to what you can do or when you've exhausted everything that you know and given every treatment that there is and it's not enough that can be frustrating. It can be stressful at times. You deal with not only your patient but a lot of times family members especially if it's a bad call.
Frustration	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	We're pretty far behind compared to other counties in the state and elsewhere I'm sure. We're one of the few I think that even do paper reports. We did have a system they finally got one last year and it was horrible, didn't work out so they've done away with that so we're waiting now to see if the county picks up something different.
Frustration	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	Yes especially when we had we had like an iPad system to do our reports and they were absolutely horrible. You know and the bad part is is that our county tried to get us a good system and unfortunately we can't afford what some of the other counties can afford so it is a price thing and it ended up being more of a headache than anything. It took 2 to 3 times as long to do your report which when you have a day where you only have 2 calls it's not that big of a deal because you have plenty

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								of down time to get that report done but when you're running back to back calls and you're on a second call and you haven't even gotten to finish your first report it's very frustrating and they shut down a lot especially when these things depend on internet and we are so you get out here somewhere and then the information the things that you need won't load. So then you just kind of got to wait until you head toward [City] and pick something up and go from there.
Frustration	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	Yes ma'am. I think that when they're bringing in technology I think they and maybe they look at this but it seems like they don't to me because I'm on the outside. I'm just the person that uses it. I don't know the ends and outs but it seems as though when you're in a rural setting that those things should be considered when they're choosing yes. There may be a cheaper way to go and it maybe budget friendly to our county but when we're one of the more rural counties and we have all of these areas that we can't even get radio reception, we can't get cell phone reception then you need to recognize that some of these things are not going to work for us.
Frustration	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	You get to see a lot of those people you get to know them by first name and a lot of the olks are related and stuff like that but it's also difficult because they all listen and then so if Aunt Suzy down the street has had a cardiac arrest they hear the address on the radio and then you've got ten people at the scene that you're trying to take care of your patient then you've got family members and they actually had one this morning and they had all of this family that was rushing them. They were only on the scene for 7 minutes which is extremely good and so that's frustrating. I think I kind of went off on a tangent somewhere but---
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	"Hey, we're on scene and we're standing by." What's more critical? Like, "Shut your pie hole," overhear, and so we have those conversations about, "Don't talk. You just can walk up and shake--"
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	The bad part is that most emergent things happen in that first 10 minutes and you may not have that help quite yet to hear. So [Name] does rear its head. So technology with radios, technology with calling on

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								the phone, taking pictures, using thermal imaging cameras. Computers help us in staffing and doing reports and just, the more administrative stuff. Right now I find, kind of, a roadblock on the network part of it. So we're linked into a network, but as soon as I leave my desk, now I've lost my ability to operate administratively as a battalion chief.
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	I know where it's at if I could-- and we have printers in the back of our car to help us, although I will tell you it's anything that's meant for a sterile environment. Computers are ready, printers are glitchy, mine probably works maybe 40% of the time, I'm saying. So I don't really-- I can still--
Frustration	FF	U	Field Responder	46-55	21-30	Male	FF-U-002	Sure. There's been times where, in a way-- I've been on incident scenes where the technology has failed. And radio systems or channels have failed, and completely prevented our ability to communicate with each other. Other than line of-- right? I mean right now I can communicate with guys in the next room, just by not moving, by pushing this button. If that fails, how do I communicate with the guys? And I can communicate with you, because you're right here, but I can't communicate with them. And so it's a communication failure, and it's technology failure, that complicates-- when we rely so heavily in our job for this to work. When it fails - which is rare - how do I communicate?
Frustration	FF	U	Field Responder	36-45	11-20	Male	FF-U-003	But when people travel to our station, they get-- we tell them the game plan that we're going to have and how they fit into that game plan. And we go over what job they are to do at this type of call, and at this type of call, and at this type of call. And if we're going to each type of call that we haven't talked about, we talk about it on the way there and then we're ready to work. Whereas opposed if there's no game plan, then there's freelancing. And there's guy's just doing something over here and nothing's really getting done. 28:16 - Know your job. And like I was saying, if I was an electrician and you had to repeat to me every day what I was supposed to do, you're going to fire me. And we let guys be complacent, and we let guys as a-- I teach around the country - and I'm not talking about [City], I'm talking about as a whole - we let guys collect

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								a paycheck sometimes and that's not okay. And I think that that complacency and the hope is is that there's going to be enough good crews where we can pick up the slack and we'll still put the fire out, we'll still make the rescue, we'll still do whatever. But there's no pressure put on people because they're kinder, gentler age group now to where we don't put pressure on people to do their job well.
Frustration	FF	U	Field Responder	26-35	11-20	Male	FF-U-004	The old guys, I've heard them complain about computers and stuff. The young guys are obviously much more comfortable but on top of that, they haven't ever had to learn how to do it without it, so now that even makes it worse because now they're really dependent on that technology.
Frustration	FF	U	Field Responder	26-35	11-20	Male	FF-U-004	I think, the luxury of knowing now is, so being on that other side not too long ago, there was sometimes a lot of frustration with the dispatch center because you're like, "Why didn't ya'll tell us this or tell us that?" Now, I see why. It's not that they're withholding information. A lot of times, I've seen and heard how the 911 call goes and I know the dispatchers are trying to get information from the caller and they're giving you everything they've got but sometimes, it's just I can't get anything more. 20:47 - And then you have-- it seems like we're always kind of tweaking and changing things a lot and that gets a lot of people frustrated because they don't remember, "How am I supposed to do this now?" So sometimes if we change things too much, it gets some feathers ruffled.
Frustration	FF	U	Field Responder	26-35	11-20	Male	FF-U-004	But then people complain when they feel like, "Well, why did we go? We weren't closer. That person was closer." It's like, "The computer picked you because it thought you were closer [laughter]." Or when it breaks and it that-- because we do have-- people lose their, we call AVL, automatic vehicle locator, that sometimes it loses the signal because the modem or whatever in the truck broke. People will complain because they're not being tracked or they were not anywhere near that call because the last place the computer saw them was here, so--
Frustration	FF	U	Field	36-45	11-20	Male	FF-U-005	They say eight words when they could say two [laughter]. Or they say

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					eight sentences when they could say two sentences.
Frustration	FF	U	Field Responder	36-45	11-20	Male	FF-U-005	There's many times, on these high-rise alarms, many times where I'm trying to key up and it's not because someone else is talking about their hydrant supply or they're talking about building occupants. And then command's getting frustrated with me because I haven't answered back. And rightly so because when command is outside and didn't know, trying to talk and I'm not answering, command's thinking, "What's going on in there?" So, it's very overwhelming in the first 10 to 15 minutes. I don't know what can be done to remedy that other than maybe reducing some of the little check boxes everybody is supposed to say.
Frustration	FF	U	Field Responder	26-35	6-10	Male	FF-U-006	I mean, this might be a personal thing for me but just the emails that we keep getting. I mean, even personal life. If I want to get emails from somebody, then great. But when they just keep sending them it's kind of similar. I know that a lot of information, they need to get out in the department but half the time it's, "Okay. It doesn't pertain to me. It doesn't pertain to me." And each shift I come in there's usually anywhere from 8 to 10 emails, and half of them aren't pertinent for me. So it's kind of like, "All right. Well, skip through those. Okay. This one I need to read," and skip through a couple more. But I wouldn't say necessarily I'm overwhelmed with it, just I'd rather not sit there and have to read through all of them [laughter].
Frustration	FF	U	Field Responder	36-45	11-20	Male	FF-U-007	Sure. Yeah, I think more frequently it's just too much radio traffic. And that's not really a technology issue either, just radio discipline. But yeah, quite often that happens and you have to wait to get your message out.
Frustration	FF	R	Supervising Field Responder	46-55	21-30	Male	FF-R-008	Now, as it regards to interoperability, not to go down a rabbit hole, but a lot of people like this word, interoperability, but it's really-- yes, we can operate with them because we're under the same group. We can go to [County] or [County] because they're part of the same network as well, we have to switch over. But as far as interoperability, I think most of the public looks at that as if, "We're going to talk to the police, and we're going to talk to EMS."

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Frustration	FF	R	Supervising Field Responder	46-55	21-30	Male	FF-R-008	Probably, from a technology standpoint, not strictly for communications, the use of drones in those type of incidents would be very, very helpful. It aggravates me in that my son could go out and use a drone, but I can't because we're part of an agency, so now we fall under the commercial guidelines. But I can take a million dollar aerial apparatus and stick in the air, or I could go and do \$1,000 drone and get that situational awareness. And then the ability to transfer that information to other people would be a key piece.
Frustration	FF	R	Supervising Field Responder	46-55	21-30	Male	FF-R-008	And we certainly have the ability to do that, it's a question of imagination, one. And then the limiting factor in communications often times is that you go and invest in this system and it has boundaries. And then to change that or to add something into it is usually not compatible, so you end up with a situation of, "You do this with this system and you do that with this system," but they're not integrated..... [32:21] So our CAD system is not integrated with our reporting system. So that information, they certainly are there--
Frustration	FF	S	Field Responder	Not specified	31-40	Male	FF-S-040	...So if you are the incident commander and communications are just becoming a massive headache for you, that person, that group that we send to you, can become your com unit.
Frustration	FF	S	Field Responder	Not specified	31-40	Male	FF-S-040	...They get frustrated that we can do all this stuff but you're going to have to change channels and change zones, and we needed to come up with nomenclature and all that.
Frustration	FF	U	Field Responder	26-35	11-20	Male	FF-U-042	Yeah, I mean, you really can't even filter the runs because by the time you get on the phone up to them, they've already dispatched it. So it's almost an hour of just pointlessness but--
Frustration	FF	U	Field Responder	26-35	11-20	Male	FF-U-042	To be honest, nobody wants to be in this position. I don't want to be in this position. We look at it as a punishment, almost. So they know it too. The dispatchers know we don't want to be there. They don't want us there. So there's a lot of-- there is some tension there.
Frustration	FF	U	Field Responder	26-35	11-20	Male	FF-U-042	So all I can do is go over to a watch commander who even isn't qualified to be a dispatcher on the fire side because all the watch commanders

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								came from the police side. They are not even qualified to help the fire side. At our communication center the fire side is like the-- the mentality amongst the police, and fire dispatchers, and their leadership is that the fire is bullshit
Frustration	FF	U	Field Responder	26-35	11-20	Male	FF-U-042	--there's a lot of-- we're kind of the-- even within the Office of Unified Communications, the fire side is kind of the redheaded stepchild
Frustration	FF	U	Field Responder	26-35	11-20	Male	FF-U-042	They call you an officer but you supervise no one. That's why we're Sergeants. We're the lowest level officer because they're not going to pay you for a higher expense officer because we still don't supervise anybody.
Frustration	FF	U	Field Responder	26-35	11-20	Male	FF-U-042	And then we weren't bogged down by running all the, excuse the expression, bullshit.
Frustration	FF	U	Field Responder	26-35	11-20	Male	FF-U-042	The bullshit EMS calls where you're just playing taxi cab. So I really enjoyed it. I hope to get back there.
Frustration	FF	U	Field Responder	26-35	11-20	Male	FF-U-042	--actually get more information because most of them will just put it just like an unknown. And then they'll send an ambulance whereas it could be a shooting, it could be a fire, it could be anything. So yeah, I deal with-- I guess, in the immediate interaction with other agencies, it comes from essentially that position.
Frustration	FF	U	Field Responder	26-35	11-20	Male	FF-U-042	--some of us carry it, some people don't. So there's no mandatory you have to carry it. So some guys just out of protest just leave it plugged in and don't carry it.
Frustration	FF	U	Field Responder	26-35	11-20	Male	FF-U-042	Well, if they can't fix it with that then they'll just keep telling you, "Well, no you're doing it wrong. You need to do it this way", "No, it's fixed." No, it's not. So we just get to the point where us, as a department, or even us as firemen, we just stop asking. And we'll just let it stay broken and we'll never actually get it fixed because--
Frustration	FF	U	Field Responder	26-35	11-20	Male	FF-U-042	Yup, and you're just wasting your time going back there so they can replug a cord back into a broken docking station that's not going to dock a tablet and shake it to death.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Frustration	FF	U	Field Responder	26-35	11-20	Male	FF-U-042	Which is why they throw all the extra stuff at us because it's redundancy. Well, let's focus on making what we have work instead of adding new stuff that half-ass works.
Frustration	FF	U	Field Responder	26-35	11-20	Male	FF-U-043	Yeah. So even just things like getting computers fixed is a process. You know?
Frustration	FF	U	Field Responder	26-35	11-20	Male	FF-U-043	--put in a ticket, then somebody's going to call you back. And a lot of our stuff, we'll call; we'll put in a ticket. Specifically, I always give them my cell phone number because, especially when you're in operations-- I'm at the firehouse today. The guy's not going to answer the ticket till tomorrow. So I'm off shift. So now, what ends up happening is they usually call the firehouse. Even though they ask you what's your best contact number, and you say, "Hey, it's my cell phone number," they call the firehouse.
Frustration	FF	U	Field Responder	26-35	11-20	Male	FF-U-043	They're like, "Hey man, how'd you get that fixed?" I said, "Well, I called the help desk and I went up to the shop to go get it fixed." They're like, "Man, that's been broken for a year." Just go do it.
Frustration	FF	U	Field Responder	26-35	11-20	Male	FF-U-043	I don't like it because somebody that is not in my job is managing my stuff and may be responsible to me, may not, depending upon my level of authority.
Frustration	FF	U	Field Responder	26-35	11-20	Male	FF-U-043	And that's a huge frustration for the guys, because you have this technology that at one point lasted you 10 hours; now it's lasting you 8 hours. Well, now the batteries are two years old, so that 10-hour battery is really like a 4-hour battery, 6-hour battery maybe. And they're like, "These batteries are horrible." They don't last at all. So they're changing them three times during the day. And they don't understand, well, A, once it gets to about 70% of its capacity, we should probably be replacing them out of operations.
Frustration	FF	U	Field Responder	26-35	11-20	Male	FF-U-043	Being in the fire service, it's about running fires, and kicking doors down, and stuff [laughter]. I'm a geek. I like the radio stuff, right? So it bugs me more.
Frustration	FF	U	Field	26-35	11-20	Male	FF-U-043	I mean, just so many little things that create annoyances

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					
Frustration	FF	U	Field Responder	26-35	11-20	Male	FF-U-043	When they guy's radio would just start chirping, I could grab the one battery that was good, throw it at him, take his battery, stick it back in there, and use it by the time somebody else is chirping. I got a full, you know. So yeah.
Frustration	FF	U	Field Responder	26-35	11-20	Male	FF-U-043	...So it's finding out from them, and nobody can just give me a flat-out answer
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	..I don't think we're breaking the barriers on anything. I tend to be more push it until we find the edges. So I'm usually disappointed with what we have.
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	And our dispatch program has a map. And then there's a separate icon and Internet site that has our hydrant apps and GIS. And then I have to go to a third website to get the federal railroad map of the railroad system. And then I have a separate app for metro. And I'm like, "Maybe I watch too many movies. I want it all on one [laughter]." I want one giant thing with lots of different layers that I can turn off and on to get the data I need. That's my expectation as an end user and they're not there.
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	Yeah, so we used that. I often get frustrated by lack of technology we had. We once had a building collapse. The street grade was here, and it was a big basement that was dug out and there was-- dirt had collapsed and there was this guy stuck under. He was dead.
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	Well, yeah, but it's easy to say we can't. I think I reject that [crosstalk]. We can, but we just have to do certain things. And I don't think there's lot of [inaudible] to do it, which is frustrating because a lot of our people-- well, we don't do that.
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	...So I'm like, "Why don't you guys buy me a Surface Pro?" And they're like, "Well, it doesn't have Internet." I'm like you're paying for unlimited data.
Frustration	FF	U	Supervising Field	46-55	21-30	Male	FF-U-044	Yeah, certain documentation agency-wide is horrible. So these tactical worksheets [crosstalk]-- well, pick a subject and our documentation will

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					suck. I guarantee you. So on tactical worksheets, we don't save them. They just go away.
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	He claims that we're going to be in court one day and they're going to ask him if they recognize his worksheet, he's going to say no and anyway, it was stupid. Yeah, like that, I'll do that. I'll take notes over here and record and I like it a lot.
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	Well, I know what I want. I said I'll push the envelope of what I want and usually get frustrated. But--
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	That [inaudible] [where I am?]. We have a guy in charge of IT and he never comes out to ask the end users what we want or need. Or if he does, it's not in front of me. [inaudible] [stay out?]. Maybe he goes to other people. But--
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	I've been told that-- I think the radio bandwidth is always dedicated and gives a better product, more consistent data, where ours-- sometimes the whole thing just dies and you have to reboot and just-- it's frustrating.
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	And even just trying to ask for help on that is-- I said, "Can I call help desk from that?" They called help desk and they created a ticket number. So then I called our head of IT and I'm like, "Hey, I'm clicking on this and nothing's happening.
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	Thanks. And in the meantime, I didn't know where any of the hydrants were, or you may because you're familiar with the area. But that seems pretty important to the fire services where the water sources are.
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	The staffing office. It's ridiculous. So we have one guy who's supposed to staff the entire fire department. And we use Kronos TeleStaff. I just don't think it's up to the job.
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	And they're usually the ones with all the hours. And everybody else, shut up [laughter]. You didn't want to work. I don't know what you tell you.
Frustration	FF	U	Supervising	46-55	21-30	Male	FF-U-044	..So then the overtime hounds will complain that the guy who never

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Field Responder					works signed up and he got it, but I'm always-- it's--
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	Yeah. And it's all over people crying about overtime. We're spending all this money slowing down the operation because we cave into our employees' complaints.
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	So I have to use my phone to try to read the email with my glasses. I can't read my phone without glasses anymore. I'm really mad about that.
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	-- I'm sorry, Outlook '13, which, come to find out, the fire department doesn't even have the license to, so it doesn't work. I have Outlook 2010, which works and is still supported. It's like, "Can you guys get your crap together?" Give me the tools; have them work. And it's--
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	All they know is what we've always done. They have their blinders on. And this is the way we do things. Which I guess is counter-- because I said I want to go back to my guys with pencils, but--
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	Up there, also a lot of data to try to manage. Until you could manage the data, it's just data. It's not real useful information. I found it very frustrating up there to manage that. I was asking for a-- what did I ask for up there?... I'd know that it was you. I'd scan your ID and that technology's available right now, today. And yet, our accident investigation is a 12-page-- pages of paper, that I don't think it's ever been to any kind of-- we're just collecting paper. And unless we can analyze this data and find out trends and see-- maybe Tuesdays after 2:00 are bad for us. We don't know what the data is going to tell us until we analyze it. And we don't analyze it.
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-044	So I think the person who implemented that program never talked to the end user of what they actually wanted, or expected, or could use.
Frustration	FF	U	Other Public Safety	26-35	11-20	Male	FF-U-045	But yeah, that every once in a while, you're like, "I really want to say something right now and I keep honking out and--" yeah. So that does get quite frustrating.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Personnel					
Frustration	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	It's very clunky. So we do the pre-plan drawing in PowerPoint. We then do the data entry into the fire marshal software. Then the fire marshal software spits out a PDF of the information that we have. We take the pre-plan document and cut and paste the PDF into it from the fire marshal software. We then export that into a PDF. And then the PDF of the combined two documents get sent to TriLink, and that gets put into the CAD as a viewable PDF. But not queryable data, because the queryable data lives inside of the fire marshall software. So you can't just say, "Show me where the Knox-Box is."
Frustration	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	...there's 50 vendors. And there isn't one vendor that's done everything very well. And even at that, the vendors, the 50, or 100, or whatever, they've really focused on one area. And they try to do the other two or three things, but they never do them well. And so we've created work-around after work-around to try to get everything to work, but it doesn't work well. It creates a ton of work on our side to be able to make all of this work.
Frustration	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	...another item of contention right now, especially in our fire department, is gear. So right now, all of our bunker gear is made by Honeywell. And so Honeywell has a program that tracks model number, serial number, all of those things. And so all of our bunker gear is inventoried in a particular program that our fire department bought. But then, all of the repairs, warranties, and stuff like that are tracked in another piece of software that's accessible online through Honeywell. And we use a third-party vendor to do our repairs. So when they do the repairs, they have to certify the repairs, and they enter them into Honeywell so that they can track them. But when we do in-house cleanings or things like that, we don't have access to that system. So then we track it through our inventory software, Wasp. And then, at the end of the day, there's accreditation. So accreditation says that you have to have programs to track your inventory to certify repairs. But it's two pieces of software that don't talk that have, each, about half of the information that you need to

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								compile together to make one.
Frustration	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	...when you talk about technology in the fire service and our rapid adaptation to it, we've never found anything to bring everything together. So there's inventory of equipment, and tracking the equipment from birth to death. And then the costs of repair, and when is it time to replace? And then inspection, and service tests to show that you've inspected it, and how it's lived...
Frustration	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	[RE: lifeline ropes] SME S3: ...we have an inventory software that we can track when we bought it, and we can track when we throw it away. But the only way to track all the stuff in the middle is a piece of paper. SME S2: So once that form fills out, you have no idea every time it was used before. SME S3: And then there becomes the problem of you have to archive it. So do you archive it in a book? Do you archive it as a digital copy? Where do you keep it? ...And then when the accreditation shows up, or when OSHA shows up because there's a problem - somebody fell off a rope or something - now you have to dig all this stuff out.
Frustration	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	...in terms of certifications. So based on what my certifications are, may be different than [Name] certifications. So when do those expire? How many CE hours do you have to [inaudible] that certification? And then you have injuries. You can throw injuries on top of that. So here's this individual. Here's all the injuries to date. Here's what happened. Here's the surgeries. There's so many different aspects of it that's not tracked. A lot of it's paper-tracked, like [Name] said, but it's never really data input...
Frustration	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	...there's not just one program that communicates with everything. It'd be tough. I mean, I think it can be done, but there's a lot of aspects.
Frustration	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	The payroll's a big one, believe it or not. Because if I'm off on vacation today, it doesn't track that... And these guys track it, our payroll, but we just changed it, and it was a nightmare. And it's still a nightmare. And we weren't getting paid. And nothing against these guys, but it's just another program that this program wasn't communicating with our scheduling.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								So it's constantly evolving...
Frustration	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	...You change the CAD, and now this program doesn't communicate with that CAD. So then, all of a sudden, you got to change the program, which is what we've been going through...
Frustration	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	...One of our latest IT guys does a lot of building forms and sheets for us now, which is kind of a new technology that's started to come out. And we're using that more as a patch to fill the need to track some of our data in a very simple form because when you build a form, it just dumps it into a spreadsheet. And so it gives us at least something, but it's not a great something because you still have a lot of back-end work with the spread sheets. You have to stop the form every year and start it on a new spreadsheet, or you end up with this giant data set... And then how do you break up the original sheet into useable data? And then it's just a sheet, so it doesn't talk with all the other sheets, so.
Frustration	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	[RE: Exposure Tracker] SME: ...It would be nice if everything talked together and you could actually open up the program and say, "Oh, look. You've ran 10 fires this year, and you've ran 50 car accidents." And even if you had to download the data yourself every year. But to run the call, go back to the firehouse, have to type it all in-- Q: ...So why can't you get that data? SME: Yeah. But it's because it's spread across three different platforms.
Frustration	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	Now we have the MDTs in the truck, so we now have a lot more access to information, which is great. But it's just getting everything to talk...
Frustration	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	...And all of these technologies we have, but we don't have in one place. We don't have one that talks. Because we have Dude Solutions; that's when we buy stuff. We have Wasp; that's when we track stuff. And so we have all of these things, and it would be really nice if they worked together...
Frustration	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	[RE: radio communication] Well, there's too many people talking that are 20 feet apart. And they're talking because they're 20 feet apart because of the noise on the fire ground. Because in a hazmat suit, you're

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								wrapped in a giant Ziploc bag [laughter]. So you're trying to talk to each other, and you're 5, 10 feet apart. Which, the technology also exists to communicate 5, 10 feet apart, but it's not integrated together...
Frustration	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	...we have one thermal imaging camera. We send one in with every group of firemen that go in. So they have that technology there. But the people in the front that are on the nozzles that are doing the job-- to be able to talk to them and to tell them, "Hey, I see this," or, "I see that," because you're focused on your one job. I think that would bring more value than everybody having \$50,000 worth of stuff attached to them... When maybe not everybody needs that. Everybody needs to be in contact and to be able to communicate everything that's happening. Because I think now, everybody wants to have a TIC because they can't see it. But if you were just being told in a regular voice where, "I didn't have to push a button. I didn't have to do this. I didn't have to do that," you wouldn't feel the need to have to have everybody have a TIC to be able to see...
Frustration	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	There's a huge cost issue. And so I think that a lot of things can be done on a lesser scale. You can give one guy the \$10,000 TIC, but then give him \$50 worth of communication that he can now more freely speak and be able to communicate to get out what he needs to do that doesn't take over precious radio time. Because we're getting dispatch. We're getting command. We're getting all of these things that-- it's turning into a lot right now. And I think we're just trying to figure it out.
Frustration	FF	S	Not specified	Not specified	Not specified	Male	FF-S-022	But that's one of the things, I think, that would be neat if it worked. It would be neat if all of that technology could work together.
Frustration	FF	S	Manager	46-55	21-30	Male	FF-S-023	It's a lot. For instance, so I've got logistics. So we're doing a lot of data with that, as well. How often our stations are ordering stuff. Where it's going? What's getting wasted? We're trying to lean that up a little bit, where we have a just-in-time delivery for all the expendable supplies, which is all medical supplies which is an industry joke. None of that stuff should expire, but it all expires very quick, so.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Frustration	FF	S	Manager	46-55	21-30	Male	FF-S-023	...currently we have, just on an incident we have three systems that capture data for us. That's our dispatch system, our CAD, computer-aided dispatch. We have an infer system. Which is just as the in-first reports. And we have a PCR System, a patient contact report system. In our current system, none of them talk...
Frustration	FF	S	Manager	46-55	21-30	Male	FF-S-023	...But to analyze that data I have to download those three data sets and have to figure out some commonality between them because they don't have the same common numbering system. So I have to download it from an off-site server, which is our CAD, and two SQL databases...
Frustration	FF	S	Manager	46-55	21-30	Male	FF-S-023	...We're now moving to a web-based PCR in [inaudible] reporting. So now I've got all of this historical data that is out in SQL and other places, and we're going to this other thing that-- when we were buying this system, they swore up and down that they had two systems, that PCR and Fire weren't just going to be the same, and that is not the case.
Frustration	FF	S	Manager	46-55	21-30	Male	FF-S-023	So now I still have two separate systems out in the cloud that I have to figure out how I pull that information to a place where I can analyze it. They keep saying, "Well, we've got great analytics," which is true, but it's not going to give me a holistic picture in the long run.
Frustration	FF	S	Supervising Field Responder	46-55	21-30	Male	FF-S-017	The old one was just as free, truly free-standing MACOM system that worked well within the city, but was incredibly frustrating when you try to leave the city because other than going to the red channels, you really-- or the statewide Mutual Aid channel, you had nothing else to communicate on. And if you had a complex multi-agency incident, you weren't able to communicate. And, like I was saying, the red channels were not meant to be this large intense operation that system just can't tolerate it...
Frustration	FF	S	Field Responder	26-35	11-20	Male	FF-S-018	SME S2: And it was a process to do the change. And then, once we got it-- again, it may just be me, personally-- but, how I use it. SME S3: I think it's frustrating because, I think, you have this huge Google platform and we never had any issues from it. SME S2: And then everybody learned it. And everybody was fine with it. SME S3: So then, sort of, changing to

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								change.
Frustration	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	Everything's different. We have certs that expire at two years. We have certs that expire at three years. We have certs that "never" expire as long as you train on them every year. So everything's different. Everything is at a different cost. Everything is at a different educational facility. Some things you can get renewed through the college. Some things you have to do it through the Green Machine or the Forest Service. There are some things that you have to get renewed at a local level or by a specific certifier, like ice rescue. It can only be done through two different certifiers in the nation. So that's a struggle as a volunteer. That's tough.
Frustration	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	This month alone, we have lost three individuals for various reasons. That doesn't make them bad people by any way-- stretch, I mean. But life has changed for them, and they are no longer able to be a part of our team. And that sucks. And we put a lot of time and effort into them. Again, they're not bad people, and this is isn't an animosity thing, but they need to move on with the next chapter of their life.
Frustration	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	So I wear a lot of hats and it doesn't all get done. And one of my frustrations that I've always said is, as a [Job title], we're the jack of all trades but mastery of none. And so back in the day, I like to have projects and see them all the way through. And it seems like I'm getting on the project and I always hit the good-enough phase, then I'm on my next project. We're never actually completing or mastering anything, or finding efficiencies because we're just-- all we're doing is just putting out emergencies and going on to the next thing, so.
Frustration	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	...Well, unfortunately, as a volunteer, we have WhenToWork. We have emergency reporting. We got their training program they log into. There's a state cert system. So, unfortunately the devil's in the details. As a volunteer, you could actually become inundated with apps and all these different log-ins because there is no one program that solves everything for volunteers. So that's actually a detriment to our program, are the apps and the availability of all these technologies because they don't interface with each other. Some of them only do iPhones. Some of them

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								only do the Android stuff. So even that's a problem.
Frustration	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	...I spend a lot of my time as the IT guy just fixing-- helping people log in to seven different apps, or the passwords, their emails, whatever it may be. And I realize is that they're a volunteer, right? This is a volunteer thing we're asking from them. With their job, they have all these. And their second job, they might have all these. So a volunteer might have 15, 20 different apps and some of them are duplicate. We have people who work up at [City] full-time. They use WhenToWork. We use WhenToWork. But certainly, in the app, you can't just change users. You have to totally log in differently...
Frustration	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	[RE: apps for volunteers] Really, they need to interoperate, or if you could have some sort of single sign-on where it covers all of them, that would at least take some of the burden off.
Frustration	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	[RE: apps for volunteers] They're all duplication of efforts, and not any one of them completes the job. Most of them are just good enough.
Frustration	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	I mean, gee, I have logged into-- between all the government stuff I have to do, I have 25 different web portals we're supposed to do something on.
Frustration	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	I have 78, as a [Job title], to log, 78 different log-ins. This one needs characters. This one needs capitals. This one needs numbers. You can't just have one log-in for all this stuff either because they're all different... It's a nightmare... I enjoy the corner fetal position, a lot of tears [laughter]. No.
Frustration	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	We spend so much time just dealing with web portals and updating stuff for everyone's portals. Then you have to learn their portals, and then they do an update on it, and you have no idea. So, yeah, it's just managing the information
Frustration	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	We have the [inaudible] MDTs, but I think we would call it a failed technology. Because it relies on Verizon to communicate, it just doesn't work. We spend more time wasting time trying to keep that thing working than we do doing our job. So we've given up on it. My vehicle,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								which actually is an old [Job title]'s office vehicle, because they built it in certain ways and it's actually one of their old terminals and all that stuff, it works okay, but I certainly would never rely on it or make it a priority.
Frustration	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	...they learn how the systems work, how the radio works, how we communicate, procedures, best practices, all the stuff. And then we test them on it. We don't just give them the information and go away. Okay. Now, they test out a bit. And like anything, it's like a license to learn. Once you learn it, you're not expected to be an expert. But now you're not afraid of it, and you're going to use it. And one of my pet peeves is that for law enforcement, all these other people, we train all these people. Law enforcement has to train twice a year. They have to prove they know how to use their gun. But they never once get trained or have to prove that they know how to use a radio, which in reality, what's going to save them the most, the radio.
Frustration	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	...But it would be nice to find a better mechanism of not so many different things. I mean, right now, on an incident, I'm carrying usually two 800 radios, a VHF, and two cellphones when I'm running an incident. And that's ridiculous... It's also too much information...
Frustration	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	Mainly, it's computer stuff. I mean, we waste so much time trying to get the computers to work right. "This PDF won't work here. Oh, I can't modify that. I don't have the software for this. I have to [inaudible] that." We lose a lot of time, just stuff that should be simple. It's almost easier sometimes to write you a note. Here's a note. But if you try to do it on a computer, well, this didn't work, and that didn't work, and this didn't work.
Frustration	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	[RE: attachments] Or it's too big. It's bounced back. Now, I got to try to reformat. Now, I got to resize it. Oh, I don't have the program that can resize it correctly. It's those stupid things.
Frustration	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	[RE: attachments] I'm sending from a Windows 10 to a Windows 8, which sends it to a Vista, which sends it to an XP, which sends it to an Apple... We spend more time dealing with that. We did not have our normal IAP [inspection plan] for our annual [Event] because all the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								computers were down in the station, I think.
Frustration	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	And that's more stuff that takes away from my job. The more time I'm dealing with computers, I'm not running the department.
Frustration	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	...Or just even new technology. We hate when the fire service is so stuck in tradition. We try to be a little bit more aggressive. I mean, you could go to different conferences around, and they're like, "Oh no. You just got to do a solid stream," and they don't embrace technology. We use CAFS. We use straight stream. We use [solid force?]. We use everything as a tool for the toolbox. And then, through education, you learn when to use that tool versus one thing fits all. But it'd be better if-- there's got to be a different way of fighting fires. I mean, yeah, there's home sprinklers and they do stuff, but I don't know...
Frustration	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	...If there's some of this stuff, why are we putting people in harm's way to put out a house that's probably getting knocked down anyway? I mean, you have all these houses down here. We've had a rash of fires lately, and we're actually getting comments from the insurance company. They actually wish we'd burn it down because it's cheaper for them to replace it than it is to mitigate it. We lost the third floor off of a house. You'd think we'd rebuild. Well, all of the stuff that they're having to do to mitigate what was left in the hall is more expensive than if it had just burned to the ground and replaced.
Frustration	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	So we're putting our people in the way to have that problem? There's got to be a better way. I don't know. Our trucks just started having piercing nozzles. I mean, just fill the thing with foam or something. So I think as our fires have changed, especially structure fires because of all of the plastics and all of the different products, we have to change how we're fighting fires and have different products that do it. Just going in and putting water on it is not working.
Frustration	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	And I understand our construction is different, but globally, firefighting tactics around the world are so much different than what we do in America. I mean, they're putting out full on stone, essentially room and

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								contents, where the structure has no fear of falling, but they're putting it out with 100 gallons, because it's going in at 900 PSI.
Frustration	FF	R	Not specified	36-45	Not specified	Male	FF-R-019	It's atomizing the water. Anywhere, depending on the handling to 140 PSI. It's significantly different. They're using smaller pumps, less water, but they also have less of a chance of the building falling down. So even country-wise, we're still not doing the same things. As a manufacturer, that probably sucks. You're trying to sell in Europe. You're trying to sell in America. Two different products.
Frustration	FF	R	Supervising Field Responder	36-45	21-30	Male	FF-R-024	Another challenge that we have right now is we have two dispatchers that English is their second language. So they're speaking English but it's terrible. It's terrible. One is, I think, it's Hispanic. It's Spanish speaking. The other one, we're not even sure. She's new. Maybe German, but it's really thick in accent. I want to ask him his opinion. And so to go the automated route, everybody is getting the same exact tone, the same voice. There's no excitement. We have dispatchers that get excited. When the shit's happening, they're getting amped up. So that keeps our guys amped up. The language thing gets them pissed off...
Frustration	FF	U	Field Responder	46-55	21-30	Male	FF-U-030	Personnel issues throughout the department. It's kind of a pain in the butt, as far as something happens to one of my crew members. I get notified as a company officer by voice, or they talk to me. I have to notify the chief. There's this whole up and down, and stuff, and then there's the paperwork shuffle that catches up with it...
Frustration	FF	S	Field Responder	46-55	21-30	Male	FF-S-031	--enter a password, and a username, and everything else, and hit the right button, while you're bouncing down the street, or it's dark out. It's two in the morning. That's where that interface of, "Okay, do I really need to logon each time I use this thing?"
Frustration	FF	S	Field Responder	46-55	21-30	Male	FF-S-031	But the problem is there's that, I have to logon every time, and then there's a time delay. If I put this down because we're doing CPR or we're at a trauma call, and I come back and I've logged out because now I have to re-login again, and it's just tough. That delays that delivery of service.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Frustration	FF	S	Field Responder	46-55	21-30	Male	FF-S-031	I don't know. Generally speaking, the updates that occur are very very quick. However, that can mean missed information right there. If I get on the computer and it says, "Here's the dispatch," and I have to close it out and go back into that program and bring that call up, that's five to ten seconds of delay.
Frustration	FF	S	Field Responder	46-55	21-30	Male	FF-S-031	...And if we got every cold winter day, all the dryer vents going off, if someone keeps texting hey, there's smoke coming out of the building, there's smoke coming out of the building. That's going to impact the agencies, or the fire service because we're going to have to investigate every one of them, and then subsequently the next, true real emergency, then we're not able to respond.
Frustration	FF	S	Field Responder	36-45	6-10	Male	FF-S-032	"We don't want to use new technology, it's not reliable, but at the same time, our technology is horrible and it's outdated and we want something better."
Frustration	FF	S	Field Responder	36-45	6-10	Male	FF-S-032	...The mindset, I think, is the thing that hasn't changed. So the people that are trying to develop systems to make this department work are very much in the technology of 10 years ago that they experienced when they were maybe coming up in the department. So there's not much in the way of training on new technology, or certainly no incentive for motivation for us to try to reach out to the newest, latest and greatest because of those reasons, that reliability and resistance. Any change that we see in stuff that typically is kind of forced upon us.
Frustration	FF	S	Field Responder	36-45	6-10	Male	FF-S-032	The new technology of video capture being so easy you could just video it and send it to somebody. Or an example would be keeping track of, whatever it may be, in spreadsheets that are stored on shared drives instead of trying to put information into a database. People are very familiar with like, "Oh, I have a list of people and I have information about each of them. I'm just going to create a spreadsheet and we're going to make the spreadsheet editable by everybody."
Frustration	FF	S	Field Responder	36-45	6-10	Male	FF-S-032	Exactly. You can learn from that information. It's a much better system to use. But because people are familiar with that spreadsheet, this is

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								something that's-- even though it's more robust, it's something that's not being utilized. So, I guess, kind of twisting that question but that technology--
Frustration	FF	S	Field Responder	36-45	6-10	Male	FF-S-032	I get a jumbled pile of paper from this person. I get a nurse who's, say, very acute and aware of what's going on with this person and can tell me everything. I get a person who has no idea, really, what the medical condition is that this person has. They don't really know, they just happen to have a shift change. I get a person that tells me something about their health that's completely bogus. So there's just no-- and so, again, right now, our mode to deal with that is push everything away mostly. Right? Because bad information is worse than no information.
Frustration	FF	S	Field Responder	36-45	6-10	Male	FF-S-032	And so he was gone out of our city IT department very quickly and now he develops mobile apps for Amazon or whoever he's working for. So, yeah. So we need that technology but we also need the motivation for those who are trained in it to do it. And to connect those people to those on the line who have the issues and problems. Otherwise, we're going to continue just kind of doing what we've done for a long time.
Frustration	FF	U	Field Responder	46-55	21-30	Male	FF-U-034	...So a lot of times, it's difficult trying to deal with the individuals that don't want help, but they need it. So it's a different dynamic, depending on where you are in the city. And each has their own, right? So there are times where it can be very rewarding, because our job is to help people ultimately. Sometimes it can be very frustrating, because you try and help people and they don't want it. And there are other situations that get very frustrating. So you have to learn to kind of deal with frustrations and anger, and be able to [inaudible], "Hey, it's my job and [inaudible] put you on a-- represent the fire department the best we can." So there's a lot of times where somebody's going off on your face, and you just kind of got to swallow it and just try and, "Yep. Yes, sir. No, sir," and, "We're here to help. You don't want our help? Okay." Fun?
Frustration	FF	U	Field Responder	46-55	21-30	Male	FF-U-034	So now we've moved into the electronic age and we're using Microsoft tablets, and I hate them. And I understand with anything - and that this is what they keep telling you - is that there's just a learning curve to it. So

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								there's two parts of it that I dislike. One is the program. It's a bought off-the-shelf program that somebody developed for somebody else, and it doesn't use terminology and stuff that we've been using in the department, right? And so instead of having something that's kind of catered to us a little bit, we're having to get used to somebody else's program. So that's a frustration. But I think my biggest frustration-- once you start to figure out how they do it, fine. My frustration is with the electronic itself. Anything electronic, right, it ends up having bugs. Or things, you're moving and you're trying to enter a password because it locks out after 60 minutes and it's just like it won't take your password, and so things like that. So it can get very frustrating that it's taking my time away from paying attention to what's going on.
Frustration	FF	U	Field Responder	46-55	21-30	Male	FF-U-034	I'm sitting here trying to peck through this [inaudible] tablet that's frustrating the hell out of me. So that's my biggest frustration. It's honestly one of those things where I think technology is so great that it has been a huge, in my opinion, a huge step-back from us here. And again, I'm an old-timer, per se. But I like technology, it's not like I don't want it. I just don't think this is the answer for our environment.
Frustration	FF	U	Field Responder	46-55	21-30	Male	FF-U-034	Without really thinking about it, the roll out was frustrating. It wasn't very thorough, and so you're having to really kind of try and figure it out and learn it on the job. Rather than having a well thought-out timely process orientation, to maybe become somewhat proficient before using it. But logistics and everything, there's a lot of things that come into play there. Right? But, yeah, I would say that's the biggest thing that has been a frustration.
Frustration	FF	U	Field Responder	46-55	21-30	Male	FF-U-034	So that, in theory, as soon as I'm doing it, the ambulance that are handing off the patient to you or the hospital ER could instantaneously have that information. It makes sense. We're not there yet. My form doesn't go to the ER. My form right now doesn't even go to the ambulance, even though they're using tablets, because they're not using the same program. And you're not quite-- I have my opinions about that, but I'll keep those to myself.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Frustration	FF	U	Field Responder	46-55	21-30	Male	FF-U-034	I think it's a month time frame, is what I was told. So if I enter a person and I'm diligent enough to enter all their history, their medications, their allergies. Which in all honesty, because of the people's frustration with this, I don't know how diligent they really are in completing the forms properly. But if you're diligent to put that in, if you have the name and birth date. And we do it a lot down here because we got a lot of repeat offenders, so to speak
Frustration	FF	S	Not specified	Not specified	Not specified	Not specified	FF-S-035	[S6] I think the only other thing that gets in the way sometimes is, the tablet has a tendency to decide to crash a few times in the middle of the night in the way of calls. But it's a matter of figuring out how to circumvent the issue and figure out a way to make this work for now. And I'll take care of the rest of it later. The first few times it happens, it's frustrating but as technology advances and there's always updates on the Surface and whatever, there's going to be bugs. So it's kind of expected that that's going to happen every so often, but it's just a matter of not getting frustrated and going, "Well, this doesn't matter. What matters is taking care of that picture."
Frustration	FF	S	Supervising Field Responder	Not specified	Not specified	Male	FF-S-036	[S3] Yeah, by the time there's-- used to be. I had one or two passwords. Now, I have a document on my phone. Luckily my phone just uses my thumbprint, but I have to open that to open up my document to tell me what password I'm signing in to what unit I have because I have 14 different passwords depending on what piece of equipment I open up. So yes, it stinks.
Frustration	FF	S	Supervising Field Responder	36-45	21-30	Female	FF-S-037	...So, I mean, it kind of creates an added step, but I also don't want to carry two phones and have two different phone numbers. That's really hard to manage and track, and it just creates more headache for me to have two phones.
Frustration	FF	S	Supervising Field Responder	36-45	21-30	Female	FF-S-037	...And just the fact that information is really at your fingertips too. You got to take the good with the bad. There's some frustrating parts to it, but there's a lot more positives than there are negatives. Having all of that information right at your fingertips.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Frustration	FF	S	Supervising Field Responder	46-55	31-40	Male	FF-S-038	With any new electronic reporting system there's always the learning curve and technology side. And they kind of play off of each other a little bit because if the technology isn't quite working right then as the guys are trying to learn it they get frustrated.
Frustration	FF	S	Supervising Field Responder	46-55	31-40	Male	FF-S-038	Yeah. That's a good way to put it. The form was right there in front of me. So, I mean, I could jump around-- if I'm sitting here writing medications down that I got the shoe box full and I'm going through it and somebody rattles off a blood pressure in the old paper form, okay, right, go down to the blood pressure, I look at my watch, that's the time. Okay, and then I get back to my-- you could jump around with the form. Now, you've got the iPad and trying to just rattle the blood pressure, but I'm writing them. So you notice all that, the kind of--
Frustration	FF	S	Supervising Field Responder	46-55	31-40	Male	FF-S-038	So not so much with the younger group but the group that's my age and maybe a little younger than me, I see more frustration with that because it feels like they're being forced to do this and this is the way it's going to be and it's not the way they're used to being. And they don't like to see compromise in the field either. They have their way of dealing with the patients and doing their business and taking care of things and now you feel this element and it's kind of slowing them down a little bit --
Frustration	FF	U	Field Responder	36-45	11-20	Male	FF-U-010	Provided the map comes up when you hit the button [laughter].
Frustration	FF	U	Field Responder	46-55	11-20	Male	FF-U-011	It works but it could be better. The city, the way it works, they always go with the lowest bid. Whoever. So the better technology, we could have, and it might be useful, we don't know, but we have to deal with what we have.
Frustration	FF	U	Field Responder	46-55	11-20	Male	FF-U-011	My pet peeve is that there's no specific class on radio ethic, and so you want to be short concise and some people just love to hear their voice and if they're always talking. And in an emergency situation, it should be just what's needed to be said, not--
Frustration	FF	U	Field Responder	46-55	11-20	Male	FF-U-011	Because you imagine, if it's a fifth alarm, there are so many people. And people are just stepping on each other when they're talking.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Frustration	FF	U	Supervising Field Responder	56-65	31-40	Male	FF-U-014	Exactly, and it's just really-- and I'll say the word frustrating. Nobody that's in the fire service will dispute the fact that fires are burning hotter, and with more energy, and more explosive in the year 2017 than they were when I first started. I mean, these chairs didn't exist 30 years ago. This material didn't exist. And you put a bunch of this type of material into people's homes-- go into your home and compare it to what it looked like.
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-016	I do all special projects as assigned such as trying to develop a drone program. I manage the K9 search team that we have. And I manage the stress unit. It's about 10 to 12 jobs in one.
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-016	No, there's no interest to give me any help--
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-016	so I'm a division of one with 10 people's jobs, 12 people's jobs
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-016	So I can't do them all very well [laughter].
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-016	So emails, phone calls happen all the time, so I have to be on top of it, otherwise-- I went away on vacation for the last week or two, 200 emails. And I still have to answer my phone, be available 24/7, because I'm a senior command staff person in the fire department. So anytime there's a major event, I have to respond and perform a certain function for emergencies.
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-016	It does because the department, we only have iPhone 5s because they're free and that's all they give us. And it's almost inadequate for this day and age. So I can't add any applications. When people say, "I want to look at something new," I can't do that on my iPhone 5.
Frustration	FF	U	Supervising Field	46-55	21-30	Male	FF-U-016	Generally, I'm in meetings most days. And that means very little time in the office to do actual work. So when I write grants or write proposals or

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					bigger papers or what not, that's all done at home on my own time. So I rarely see the kids during the week because of my division of work.
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-016	I get a lot of PDFs. I have to try and extrapolate something so I can put into my own document, such as a map for a special event. So I have to have PDF Pro, which I don't have at home because I'm not going to pay for it my own pocket. So sometimes I can only do certain things at work, or I have to ask one of the secretaries who's very proficient at that.
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-016	And the engine company, we're there in two to three minutes. You don't have to chance to look at it anyways, we don't have iPads that we can't take with us that could give us the blueprints and take advantage of technology, which is capable of doing that. We're not capable of using that technology yet.
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-016	It's very difficult for a large organization to change and embrace technology, and go to new things. People want to give up on it, and can't wait to prove that it failed, versus giving it a chance. And we're not able to give it a full chance because we don't have the hardware, we don't have the training, we don't have the money to invest in that infrastructure and the application tools.
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-016	So I work with a lot of private industry, other government agencies that can move much quicker. And when I work with the private industry, they're able to do things so much faster with so streamlined for making decisions and investing in-- everybody's very open-minded and wants to progress forward. We're very very slow here.
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-016	We're always behind the curve. There's great business intelligence solutions out there but we don't have the budget, we don't have the thinking, we don't have the proactive thinking to want to be proactive and change, and be on the forefront of technology. Very frustrating being in the heart of technology in [State] and we are very slow to change. And we're not able to take advantage of all these great tech companies here
Frustration	FF	U	Supervising	46-55	21-30	Male	FF-U-016	But that's the next evolution, to be at an incident such as a high-rise

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Field Responder					building across the street here, have firefighters in on it, and we have the blueprints and the markers of each individual firefighters show up in a 3D model on an iPad, showing us exactly where everybody is. And the fire service will be way behind the curve in making that happen.
Frustration	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-016	Technology is not holding us back, it's our budgets and our thinking is what's holding us back, our culture.
Frustration	FF	U	Field Responder	46-55	21-30	Male	FF-U-025	...And something that they're also looking at is, which they should have done years ago, are more of a GPS-type direction of travel, which is huge. City's big. And if you are moving around from one area to another, say, I was a relieving officer, so I would go this firehouse and to that firehouse and then that district. So there was a lot of areas where I wasn't real familiar with, so even going from point A to point B, I couldn't tell you. So it would be nice to have that immediate, boom, hit a button. It shows you the travel route, just like the GPS that we use to go anywhere else, should pop up immediately and give you the quickest route and the more-- so those kinds of things are coming, hopefully.
Frustration	FF	U	Field Responder	46-55	11-20	Male	FF-U-027	...I mean, there's times where they don't work as well, especially in high rises. You may not get out as much, but apparently, they're always working on that. Subway incidents are another hard thing to use radios at. They have phones in there for us to use...
Frustration	FF	U	Field Responder	46-55	11-20	Male	FF-U-027	I don't know. Some of it's nice. We get it on the print-outs and the mobile data terminal. Like I said, they have to be on something that you can digest quickly. It may be too much information to put on any one thing, or it may not be able to process it as quickly as you'd like. But some of it would be nice to have on the screen. You could scroll down. We do have it on some of those where-- how many floors, because I go to high rises all the time. I don't know how many floors are on there. I mean, so I've got hundreds of buildings in my [inaudible] district of high rises. I don't know each one how many-- what the floor is. Be nice to have that either on the printout or on the screen so you could access it.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Frustration	FF	U	Field Responder	56-65	31-40	Male	FF-U-026	[RE: radio comms] Frustrated, I don't know if overwhelmed, but frustrated just because you can't get through. I mean, for me that's the biggest thing about technology is with everybody having a radio, everybody wants to talk and everybody thinks what they're doing is most important. And I don't know how you prioritize that, you know? And they all might be important, but.
Frustration	FF	U	Field Responder	56-65	31-40	Male	FF-U-026	... At a big incident, just trying to get through sometimes is frustrating, and I don't know what the answer to that is because if you're trying to talk to the commander and one of my guys is trying to call me on the other channel, we use hazmat channels sometimes. So sometimes, I'll tell-- I'll pair up two people. I'll put one on hazmat and one on fireground. And if we want to talk to each other, we'll go to hazmat. So I have that option because we're the hazmat channel-- and they don't use it at fires. So that's how I get around it... And I mean, they're coming up with search and rescue channels. They're coming up with other channels. But it's just overwhelming when everybody-- you have 2 companies leading out, and there's 40 guys upstairs, and it's just-- and again, I don't know what the answer is.
Frustration	FF	R	Supervising Field Responder	36-45	11-20	Male	FF-R-047	To not be on the right channel? Yes. And that's another deal with kind of resigning as chief as I feel like a broken record you know every meeting we waste so much time on going over stuff I've said a million times and I don't know it's almost like kids in grade school they get in here and they just want to chit chat and show pictures and this and that some of them not all of them but for the most part once everybody I may have to get on my phone and call that person and say hey get your radio on this channel you know and because I mean your adrenaline gets to going and around here we don't have a lot going on and you don't know who it's going to be that shows up to the call who is available so you may run if we have a call everyday there may be five different people every one of those days so it varies.
Frustration	FF	R	Supervising Field	36-45	11-20	Male	FF-R-047	... actually probably been a little too tight with money but I'd rather have it there then not you know and this sales tax I thought was going to be a

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					great deal and it is don't get me wrong but it is a pain in the rear as far as being able to use it because I had it in my head that you know between those seven departments actually there's eight because [City] is part of [County] now because they changed the lines but they only get a like a 16th or an 8th of what we get but they divide all that money equally between those seven departments and I thought they was going to hand us a check and say here put this in your bank account well it's not that way. You have to go to the chief's meeting and if you want if it's over x amount of money you have to get three bids, you have to get approval by all the other chiefs by everybody in that meeting, you have to then have your own money, pay for it and then get the receipt and then it'll be not until the end of the next month before you get reimbursed for that. So it's kind of a pain to be able to use it.
Frustration	FF	R	Other Public Safety Personnel	26-35	6-10	Male	FF-R-048	<p>Yeah I mean obviously you know our trucks are getting outdated. I mean but you know we're working on a tanker right now to replace the one we've got and it's going to cost over a hundred thousand dollars just for the tank part and the bed and that's not including the cab and chassis on the truck which was donated thankfully and like our jaws you know ours are hand me down, hand me downs and I mean you're looking at ten to twenty thousand dollars for a set of those you know stuff like that you know there's always things like gear.</p> <p>Gear is more important. I was at a training deal extrication class and one of the instructors was the [City] Fire Department and he's like yeah he goes it's funny listening to you guys talk you know you're going gosh I wish we could get a truck you know, I wish we could get you know jaws, get this he goes we got guys complaining because their gloves are a month old and I looked at him and I said we got gear that's been out of date for ten years. [Town] Fire Department over there that I'm on we got a couple of guys don't even have gear and well until they just got some wild land gear but at a structure fire they can't go to a structure fire. They can show up on a car wreck you know we've got guys here that are you know it's getting to the point where we've got to get some more gear but you're talking just the coat and pants alone are about \$3500 that's not</p>

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								including boots, that's not including helmet, that's not including gloves you know, that's not including you know radios, you need hand tools, flashlights you know I mean there's a lot of hand tools that would be nice to equip every guy to have you know just for breaking glass you know but we have to have everything up to code. We can't just go down the hardware store per se and get a hammer you know to do this and that. Would it probably work? Yeah but inspection wise we got to have everything you know the fire tools that work better you know for our stuff.
Frustration	FF	R	Other Public Safety Personnel	26-35	6-10	Male	FF-R-048	Okay from the government standpoint that makes our regulations understand we're doing this on our spare time. This is not you know we're not paid, we're not sitting here at our fire department going okay we got to have a call any time you know we're at home, we're at our jobs, we're at our kid's basketball game, t-ball games, we're at our kid's birthday parties, we're at our family Thanksgiving's and when our phone goes off we leave those you know and so and then when we have training you know it's like I've been on three calls already this month you know I've taken enough time off. It's hard to get guys yes, we need the training but you know whenever the state's going you guys don't have enough training. Well first off you get them here and second off you keep them here. I mean even a paid department you know just the regulations to drive these trucks if we were in [city] they ain't a person on this fire department that would be qualified because the amount of driving, training they require to do that. Now do I make sure my guys are safe before they go? Yes and I have a rule if they don't know how to drive it it's grass it's a house as long as nobody your safety is first. Leave the truck. Wait on somebody else to get here don't drive it. You know that's the thing you know if you don't know don't go in but it's just you know the amount of time it takes.
Frustration	FF	R	Field Responder	36-45	21-30	Male	FF-R-049	Out here you have to become a very good fundraiser. We do get a little bit of funding from our county but considering the funding that we know could be available to us we're very underfunded. That's also a very sore

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								subject out here. We have to take a lot more time cooking barbeques, selling raffle tickets and things like that and you know that takes time away from our daily lives with our family as well so there's more to being a volunteer than just going to the call in the middle of the night. Our communications out here have it's been updated but it's very limited and antiquated.
Frustration	FF	R	Field Responder	36-45	21-30	Male	FF-R-049	It's the general picking on each other, complaining about this, that and the other and the topic is talking about how to keep it running out here. What our next fundraiser is going to be, how bad is the county going to short us this year with money you know. The State of [State] has I'll say cracked down on the volunteer departments and a lot of the people dislike it and I think it's because they really haven't researched why it's happening but there's a need for it. Whether you're a volunteer or you're a professional when you're on a call the same level of accountability is necessary and I think that's what they're going towards making sure people are trained, training records are kept. People volunteers in the state are allowed to be in the state fire pension. I go to work every third day to get my pension. I have no problem with volunteers getting the pension but I want them to put in a little bit of work and dedication to earn it. You know just being on it and having someone forge a document for you to me that's taking away from more money I could possibly get.
Frustration	FF	R	Supervising Field Responder	46-55	21-30	Male	FF-R-051	It can be quite a few of them. Sometimes it's fulfilling and sometimes it's aggravating. Because of where we are... you... you have to be a jack of all trades. So we do fire, we do EMS, we investigate, we have an investigations division and inspections division that do those tasks. So it can be... when you wear a lot of hats it can be somewhat frustrating trying to get them all done and sometimes the needs in one place od not necessarily satisfy the needs in others in terms of what you have to do it with you're the manpower you have to do it with.
Frustration	FF	R	Supervising Field Responder	46-55	21-30	Male	FF-R-051	Impossible to talk to. We have--it's not impossible. We'd have to go to a region frequency. See one of the things that aggravates me about the 700 system in [State] is that that radio works everywhere in the state.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								But if I'm in [City] which I regularly--I go to [City], I go to [City], I go to everywhere, if I'm going down the road and run across a problem I have to go into that radio to find something that might let me talk to somebody. I can go and have immediate help or I can pick up the phone and dial 911 and have to go through a series of operators instead of saying, hey, I need a trooper to come to this area or , hey, I need, because I--they monitor our region channel, okay? And I can get to our region channel pretty easy.
Frustration	FF	R	Supervising Field Responder	46-55	21-30	Male	FF-R-051	But when I go to another region channel you don't know whether those organizations monitor it. State police usually do. They can get you to one of the others. But. 911, I'm not doing anybody else any more good than [Name] driving down the road because I can call them on the radio and say this is what I have, this is what I need, and bang, it should be done. Where instead calling 911 and they're going to just go through their normal deal and they may be sending me what stuff I don't need when I can say, hey, this is all I need for this particular thing.
Frustration	FF	R	Supervising Field Responder	46-55	21-30	Male	FF-R-051	It's all--everything in the public sector is about money. You have a limited supply of it. People think you don't. But we get 6 mils property tax that's all we have. No sales tax. No user fees. No nothing. We get 6 mils property tax and our tax is based--is dependent on the value of the nuclear plant which reduced 4% every year. So my budget constantly goes down and my expenses go up and my needs go up. So I mean... that's where we're at.
Frustration	FF	R	Field Responder	36-45	21-30	Male	FF-R-052	I think for the most part everybody that works up here get along well with each other. Of course no matter where you go there's going to be one or two people that get under your skin or, you know, that... there's just a personality trait that you may disagree with or not care so much for but... especially in our line of business at the end of the day I'm my brother's keeper whether I want to sit down and have a meal with you, might be one thing, but when it comes to your life or my life I will be there regardless of my personal feelings.
Frustration	LE	R	Field	18-25	5 or less	Female	LE-R-002	But they use a different program than we use, we use a different

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					program than the sheriffs office use. So if it wasn't for cell phones and the crappy radio service, sometimes it would be that we couldn't get hold of somebody that's two blocks away from us.
Frustration	LE	R	Field Responder	18-25	5 or less	Female	LE-R-002	Yeah. So just things like that. If we were like that now, if everything was handwritten and I made a mistake on a report or something, it would be a big to-do to get that fixed. Because there's so many loops and boundaries that you have to go through now in order to fix something on this document that I said that I worked on, you know? Because of the courts and things like that. But other than the change from my big agency to this small agency, I'm too new for it.
Frustration	LE	R	Field Responder	18-25	5 or less	Female	LE-R-002	Well, that's a good question because we have to come back here. Because, once again, we don't have the same program on our laptop that we do here to write reports on. And it can be kind of inconvenient because, for example, if you're on a car crash you provide the victims of the car crash a number to reference to, to get a crash report online. And when you're out there and no one's here at the office to pull a number for you, you have to say, "See you, I'll call you in a little while with a number," and come back here and pick a number. And if your crash happens at 8:00 PM and you get busy until 2:00 AM, you forget about it or you can't call and get a hold of them, and you have to hope that they get the voicemail that you left just to get that number, so.
Frustration	LE	U	Field Responder	36-45	11-20	Male	LE-U-003	I need to know as much as I can about what's happening in a timely manner. There's a little bit of a disconnect-- I'm sorry, not disconnect. There's a little bit of a delay, because currently, when someone calls 911, the information goes from a call taker to dispatcher to us. So there is a few seconds even to a couple of minutes delay in getting the information.
Frustration	LE	U	Field Responder	36-45	11-20	Male	LE-U-003	In my opinion, technology should make life easier not harder. Right? And if the radio doesn't do anything other than just add more weight to your belt-- with these new radios, I'm not accessing any new channels that I didn't have permit to before....So it's like a newer radio with some new technology that, as far as I know of yet, the city has yet to-- they have

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								GPS and then [this and that?], but the city's not paying for it, so we're not using it. So it's like bigger, badder new radios that we're not really using to the full capacity
Frustration	LE	U	Field Responder	36-45	11-20	Male	LE-U-003	There's a bit of a learning curve, especially with the radio, because there's different zones. And man, we have so many different channels, and they're not really labeled very well. So unless you know what channel you need to go to, it can be difficult trying to find what zone it's on, the channel label. Because our display screens in the car are like that big, so it can only fit so many characters. So there's just kind of a hodgepodge of letters and whatnot. So yeah, tuning to different channels that you don't normally use is a little bit challenging with our current radio system.
Frustration	LE	U	Field Responder	36-45	11-20	Male	LE-U-003	On those interagency calls, every now and then, I will get one. Maybe if it's a bank robbery, and there's other agencies in the neighborhood, it can be overwhelming because once you start introducing different agencies other than [City] or even specialized units, because the specialized units in [City] operate on different channels, as well. So you'd have a massive miscommunication because you have these different entities talking on their own separate channels. Supposedly, the dispatcher is supposed to be connecting everybody, but rarely does that happen. So it makes for a big breakdown in communication, which causes confusion and adds stress to the situation.
Frustration	LE	U	Field Responder	36-45	11-20	Male	LE-U-003	So our dispatch can patch in radio channels like she can, or whoever it is, a male or female, can patch in the sheriffs to our channel and dispatches specialized units. They have that ability. When I was on patrol, that rarely happened. And when it was attempted, it usually didn't happen right. Someone was always left out it seemed like. So apparently, it was difficult to do and rarely was done successfully.
Frustration	LE	U	Field Responder	36-45	11-20	Male	LE-U-003	Because before, you'd have these old-timer officers who were all about their 10 codes. And so they get on the radio and all in our-- they'll be all flustered spouting out these 10 codes that are rarely used, and you have to pull up your list and like, "I have no idea what he's talking.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Frustration	LE	U	Field Responder	36-45	11-20	Male	LE-U-003	Because like I said, we all have to use our personal cell phones for one. And then two, I haven't really seen anything come out or the departments even looking at that takes advantage of a small form. It's always the big laptops.
Frustration	LE	U	Field Responder	26-35	6-10	Male	LE-U-005	That includes loading up the vehicles, which is a huge fiasco for us because when we start running into technological issues, we've got a lot toys in the car and a lot of those toys don't play nicely with our wireless. So that's a big window when we're off the street tied up for a while. And then we'll hit the street somewhere about 45 minutes to an hour after the start of the day
Frustration	LE	U	Field Responder	26-35	6-10	Male	LE-U-005	So we're using [inaudible]. They're great for heat, great for everything else. They're very slow on the connectivity issues that we have. We also have what's called DMAV on audio/video also needs to communicate via the Toughbook to either offload it, offload video that we got, or to get updates for the computers as well. A couple of that, we got a CAD. Which CAD, I'm sure you've heard, has lots of issues in itself, needs constant updates. All these things all have individual passwords. They all have individual updates and then coupled with that are Windows. I think we're using Windows 7. We finally moved off from XP. Well, we're using Windows 7 and for whatever reason, whatever CTM parameters they have, it takes a very long time for communication to make sure that the correct passwords in there are being uploaded. So it can be fifteen, twenty minutes just for the computer to boot up.
Frustration	LE	U	Field Responder	26-35	6-10	Male	LE-U-005	And I don't want to get off on a tangent, but one of the big issues that I brought up last week with these guys is, this is going to be compounded 5 to 10 fold once we go to body cams. The community hasn't quite realized that we're already short on bodies, and now you're throwing a piece of equipment that's not been field-tested and their city's not buying the appropriate equipment to allow that piece of technology to communicate effectively with our other toys. So we have to be the middleman as far as documentation and metadata as far as making sure case numbers are inside, auditing all that information that goes in.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								So that's going to be a tremendous amount of time for us not being on the street as well.
Frustration	LE	U	Field Responder	26-35	6-10	Male	LE-U-005	It's definitely a burden. I mean, I like the idea of having a body cam and I understand that there are going to be extra issues with having a body cam. It's just the nature of technology and it's a necessary evil at this point in our society. But there are definitely better solutions that we could go about doing and we're not taking the appropriate steps to take those into account.
Frustration	LE	U	Field Responder	26-35	6-10	Male	LE-U-005	If we can catch a burglar as he's about to break into a car, if we can catch a burglar in the act of breaking into a car, we still would have a case. We can put them in jail and then the victim would know that at least we caught the bad guy. And then we keep the burglar from being empowered and doing it over and over again. And unfortunately, when you're doing almost completely reactionary type of police work, you never have the time to go out and do those types of things. To catch these people, to stop the crimes from happening before they happen.
Frustration	LE	U	Field Responder	26-35	6-10	Male	LE-U-005	I know that we have definitely lowered our standards for hiring in the last few years. I've seen it, it's pathetic, to me personally, to see that we lower our standards. We should never lower our standards. If anything, as we become more of a professional society in our group, we should have higher standards in my opinion. We've lowered our standards just because we can't make the quota to get bodies in to actually do the job.
Frustration	LE	U	Field Responder	26-35	6-10	Male	LE-U-005	You can get a call with absolutely no information. You can get very basic 911 hang up and then at that point, you would know absolutely nothing and you walk into potentially anything. You can walk into a murder scene, you can walk into a burglary, you can walk into someone needing medical assistance. I mean, you can walk into absolutely nothing. So our officers are very good about being flexible for these things. And even on the same token, you can get a 911 call that's all misinformation. Completely inaccurate information.
Frustration	LE	U	Field	26-35	6-10	Male	LE-U-005	We've got one design for body cams, we've got one design for in-car

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					cams, we've got one design for CAD, and then we've got all these other small things. And they're all from different vendors, because of whatever reason. The city was trying to beg, borrow, steal these things from different vendors and they didn't want to pay full price, so none of them integrate well together, which is a huge issue for us.
Frustration	LE	U	Field Responder	26-35	6-10	Male	LE-U-005	And I don't know what its SingleSource login. I know Windows can hold files. When I was in the military, 2000, I had a card, and it had my information on it, pop it in and everything would work. Yeah. I mean, why do police not have something like that? I mean, that was a decade ago - well over a decade ago.
Frustration	LE	U	Field Responder	26-35	6-10	Male	LE-U-005	For communication? Yes. It's not bad. I'm a little more tech-savvy than some of my guys, and I know that they get frustrated dealing with it. But they're all capable of dealing with it. They just whine about it a lot. So they're capable of dealing with they just don't really want to.
Frustration	LE	U	Field Responder	26-35	6-10	Male	LE-U-005	No, no. But it's a pain in the butt if I can't carry all the gear with me and if now I need to go to another car and log into it, I have to go back to my car to get the damn token.
Frustration	LE	U	Field Responder	26-35	6-10	Male	LE-U-005	So it (earpiece) connects in for here via here, runs in through my shirt, which is kind of a pain the butt. And then, it clips-- my trigger clips here. And then, there's a piece that runs around the back of my shirt and goes into my ear.
Frustration	LE	U	Field Responder	26-35	6-10	Male	LE-U-006	They added features to it and it does it's job, but it hasn't kept up. My phone has more computing power than what's needed to run the RMS now. And it's not-- again, they've invested a lot in it. And also on our end, it's very difficult to upgrade. The upgrades can be quite painful. There's migration and if they change types of servers, then are we going to lose data? How long are we going to be out for? Back to the high availability. Sometimes an upgrade takes us down too long.
Frustration	LE	U	Field Responder	26-35	6-10	Male	LE-U-006	All they know is that I looked at my phone and I saw the video. So they want to see what's on my phone. And I can explain it until I am blue in the face that this was just a connection to this device. I was really

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								playing it from here; it just streamed it like YouTube. If I watched a YouTube video, you wouldn't want my phone to see it. You would go to Google and say, "I want this." But judges allow it.
Frustration	LE	U	Field Responder	26-35	6-10	Male	LE-U-006	But the joke is, officers today, our job is paperwork. We spend more time on the administrative side of the coin than actually answering the calls for service, which is what we want to do. We want to get out there and help you, but every time I do that, I have a mountain of paperwork I have to fill out. And again, I know technology can bridge that gap for me. We've seen it, but how do we get there? And then, what's the right way to do it that's secure, that's user-friendly, that's friendly for upgrades and things of that nature?
Frustration	LE	U	Field Responder	26-35	6-10	Male	LE-U-006	So I guess the only thing is, I believe that there is some great potential in a-- whether it's nationwide. I would hope that it's a nationwide. I don't know what it's supposed to be. But I also know that things can [laughter] somehow fall short of what their goal is. But I really would hope that - as an officer that travels around the state, whether I'm teaching or visiting to look at other technology - I would like that at least something that can be statewide, that's seamless. And again, pie in the sky, I would like it to somehow work with my existing technology. I won't have to carry two phones. So if it can somehow handle that transition of, this is either my personal phone that does both or my city-issued phone that I can - whether it's a double SIM or something - I can still do-- because I mean, these phones are huge now, which is great
Frustration	LE	U	Field Responder	26-35	6-10	Male	LE-U-006	I think sometimes they feel like they're not heard as well, so when a decision's made that they don't like, it makes them even more upset. But I think here in [City], by and large, once you get past all the complaining, I think they're actually quite happy with what they do have, if that makes sense.
Frustration	LE	U	Field Responder	26-35	6-10	Male	LE-U-006	I can tell you, just as an example, we used to be able to-- so our RMS, it actually has - this is just, again, more of an antiquated type, how it works - it has a mobile end that sits on the laptop, but then we also have a reporting that also is like a mobile version that sits on the laptop right

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								next to each other. Same company. So you have to run them in this side, and then type it in this side. Well for a while, we were able to automatically pre-fill it by pushing a couple buttons. And we had some officers who messed up, and they pre-filled the wrong person and didn't fix it. So there was a-- in my opinion, well, I won't even say my opinion. There was a decision made to correct that by disabling the technology which-- I mean, really, in the grand scheme of things, after everything I've told you-- I mean, that's one less time you have to do it, but you still have to do it 20 times. But you would have thought that we had just taken away their days off [laughter]. I mean, it was that bad and--
Frustration	LE	U	Public Affairs	26-35	6-10	Female	LE-U-007	And then what I do is I take my statement, and I tell the detective this is what I am going to say. And then they look at. And they'll say, "Oh, you can't say this. Or you can say this." And then sometimes I'll ask them a couple questions like "Would it be okay to release this or that?" Something big that we run into though is EMS. EMS will tweet out stuff. They tweet out right away. And they're saying, "Transporting one with a gunshot wound." Or they'll say, "Transporting." So for us, we don't confirm that. And the reason we don't confirm a type of injury is because sometimes people think they get shot and they didn't get shot or they didn't realize they were shot and they were shot. And we're not medical doctors. So us as a police department, we can't make that determination. The investigation's still rapidly unfolding. So we run into the media saying, "Well, one was transported with a gunshot wound, can you confirm that?" And when you're the PIO standing up there it's a little frustrating.
Frustration	LE	U	Public Affairs	26-35	6-10	Female	LE-U-007	I think with anything, once you first get something like when we got our E-ticket writers, and it kind of takes some getting used to. But I don't think anything that we have is overly difficult to figure out or use. I mean, there's some things that could be better and you get frustrated with.
Frustration	LE	U	Public Affairs	26-35	6-10	Female	LE-U-007	We would of loved if that information from the CAD screen would have populated onto our crash report. But the interface for the two is just out of the question. So we have to get the information from there. We either

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								copy and paste it if we can. Or we just have to go to the other side and type it in. So if we had the fields that auto-populated or things like that, that would be easier because we have to fill out a lot of paperwork as it is. And a lot of it is duplicate.
Frustration	LE	S	Field Responder	26-35	11-20	Male	LE-S-033	Now, EJustice, it allows folks to communicate better, but we spent five years and spent hundreds of millions of dollars on a program that was inadequate. And it didn't do the job that it needed to get done. Again, we're a day late, a dollar short.
Frustration	LE	S	Field Responder	26-35	11-20	Male	LE-S-033	So in one of the richest counties in one of the richest states on the East Coast, we were using outdated equipment and outdated report writing and information sharing capabilities while other folks had been using these programs for years and years and years. Now, I don't think that has anything to do with dollars and cents. That's bad policies and that's bad politics.... And [County] has no excuse to not use the latest and greatest technology because of the money that we have here in this county and in this state. So that is a glaring example of why that report writing system, in terms of the technology, we couldn't even search a name.
Frustration	LE	S	Field Responder	26-35	11-20	Male	LE-S-033	the fact that we can't immediately switch to a mutual A channel immediately-- I'm sure our radios have the capability of doing it, but we don't know how to do it. I don't know how to do that. I mean, I've got an \$8,000 mobile radio that I have on my belt.
Frustration	LE	S	Field Responder	26-35	11-20	Male	LE-S-033	...I mean, it's an \$8,000 radio, you know what I mean? and you turn it on, turn the thing off.
Frustration	LE	S	Field Responder	26-35	11-20	Male	LE-S-033	...Like I said, the information is there. It's just a matter of how much of a nuisance it is to go find it. But there's a lot of databases that we can gain lots of information from folks. You just have to A, know where to go look for it, and have the capability of doing so.
Frustration	LE	S	Field Responder	26-35	11-20	Male	LE-S-033	I think in our region, I think an ability to identify folks, whether it would be using the new retina scanners or the fingerprint scanners. We have fingerprint scanners.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Frustration	LE	S	Field Responder	26-35	11-20	Male	LE-S-033	Go to software engineers, go to the folks that are developing these programs and say, "What are you working on in the future?" and "Is this compatible with that so we're not wasting hundreds of millions of dollars on all of that sort of stuff?"
Frustration	LE	U	Field Responder	26-35	5 or less	Male	LE-U-036	Because we have a [City] court system you have to log in for. There's a national system that you can check. I mean, it's ridiculous how many passwords we have for everything.
Frustration	LE	U	Field Responder	26-35	5 or less	Male	LE-U-036	Well, that's the biggest thing with a lot of the stuff is you make it, but you never test it out on the real person who's going to use it. And then will it get lost in translation, and then it becomes useless because--
Frustration	LE	S	Field Responder	36-45	21-30	Male	LE-S-037	And they're wanting to do their job and just waiting for it to be safe to come in. It's just a matter of getting around that circle to get to it.
Frustration	LE	U	Field Responder	46-55	21-30	Female	LE-U-040	But when you log into the mobile data computer, it's different than it could be log in for the body camera system on your phone, or it could be different than the one you have for your desktop. And patrol district personnel don't have a specific desktop assigned to them, so they're always using group computers.
Frustration	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...The detectives there are seen as the Swiss Army knife because we can do everything... So the front desk folks, if they need help, they have a question, they kick it back to us. And we get a lot of, "Hey, can you come here? I need you for five minutes." Well, five minutes, and five minutes, and five minutes, and five minutes... So everything filters into our-- and it's a corner office. So everything would filter into there...
Frustration	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...So everything filters into our-- and it's a corner office. So everything would filter into there, whether it's some command staff just coming in to BS, which is-- it's cool. "We're letting you know we're one of the boys." But they come in there. Or if they have a special project that needs done right away, they come in to us. "We need this done right away." And all you do is say, "Okay." Whatever I was working on, it wasn't the priority. Now, this is my priority. But what happens is they come back to you, "Why didn't you have that done for me?" "Well, it's because you told me

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								to do these three other things." "That doesn't matter. Why isn't this done? I don't want to hear any excuses." So we're kind of a dumping ground of-- we get everything. And the other detectives that are down there hate me because I'm off-site.
Frustration	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	It seems to be out of jealousy. Because they'll go in. And they've got a bunch of paperwork to do. And then they don't type it. And then we shut our door, and then we're told we're anti-social. I'm like "but I got to get this done".
Frustration	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	So station life is-- life at the office is you avoid it as much as you can.
Frustration	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	Just because you know you are going to get more work done some place else. And being detectives, it's a spot we all have to attest for, and everybody gets picked because of that drive to do the right thing and get stuff done. But it gets very frustrating that the boss is always coming in and derailing your train of thought.
Frustration	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...That gets to a point where you get bothered so much. You just lean back. All right. Let's just talk. You don't even try because if you're going to pay me, and you're okay with doing this, then I'm just fine with it too. But that's why a lot of us will work before and after, before 9:00 when the bosses get there and after 5:00 when they leave. Because between 5:30 and 6:30, you can get more done than you did in the previous nine hours.
Frustration	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...But it's getting to the point of there's so much stuff in the car... And then, what burns my ass is when dispatch tells to switch a channel. And you're like, "I'm doing 100 and I'm driving, and I'm dodging man, and machine, and critters, and everything"...
Frustration	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...the new [State] driver's license, they've got so much information on them. It's - I don't know - like a six font. These guys have literally gone out and bought the Home Depot or Walmart and got magnifying glasses so they can read the-- so you're doing this.
Frustration	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	... at some point during that contact - and we do e-tickets for warnings and tickets - you're going to have to be focused on this damn thing. It's

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								about the size of the original Game Boy. Except with a keyboard.
Frustration	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...we do e-tickets for warnings and tickets... And I'm like, "Put it on an iPhone. Put it on a Samsung. I don't care what Android or iOS, Apple platform it's on. Don't put it on Microsoft because that's why it's on, and that's why it's garbage." But make it user-friendly. We all know how to work touch screens. We can all zip through that. And if I could zip through that, take my [inaudible], and put it on my phone, so it's an app. I hit my button, type in my ticket, walk up there, take their picture, it send...
Frustration	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...we do e-tickets for warnings and tickets... put it on my phone, so it's an app... I still have to go back to my car to get the ticket, which unless-- and they have a thing we can wear, the printer, hook it onto our belt but it's a pain in the ass because you've already got gun, taser, bullets, handcuffs...
Frustration	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...You got utility belt. The last thing you want is a printer. They make it thin so you can slip it into a container on your belt and keep it there. I've seen, and I'm like, "Oh, enough. Just calm down." But you still have to do that...
Frustration	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...I'm not saying open the flood gates and start spending like a drunken sailor. But there's got to be a median, comfortable. And the decisions made by the command staff, usually with little or no impact on the people that it's going to affect the most. There's not that open lines of communication. It's decided up on a high, and it's dumped on, and you shall accept and make it work even if it doesn't work.
Frustration	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	[RE: cause of communication problems] Egos. Cowardness. They're afraid to confront each other... I can't stand keyboard commandos. Keyboard tough guys. And it also shows a bit of laziness.
Frustration	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...I tell our rookies, "Don't ever let me catch you doing this." And thankfully, they've stopped for the most part. But they'll type what would be a five-page email about why they didn't pull an IR, an insert report number, any type the report. They have all the same information in there. But they're just telling you why they worked harder to get out of work

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								than just doing the damn report. So it's just people that just hide behind either laziness or technology, they don't want to go talk to somebody
Frustration	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...People just getting new on the job don't have that ability to talk to people... Some do but others in the majority, they think there's going to be an app that's going to save their life, where they can send an emoji or a meme that's going to get them through a situation. There's not. Sometimes you just got to figure out how to talk to people... they'll bring me something, "Hey, what about this one?" "Did you ask them that?" "Well, no." "Go ask them [laughter]." "I don't know how." ...people hide behind technology.
Frustration	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	Well, in technology-based is nothing talks to each other. And if you want it to talk to it- if you want program A to talk to program B, A and B is going to have their hand out for a monetary supplement to give you the patch that they've already created or to create a patch. So that's frustrating.
Frustration	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	You can't get two phones to talk to each other sometimes or- we all have the issues where you're trying to sync your phone to your new computer, and they may catch flight now and then, and you flip the table over.
Frustration	LE	R	Field Responder	36-45	11-20	Male	LE-R-017	...it's very frustrating. Like I said, we've got people. I can call somebody that can speak any language. But it's very frustrating for me as a cop. It's very frustrating for the person reporting the crime or the incident or whatever that you can't communicate.
Frustration	LE	U	Manager	46-55	31-40	Male	LE-U-020	...when our CAD went down, we went back to manual. And we used to be on a card system, and writing things down on cards and the frustration level of our dispatchers was through the roof because they're not used to it, writing things down... when it came back up, they had to go back in. The frustration of back-filling information.
Frustration	LE	U	Manager	46-55	31-40	Male	LE-U-020	But there's a lot of agencies that will get- and this is the frustrating part. They'll dispatch an officer to the scene and then he gets there and says, "Oh, no. It's State." And then they call us so they've already waited an

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								amount of time, and they have an officer on scene. And then they ask us for an ETA. So even if it's 15 minutes type of thing, when we get there, the people are upset because they've been waiting there a half hour.
Frustration	LE	U	Manager	46-55	31-40	Male	LE-U-020	...there are some where, oh, no that's state, call state. But they don't call us on the initial call if there's a question. They wait till they get there and then they decide, and then they call us. So that's a frustration piece, but working with 63 different counties and multiple local jurisdictions, you're going to find the good and the bad and the others.
Frustration	LE	U	Manager	46-55	31-40	Male	LE-U-020	...in this day and age it takes a while to implement things, and especially if there has to be money involved and going out to RFP and those type of things where you're line level person has no idea of the frustration that that is.
Frustration	LE	U	Manager	46-55	31-40	Male	LE-U-020	...clearing flow of traffic as soon as we can with accidents. If people are involved in a fender bender, we get them off the highway so the lookie-loos don't run into each other...But there are some agencies that have no concept of this and they'll lock up a lane in traffic for hours and then we just see multiple things back up, and eventually, if it's in the city, it's going to back up into our area. So that's frustrating, trying to get them all on the same page because they have their own leader they're responsible for...
Frustration	LE	U	Manager	46-55	31-40	Male	LE-U-020	...In law enforcement, it's different because typically your sheriffs are elected, so they're going to do things to keep themselves in a job... You're at the whim of the city council or whatever that they'll hire and fire or do whatever they want if you don't do what the mayor tells you to focus on. So they have their own things that they have to do and I understand that. But just, when you get into, well, you're all law enforcement. Well, yeah, we are, but it's difficult so. It's just kind of a perspective of internal communication and then external communications
Frustration	LE	U	Manager	46-55	31-40	Male	LE-U-020	...[State] is very difficult. We're having very difficult time. They run their radio system differently, and their legal department has indemnity

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								issues type of things about sharing their resources with others. And so when you start getting into legal problems, I mean, it's, why are you involved?
Frustration	LE	U	Manager	46-55	31-40	Male	LE-U-020	...When you get up to end of the metro areas... it's a different dynamic. So we do have very good working relationships with some. Some we don't because they're self-sufficient and they want to have control over everything. And that's why we a multi-county thing that they bought their own digital trunk radio system, that is the exact same system as the state is on. But they don't have control over the state system, so they got their own in a tune of over a million dollars
Frustration	LE	U	Manager	46-55	31-40	Male	LE-U-020	What they did is they've put up a silo because now the officers, boots on the ground, where they had the ability to talk to each other. They back each other up. They knew when each other was in-- that because they went on a different system, even though it's the same system, but it's theirs. And now the two cars can't hear each other. And it's been very difficult on the boots on the ground to say, "We lost this, and we can be right here and this other officer can be getting his butt kicked. And we don't know about it." It's going to take multiple phone calls to-- and then dispatches, and time. And it wasn't a good decision, but it was a political decision that they created our own silo. And that's tough, but that's what I'm hoping that FirstNet won't become as well.
Frustration	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	...we have a few people who will not use the computer, use only the radio, which then takes up bandwidth for everybody else, but they won't change, and they're our trainers. So when you have trainers who are teaching people to constantly do that, it's like, yeah I can teach them how to, but you don't need to do it all the time. So it just, there's a lot of things that we can do with technology that our people are preventing. Whether that's dispatching, whether that's running inquiries and stuff like that on computer, because we just get a mindset of, "Well, this is how we've always done it."
Frustration	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	[RE: electronic v. paper forms] ...There's a lot of things that-- there's really almost nothing that we have to do on paper anymore, I don't think, but

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								we do. Even our eticketing, it imports directly into the court. They have it the next morning. They still print out paper copies. Our records department, it could import directly into our RMS system, but because they had to click three times to merge the records, they print them out, and they hand type them in. There's job security there [laughter]...
Frustration	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	[RE: electronic v. paper forms] ...we still have stacks and stacks. "Paper and printer is expensive." Then stop doing it [laughter]. But we keep doing it, even though we have other places to store all that stuff.
Frustration	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	...The thing with technology, we used to dictate all of our reports. We never typed. I mean, we'd fill out the face sheets but then our narratives we would call in-- when I started our records department typed them. They ended up getting so far behind that we ended up laying off our [inaudible] clerks, and we moved to a private company, a dictation company. And we'd call in there, and they would type our reports for us, and we would get them back within a day or two. Or within hours if they're a emergency type thing. And again, that's a quarter million dollars a year...
Frustration	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	...And then, "So okay, well, maybe we can save this money." So we went to Dragon Dictation, doesn't work. I mean, for us. We have a few people around who beat up and train their dragon enough that it works-ish, but the quality of reports weren't there, and then the reports got shorter. So then, most people just stopped using Dragon altogether. They went back to just hand-typing their reports...
Frustration	LE	S	Field Responder	36-45	21-30	Male	LE-S-016	...primarily we're secretaries. We take reports. The emergency responses are limited here, but everything has to be documented, so you do that. So our officers were in here all the time, so now we're going back, and we're now going back to another dictation system. And that's an app, it'll be on our phone that I can record, and it'll send it to them, and they'll type it up for us. So hopefully our reports will get better and faster, as far as that type of stuff goes...
Frustration	LE	R	Field	26-35	11-20	Male	LE-R-018	...One that we do have is an e-ticket machine which I detest because the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					buttons are the size that my three-year-old can push but not me. So there's a lot of fat fingering on those. In my opinion, it's a very good idea. It will save on paperwork. It's a terrible follow-through.
Frustration	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	Short of dropping the brand new tablet [laughter], there's always little gremlins and bugs. Currently, my computer, I can print almost anything except from one piece of software that it doesn't know where the printer is. And there's always some little aggravation like that...
Frustration	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	...They've got a license plate reader that they put in the parking structures, which I was trying to log into yesterday, and apparently, it crashed. They put it on a different server, and now I don't have any of the login information because it changed... So I'm trying to get them to solve that. And all of these pieces of technologies would be helpful if they were working properly.
Frustration	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	...I'm trying to think. I think my biggest gripes are that e-ticketing machine and just the fact that it's not well thought-out for the application. I don't think there's any reason why it couldn't be done on the phone that I already carry or the computer that's already in the car. So integrating technology with stuff that we already have, that we already carry. Because when I'm on patrol, I carry 30 extra pounds of stuff, which doesn't count the two bags which are probably 30-pounds each of stuff that I keep in the car. So adding more stuff to all my stuff is more weight and redundant. So I think finding ways to use what we already carry...
Frustration	LE	R	Field Responder	26-35	11-20	Male	LE-R-018	[RE: Blackberry-style buttons on e-ticket machines] Well, that's why it pisses me off [laughter]. It's 2017, we should be able to have buttons big enough for me to push.
Frustration	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...So for a while, we sort of lost communication if the helicopter was up in the air and that created some frustrations as a new technology came out and people realized, you get up in the air, kind of like, "Why are you not supposed to use your cellphone on airplanes," because you'll see so many towers. Not that that's going to bring down the airplane. We would

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								hope that airplanes are made better than that. But there's other reasons and they don't always get explained properly as to why they make these rules that say "No." The helicopters there and flying around regularly...
Frustration	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	...we'd recognize, from a workflow standpoint, if a dispatcher does something, how's it going to affect the unit out in the field on the computer? And vice versa. It was starting to create a lot of frustration because somebody would do something on the computer and all of a sudden they would disappear from the dispatcher screen. And they didn't know why.
Frustration	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	Going to the airport and the guy at TSA's holding it up now. They see licenses from everywhere that they have to understand and even they're like, "Wow. These are kind of tough to read." So yeah, I don't know who came up with that idea. So that's, yeah, I guess, another frustrating part that sort of technology related on the printing and the style format. Again, they're trying to use more security in their driver licenses. The REAL ID Act necessitated that, so responding to the federal stuff...
Frustration	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	... if the dispatch tells you it's windy, that was a big discussion. If when the new system came in, if you're digital, do you want dispatch to tell you you're digital? Do you want them to tell you why your transmission didn't go through based on their point because it was too windy and they couldn't hear it, because your microphone was too far away and they couldn't hear it, because it was digital? Or do you just want to be asked to repeat? Big topic at discussions, guys like, "I can't do anything about being digital. What good does it tell me you're digital? Just tell me to repeat." But if it was windy, you should be told, "A lot of wind noise. Please move." Little annoyance things. I try and count. Some guys are, "I'm glad this is the biggest annoyance you have today, and we can resolve this."
Frustration	LE	R	Field Responder	46-55	21-30	Male	LE-R-019	For some reason, having to dial 911 because we've trained everyone to dial 911. It was supposed to be for emergencies only, but we've done a good job of training them. So everyone dials 911 for everything. And I hear stories in big cities of people getting yelled at, "This is not an

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								emergency. You need to dial the administrative line." "Well, can you tell me that number?" Because we've trained everyone, dial 911. Anyway, so people dial that for whatever their problem is and then they expect it to come out...
Frustration	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	[RE: tracking device / suspect] ...And then there's the relay to the dispatch and then our dispatch has to relay to us while they're trying to maintain the channels and then also provide the information that we're giving to them to other people. So then they have to run a third channel, MetroNet, so they're relaying out all of our information to the rest of the metro area...
Frustration	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	[RE: tracking device / suspect] ...So our channels are encrypted so no one can listen to our channels. But they take it to Metro and now they're telling all the information, so now everybody else is-- if you're scanning the Metro channels you're hearing that we're tracking someone. So if the suspect is listening to that, they now know to get rid of the pack, which they did. Okay? So if we can-- I don't know how it can happen because you have to share encryption across everybody. So I don't know if it's a monopoly then if everybody has to have the same system or same-- plus, then, if the encryption code gets out, then now you have to deal with all of those issues. But if there's a way...
Frustration	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	[RE: tracking device / suspect] ...So if we could get on and just air out our information that we're doing this but have it be encrypted for everyone, then it would be good. And then those people that have the trackers can just air up for us and give us direct information because at this point, throughout today, I'm following, trying to catch up to this car, and I'm already two steps behind because the tracker's so slow. And now I'm another step behind because of the information getting relayed.
Frustration	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	[RE: tracking device / suspect] And then I have to wait to get on the air, and by the time we find out that the tracker has stopped, we now block off the roadway, but by then, the person is already long gone. We don't realize that because we think it's immediate information, which it's not...

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Frustration	LE	S	Other Public Safety Personnel	26-35	6-10	Male	LE-S-021	So I just recently just started doing this again because I can't stand listening to it just blaring out through the mic here. But when I was on patrol, I would say I could probably make one last three weeks and then I have to buy a new one. It's usually, generally, not the earplug itself, it's generally the tube. But I mean, there's a variety of selections, like I said, of these. This one I cut down because there's all sorts of different flaps and stuff that they come with. There's ones that come conformed to your ear that still allow some of the sound to come through. They bought us and had us made specific ones that actually conform and fill your whole ear cavity, and it's supposed to have an air hole in it, and it does have an air hole, so it relieves pressure, but it's supposed to allow for sound but it doesn't allow sound. So there's got to be a better solution than this.
Frustration	LE	S	Field Responder	26-35	5 or less	Male	LE-S-022	[RE: logging into 4 separate SW systems] Usually you have the same user name for all of them. But then the password is whatever you want. But some of them change every 90 days or so, and some of them don't... It's pretty irritating.
Frustration	LE	S	Other Public Safety Personnel	36-45	6-10	Male	LE-S-027	Well, I mean, I think just law enforcement in general, as the world is the way it is right now, our name is-- as a police officer, a lot of people look-- some people look down on us and what we do. So that is a huge challenge, and a lot of it comes from well, social media. It's good and bad.
Frustration	LE	S	Other Public Safety Personnel	36-45	6-10	Male	LE-S-027	But yeah, we wouldn't want the car thing because people see us and they already yell because we get the exemption of-- technically, I can be on my phone
Frustration	LE	S	Other Public Safety Personnel	36-45	6-10	Male	LE-S-027	Yeah. So if we're responding to something and for some reason we need to be on our phone, we can be on our phone. So most of us, we're not going to drive around like that because someone's going to complain about this. Not that we would need to
Frustration	LE	S	Supervising	36-45	21-30	Male	LE-S-028	because oftentimes people will call in and go, "Hey, my car got

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Field Responder					vandalized." And so you're like, "Send me a photo of it and we'll talk about it on the phone." That way I don't have to run eight miles away to get that data, and it could just be passed on through. While they're thinking about it, while they're doing it, it can just be passed through. I don't know what that looks like for data retention, so that's going to have its caveats as well.
Frustration	LE	S	Supervising Field Responder	36-45	21-30	Male	LE-S-028	..Obviously, we deal with so much more than we did 15 years ago when it comes to developing the social media area. I mean, we've had investigations-- I've had investigations that lasted through years, tracking people through social media. And I don't know that we'll ever find true technology that will be helpful there because those agencies are all balancing privacy with criminal activity.
Frustration	LE	U	Field Responder	56-65	31-40	Male	LE-U-030	There will always be our detractors, our critics. And police work is a very public thing, and so it does not strike me as unusual or unacceptable that we do fall under scrutiny and criticism. I think that's just part and parcel of the job, and the critics, the detractors, I think, get more attention drawn to themselves or paid to them than the supporters because the supporters are usually, I think, quieter, less vocal, less public about their praise and appreciation. And so the media is drawn to the attention from the negative aspects. But again, I think that's entirely understandable. I don't worry too much.
Frustration	LE	U	Field Responder	56-65	31-40	Male	LE-U-030	...because you have to log into the computer, and sometimes that's a little bit slow. And then you have to log into the in-car video system, have to make sure that's working. I've had any number of times that you're halfway or 80% of the way through, and it just isn't working. So you have to shut everything down and start all over again.
Frustration	LE	U	Field Responder	56-65	31-40	Male	LE-U-030	...Sometimes the technology fails and the radio doesn't broadcast clearly. There's static. It's broken up, and that makes it even more frustrating. And that's fairly rare. But there are kind of little dead pockets all over where if you happen to be-- of if you're inside a building, sometimes, the radios don't work well.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Frustration	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	Well, that's almost a little bit of a sore spot for me, because the bike officers in the other precincts have cell phones where there's a program where they can run names. I don't have that--
Frustration	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	Yeah. I can't get to those from this. That's a little aggravating sometimes. (from 07:46 - he is talking about Outlook email: We have Outlook email and I'm unable to look in my other folders with this cell phone. I can only look at my inbox.
Frustration	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	Anyhow, so they looked at that guy's photo and as they're biking along, "Hey, that's the guy on--" and there's probable cause to arrest him, so they placed him under arrest. It turned out that was a stolen car. So now, because he said, "Ouch," I have to do an investigation as a supervisor into a use of force, so I have to have a camera, so--
Frustration	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	So in a police car, we had and used cameras and microphones. And to be honest with you, it wasn't that big a deal. I don't really understand what the problem-- they make a big deal about it here in [City] when people forget or they crash, or whatever.
Frustration	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	But they're getting on radio and they have to tell radio that, "Oh, my ICV isn't working," or "I wasn't able to log on." And we have to get this on radio, which is another stupid thing, so the officers don't get in trouble.
Frustration	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	It's just another piece of equipment we have to carry and think about. And in that regard, it's a little distracting. It used to be that to activate it-- a lot of guys would wear it right here. You had to push this button twice--
Frustration	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	Well, and so much-- I mean, how much equipment do I have to carry? This stuff all weighs probably-- I mean, I'm probably pretty light at probably an extra 15 pounds. One of my officers wears a vest. It's 30 pounds.
Frustration	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	...But now we put all this crap in here and when officers have accidents, and they have accidents, nobody has said this is safe or not. I'm sure there's been a lot of injuries from-- we don't look at that stuff when we buy this equipment. We just shove it in there. We just shove it in there and say it's good to go.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Frustration	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	Fatigue is an issue but nobody will look at that. Anyhow, I don't know how I got off on that.
Frustration	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	Right. The really important stuff is going to get forgotten, and the minor things get remembered. So that's kind of-- one of my pet peeves actually is when-- I'll be honest with you. There's another sergeant on the watch-- we get a lot of things in our emails and those go to every officer, but it's things like-- well, there was an email from somebody at the 911 center saying, "Hey, please ask the officers not to talk between themselves on their MDT, but talk to radio so I know," because apparently, they said, "Well, we saw the suspect." Well, in my mind, that is-- one set of officers, why would I go to the entire department and say, "Hey, quit talking amongst yourselves or don't-- make sure to share that with radio."
Frustration	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	It's redundant information, and these are officers that-- what should have happened was at the time was the dispatcher should have called their sergeant or called them and say, "Hey, listen, I know you see the guy, but you didn't share that with me. Don't--" send it to each other, send it to me. But instead, they save it up and they add it to a couple other problems and they send it out for the entire department. And it's like, that is unnecessary.
Frustration	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	Certain categories, some really just pretty serious felonies, and then some larcenies, and thefts. But these, for the most part, are all felonies. I'm down here in the weeds and most of the stuff that starts, starts as misdemeanors. So when he sends me this information about these crime trends in my precinct, about robberies and-- well not robberies - that's not exactly true - but some of these other crime trends, it's like, I can't control those. I can't control trends. I can control specific incidents. Anyhow, so he shoves that information down to me. He sends some other information down to me and I've even turned to the other sergeants, I said-- I've asked them, "How do use that information you get from the captain? What do you do?" and they go, "We don't even read it."
Frustration	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	It's irrelevant to me, but he feels it's important. So I mean, we've met with the captain, but it feels like to me, what needs to happen is, is if he

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								wants me to think like him, then he needs to tell me why it's important to him.
Frustration	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	What he has to answer for and how he uses it and synthesizes it is different than my need for it and for him to just shove it to me doesn't do--
Frustration	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	Exactly. And sometimes I'm not sure what he wants me to understand. I'm not by any means stupid, and neither is he. But there's a piece there also. I'm not quite getting what--
Frustration	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	...I know that he is going to be in jail for a very short time. He's going to be back out, and I wanted to look at his picture. So I went into this system, took his name, ran his name, found him, found his picture, printed his picture, got up and walked over to the printer that was a mile away--
Frustration	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S2] And I will use one that he used is challenging. That was my number one right now. I'm basing it right now on how I feel. It's challenging. It can be frustrating, but on the other hand, it's fulfilling work, it's worthwhile work, and it's important work.
Frustration	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S2] it's a little frustrating because there's all these initiatives and things happening all around, but the number one thing that we have to remember that is the most important is keeping the lights on at that com-center, answering those phone calls, getting those dispatched and keeping the officers safe. Sometimes it can be challenging to try to brain in everything happening around us.
Frustration	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S2] Or all the body-worn-- all the video that's happening. All of that needs to get integrated. Every bit of it needs to get integrated, and we're so far from that. I mean, we're struggling with that right now with how are we going to take body-worn and know what the call was and what was the officer doing and just all of that?
Frustration	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] ...If you don't get that initial buy off on technology, that people don't understand it, then they don't use it and then it just becomes a shelved item that collects dust. So we've seen that happen countless times.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Frustration	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] You can go anywhere in this department and find older employees embracing technology, being evangelists for the technology, so I don't think that's the issue. Could be stubbornness. I think that happens from time to time though, where people say, "Enough's enough. I don't want to learn a new system. I know how to do my job. I know how to do police work. Why do you keep changing things on me. What are all these new things coming at me?"
Frustration	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] Yeah. I think maybe a small number, and it's probably small, is unwillingness to, I think-- "I'm a cop, or whatever. I'm a first responder. I know how to do my work. I don't need any of this stuff. I'm not going to even deal with it. And I'm going to do as much as I can to keep circumventing it as long as I can."
Frustration	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] That's another one that I think is in progress and has been for some time, so we've made strides to get into single sign-on sessions for a lot of the homegrown apps that we've talked about. We've got two-factor stuff with our IDs with Imprivata systems where you can log on with your ID. There's other two factors where it's an ID and a PIN, and then there's the wide variety of Windows passwords that live in the 90-day password reset time frame for everybody in the city. That's different than application logins that you might log into once you get into Windows so.
Frustration	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S2] It's a mess. I mean, we all have 15 different passwords for different things that we're getting into. Different usernames sometimes. It's our unique identifier that's numeric for us as employees. Sometimes it's--
Frustration	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] And every person manages passwords in a different way, whether it's electronically, or on a piece of paper, whatever it is. Just looking at the [heat queue?] or ticket service that comes through for end user support, I see a whole lot of password resets just about every day.
Frustration	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S2] I mean, there's just all kinds of stuff and they'll bring it up, but it's a big pain.
Frustration	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] Yeah, and actually that's a really good point. So we've got security standards which you guys are very familiar with, and we have some of

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								our own that sort of add to those. So the [State] security standard is out there floating around somewhere. We had to walk the fine line at least in the 911 center of using a pool or shared password or username. If we didn't do that, operationally, we're talking about a minute to two minutes of time switching people in and out of seats which happens all day every day all day long to the point where, yeah, two or three minutes doesn't sound like [inaudible] minutes. But yeah, when there's calls pending and everything else--
Frustration	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] Logging on is the last thing you want to think about. So we try to be compliant, and are in most cases unless there's a severe operational impact.
Frustration	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S2] And I was leading an effort through the county 911 office to maybe look into having CADs that talk to each other or eventually having one CAD system, etc., etc. It was painful. It was painful, because everybody does their business differently. Everybody wants it their way. Nobody really wants to change.
Frustration	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] ...Not to say that doesn't cause all sorts of boiling up tensions inside the comm center. So you're going to have people that need to get separated I think at certain points in time, not maybe physically because they're fighting but just I don't want to sit next to that person right now or you're always going to have that in dispatch centers. I think we've got a lot of new people over the last two years, the type of people--
Frustration	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] We can't get an SMS. I can call Domino's and they know what I ordered four years ago. They probably would make a good recommendation for me but I can't do that in 911. So that can be frustrating sometimes.
Frustration	LE	U	Not specified	46-55	Not specified	Male	LE-U-041	[S4] But you mentioned something really important, and so did the chief. There's really a lack of appreciation. And the way vendors come in and the way they want their product sold and, "Well, we'll just use this one thing for everything and it'll solve our problems. Voice, data, video, you name it." And there's such a disparity between the worlds of mission

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								<p>critical voice and the infrastructure and the types of devices that we use, and the simplicity of it. I mean, really, when you're out there and you're a cop and you're not doubled up, you need something that you can just click and know that you're going to get a voice on the other end of the line. Whereas the more advanced these get, the more I have to click in, the more I have to do this, the more I have to do that, and it's a challenge. Everything from ruggedization to battery life to the differences in the technologies, I mean it really, really-- even though people say, "Oh. Well, we're going to deliver on this." And probably when you talk to the fire department, you'll probably hear a lot about what they do on a daily basis. A lot of communications is point-to-point for them. Rarely is our communication point-to-point. Everything is done through dispatch, except in cases where you have your special-- we have special TAC channels between the police and fire and TAC-U, but we have that point-to-point with the fire department. But, again, the human factors element is something that really-- having all your eggs in one basket, cramming that down public safety's throat is not necessarily always the right approach. That's really important.</p>
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	<p>You try, but for every one there's like three more, and then three more, and you see them especially down here. You seem like you're not getting ahead of the game. And by providing all these services and city workers are taking pay cuts to keep these shelters open, free exchange. When people are coming out of [art?] and have their kids to go see Hamilton, they don't want to walk around skipping over people who are shooting up in the middle of the street. But like other cities where they don't have the services like we do, because we got every grant and everything here to get people off the street, everybody gets sent here. So as a sergeant, I try to manage that. Like sometimes, I don't have the resources, and all of the sudden I've got a protest, a black lives protest, so those cops that are on the bikes, those cops that are walking the foot beat, they're not out patrolling the neighborhood that people think the cops are there; they're in the middle of a protest. So that guy that was supposed to be picking up, that's going to a homeless guy, "Hey, sorry I know this is what</p>

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								you're supposed to be doing today, but I need you to cover, handle some runs, because people are calling 911, and they got robbed," and I can't call them up, "Sorry, we have a protest." Just can't do that. So as a supervisor, we try to manage that as much as we can. Most officers at this station, they normally don't even get off, say they work a 10-hour shift, they don't get off at 10 hours because they're writing police reports. It's not like TV where you're going to make the arrest, and that's it. Now, you have to dot your I's, cross your T's, and then the sergeants have to read the reports to make sure everything, you know, all the elements there. Because once it goes to court, if it's not there, it's thrown out.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	We're just challenged with-- look how long it took you to get down here with traffic and stuff. So try and imagine me trying to get with lights and sirens around.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	It's horrible. That's why it's great you have bikes. Get up and down with the bikes real quick. I go and handle calls for service, just like [inaudible] there's times, and I'm sure you guys work for people who they worked in position, they kind of went up the chain, but they forget where they came from.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	So there have been times where there's just one officer for the whole Tenderloin, going from call to call by himself because all the officers are tied up at the protest.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Yeah, here, basically, the Bay Area pretty much is a very liberal part of [State]. It's all around here. So we get a lot of-- I mean I've had people-- we go to so many protests about the pandas being mistreated in Africa or crazy stuff, like really? We're going to protest here? The oil. There's a new one up. What's the oil one?
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Or they used to do it-- because after it's all said and done, we get the complaints of, "So they used a key and they keyed my car during Critical Mass, and I wanted to file a police report." And then I wait with the person at the window going, "You guys aren't doing anything about it. I

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								demand to speak to the supervisor." Here comes the supervisor's boss. I go out there, "Yeah, can I help you, sir? What happened?" "You guys are not doing anything about this. What's going on around here?" Or the person who called 911 and saying that there's a homeless person in my doorway. By the time the officer gets there, then I get some advocate from the Homeless Coalition saying, "That person is not doing anything, officer. Let me get your badge number and everything. Where is your supervisor? I demand to speak to your supervisor." So these are some of the things I have to go out to the scene by. The problem is he is in violation of a doorway. Well, this officer had no reason to wake him up that way. Or the officer had no reason to talk to him that way. He's homeless. There are dope dealers around the corner. You guys aren't doing anything about it.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	And they say look, the officer is beating him up. They don't see what happened before that. They never do. So it's nice having the body camera to protect us and say, "Oh, really, we're going to show the whole video on TV, all right?" And then usually that lasts about two days in the news, and then they go off to something else, the President does something stupid and then all of the sudden that blows up. And actually, that's been pretty good for us because he's doing that on a weekly basis [crosstalk] he Trumps everything over.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	We also have families that live here. So we have actually kids that are actually growing up a lot faster than they should. We have only one park in the district. Kids can't go out and play and throw footballs around and stuff like that. No way you can do that. They're also stepping over needles. They're learning at four years old, that is needle, don't touch it. So they are seeing a lot of mental health. They've seen a lot of that around here. "Why is that guy with his pants down around his ankles? Why aren't the cops doing anything about it? Oh, the cops just grabbed him, but now I just saw him an hour later. Why is he out?" "Because he's already been to a psych ward, they have already given him his blessing, and he's right back out." He needs to be conserved and everybody falls

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								back to Reagan. Well, it's not a Reagan issue. Even though he closed down those places, they've had many governors since then. They could have fixed this. There's no where for them to go. Unfortunately because of our SROs down the [Location], everything gets filtered down here. So for instance, the clinic that's in [City], the clinic that's in the enrichment district, a clinic that's where the wealthy-- there is no clinic there. So where do they move them? They move them down here to the [Location]. Now that area is cleaned up. That city's supervisor gets all this praise for getting rid of that clinic. Well now that clinic is down here.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	I have clinics that are across the street from parks. It doesn't make any sense to me. You have a park, and you have a clinic right across the street so kids are in swings watching people shooting up right across the street. And they are victims. In reality, I'm not saying they're victims because when we arrest them they-- and it gets dismissed. They say, "But the person's an addict. He's a victim. He needs to go. He needs services." Well now you just spent an hour and a half, an officer wrote a report that this guy was shooting up I mean illegally, all right? So what do you tell that brand new officer? Right? What do you tell the person who called 911 who is pushing their kid, going, "Hey, I'm sorry. We're trying to clean this up." The big thing is displacement. See, I do have that officer in that corner. And he just kicked out that whole block of people there who were shooting up. Where did they go? They have to go somewhere. So then they go somewhere else, and now somebody else calls and says, "I don't know. I've been here for three years. Now all of a sudden I have all these people here." Why? Got displaced.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	But that normally doesn't make the news. What makes the news is that officer harassed this person of color and said-- and he's irate and it's all on film. So what happens, we get the tendency of officers go, "I'll just go wait for that person to call 911 and just go handle the call," right? "Because I can't get in trouble that way. But I can get in trouble, accused of racism or something like that, for just making contact with somebody." And they get afraid-

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	That happens all the time especially when you have the seatbelt on. I have my seatbelt on in the police car, and I come out of the car [inaudible] or every altercation I've ever been in or helped out, it falls, because it's on a magnet and you can't attach it to your uniform because it'll rip your uniform. Some cities have them on their lapel here. It's limited. And the other thing that's limited too is that this is for the shootings, and they want to see, but officers shoot like this. This covers it, the camera part. And if you wear your rain jacket, you don't have that connection but this is still in the steps as I can hear technology things start to get better, clamps start to get better, magnets start to get better, just like anything else.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	And that's usually from those footbeat officers making that contact with the people on the street. And usually, it's, "Hey, you didn't hear it from me, but so and so," and they go, "Really?" And even at the district attorney and his attorney drops the case, I got a gun off the street. It sucks to think that that's why the sergeant tries to make sure that the Ts are crossed, the Is are dotted. We just try to keep on-- okay. What can the defense do on this police report to eat this up? Okay. This is a lead case. But no DA is going to give him back that stolen gun.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	So now the advocates are telling us that, "Well, you should be CIT trained, crisis intervention training," which we are. So, basically, I gotta talk cuckoo to this guy who's already cuckoo. But there's no cop that wants to get hurt. So we've already been doing this. It's just that right now, because the videos and what's been going on nationwide about these shootings, we had no reason to shoot them. For [City], I [haven't had?] an option right now. That's why we keep on lobbying for tasers. We need the tasers. We need the tasers.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	These guys, they would know on the street, because some of these guys have been tased before from other cities, and then they're coming down here and yeah. That's not going to work with the guy that's done PCP or meth. You sat there and said, "Hey, you want to go to Disneyland?" He didn't even hear it. Whatever I tell him, he's not listening anyway. So what

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								the other option, what you do? We can wait him out. But now he's frantically having a knife and he's swinging and now people are filming it. Oh, the cops aren't doing anything. Look at that. I have all the time in the world.... So they say that we could use our crisis intervention training, which is on the news, but we also have body cameras. So I guess if I throw my body camera at him--
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Right? So what do I do when the ICE agent or the Feds call for backup? They're an officer. What do I do? Do I not respond? Or do I do respond? I have to ask those questions, "What do you need the backup for?" or, "What are you doing?" "Oh, we're doing immigration law." "Oh! Oh-ho-ho-ho-ho-ho [laughter]!" Right? And I got to backup right away? Oh, no, no, no, no, no. Right? He's calling for help. What do I do? Right? So they stop people all the time. Just like anything else. Hey there's a guy over, have a knife then it kinda goes through their dispatcher, it goes through our dispatcher, and I come flying down there, you know, 'cause I'm thinking there's a cop in blue calling for help. Their politics are different from our politics.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Instead of coming back here and trying to figure out later all the 15 entries that I have on my camera, and now I have to tag each one of them, and then you have to pull the CAD of your history for the dates, and it's kind of a pain in the butt.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Yeah, yeah. "Here's a contract in your blood. Here's your blood," just you know. But and then our cars. The biggest thing is our cars. We have cars that have 160,000 miles on them and they're just barely getting through. They keep on putting Band-Aids on them. It's not the department's issue; it's a City Hall issue. You ask for five cars, and they say, "Okay, well, we'll give you two." And then what happens we go through so many chiefs, that when the chief [inaudible] by the time he goes through all the paperwork and a new chief comes in, they have to start the whole thing all over again.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	And then they go, "Well how many times have you go down to BART?" It's not how many times, it's that one time that you go down to [bars?], yeah.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	So then and then you keep on charging them over and over again, so that 100% charge is no longer 100% and that time you can only maybe get maybe 50% out of it. So cops carry-- we work a 10-hour shift. So originally we went these, they are buying 8-hour batteries on 10-hour shifts that didn't make any sense. But somebody had a bright idea, "Oh, they can just go back to the station." So that doesn't work--
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	I mean, I was taken off the street. Which I do what I'm told. But I was off the street for a year to do a re-banding project. So I went through 6,200 radios citywide, the cars-- I was taking the radios out of the cars, unscrewing them--
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	" We don't practice that. And unfortunately until something happens, then they make changes. And that's been the history of every police department. Until something happens then they make changes.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	We were never proactive. We're always reactive to different things and that's just the history of the police department. A smaller city is a little bit more proactive, because that's what they demand from their city council and things like that. A big city like this, we're just catching up. We're constantly catching up.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	So that's the most frustrating with the people that are calling 911. They have a script. "What's it look like?" [inaudible]. "No, what's it look like?" Right? Because they have a scripter going [inaudible] even with the fire side. I need an ambulance here. "Why?" Because they have to figure out what type of-- are they bringing firetruck also? Are they bringing police who might be closer with the [AD?]. What's going on? "He's going nuts, I need a--" well, if he's going nuts, they're not going to bring the fire or the ambulance crew by themselves.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	So I said, "Here's a call. Here's a CAD. It's an A priority. One of these six people in that corner have a gun. And they're wearing black clothing. Wait a minute. All six are wearing black clothing? so what do I do? Do I get out and point my gun at everybody, because now its going to be on YouTube. Or I do nothing. Right. They couldn't answer it. One was said,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								"Well, you can't do nothing." I said, "That's correct. I can't do nothing." But if I do something, I'm going to get in trouble. Be called racists. You know who's racist? The person who called 911. I'm not going to ask dispatch for that information. No, its in CAD. Here's his name, Mr. [Name]. "Hi, Mr. [Name], how you doing?"
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	It's great to the have the technology on the cell phone and stuff, but when I got my kids, they're in the back seat, and they're texting each other in the back seat, I want to sit there, grab their phones, and throw it right out the window, right? I would throw it out the window but I paid for the phones, so [laughter].
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	But that includes the command staff down below. What they do [inaudible] communicate with somebody. I email them. If you're pissed off at me, don't email me.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Tell me what needs to be done. We'll go get it done. Don't text me. I get guys who text me all the time, "Hey, I texted you. I emailed." I was off. I was out skiing. I was up fishing. Oh, if you would've called me, I would've given you the answer right away. They don't know how to communicate. And a lot of it is these kids. How can you communicate with a 17-year-old kid that doesn't play basketball, he's now on the streets doing sports, is not playing video games, because he can't afford a video game, but he has a cell phone and he's hanging out with the wrong crew, and how are they communicating? Instagram, Facebook, and they're texting. That's all they do. Sometimes I wish, okay, I want to arrest that guy. Let me text him, "Put your hands up."
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Yes, yes. "Put your hands up. Turn around. [inaudible]. Emoji, emoji, emoji, emoji."
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	And this first time the community has talked to the cops in months. And they're still doing this thing. The Captain says, "You got any issues, you email me." I'm looking at him like [laughter], "Why?" If that was the fact, why are we having a community meeting? We just do a mass email. How about that? Let's just video tape it. We'll video tape it in here.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								Everybody logs on and you video tape so you don't have to talk to anybody in person anymore. But that's what society has turned to now. And that's where technology is hampering, I think law enforcement, is they're not getting out and not talking to you. Every once and a while, you'll get a clip of a cop playing basketball with a kid out in the street or something like that. But they're not doing that. You can't communicate with them unless it's PlayStation 4 or some crazy stuff. There's nothing to relate to. There's no Monday night basketball. I remember you had to be home before the streetlights came on. And if I screwed up, my neighbors had permission to whip my butt. Then I got two of them, from them and then from my parents when I got home.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	And you talked to everybody, [Name]. It wasn't baggy pants walking down the street. It wasn't the disrespect. There are just so many calls with the disrespect. We go to people's houses and the kids [claim?] "Eff you, Mom. This and that." I'm going, "Would you like me to pin him down for you?"
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	No. "Oh, no we believe in timeout. No. We'll give him a timeout. [We'll give him a long nap.?] We do this together." We have a huge generation gap. I got these. We got the new cops from [City]. And worked at Starbucks all their life, and never-- I got an [ebop?] instructor here. I got people who never had their license until a week before the police department, the academy because they never had to because there's Uber.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	I think if the burnout comes from the lack-- from cops making that arrest and then the DA dropping the case, that's where you get a lot of burnout. Anything like, "My captain yelled at me and told me to go out there and zero tolerance on this block because the communities complain about dope dealers and stuff. I go to make the arrest, and then the DA drops it."
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Exactly. What do I tell that new cop? Say, "Sorry that's the way things are, but go out there and keep on doing that good work. You got 30 more years to do." Right? Or the burnout that they get some of the cops that

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								they're on video, part of it and so departments have a jerk reaction. Pull that cop off the street. Get him off the-- the cop thinks he did something wrong. He didn't do anything wrong. He's just in that part of the video, and by the time the investigation is done, six, seven months then they go and tell that cop, "Oh, go back there, you did everything fine, go back out and do the police work you used to do." You just ruin-- he's done. How can you get that [inaudible] to go out there again? So that's where you get the burnout. [inaudible] some of the cops filter out because you see so much here and after a while--
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	The people that do the child porn and stuff. How they could do that, you know? And then they're done, they're just like-- they quit, usually, they quit early, and we do have advantage where you can go to other stations, you can put a transfer request in to go to other stations. Specialize [usually on the horses?] but it's like a waiting list to get on stuff like that.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Yeah, but I had taken a promotion before that. So I was on the dirt bikes for a year, and then my name came up and was like ugh [inaudible] tried to get on the dirt bikes, only here for a year and then get promoted so then you get kicked off, and you have to start all over as a-- so the dogs, I think my name came up in the dogs when I had 14 years in, but I was doing the command van that I was talking about, this other stuff, and I had [to take them car?], and I was like, "You know what, I work in day watch," I was like, "You know what, [I don't want?] to go back to nights with this dog barking at the back of my [head?] [laughter], stinking and smelling." Now I love animals, but I don't think I want 10 hours of this dog. So I waived it anyway. And so some guys do, and then some guys, you know you get to this-- when Google and all these companies went under and guys that .com, so we had a lot of executives that got fired. And so they [took up?] police department, great police departments test. Oh. So I got fired, got a little package but now I got to pay for medical for my family. Well, who pays medical but civil servants? So I got people who are great with computers and stuff like that, so they'll do the police work for about three years and then somehow work their way downtown

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								and start, and they're inside. And they're doing technology stuff. Or you people that are not really street cops anymore, but they like to do investigations. Because they liked it on CSI or TV and try to figure out where all the bullet holes go. So you get people with knack for CSI stuff. After about you get your eighth year in the police department, you usually go one way or the other. You'll be out standing at traffic accidents. Some guys can knock them out real quick, meaning draw them, love the investigation, find out how the car, the front wheel pressure, and they're really great at that. Some guys are great with dope arrests. They can get there and write a search warrant in two seconds. They love all the aspects of it. They go to all the training. They recognize this person's under the influence. Some guys do regular stuff. And I got kind of thrown into it and picked it up. Tracking, bank robbery stuff, car chases, this 2-11 vehicle. I'm great with stolen cars. That's my thing; I profile cars. Some people profile-- you're not supposed to profile, but I profile cars. Because most cars have tinted windows so I don't know what their race is anyways. When I get that Honda Accord, that's on the top of AAA of stolen cars. I say, "It has no plates on it," or, "That's weird, why does this say it's a Honda Accord but why does it say Toyota [inaudible] on the paper? Hmm. Oh." So some guys get after that. Some guys are just good at recognizing people. They get that list of all the people on the wall. They're great at that. "That's So-and-so." "How do you know?" "No, I saw them on the board last week." "I guess." Or some people are great with names or with phone numbers. You know everybody's phone number. "That's So-and-so and So-and-so." So you start to get your act with what you're really good at, and that's pretty much going to be your career.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Until he's gone or she's gone, and then all of a sudden the payroll's messed up, everything's all screwed up. And you're like, "It's like they didn't know." And then everybody's mad at that person. Why didn't you train somebody else? Wait a minute, hold on.
Frustration	LE	U	Field	46-55	21-30	Male	LE-U-010	"Six months ago I told so-and-so I was leaving. I'm not sticking around.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					Bye. See ya."
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Yeah, we do need a shadowing program in almost all professions, as you're cycling people out.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Yeah. But they don't do that. We even have homicide inspectors, are great with homicides, and they know everybody on the street. And then they move them to fraud. Why would you move a person that has all the knowledge of homicides and those gangs and stuff, and now you're using-- he's doing frauds. But the police department, we're famous for doing stuff like that. It's mind-boggling. But I mean, it goes in cycles... It's just that this wave keeps on going down, because we're losing so many cops and when you only have a class of 40 that you normally-- Q: So why do you think you are losing cops? SME: Retirements Q: And why aren't you replacing them, I guess is where I'm-- SME: We are. I mean, the background. I have guys that come back from the Army, and they can't get into the police department here because the backgrounds. Because they've seen [their death?], "I've been to 18 shootings. I've shot 18 people." You think they want-- the police department doesn't want that guy here, but the city might hire him because other cities go "Jump!" and they go, "How high do you want me to jump?" They're already set.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Well now, nobody wants to be a cop. So that's another-- so do I want that person that worked at a coffee shop, all of a sudden is a cop, and there's a guy, "Officers I'm glad you're here. There's a guy in there with a gun. Can you go and get him?" Then the person that worked at a coffee shop is going, "Hmm, well, I know I'm supposed to go in there. I could make a great latte right now," right? The lady, I want you to go get this bad guy and the person's going--
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	What's the incentive right now to be a cop right now? Nobody wants to do it. My brother wants to-- [Name], he joined the fire department, everybody likes a firefighter.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	It's a lot more paperwork now. And that has a lot with the district attorney. They demand more paperwork. We're supposed to be the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								paperless world. I'm killing trees left and right in here with all the paperwork that we're going through. I don't know. I don't know how to fix it. Technology is going to keep on getting better and better and better. This is how we use it.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	Yeah. And so once again, you're doing the stuff on perfect tool. So that's –(sarcasm)
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	My older brother is retired. My younger brother retired. I think post 9/11, we caught a big wave, public safety police and fire. I think 9/11 doubled their wages. 9/11 made us all heroes, whether we deserved it or not. And then reality started to impinge on the image, and the way the city manager of [City] ran [City], and that kind of thing where the city is funded on citations on the backs of their poorest folks. And the cops want to get paid, so they don't write tickets. They don't get paid. So they have to write tickets so that they'll write you three tickets in a day. "Because I got to get paid. I really don't care. I've got to get paid." They've told me. There's no overtime. There's no funds or no nothing. There's no gas for the cars unless I write you tickets, unless we do DUI checkpoints and other enforcement programs to catch the poor tourist driving up from Florida to New York. "40 a day, I want from you."
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	Yeah, it's like hey, what is that? We don't train it. We don't practice it. Fire lives and dies by it. So once again, when we talk about unified command– fires, we run in, guns blazing. We get it done. Fuck the fire department. Just do it. Jesus Christ, all they're doing is tying up the streets with their trucks and their hoses [laughter]. So I've been trying to develop a thought towards a formalized unified command training.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	....But in a conference call with all the movers and shakers of [State] Highway Patrol three weeks ago, I said, "Listen. I'll trade you. I'll give you my A-bank. You unlock the other half, other side of the low-band equation." You would have thought I was asking for everyone's first born on that phone. "If we do it for you, we'd have to do it for everybody. We'd have people on our channel that'd be unmanageable." It's the same shite that everyone had been predicting would happen if we ever had anything

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								that was like you had. No one would be able to talk.
Frustration	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	...Motorola chief technology officer was here about three months ago. And I don't know how they made the mistake of allowing me into the little pow-wow. But so they were going all around and I said, "Who designed this?" Two of the guys at the table. And I go, "Who did you talk to before you did this?" I mean, I don't know how often I was ever able to use it like this in a real-world situation. And I go, "This noise reducing thing and everything else, big fucking deal."
Frustration	LE	U	Field Responder	36-45	11-20	Male	LE-U-013	It doesn't work anymore, but I have a whole presentation. I did it for Command Stop. Everyone loved it. And I wanted to make our job easier, so we're not in the field taking extra time looking up information. And I also was using the Apple experience, where they're talking to you [crosstalk]. They're using their phones to engage with the public. Community interactive technology, but I dissolved the company. I'm not pushing tech anymore. But just drones and just simple information. You have people in law enforcement. They want to build a legacy, and they're utilizing technology in the wrong way. They're making it harder for us because it looks good for them.
Frustration	LE	U	Field Responder	36-45	11-20	Male	LE-U-013	They went to [City], [City] bought it. And then, I guess there was a homicide that ShotSpotter helped, and they're like, "Oh, look, we helped capture a murderer." And then, [City], "We want it," because it's reluctant to change. We don't want to try [inaudible] do new stuff.
Frustration	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	...You're distracted no matter what. You're not paying attention to your surroundings. I mean, back when I started, we didn't have computers... But now, with all the different functions, it makes actually seeing what's going on in the neighborhood harder. And somebody's looking at this box to tell them what's going on as opposed to actually looking at the surroundings and figuring out what's going on.
Frustration	LE	U	Field Responder	Not specified	Not specified	Not specified	LE-U-024	Part of the thing too, everyone's focused on this box of information as opposed to figuring out, talking to people, whatnot, and actually getting the full story. And I know I've been there too. You get a stolen car and it's

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								like you're trying to call it in and figure out where you're at at the moment.
Frustration	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	Sometimes we have problems with dispatchers, and they're the ones who are relaying the information. For instance, somebody is chasing somebody outside and we can see it on the cameras. The dispatcher doesn't always acknowledge the people in the room. She'll purposefully not listen to them. Or if ShotSpotter goes off and, "Hey, there's nine rounds here. Now there's seven rounds," you can clearly see people are shooting at each other with the way that it's going off, she'll purposely not answer. Just disregard, "I have other things to do. You need to wait."
Frustration	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	It causes them to get frustrated with the technology. It doesn't make the transition of getting them to do these things much easier. They would have one password, one email, and after so many tries, if they can't log in into HunchLab one day or log in into ShotSpotter, they're just not going to do it. They're just going to put it in their pocket and like, "No."... Especially if you're going from job to job, from call to call and you just want to log in and go. You're going to try to log in; you're not going to get in. You're going to get a call of a person shot, stabbed, or a domestic and you're just not going to do it.
Frustration	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	...Logging in is a big deal. Yeah, it's very difficult for some people. They have all this stuff going on in their personal lives and now I need them to remember more passwords.
Frustration	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	Q: Okay. Any questions for us? SME: Are you going to get us a single log-on?
Frustration	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	Even updating the software that are on some of the computers. Just upgrading Word or Adobe... A lot of updates. Adobe and Acrobat Reader, just-- Adobe would be nice so that if there was something that popped up on the computer, I would actually be able to type on it. Because it hasn't been upgraded, we don't have access to it. I have to print something out, type it on Word, cut it, put it on the photocopy machine, photocopy it, email it to myself so I can send it out, so it looks like I

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								typed on it... It's just the very long version of I know if we upgraded this, this would make this easier.
Frustration	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	That would be nice. We could upgrade our computers in the station. That's very frustrating when officers come in and they're like, "I have this arrest. I would like to do it but there's no working computers." There are no working computers. So then they would actually have to wait. So we could actually get officers on the street if we had stuff that worked.
Frustration	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	It's pretty consistent with people who come in with arrests on a regular basis. 7 has a newer station. They have computers. In my office, we would like to get one more computer. That would be nice. We have four people in the office, we have three computers... So sort of sometimes it's just we need more computers... And upgrading them.
Frustration	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	[RE: senior officers] So I mean, I understand their point of view too, because sometimes I get frustrated. It's like, "This is basic information," but we'll discuss it more later, I guess. But it's like you got the people that are old school, "Here's the keys. You know where the problem is. Go out there and do it." And you got the new technology coming in. Well, what's going to be able to help us figure out what to do there, what to be on the lookout for? So it's that lap between what the lieutenant is telling you at roll call, and what you retain, like, "Well, be on the lookout. This corner is that-- we're looking for this person, that person." It's like every day you're always looking for somebody wanted. Every day something violent happens that they're trying to find the offenders...
Frustration	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	I think that's the issue that I have with the HunchLab. If it could be a little bit more in-depth or a couple more boxes just to click on. Just to click on and see there was shooting [inaudible] blah, blah, blah. They don't want to give-- and just a quick briefing of what was it about. What is it drug related? That's something that when I log in on the computer, I want to find out that shooting, that's what I read. And there would be some from the detective's division saying, "Okay, victim, possible offender information, possible gang problem." And the detective's good with it because they will always label preliminary what they think the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								justification that shooting was. Was it gang related? Was it calculated? Was it road rage? And they'll say, "Male standing in the corner was approached by blah, blah, blah." And it's a pretty short paragraph like, "Okay. That's what that's about." But that's something that you really can't access on here. I'll have to go back, and here I am, head down in the middle of the worst area in the town district, and now I'm logging in here trying to find it. So I mean, that's the biggest thing. The information is there. It's the problem of accessing it and get the information. Cops are very impatient. We want everything here-and-now, okay? And if it's going to take me too long to try to find it, then why bother?
Frustration	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	... Back in the day, you see some guy standing in the car, you know he's got drugs. You know he's selling drugs. You'd stop him or you'd run this and that. Now I think police officers are-- myself included, are more hesitant to want to stop that guy, just because of the policies coming down on you such as why'd you need to act on it now? That's the keyword, an act on furtherance. What's your justification for stopping that person now? I mean, I think it's still the same thing. I think now, you just have to justify it on paper. I think that's what a lot of police officers have that issue. Like you said, more work, more work. So why do I want to do more work and more paper work just to do the same thing I've been doing?
Frustration	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	...These cameras, I don't know, really, what to say about them. Because really, the only time I really access it is if I have an arrest or something and I want to actually plug it into a computer to view my recording. I mean, this works pretty good as far as that aspect. It's kind of hard at first, trying to figure out what website to go into to put your username, put your password. There we go again. So I got a username and password for this. I've got a username and password for this. I've got to use a name and password for this. I've got to use a name and password for the terminal. So I mean, I've got four different usernames, four different passwords.
Frustration	LE	U	Field	26-35	6-10	Male	LE-U-023	[RE: personal cell phone use] No issues, other than it gets banged up

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					[laughter]. Yeah, it gets banged up. Other than that, I mean, the latest update when I was trying to-- I had my department email routed to my phone, and there was some kind of a disclaimer. And it said basically, "We're going to be able to access your phone." They figure, "If we're going to use the Internet, we're going to be able to access your entire contacts of your phone if we want." Which it was like, "Oh, man, that kind of sucks." My partner went off of it after that. He was like, "Man, I'm going to have to not get my email on my phone anymore." So now, he took, literally, 10 steps back because of that. Yeah.
Frustration	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	[RE: body cameras] ...I think for the most part I think it's been very valuable as a way to capture evidence in criminal cases and I think we've had one or two instances where you know a citizen made a complaint against an officer and we were able to review the video and either show that it didn't happen or show that it did and address the issue that needed to be addressed and so all in all I have not heard anything negative about it other than sometimes the at first the functionality of it and getting it up and running was I think fairly difficult for us to do and some of our staff really pulled their hair out over getting it to work properly but it was really on the manufacturer's side not on our side or our IT department side. It was more the instillation of the product and the lack of support from the vendor that sold us the product.
Frustration	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	[RE: body cameras] They did but it just didn't work. I don't think they knew how to make it work and the manufacturer didn't really help them until there was quite a bit of time that passed until we finally had to put their feet to the fire and say we're not going to pay you unless you get this up and running and so they did get it up and running but there was a lot of frustration but it's working well now and so that's good.
Frustration	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	...so for us it's always a balance of security, functionality and usability and those three have to balance and so the usability portion of it is something that we often don't see. We're not in these applications on a day to day basis and so we cause a lot of havoc along the way and I think it is a daily occurrence. Technology is constantly changing as you

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								well know and you guys are in a laboratory looking at technology on a daily basis and trying to figure out how to secure it, how to use it, how to make it better and so yes, I think it's a common occurrence and I don't think that that will get any better along the way. I just think it takes teamwork to make stuff work effectively.
Frustration	LE	R	Other Public Safety Personnel	36-45	6-10	Male	LE-R-043	... It's like I just want what you know so it's tough, it's frustrating and that's where that inoperability breaks down because nobody wants to learn how to turn their radio to different channels.
Frustration	LE	R	Other Public Safety Personnel	36-45	6-10	Male	LE-R-043	... It's really tough and frustrating and so you don't know any more that's not work that's just life right? You don't know who to trust or what you say to who or where it's going to go and how big it's going to get. Again that cell phone thing right?
Frustration	LE	R	Other Public Safety Personnel	36-45	6-10	Male	LE-R-043	... It gets a little frustrating I guess at times when you don't have your voice heard but at the same time you just know that. That's not why I live my life. That's a philosophy thing right?
Frustration	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	Five cartons of carbon copy, there's five carbon copies and you got to push hard, it's a pain in the butt and so ISP they literally slide the driver's license, check the box for the violation, spits it out and they're done so it does a couple things for us. Number one it kind of automates the process and number two when you think about it from a safety standpoint when you're sitting on the side of the roadway if I can be on the side of the roadway for 2 minutes less that might not seem like a lot. But you take two minutes over a ten hour shift over you know a 52 week year and that's a lot less time that I'm exposed to a dangerous situation and the same with like the MDT's you know when we have issues or when we were running everything over the air when we do the wants and warrants checks over the air that takes longer than me typing into the computer.
Frustration	LE	R	Field	26-35	6-10	Male	LE-R-044	...I want to help people who want me to help them but if you're the guy

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					that's saying screw the police and you call because your neighbors are harassing you I don't want to have to respond to you but I have to. You know what I mean? And so trying to bridge that gap can be really frustrating because we actually have that happen where people post things on Facebook or send a nasty gram to the department, tell us how horrible we are and then their car gets stolen and guess who they call for help. And so that's tough that's an industry issue that is really tough and from my perception trying to be safe as safe as we can and minimizing that risk helps with that from my side and don't misunderstand me I'm not saying that I wouldn't do it or I'm going to stop doing it. It's a challenge in the industry I have a wife and two little kids
Frustration	LE	U	Field Responder	26-35	6-10	Male	LE-U-051	... Public safety so the police department gets the raises, the fire department gets the raises, the fire department and the police get what they need whereas here we're part of campus services that's who we answer to in the structure. The name alone implies services.
Frustration	LE	R	Field Responder	46-55	21-30	Male	LE-R-052	... It covers everything that we want, however, there are places once you get into it, your signal drops to one bar, you have no Wi-Fi, you have no four light, you're back to the stone age. A Dixie cup with a string is more effective at that point. And our, my file [phonetic] on the computers is a Verizon. So the same problems that you're having with your phone, you're going to have with your computer. So that's when your radio really kicks in and is helpful. But we have several failed safe, so if the radio's having an issue, we have a repeater that we can go to back to our regular channel, just using a regular repeater, 700 Mhz.
Frustration	LE	R	Field Responder	46-55	21-30	Male	LE-R-052	... It gives them what you call AVL, automatic vehicle locator that is allowing us to see where they're at. When the computer drops or they have a service go down temporarily, or they're doing an update and you have to sign out for at least, sometimes an hour, you're in panic mode. Like man, where's this deputy, where is he at? I can't see you. Where... it drives you batty. And I never thought it'd be that way, because you always worried about somebody tracking you, big brother watching you.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								But now, as a supervisor aspect, I couldn't see doing this job without the technology. Without the ability to see where everybody is at.
Frustration	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-053	Well, as a patrol officer it's really not too bad, but when you get into the administration portion of it, you start to realize that fighting the criminals is only is the easy portion of your job. When you get into administration, fighting the politics and the bureaucracy that goes along with the administrative work is hard. I mean it's, sometimes you've got to pick the battles you want to fight, and other times you've got to let things go that really bother you when, I mean it's--sometimes I mean you're just speaking on deaf ears and you try to do the right things for the right reasons but I mean all in all over the span of my career it's been a good career. I mean I don't... I don't really have nothing I regret. I mean not too many people have been able to say they'll be able to retire at 47 years old and collect their full salary, so I mean is that the answer that you're looking for kind of?
Frustration	LE	U	Field Responder	26-35	6-10	Male	LE-U-056	...That was always really irritating me. I get--I'd move a lot of things around, I'd put other things in the way, that's really where I like them to be. I don't hear that complaint as much with some guys, as we go into the smaller radios, the dials are just kind of in different places. Once we get more tasers in, I'm supposed to go to the class to get issued a taser.
Frustration	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	... As far as anything else, it really - you know, when a system goes down, it's incredibly frustrating because, inevitably, as in anything, you know, you are going to have systems that go down and if you don't have redundancy built in your system, or have a fallback, you are done.
Frustration	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	... It's frustrating I think, more than anything to know that that technology exists but not have that technology for everybody involved, you know; it shouldn't be, because, you know, say for instance [City] has deeper pockets and has more budgetary pull than say another jurisdiction in this country or another jurisdiction across this country; that shouldn't be the case, you know... I think that is probably the most frustrating thing, is this technology is available for everybody to work in a safe environment or a safer environment than what we currently have, and trust me, you

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								know, our system is certainly not the worst system, you know, in this country; I guarantee that. But that I think is probably the most frustrating thing, and if there is something that I could change, it would be that, just the fact that we all need to have a system that we can rely upon when necessary, and quite honestly, the citizen should demand that and they just don't, you know, because I don't know that the average everyday citizen understands how fragile our communication system truly is - I don't think they understand that I can't talk to, I can't even talk to [County] which is less than, you know, fifteen miles away from us, you know; I don't have that ability, and I don't think people truly understand that.
Frustration	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	No, honestly I think we have covered a lot of different topics. It's - like I said, the biggest thing is, I guess, from an administrative level, is the frustration, you know, knowing that I have officers out there that these communication systems are their lifelines and having that and knowing that system is as fragile as it truly is.
Frustration	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	And they have. And much more than, you know, it's always been politics that drives policy to a degree, but you know, we always used to be able to tune it - it doesn't matter if its law enforcement or fire, we always used to be able to defend kind of what we did because of, you know, rational, legal, objectifiable, you know, data. And now it doesn't matter.
Frustration	LE	R	Field Responder	46-55	21-30	Male	LE-R-060	When we talk about, you know, we got all this technology people, you know, things that fighting cancer by training different cells to attack different cancers but we can't talk to our neighbor, you know. It seems kind of foolish.
Frustration	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	It's a change of - it's a generational thing. To me, it is a - they spend too much time worrying about Facebook. They spend too much time talking and texting back and forth to their friends. I don't like that and it's a pet peeve of mine because I don't pay you to come in here and play on Facebook all day because you have to be updated with your social media all the time, but it's a never-ending battle because these kids, they have to be talking to somebody all the time. It's like, I don't understand it

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								but it's me, but that technology part I think is actually a negative impact on the work place overall.
Frustration	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	Yeah, that's a pet peeve. I mean, when I started here, we had a very different 911 phone system. We had these big black boxes with red lights and stuff on them from like the 1980s. They were dead reliable, they had no problems, they were high quality, they were well laid out, nobody had any problems with them, they were just fantastic.
Frustration	LE	S	Field Responder	36-45	11-20	Male	LE-S-064	MDTs also don't work very often; they lose connection quite frequently and if you are trying to do something and it drops the signal so it's frustrating.
Frustration	LE	S	Field Responder	36-45	11-20	Male	LE-S-064	Yeah. It - I mean these things half the time don't work. They fall, you know [unintelligible]
Frustration	LE	S	Field Responder	36-45	11-20	Male	LE-S-064	Just the ability to have user friendly report writing functions and search functions and stuff like that, you know; when it is not user friendly, it becomes frustrating because it is time consuming and then if it doesn't work that's even more frustrating because then it eats up your time by trying to get around - it's easier if you could just write your reports in the car when it works, instead of having to come in here and do it. It is faster, it is easier. If the network is down, then that's impossible.
Frustration	LE	S	Field Responder	36-45	11-20	Male	LE-S-064	And add functionality, I mean, if you have one that doesn't have a lot of features that you take for granted with the one you currently have, then that's kind of frustrating too because then you - for example, the one that we have got now has got a huge name database that - and if you have a first and last name and that's all you have for somebody, like oh yeah, [name] did it [unintelligible] there are a million [name] but all I gotta do is type in the first and last name and it comes up with a list of all the contacts if they have ever had, like if they were even arrested or got a ticket or say been a name in our record, it pops up with all those options to choose from. Now you go to a new system all those names are not gonna be in there.
Frustration	LE	R	Supervising	46-55	21-30	Male	LE-R-058	Oh mercy, yes. You know when I found this body worn camera, new age

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Field Responder					technology, right. So, it's new -- we had in-car cameras but I had my chief of operations, who he is retired now, you -- And Sheriff, oh that will never work. That will never work, that's crazy. And [Name], he wanted to take the cameras and dump them off the [Street] Bridge and [inaudible] because he said a policeman's word doesn't mean nothing anymore. And it is sad you know you can't go up there unless you have got it on video, it doesn't matter. The policeman's word doesn't mean anything. That's crazy. But it is true but you are not going to regress, you know, so we got to embrace this.
Information	LE	S	Not specified	Not specified	Not specified	Male	PS-S-002	...And so I kind of pressed the issue a little bit and he came back in and he didn't have my yellow pad with him. And I said, "So if you want your laptop you can go get the yellow pad and you can come back and get the laptop." And so he did. And I said, "And just so you know, I pulled up the Internet history on the laptop while it was sitting on my desk here." And I said, "You like this laptop because you get to go and surf the web and do all the things you want to do." I say, "Guess what? We pay for this laptop. You're going to do some of the things we want you to do with the privilege of being able to do the things you want to do." And then I told him also that, "You need to go back to your briefing and tell all those guys that this thing is actually a decent piece of equipment."
Information	LE	S	Not specified	Not specified	Not specified	Male	PS-S-002	Well, it was interesting because my husband and I ended up in a similar situation. He was working in OSTP, Office of Science and Technology Policy, and that's considered in the president's office. This was X years ago. And so they had a call for all emails that included some piece of information. And [Name] and I were both like, "We talk between this phone all the time. They're not going to search every one of our emails. But, again, if they want to that's fine." I mean, it's doctor's appointments, it's the boys are doing blah, blah, blah, and whatever. But yeah, you feel like, "Wait a minute [laughter]."
Information	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S2] Mmhmm. Yeah they communicate with them every day. They work pretty closely with the other agencies assisting them basically with any criminal justice information that might be needed or researching or

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								getting them reports or phone numbers or whatever it is they happen to be requesting but they work closely with all of the responders.
Information	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S2] ...But in the future that's you know just pretty much with a push of a button, you'll get the recordings, you know people will be able to submit pictures, videos you know whatever the case may be so it will change the dispatcher's job dramatically.
Information	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S2] So they get the address, the first piece of information, their name, their phone number, they determine the call type and then from there it will determine whether or not they're opening up the EMD program.
Information	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S2] With our CAD system you have to have an address and a call type to get a recommend to send a to page out for police or fire so those are the primary pieces of information that they have to have immediately and then from there it's just data collection of you know depending on the call type whether it's clothing descriptions or suspect's names, weapons, children involved, vehicle descriptions, road of travel and if it's an accident it's related to injuries, leakage, Hazmat stuff so they have their with EMD they have their line of questioning.
Information	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S2] Well we were just talking like with the teletype. I mean it used to come out on the [application name] and you'd have somebody with a long criminal history that would you know like a 4, 4 and how loud that used to be you know and so you'd be trying to talk on the radio and that's going on so trying to get that information to the officers or whatever where now it's sent over their MDT's and so that's come a long way.
Information	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S2] So the text to 911 comes through your text messages so basically if a call goes out so like if a call goes out they get the call for service, they get the call code description, they get the call for service number, the address, the city and if there's like a business name or something like that so they'll get that.
Information	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S2] It's almost the same as this so what active 911 does is they can actually say okay I'm going to go to this and show me a route. It doesn't show us that they're in route but it shows the other responders on the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								app that they're on their way so you kind of get an idea of who is coming to the call.
Information	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	Okay so let's say I'll use a domestic because a domestic I think is a pretty good example of a regular call that we take so the most important question that we ask always is the first question we ask is what is the location. We need to know where it is right? Our technology in terms of locating people is just not there. We don't know where you are you know I've used the map as a reference but based off of the cell tower that you're hitting off of I don't know where you are.
Information	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	Right. I don't know where I am.
Information	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	So anyway so location and then after I collect their location I want to know a brief description of like what's going on... Are they guns, knives, what do they have? Has anybody been drinking? Is anybody under the influence of anything? Where are you? Where is this other person? Are you both in the apartment? Is this going on right now? You know did they leave? Okay let me get a description of them. Are they black, white, Asian, Hispanic? What color shirt? Pants? And then I go back around. I do my next descriptions you know how tall are they? How much do they weigh? Heavy, thin, medium build? What color hair? You know and then I'll say you know which way did they leave? Did they leave on foot or in a vehicle? If it's a vehicle I can look up a description. If they went on foot I want to know which direction of travel they went. How long ago did it take them? That sort of stuff.
Information	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	...Okay is that a house, business or an apartment? And if they say it's an apartment. I say okay what apartment number are you in? And then apartment number 810 because sometimes people don't think about that so I need to know what apartment we're going to.
Information	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	...I can believe and know this is exact whatever information needs to pass is not only secure from anyone tapping into it it's also secure in we don't need to verify that that person is actually working.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Information	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	The fire department, I mean we talk, and they'll stop by here, or they might come in to discuss a call that they just went on. But the central dispatch, luckily, dispatches all the medical and all the fire.
Information	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	...So you get to know them as well, because we have-- I won't say daily interactions, but pretty close to daily interactions. If they have an arrest and they need a full work up, we'll do what's called-- we do a file check, a criminal history, a driving history, depending on what they've been arrested for. So we're doing with them as well.
Information	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	It's basically the who, what, where, when, why. Who are you? What do you need? Where are you at? What's going on? Is it in progress? Is it already occurred? Because those are things you want to make-- like for priority reasons, if they were just assaulted and the suspect's still there, if it's a domestic violence. Or if it happened two nights ago, you were scared but you're just now calling the police. Do you know where that person went? Or if that person just left, you want to get their clothing description, their vehicle description. Did they have any weapons? Were they drinking? Are they on drugs? I mean, all these things that would play-- generally we try and run the person to see if they have an officer safety caution, to let the officers know if they have a history of violence, or running from the police, or assaulting the police. And again, where did it happen? When did it happen? You want to make sure that it was in our jurisdiction. If it wasn't, we would refer them to the jurisdiction where it happened. Again, get the caller's name, their phone number. And that's in case we need to call them back.
Information	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	We start out by asking who this is and where they're at. Those are the two pieces of information we really have got to get. Who is this and where are you at? Then we need to know what's going on. Is this an accident? Is this a fire? What's the nature of the call because then we have to send out the appropriate people so that's the main information at the minimum that we need to get. Kind of who is this, where are you and what's wrong? Once we get that we really need to dispatch because that's all they need to get going and because we are such a large area it

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								might take one of our deputies a while to get wherever they're going so we want to get that information out to them and then we might go back to the person then and ask we're going to ask things like is anybody hurt?
Information	COMMS	S	Other Public Safety Personnel	36-45	11-20	Male	COMMS-S-001	[S3] ... So one board will be the fire department status for this particular agency. Another one will be an EMS status, and one will be road status and those kinds of things. So we do that exact same thing but we digitize it in the application, right? So we have all those things, shelter statuses, staffing levels, we've got road statuses, those kinds of things so that at a glance everybody can see the same information at the same time.
Information	COMMS	S	Other Public Safety Personnel	36-45	11-20	Male	COMMS-S-001	[S3] ... We needed high fidelity mapping to say, "Okay, this is where the pipelines are, this is where the utilities are, poles, and all that kind of stuff". To look at it from a detailed perspective how we are going to fix this problem. So it's a right size-- you pick the tool based on the scenario [crosstalk] and who has access to it.
Information	COMMS	S	Other Public Safety Personnel	36-45	11-20	Male	COMMS-S-001	[S3] Yeah. It's a little clunky, just to be honest. But yes, they have a mobile application where you can say-- get my GPS location, take a picture, this is what I'm seeing at this location and post it. So yeah.
Information	COMMS	S	Other Public Safety Personnel	36-45	11-20	Male	COMMS-S-001	[S3] ... Right. Right. Yeah. We actually just used the drone. Well, we used the drone at our county fair for situational awareness, large crowd gatherings, to monitor that. What's going on in the middle of the crowd... Hey, is he coming in, or is he just running through?" Those kinds of things. And then we had a large fire in [City] a couple weeks ago, and they used a drone there to map out how much was actually involved in the fire, and whether or not structures were involved. That kind of stuff. PG&E transmission line, it was in the fire area. So those kinds of things. Checking that stuff out. So they can be really useful.
Information	COMMS	S	Other Public	36-45	11-20	Male	COMMS-S-001	[S3] .... So if I have a problem at my refinery there's levels of notification that go on from,"Hey, just an advisory," to, "Hey, emergency services you

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Safety Personnel					need to know because we might need your help." To, "Hey, now the community outside of our perimeter needs to know," and, "Hey, I need to blast this to everybody."
Information	COMMS	S	Other Public Safety Personnel	36-45	11-20	Male	COMMS-S-001	[S3] And it's overlaid with your APN number, for the house and lot that you live on. And that automatically gets populated system. So when we have an incident they have a tool that they literally draw a geometric shape on the map, and then it will pull out all of the phone numbers from that area and then feed that into the caller system.
Information	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	... And we have to make sure that we get all the pertinent information, such as how many weapons they have, is that person still armed, can you see him, are they irate? If they are, can you put yourself in a different area? That way you can give me the information that I need, and I can get you the help that you need, so we can we can neutralize this subject, make sure that if we can't subdue him easily, then it's just something that just had to happen that way...
Information	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	... Now we do assist their dispatcher in getting that information. If they lose the call or if they couldn't hear the caller, and they call back, we already got that information, so we'll in return give it to them and make sure they have the assistance if they need any assistance going in. Then we assist them in doing that also.
Information	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	That's a stressor. That's a big stressor, because if you're busy, and they're on that traffic stop or they're doing something else, and it's one of the officers that, okay well [inaudible] I gave you this information, I need this information back. I understand that, but you have to take into consideration that hey, I was on another call, I was trying to help somebody else. So getting them to understand is a major stress. That's a major stressor.
Information	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	A typical call, a subject calls in. You get their basic information, name, address, and their location. Location is most important. That's the most important. I can get your name at any point in a call. If I don't get your name when my deputies get on scene, they're going to get it, and I can

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								get it from them. So my most important, the most important thing that I always stress during training is location. You can't go wrong if you get the location first. You get the location, and you get what's going on after. So once you have your location and what's going on, you can get that deputy or the fire service or EMS headed that way. I don't have a caller's name at this point. I know it's a female, it's a male. I know there's kids involved. I know the basic. The rest of the information can come afterwards.
Information	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	Yes. We try to send out the, you'll get a long story. You shorten it up and give it out in a timely manner, because the more information you get is always helpful. But it's how you put it out over the air.
Information	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	... So in event we are on a call, and we're getting information from that caller, we don't want to accidentally press that, and it goes over the air. So we mostly use the microphones, and we know when we're going to press that and [inaudible] out.
Information	COMMS	R	Manager	36-45	11-20	Male	COMMS-R-011	... So we're almost the speed dial call of a lot of people because when's the roads going to open, when the bridges are going to reopen, that type of thing. So I mean it's, and they come to us for a lot of answers that sometimes may take us a little while to get back to them. It's quite interesting.
Information	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	It definitely starts the same and ends the same. We come in. We relieve the group before us. They're usually tired or ready to go. So yeah, we'll talk, [inaudible] pass on what situations could have, could come back up, what happened, and is not going to come back up.
Information	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	... Then we get a description of what's going on. At the very least if the call drops, we have the address. So even if we don't know what's going on, we know somebody at that address needs police help. And then we get a description of what's going on and based on the description would be what kind of incident it is or what kind of priority it would have... So basically we determine the priority, and then after that if we can obtain their name, their phone number, if they're involved, if they're not involved,

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								if whoever they're calling for is still on scene, or whoever is a possible suspect is still on scene, what they're wearing.
Information	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	... So like your regular clerks would not do that, 'cause it's also sensitive information, 'cause you're pulling, when you enter a wanted person for their warrants, you're also including their personal demographics such as their Social Security number. Criminals, or people that have been arrested actually are assigned a state I.D. number. So if they're arrested in the state of [State], they have their own personal I.D. number that shows, you run that I.D. number, and it shows every time they've been arrested, where they've been arrested, which is their criminal history sheet. Then there's an FBI number which is your, your 50 states, it's a number, if you run that number, it shows all 50 states.
Information	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	Correct, the name, the address, phone number. Phone numbers are definitely helpful because in the event that I later on which that's what our database does. It holds these addresses and anything associated with this person. It associates all the incidences. It relates them to other people if they're in other cases. So if I need to find what happened to Jane Doe five years ago, my database can pull it up. It can show me the phone number she used back then. And like say maybe she was reported as a missing person, we haven't spoken to her in five years. And she may still have the same phone number. We try to call that number; we can try to ping it. It keeps all the information when you're able to get everything put into the database.
Information	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	Well, the call volume definitely increases, which the problem we have [inaudible] we're answering the same question. Even though like we put our press releases, we've put out, there's numerous ways to inform the public, and like they'd rather just call. Which is fine normally, but if we have an active shooter, we have other things that we're focusing on and getting everybody ready 'cause we know we have to deploy a SWAT team, 'cause we, it starts with this building for any situation.
Information	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	... And once they've identified whether it is or isn't then, you know, there's a procedure after that. But a routine call is normally not an emergency

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								per se. It may be an emergency to that caller, it's just not an emergency to the actual police. But they take that information. They figure out what's going on.
Information	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	In a way we are but all the information that we put in in our calls for services actually go to MDTs in the unit so they can see exactly what we're typing and what's going on in live time.
Information	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	.... The deputies you're telling them to go there. And this is where you need to go.
Information	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	S2:I don't feel we have that in our agency. We have a PIO who is very apt on Twitter and I don't even know Twitter but Facebook and all the social medias that he gets information out them as soon as possible in the middle of the night, middle of the day, to make sure. And if it's something to make our jobs in here easier, road closures or whatever else because people have--he will get that out on social media just to lessen that amount in here. So I feel that we do a very good job in communicating with the public.
Information	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	We are constantly using technology to help us in using cellphones to locate people that a missing or lost or sometimes unfortunately wanted for a really bad thing. But... not only that our records management system, we had a bank robbery and we had a description of the guy and a description of his vehicle. I immediately went into our record management system which tracks any vehicle we've ever deal with and searched for an older model Chevy Blazer. Came up with 3 or 4 names in the vicinity of the bank that it happened at 'cause we knew it was an amateur, not a professional [Laughing] and anyway. And within 5 minutes we knew who robbed the bank because I pulled up a driver's license pictures and sent it to the detective and said is this him?
Information	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	Well you just basically just convey the information that the caller gave you and try to remain as calm as you can, speak as clearly as you can so they can understand and just try to do it as quickly as you can.
Information	COMMS	R	Comms	26-35	6-10	Female	COMMS-	Your location. And depending on the type of call it is, if weapons are

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Personnel				R-014	involved. If they need--what type of help they need. Whether it's fire or just patrol or just EMS or, you know, just that. But, yeah, location is the most important.
Information	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	No. We actually give all the information out. There is point where in the initial dispatch we only give like the most important information but after they've been dispatched and they're en route then we'll convey like the other stuff.
Information	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	It's easy but our fire department, their radios are kind of sketchy [chuckling] so it's kind of hard sometimes with them because they don't get all the information that EMS and patrol would get over the radio. Or we have to keep repeating it over and over and yeah, and it's not great.
Information	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	Well... because there are--like I say there are a lot of instances where we have to look up stuff for our guys because like I say we are the country and some of the addresses don't... aren't easy to find. So [Laughing] we have to try to Google and look up stuff and we've had callers who are in this [County] and they know someone who needs help in another [County] so we have to like Google, you know, information for them so--and we do that a lot.
Information	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	... And the passing on, I definitely think that helps because you get to know like what happened on the shift before. So if somebody calls us right back and like well I just talked to y'all, I'm like, no, you didn't talk to me. But, yeah, we'll know what happened because we can look at the shift notes and they can tell us. They've already told us what happened.
Information	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	I think the--I think it's the in--an in house thing. I think it's like first responder type of thing. Like I think it's like either they think like we don't give them enough information or we didn't ask or something like that but it's like how could you not get enough information. Like I understand you're going but there's no way for us to sit there and tell you every little thing. All we can tell you is what we were told.
Information	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	Mm-hmm. Yes. Absolutely because... I mean we try to dispatch out as quickly as we can but we try to give the information that's needed of

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								course. So sometimes if they tell me something that I feel like it's kind of irrelevant then I'll leave that out. But most of the--most important thing is the location, what's going on, the safety, if it's 2 people involved, if the people are still there, what the relationship might be to each other, that's the main thing.
Information	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	It is a little more stressful because sometimes like if we have a 911 call, sometimes I can sit there on the phone with you until the first responder gets there. But if we're very busy I can't do that. I just have to take your information and get off the phone and just hope you're okay and you'll call me back if you need something else. But I kind of like when it's a little slower so I can just on the phone and listen.
Information	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	...We transfer medical calls to the private ambulance service. So the emergency medical dispatch instructions and pre-arrival instructions and things are given by the private ambulance service. They will talk to firemen, different municipal police departments
Information	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	It's just a wide range of individuals on a daily basis including surrounding agencies. Giving them updates of calls that may be affecting their area that are on the jurisdictional borders and things like that.
Information	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	And being in a controlled environment it's much easier for us to start looking things up, the resources for them, rather than it is that incident commander in most cases to look it up, look at an iPhone and start Googling something rather than calling dispatch and saying, hey, I need additional manpower, I need hazardous materials, I need the coroner, I need whatever resource, it's much easier for this dispatcher in a controlled environment to get that.
Information	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	Getting the important information from the caller and relaying that information to the responders timely and accurately. Getting it from that caller, no matter what the circumstances are and then relaying it timely and accurately. We don't determine how that responder goes, whether it's lights and sirens or not. They determine that based off the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								information and that's why it's critical with that information that's given timely and accurately so that the responders can make an appropriate decision on... how they respond and... basically that picture that was painted for them, how do they go and finish dealing with that situation to satisfy the needs of the victim or the caller or whatever it is.
Information	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	Location is number one. We can dispatch. We can do anything else in the world with that call if we have the location. But getting that location is just paramount. We can't do anything if we don't get a location. Finding out what's going on and who's involved. What hazards are there whether it's a police call, law enforcement call, or a fire call, medical call, still finding out what hazards are there that can impact that responder going or the people around that event. And then giving them the basic instructions to help themselves before we arrive.
Information	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	And they can call and vice versa. They can call from the field into here to get additional information or if it's a non-priority call and we're going to a gated subdivision or an apartment complex they can call in here and we have all of those gate codes and call in and get the gate codes so that we can give it. But if it's a high priority call they'll dispatch, they'll give that gate code over the phone.
Information	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	... And hearing that voice, hearing the background noise of a particular call gives us so much more information than just the words that that caller is saying.
Information	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	I say that I basically babysit police officers. I say that I help utilize all the information that I can. I find every bit of information I can to help my officers. I basically research. I basically find anything you could possibly need. I'm not separated from our information, you could say, 'cause some offices, they have CIU, whereas they look up the crime information.
Information	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	...And then we go from there, and then at 7:00 we get off, and we give them the rundown of what happened that day. If it's serious, I've got to let them know. During this time, we're also dealing with national crime

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								information files. We have to do a lot with that as far as if somebody stole your phone, and [inaudible] NCIC. If someone gets a hit on it, I have to verify that. That can happen time anytime during our shift. And so if we input someone as like a wanted person, I would really need to relay that to the next shift.
Information	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	You could say that when we have, the office aspect, I have very rarely, but I'll have sex offenders come in, and I have to get their information. Today we're scheduling interviews. I get their information if that's needed, and I have to text my supervisor, message my supervisor and let her know that they're here. It varies from day to day to day. We had our phones reprogrammed. And then I knew I was meeting with you probably around 1:30, which that was no big deal to switch time or anything. But that can happen at any time. It's been a busy day. So I guess you could say there's like little tasks in there. I play some games.
Information	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	For example, on an alarm call, I will have Complete Wiring and Security contact me. They're one of our many that we use. And I will say, they'll tell me where [inaudible], and I'm like okay, what building is that? They'll give me that. I get their name, callback information. Even if they work for that company, I still get their name or their ID, 'cause we have to contact them back sometimes. The location of the actual alarm trigger, really need to know that. If there's a key holder, I walk through. I always have name, phone number. Location, location, location's first one. Where is always first. I dispatch the officer. I give them all the pertinent information that I can. And then they go from there. And I check on them, code four. It's one of our codes. They're code four, they say fine. If not, I tell them like 205, please back him up. So he'll back him up if need to. Rarely we do. Or even a traffic stop, they'll be like headquarters violator. Okay, I am [Street], okay, with [inaudible], copy 28, which is the car tag. I give the information; I run it. I give them back that information if it's stolen or if it's valid. I give that back. They stop him at the final location, which could be [Street] [phonetic] and [City]. And I tell them okay, they get out of the car.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Information	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	Not too much. Like I said, I listen. And if it's, I get their name, where they are. If it's not serious, I can hear it in their voice. I've never actually received a bomb threat, but I'm waiting on the day. But I know, I can kind of hear it. And if so, I'll try to keep them on longer. Especially with a bomb threat, if it's a person calling it in, if they have one on the city, or it's not just [inaudible], they heard it, I will keep them on the line as long as possible. Those kind of situations. But other than that, no.
Information	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	Name, callback number, location. What the issue is, is it an issue where they're in danger, or they still, is the person still there? Say if it's an active shooter, what kind of, what is he wearing, description. Descriptions are always helpful. You should always get a description. Location again. If they keep moving, always kind of ask them which direction are you going? Well not very many people are well-versed in cardinal directions, so you have to really work with that. That's how that would go.
Information	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	... We also do--usually, you can see these folders up here, we do bike registrations, we do--anything like that, Lieutenant XXXX does the bike registration, we get the information from them, give it to her, and she does that, and they need a record, like if they were involved in a traffic crash, they come in, they fill out the information, we send it over to Records, and then they get what they came in to get. Yeah, I mean, we have a lot of tasks in here, and it's definitely never a dull moment. We always have something going on.
Information	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	I mean, I wouldn't necessarily say stressful, it's just that you want to make sure you get all the pertinent information to give to the officers. It's just sometimes, trying to talk to people, like, we're trying to get--especially, like I said, it keeps going back to this, you get a hot call, and you're trying to get information, and you're trying to relay the information from the person that's telling you to the officers to make sure that they have all the calls, I mean, that's kind of stressful when you're trying to get information, and you know, they may not know everything that we need to know, but other than that, I mean, it's not--it's not bad. It's definitely not as bad as other agencies, so I definitely enjoy it here.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Information	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	Okay, so let's say if we have a subject that is--let's say they're breaking into a building, or they're going inside the stadium. We usually have the cameras pulled up, we'll have those pulled up, we'll try to locate them, we'll get as much information from the complainant as we can, you know, get their race, what they're wearing, if they have any accessories, like if they have a book sack or anything like that, we'll get that information, and we'll send the officer out there. Now, if it's a theft case, we'll send--we'll get all the information from the person, and usually, I mean, the usual theft cases we have here, sometimes it's usually technology, iPhones, it's computers and stuff like that, so we'll get all the information from the person that--you know, if they're on campus, and sometimes, they'll call, and they won't be on campus, so we have to tell them, you know, call back when they get on campus, or to come in here, and then they can make a report that way. So then, they have to get all their information on the phone or the computer or whatever is taken, and we have to enter it all into NCIC, and once it's entered there, we make folders, and we have them in our--actually, this is where we keep all our files at, these are all the wanted people files. We have the stolen articles on that side, so it's a lot of entering data stuff that we do, too, so it's a little--it goes hand in hand. We have hot calls, and then we have data entry stuff, and that's mainly what we do.
Information	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	Well, we get their name, whether they're involved or if it's third party information, if they're calling for somebody else, we get all the--basically, all the information that we can, like if it's--you know, if it's a person that we're looking--that is out doing something, we get their race, what they're wearing, all that information. If it's a wreck, we get the vehicles that are involved, make sure that the vehicles are still there, make sure it's not a hit and run, then, you know, we give all that out to the officer, whether they're in the roadway, whether they have injuries, if they have injuries, then we contact EMS and get EMS and Fire out there, so I mean, every call is really different. There's no real perfect call, so--
Information	COMMS	U	Comms	26-35	5 or less	Female	COMMS-	Okay, my job during a call is like--is to get the officer there, you know, get

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Personnel				U-018	all the information, get the officer where they need to be at, and then have the officer tell me information, and the information he gives me, I put into his call. That way, whenever he's done, he goes to write the report, he has all that in writing.
Information	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	What we do is, usually, me and XXXX are working together, so I'll usually build the call and then get it out to the officer, the next officer in the rotation, and let them know we have a fire alarm at [Team] Stadium, we're going to get Fire en route. Usually, she's calling Fire, and what it does is like, whenever you pull up [team] Stadium--like, watch.
Information	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	So, what we do when we call a fire is let them know that it's going to be [address]. They have everything by numbers, whereas we have everything by name.
Information	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	... If we have somebody, let's say, at [Stadium], if they have a medical emergency, we would call EMS, tell them we have whatever we have, we have a 25-year-old female passed out, we let them know that, and we tell them we have officers en route over there, and they tell us to call back with any more information, so when the officer relays us more information when they get out there, we call them back to let them know what we have so far. Now, EMS is the one that put Fire on that call, so--and usually, Fire shows up before EMS, so EMS is the one that dispatches them.
Information	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	Yeah, I mean, we get all the information, because we're already--we have all the--especially if it's like, a motorist assist, we can just transfer them to city police. Now, when it's like, a pursuit, we get all the information that we can from the officer, we get all the streets, whenever they turn on streets, they tell us the street, and we put it in there, so once we call City, we should have all that information inside the CAD to let them know, and that's about what we do, and then, you know, if we get the vehicle stopped, we'll call them and let them know that we have the vehicle stopped before they get somebody out there or whatever.
Information	COMMS	U	Comms	26-35	5 or less	Female	COMMS-	And if you run the information and you can't get it back, there's nothing

Information	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	On scene, leaving scene
Information	EMS	U	Field Responder	26-35	6-10	Male	EMS-U-013	Q: Okay. And where does that information come from? SME: From our OAMC.
Information	EMS	R	Field Responder	18-25	5 or less	Male	EMS-R-018	...You still may not get to anybody. When you get to the hospital you have to tell them you're at the hospital but our only hospitals our in another county so when you get there they don't reach so you have to know exactly where in the road to call dispatch and tell them you're at the hospital or they won't ever know. You got to call them on the cell phone so I mean you know it's just rural EMS and you just deal with it.
Information	EMS	R	Field Responder	18-25	5 or less	Male	EMS-R-018	A lot of the time you'll have to call but still you'll run into places out here where cell phones if you don't have any service either. For example, the place we just went had no cell phone service so you know being able to know where you're going it was an unmarked dirt road off of another dirt

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								road and if you didn't grow up here you know been here for 30 years or you didn't have GPS you wouldn't have found that so cell phones are important but you run out of reception. I mean as soon as we got down the dirt road reception went off.
Information	EMS	R	Field Responder	18-25	5 or less	Male	EMS-R-018	So for the most part here you hear dispatch calling to see if you're okay. So you send somebody back to the truck to tell them you're okay. You can hear on your portable you know it's garbled but you can hear you just can't respond. So you'll tell them you know yeah we're okay then come back. The problem with that is you know service where you just have you and your partner now you're down one in the house there trying to work on somebody so often times if it's a real bad situation we just won't answer. I mean you know we just won't answer until we can get back to the truck because we're more interested in the patient's wellbeing than we are letting dispatch if they send us somebody else great we got somebody else you know. So that's typically what it's like.
Information	EMS	R	Field Responder	18-25	5 or less	Male	EMS-R-018	...If there's good CPR we're good. That LUCAS device comes in handy and our revival rates have gone way up but that's a huge piece of technology. We got video laryngoscopes, we use technology now to do our reports right, wrong or indifferent it's all going to the internet so we all have to you know we've got all the different services, we're trying different internet based software's on different things, Toughbooks, iPads stuff like that.
Information	EMS	R	Field Responder	18-25	5 or less	Male	EMS-R-018	Yeah. You'll see us in the back of the truck taking names and demographic information down right then so that we can use that to show the hospital so that we can get them registered and get them cared for quicker. So we got to have it right there with us. The patient signed, the computer you know so we've got our whole record right there on that computer. Don't have to do three different things like we have to do here right now.
Information	EMS	R	Field Responder	18-25	5 or less	Male	EMS-R-018	Sure I use apps on pediatric doses for medications. I'll use Google. I mean we're not too far gone from doctors that I mean when you tell us a whole list of things that are going wrong that could be anything in the

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								world I mean I'll type them into Google and say well it could be this but I don't know you know so I'll look up something for the patient. I'll use it to get us there so yeah there's lots of things I use.
Information	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	Honestly the only other thing that we use is once we get back we kind of do old school. We have paper patient care reports so we write all the patient's information and then when we get back we log into the computer here and actually type a narrative which is a storyline of what we did and what happened on that call. Printer, copier, fax that's about it.
Information	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	... I may have never seen that patient before but someone else here may have went to them several times before and they've entered in all of their medical history, what they're allergic to so if I can get a name first and last name and enter it into the system and then it pulls up everything and then I can go in and read oh wow, they're allergic to this so I can't give it because I don't have a patient to talk to me or a family member to talk to me so it's lots of benefits.
Information	FF	S	Field Responder	18-25	5 or less	Male	FF-S-039	What units responding, incident location, map, best way to get to incident

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Information	FF	S	Field Responder	46-55	21-30	Male	FF-S-031	And so we're trying to integrate everything into the mobile data terminal, so when the officer gets in and sees the screen, that all that information would be available.
Information	FF	S	Field Responder	46-55	21-30	Male	FF-S-031	and that human interaction of receiving information and then disseminating that information out to the field. So 911 call-takers take information, and they have to triage that and basically push the right buttons to get the right resources out. And it's tough to sometimes coordinate that because they're getting an influx of information, and we're trying to come up with the decision-making process. "Okay, we've got five bits of information. It sounds to me like we're going on a fire versus just an automatic fire alarm," or we're going on automatic fire alarm, and we get there, and there's fire blowing out of all the windows. So that's an extreme example, but sometimes there's information that we just don't get by the time we get to the call because the call-taker is still intaking that.
Information	FF	S	Field Responder	36-45	6-10	Male	FF-S-032	No. Anything like that is done over the radio. So if we have a question, or if we want to communicate something back, it's pick up the radio and call them. They have the capacity to type on their end and send us information about the call. So they would send us then, what type of call we're going to, what kind of notes they have from the dispatcher who took the call. So that's the other piece of technology that's in all of our apparatus.
Information	FF	S	Field Responder	36-45	6-10	Male	FF-S-032	Yeah. I suppose in the-- just like we were chatting before about when a technology doesn't work and you're really dependent upon, it to get that information you need in such a time critical fashion, then I guess you could say that it got in the way. You're trying to respond somewhere and you utilize a mapping application and it sends you to the wrong address and then now you're in the wrong spot because of technology. I guess that's an example of how maybe it got in the way. It doesn't mean that people don't make mistakes with their paper map method as well.
Information	FF	S	Field Responder	36-45	6-10	Male	FF-S-032	--available to us in a way. And then the other big thing is basically just the information about the buildings that we are-- our environment. So on

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								an EMS call, it's the access. "How do I most quickly get into this person's house to help bring our care to them?" And on a fire-related thing, it could be, "What's the layout of this building, and what are the hazards?" And then, again, those are kind of things that are currently somewhat managed by our pre-fire system, but it's a very outdated method compared to the capacity that currently exists and is coming to capture and collect and utilize that information. So we do fire inspections in buildings, currently, where we're looking for violations, but really, we could be in those buildings recording almost everything about that building. And then having that displayed to us in a way that's meaningful and that we could use on a future call is a very significant area of gap of the information that's out there. And then I guess the other thing concurrent on that information is that there's really very little done on trying to predict or learn where our hazards are, because we don't capture that data in a meaningful way. So we could all kind of tell you what our hunch is for the most dangerous building, or the most likely place to catch fire, the most likely place to have a certain type of medical response because of the hunch that we've gathered by seeing these different things, but really that's all information that could be--
Information	FF	S	Field Responder	36-45	6-10	Male	FF-S-032	Potentially. I mean I guess the benefit we have is that do we have different personnel responsible for different things? So the person who's driving to a call may not want to see information about what medications this medical patient is taking, but the person who's sitting in the officer's seat--
Information	FF	S	Field Responder	36-45	6-10	Male	FF-S-032	We always have two or three people. So certain people can be looking at information in different ways. So the driver may want to hear visual cues as to maybe how they're getting to the call. "You're going to take a left on," whatever. Or just a display that's easy to look at. I mean, again, how do drivers currently use navigation in the vehicles? That technology's kind of already been--
Information	FF	S	Field Responder	36-45	6-10	Male	FF-S-032	How to collect it, how to store it, how to utilize it, disseminate it in a way that is standardized and useful. [talking about information]

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Information	FF	S	Other Public Safety Personnel	36-45	11-20	Male	FF-S-033	Sure. All the fire engines, aid cars, and ladder trucks, they have a computer. They're our mobile data terminal. And what that does-- it's a laptop that has a program on there that generates our call information. So when we get dispatched to a call, the screen will pop up letting us know the address of where we're going, the basic nature of the call, the time of the call, who called. So all the call information that the 911 centers get, it gets patched over to our computer. So we can look at that information. We also have I-- all of the rigs have iPhones and iPads now.
Information	FF	S	Other Public Safety Personnel	36-45	11-20	Male	FF-S-033	Yes. The Active911 app is the most commonly used program that we use on the phones and the tablets. And that's the one that will pop up, let us know we have a call, lets us know some of the basic information. That one does address, and it does some mapping and tells us what tactical channel we're responding on. If you want the very detailed call notes, and who's calling, and past information at that address, then we would have to go to the computer in the rig to get the most detailed information.
Information	FF	S	Other Public Safety Personnel	36-45	11-20	Male	FF-S-033	Sometimes the computer in the rig won't get calls, but the iPad will, or vice versa. So there's a little bit-- technology is not a perfect system, right? So sometimes you have to be able to adapt to the intricacies that kind of come with what you're doing. For the most part, I think we're moving in the right direction. We have a lot of information.
Information	FF	S	Other Public Safety Personnel	36-45	11-20	Male	FF-S-033	So we have our pre-fires. They're all on paper in binders. The tablets have most of them loaded on the tablets.
Information	FF	S	Other Public Safety Personnel	36-45	11-20	Male	FF-S-033	...So then dispatchers have to take what they've given and then try to piece that together about what that actually means. And then they give that information to us. So when we are responding to a call, we have to have in the back of our mind, "Okay, this is what somebody told the dispatcher. This is how they've interpreted it to tell this to us. So this is what we're responding on maybe." And so we will have to reevaluate when we get there and see was that a clear, accurate message being

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								portrayed. So you have multiple channels of communication where some of those information [get lost?].
Information	FF	S	Other Public Safety Personnel	36-45	11-20	Male	FF-S-033	Well, maybe. I mean, we have different lines of information. So a new line might pop up. And the way our current system is designed when something new pops up, it's supposed to be yellow. But you won't know that it's yellow unless you clear that you've seen it.
Information	FF	S	Other Public Safety Personnel	36-45	11-20	Male	FF-S-033	Maybe it's just the chief who is responding. When they're responding, they can look at the drone view because the first responding officer has to also be figuring out, "How to get there? What is our best hydrant going to be? Where's the best access [for it?] to be?" And that would be good information for them, too. That'd be something interesting to see. But man, that would be very, very helpful information.
Information	FF	S	Not specified	Not specified	Not specified	Not specified	FF-S-035	[S6] The biggest thing is address and the nature of the call. Those are the two things, at least for me, that I want to know. Where am I going and what am I walking in to? And as much of that information as we are able to get from dispatch, the better off we are. So if we're going to somewhere off in [City], which is another small district that we provide service for, sometimes the addresses are a little tricky. Sometimes it's a long driveway. Sometimes, oh, so-and-so's got a key underneath a mat downstairs behind whatever. All that information is extremely helpful because it helps us get to the patient as quickly as possible.
Information	FF	S	Not specified	Not specified	Not specified	Not specified	FF-S-035	[S4] I'm sure he will speak to this, but information management, that's all absolutely true, what you just said. Information management is the huge double-edged sword because the only thing worse than no information is bad information. So what I don't want is him to think is that he doesn't have a hazard because he has all this information. Or that the hazard is this when the hazard is something else. It makes, I'll say, people complacent. They think they have all the information and they don't have all the information.
Information	FF	S	Not specified	Not specified	Not specified	Not specified	FF-S-035	[S4] It actually comes from dispatch, but it has to come from us to give it to him and then he sends it over to dispatch and then it has to be

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								maintained. It has to be current. And it's quite a test. I mean, you get emails weekly that says, "We've got a better system now that would manage that information." But still, there's never going to be a perfect thing. Never a perfect system in terms of always having good, real-time intel. It's going to be the best we can, and so we have to make sure that we set realistic expectations into how reliable that information is that you're getting. A key that's under the mat may not be there. That may be five years old. Routinely we get dispatched to a building where the information on the building says this but that building is no longer there. It's been something else now. We're working on that. It's a battle. But information is great except when it's not.
Information	FF	S	Supervising Field Responder	Not specified	Not specified	Male	FF-S-036	[S3] That's good news reporting we got. If I sent you in there to extinguish the fire, I don't need you to come back and tell me, "Hey, we're accomplishing extinguishing the fire." I do need to know though, if you're not being able to extinguish that fire. So it's just totally--
Information	FF	S	Supervising Field Responder	36-45	21-30	Female	FF-S-037	The text messages that we get come through our dispatch center. They come from [City] 911. So they send it when-- typically they'll send one when a major incident initiates. So if it's a water rescue, fire, any kind of major incident, they send one initially. And then they'll send a follow-up if it is something because sometimes we get there and it's really not what we were called out to. So we'll get a follow-up saying, "Hey, this is a fully involved fire or active rescue or something like that." They give us a follow-up. And then if they need a fire investigator, which is my role, they'll send another text saying we need a fire investigator, and that's when I call dispatch and tell them I'm on my way.
Information	FF	S	Supervising Field Responder	36-45	21-30	Female	FF-S-037	Usually, it's from a mix of what's entered into the CAD, as well as what's entered as firefighters come back and enter their reports. It all dumps into one place.
Information	FF	S	Supervising Field Responder	36-45	21-30	Female	FF-S-037	I don't think so at this point. I think the thing that technology does today that we didn't have to worry about when I started this job 20 years ago, is that today the expectation is that information gets out immediately. And you don't have time to verify and make sure that information is

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								100% accurate before you send it out because the expectation is that I need to know what you know when you know it. And so I feel like we maybe jump the gun sometimes on putting information out, or the media jumps the gun in putting information out as opposed to just hitting the pause button for a minute.
Information	FF	S	Supervising Field Responder	36-45	21-30	Female	FF-S-037	Well, and will be able to control that-- I think we're able to control the information that we put out a lot more today than we used to be able to, but we have no control over what other people put out. And it doesn't have to be true or accurate, and so that sometimes causes us more work [laughter].
Information	FF	S	Supervising Field Responder	36-45	21-30	Female	FF-S-037	Yeah. So as part of our planning group, we have a GIS person. And his job is to create maps that the crews use to do their job. So he can kind of-- his maps will tell kind of like, "Okay. Well, here's the nearest hydrant location, and here are some of the things that you might need to know about this building, or--" so he's doing a lot of behind-the-scenes work, so that when they roll up on a scene they'll have more information about what exactly is there.
Information	FF	S	Supervising Field Responder	46-55	31-40	Male	FF-S-038	Well, they have the radio, they have the cell phones, and then they have what I call an MDC. Some people call it-- there's another term, MPS, something like that, but mobile data computer. So we have those in all the vehicles currently, and what that does is when Firecom dispatches the call, it pushes information out to that computer. So basically, they can see the address, they can see the secondary information on the call.
Information	FF	S	Supervising Field Responder	46-55	31-40	Male	FF-S-038	They will get the information. The MDC does have the buttons responding at scene, those type of things, that when it's working they will utilize those buttons for that to cut down on some of the radio traffic, which is the direction we're going and we've gotten from Firecom ourselves on 911 dispatch.
Information	FF	S	Supervising Field Responder	46-55	31-40	Male	FF-S-038	Well, the big one is the safety side on all calls. So if it's a medical aid call, obviously they need to know what's going on with the patient. They need to know all the information that they can on the patient before they

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								get there because that's going to set them up mentally to deal with this patient and not just go into it cold knowing that they have a medical aid call. And then, second to that is the safety aspect, make sure that they get dispatched to a trauma well. The trauma was caused by a knife. So they have to know that information. Was it an assault? Was it cutting tomatoes in the kitchen and cut her finger? I mean, so they want to be prepared for all of that. So that's very important information for them to have that they would either get verbally from dispatch or they would read it on the MDC from dispatch. And typically, dispatch, they know that we can't rely on the MDCs 100%.
Information	FF	S	Supervising Field Responder	46-55	31-40	Male	FF-S-038	Once we deliver the patient to the hospital the-- field guys typically don't have the ability to contact the hospital, and it depends on the hospital sometimes too. But we have an EMS division that if we have a particular call or a patient we'd want to do a follow-up on, we'll communicate that through them. They know their contacts at the hospital. They'll call and say, "Hey, would you be able to provide information on this patient that we hauled in this day?" But nothing electronically that I'm aware of that we can go on and follow-up with patients.

Information	FF	U	Manager	46-55	11-20	Male	FF-U-021	Vehicle schematics: where the high voltage is running, where you can cut it, where you shouldn't, where fuel lines are, does the car have one battery? Does it have two?
Information	FF	U	Manager	46-55	11-20	Male	FF-U-021	Vehicle schematics: where it's safe to cut, where it's safe to stabilize, how many batteries there are, if it's electric, if it's partial hybrid, if it's even hydrogen
Information	FF	U	Manager	46-55	11-20	Male	FF-U-021	Address, skylights, what the back of the building looks like, location of utility shutoffs, aerial views, skeleton of high rises, location of elevator shafts, location of fire department connections
Information	FF	R	Supervising Field Responder	36-45	21-30	Male	FF-R-024	Who, what, where, why, what's going on
Information	FF	U	Field Responder	36-45	11-20	Male	FF-U-010	Yeah. It's a balancing act, I think. If they're going to transmit three minutes worth of information over the radio when somebody else needs access to the radio also. A lot of times they'll send that in the text of the MBT. An officer will read that on the way.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Information	FF	U	Field Responder	36-45	11-20	Male	FF-U-010	I would say, for the most part, it's the accidental transmits and then it's people getting too excited and not trans--or not communicating effectively over the radio and not knowing how to speak into a microphone and have that come out clearly on the other side. A lot of people get up too close and you hear over-modulation [laughter].
Information	FF	U	Field Responder	36-45	11-20	Male	FF-U-010	Yeah, it's just professional speaking. We don't send a whole lot of personal messages over the radio [laughter].
Information	FF	U	Field Responder	46-55	11-20	Male	FF-U-011	So we are expected to be here at 8 o'clock in the morning but most guys come in earlier, around 7:00 so they can relieve the people that are here. You can imagine if you've been here 24 hours, you're dying to get out of here. Some of us. So we show up at 8:00 and then our day really doesn't start until 8:30.
Information	FF	U	Field Responder	46-55	11-20	Male	FF-U-011	Well, in a fire-- you might have to do a face-to-face with the incident commander, the chief that's planning the call. Because there's so many people talking on the radio that if it's important enough, instead of waiting, I'll just go outside and do a face-to-face.
Information	FF	U	Field Responder	46-55	11-20	Male	FF-U-011	My pet peeve is that there's no specific class on radio ethic, and so you want to be short concise and some people just love to hear their voice and if they're always talking. And in an emergency situation, it should be just what's needed to be said, not--
Information	FF	U	Field Responder	46-55	11-20	Male	FF-U-011	Because you imagine, if it's a fifth alarm, there are so many people. And people are just stepping on each other when they're talking.
Information	FF	U	Supervising Field Responder	56-65	31-40	Male	FF-U-014	No. No, there's some days that we do 10, 12, 14 times. Some days 2 or 3. But yeah. Somebody phones up and says that their house is on fire, then we send a lot of people, yeah, which means a lot of radios. Which means people have to have discipline on the radio to not be talking very much.
Information	FF	U	Supervising Field Responder	56-65	31-40	Male	FF-U-014	So I mean, the people problems are just a matter of-- I tell people, "I need you to talk to me in words, not sentences, or sentences, not paragraphs," and so limiting what they say and how they say it. One of the things then is-- one of the number one things that I encourage as a drill very often is

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								the ability to communicate when you are on air. And [inaudible] wrr-wrr-wrr because that's what it sounds like, and they have to practice that and learn to talk to each other when they are not on air. Because if they don't know how to talk to each other when they're on air now, when they get a fire, it's going to be the same thing.
Information	FF	S	Field Responder	46-55	31-40	Male	FF-S-015	I think it's an ever-changing landscape in the fire service because of the newer technology, newer equipment as far as apparatus, as far as personal protective equipment that we issue individuals. They all have a role in providing some form of function. Ours just happen to be communications and information sharing, and everybody needs current, accurate information to make good decisions.
Information	FF	U	Field Responder	46-55	21-30	Male	FF-U-025	On scene, returning to station
Information	FF	U	Field Responder	46-55	21-30	Male	FF-U-025	the progression of the fire attack; what maybe could be dangerous about the building; there holes in the floor on the third floor; Are they getting the fire under control below you?

Information	FF	U	Field Responder	46-55	21-30	Male	FF-U-028	[RE: hazardous materials] physical properties, characteristics of spill or leak, how it does harm, how to rectify harm
Information	FF	U	Other Public Safety Personnel	46-55	21-30	Male	FF-U-029	Right. Now, I know in our department they talked about in the very near future, if I was en route to a, let's say, a fire in a high-rise building, that I would hope-- they're speaking in the near future I'll have a lot more information available to me en route, which is nice. We do have an enormous amount of information in a high-rise building given to us on a run sheet when we're enroute from the firehouse.
Information	FF	U	Other Public Safety Personnel	46-55	21-30	Male	FF-U-029	Yes. Yeah, I mean, maps aren't anything that we normally get. Our command vans that respond to either incidents that are upgraded or large-scale incidents, our command vans all have that accessibility. They have computers. They have hard copies of maps of everything in the city from our infrastructure. Well, a lot of it's outdated [laughter], but it's supposed to be able to-- they call them [Company] Maps here. And it gives us all the locations of the grids for our water supply, which are kind of key for us. So if we have an industrial area, let's say, so we have an enormous amount of fire or enormous buildings on fire, we need a lot of water to put them out. So your standard fire hydrant is not going to work. But in those areas, the idea when they're building in those areas is to put larger diameter piping for water for that reason, but it doesn't always work out that way. So now we're trying to look for water, we're looking for water sources that are further away, and try to-- it can be complicated. But, yeah, so, on our command vans they have access to all that information, but at the lower levels, no.
Information	FF	U	Other Public Safety Personnel	46-55	21-30	Male	FF-U-029	...But if we had the information on number of people that are normally in that building during what are considered normal hours, hazardous materials, of course, building dimensions, number of basements. We go into buildings sometimes that look like they may have one basement

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								and we find four, and a fire's in the fourth sub-basement. And those are horrible for us. But things like that. What else? That's the nuts and bolts of what we really want. We want dimensions. We want all height of the building helps out because we know from our codes here in the city that if it's greater than 80 feet it has to have a standpipe system in it. Things like that. Sprinkler or not. Yeah, that information is pretty critical from a technical standpoint. At the lower ranks maybe not so much, but for the people that have to do the decision-making in the early goings of an event, definitely. It would be nice to know that.
Information	FF	U	Other Public Safety Personnel	46-55	21-30	Male	FF-U-029	But that kind of information, real-time info that could be transmitted and given to firefighters, or policemen for that matter, prior to entry to any kind of a structure would be tremendous. It really would.
Information	FF	U	Other Public Safety Personnel	46-55	21-30	Male	FF-U-029	Right. So if I had all that information prior to responding, I mean, I'm already thinking, it's going to turn into a multiple-alarm, at least the that way we structure our incidents here in the city. So I'm already thinking about escalating an alarm, just because that does not seem like enough equipment or people to mitigate that incident properly. So I'm having those kind of thoughts en route already. And so, I have to think of it in terms of my rank now, because it changes tremendously. So if I pulled up to an event like that, yeah, I have a lot of things going on there. So you're telling me I have exposures on two sides of the building, and it's a corporate setting. I have a fire on the fifth floor and it's an eight-story building, and it's 10-something in the morning. So I have a big problem with civilian traffic in the building, getting people out
Information	FF	U	Other Public Safety Personnel	46-55	21-30	Male	FF-U-029	Well, if I have a partial collapse, I'm going to rely heavily-- if I was running that incident, I would rely heavily on what was being told to me, because it's impossible, in a building that size, for you to personally engage every nuance of what's going wrong and act on it. So it's all about communication at that point. If they're telling me I have a legitimate collapse, we have a whole new way that we respond to collapses in this city and so now I have to bring more resources in.. So company by

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								company, we will make radio transmissions to make sure that everybody's accounted for from our standpoint. Because without us, now the public has nothing. And that can turn into mayday situations... And now we have exposure issues. We have people above a fire floor and we have a partial collapse. That's the perfect storm of everything going on at once. Sometimes we just do our best, unfortunately, it isn't always perfect. But that would all be about information transmission to whoever was running the event. In the early stages, at my rank, it would be me.
Information	FF	R	Field Responder	36-45	21-30	Male	FF-R-052	–usually it all comes from here. And also we get text messages sent to our phone with the basically the same information. Some people get both. Some people don't get any, it just is a preference I think whether people want it or not. It's there available if we want it. Some people think that their text messages goes off too many times in the day and they don't want to be, you know, bothered with it but.
Information	FF	R	Field Responder	Not specified	Not specified	Male	FF-R-053	S4: Sure absolutely, we do a shift change in the morning with the previous crew. We get total information about the truck or about equipment, any changes that needed to be taking place and anything that needs to be repaired or replaced from the previous shift, any cool calls that came about and we will talk about those and we do talk about those as in a debrief type of atmosphere is routine. You know the crew ran a two-car crash at an intersection, there was a patient trapped, they flew one out, and you know we talk about that kind of a call, not breaking any HIPAA laws.
Information	FF	R	Field Responder	Not specified	Not specified	Male	FF-R-053	S4: But it helps us understand how we can be better if we talk about it that kind of thing. After the shift change we are required to do a daily truck check, we have to go through the entire truck, check the lights, check the equipment, make sure the pump can works, the pump fires, all of our breathing apparatus and all of our hand tools and things that are supposed to be there in working condition and be ready for the next incident. After that, of course, we are required to respond to the calls. We do reports on those every time we run a call. We do any of those

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								daily projects we have told you about, whether it is a home safety check or that we do a pre-planned project or other project which we are required to get those done there in a day. And they we are supposed to have two hours of training. Some sort of training every day, we have to always stay educated on you know where do we pull the ladder off the truck or pull the hose off the truck or sit in front of a YouTube video and learn from other fire departments, what they have done what worked and what didn't work. We do some sort of training every day about two hours and once we usually get that done, all we do is kind of sit back and wait for the next emergency; we are here 24 hours.
Information	FF	R	Field Responder	Not specified	Not specified	Male	FF-R-053	S1: So if a call came in what would you want from Dispatch or? S3: On. Everything we can get.
Information	FF	R	Field Responder	Not specified	Not specified	Male	FF-R-053	S4: That's different situation. We shouldn't ever go in there without back up from law enforcement and that happens a lot. If we can't get through 911 call takers to get the accurate information that we need to be able to respond appropriately. We get a call for a car crash, sometimes we have got a tractor trailer carrying hazardous materials; we walked into the scene that can potentially be life threatening for us. You know we need that information, so you are asking what kind of information we need, we need everything supposedly we could put together before we get there because when we are driving to a scene our hamster wheels are spinning rapidly.
Information	FF	R	Field Responder	Not specified	Not specified	Male	FF-R-053	S4: If it is a fire whether they can apply safety rescue, water supply; who is going to do what, when, where and how. A medical call, if it is chest pain I am going through my head all the chest pain protocols that I have to follow, what kind of meds I am going to give, what kind of blood pressure I am going to expect, what am I going to see on the monitor, I could kind of pre-plan as I am going to the scene and if I don't get that accurate information from my dispatchers, it makes it tough on our jobs.
Information	FF	R	Field Responder	Not specified	Not specified	Male	FF-R-053	S4: You know, we get on the scene get a description which is [indiscernible] or something of that nature. That helps with as far as knowing what we need to know before we get there. A fire - we need to

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								know if it is a home, a residence, we need to know if it is a commercial business or an apartment building and we should know most of those things anyways in our area if they give us a certain address we are going to know it is certain individual's house, we know if it is a certain individual single-storey homes or two-storey homes so you know that information helps once we know where the location is. Hazardous materials that's a big one for us, because there are so many things that are out there; we want to know what type of hazardous material if we can get it as much as possible from the color, what is it, what was in it, how was it stored was it in a [indiscernible] or drum or container - is it a liquid, is it a solid substance of some sort, those kinds of things.
Information	FF	R	Field Responder	Not specified	Not specified	Male	FF-R-053	S4: Even if I was in home off duty and I saw that and I chose to respond, I have all the information right there just then.
Information	FF	R	Field Responder	46-55	5 or less	Male	FF-R-055	And we get -- my pager is out in the truck but I get my phone which has got 911 on it too and it goes off the same time the pager does usually. So, the pager goes off and they will usually tell us the address, what is going on, and summary of whatever is going on.
Information	FF	R	Field Responder	46-55	5 or less	Male	FF-R-055	Yeah. They're really good about -- you got something they'd like to sing it.
Information	FF	R	Other Public Safety Personnel	26-35	6-10	Male	FF-R-048	... then it will give us the information for the call, it will be followed by a text through text messaging through that system we can either say we're responding to the scene if we're closer than where we're at to the scene or we can respond to our department or we can stand down and in doing that through the app it goes directly to everybody on the department so everybody knows who is showing up and it also goes to dispatch and they can know okay we have a firefighter or EMR that is in route either to the station or to the scene.
Information	FF	R	Field Responder	36-45	21-30	Male	FF-R-049	Let's see here. Our dispatch here is pretty decent. I think we've come a long way with getting them a card statement of what we need. We'll just say a structure fire for example we need to be alerted which can be we use a tone out, we need to know who needs to go, we need to know

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								what it's for, we need to know the involvement so that's units that need to be dispatched, what type of a call is it if it's a structure fire we need to know the involvement, is it fully engulfed as descriptive as possible, paint us a picture, paint us a picture, are there people entrapped things of that nature and it's gotten a lot better out here.
Information	FF	U	Field Responder	Not specified	Not specified	Male	FF-U-050	[speaker 3] Right now we use the MDT's mobile data transmitters. The MDT's mainly give you the location, the call, it can pull up the address, give you all the information plus we have our radio communication.
Information	FF	U	Field Responder	Not specified	Not specified	Male	FF-U-050	[speaker 2] Which is right here in [city] from e-plan they can pull it up it'll populate and it'll tell the Hazmat team what chemicals are being made, where they're being stored, who is the emergency contact person during the day or at night, how much and then if it needs to get into the science of the chemical makeup of that product it can take you to the DOT guidebook, it can take you to other research materials from this safety datasheet standpoint, manufacturer safety datasheet to tell you more about the chemicals, flammabilities, health hazards, it's reactivity and things of that nature.
Information	FF	U	Field Responder	Not specified	Not specified	Male	FF-U-050	[speaker 2] We were still doing fire reports with pen and paper and the station log book I think we were still writing books well some of the captains do. They'll do a handwritten daily log but everything else is done electronically what he pulls up so if you need to query something so it has come a long way. Even when I was in the training session at my old department when I came up to being an instructor we learned how to put all of our presentations on transparencies. Now we got PowerPoint you know which makes things a whole lot easier and I forget what the new thing out is supposed to be better than PowerPoint. I've used it once or twice I can't think of the name of it.
Information	LE	S	Other Public Safety Personnel	36-45	6-10	Male	LE-S-027	My first instinct is that it definitely could be helpful because we often are fighting to get some of that information from people. We're in an active situation or active high-priority situation or high-risk situation, and we're like, "We need a description."

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Information	LE	S	Supervising Field Responder	36-45	21-30	Male	LE-S-028	... So all of our patrol staff is being issued that right now, so we might have a briefing training that says-- so we'll pass this information along. There might be a short training environment, and then everybody kind of goes out and goes on to patrol. And we might meet for coffee, or a couple of individuals might meet for coffee, but then the day is really then, again, whatever kind of comes at you.
Information	LE	U	Supervising Field Responder	46-55	31-40	Male	LE-U-029	I think there's a lot of pros but my standpoint, I just don't want people to get overloaded with information. Sometimes you can. So I would love to come up with a way for communications to be able to prioritize on safety issues first. Because now they've got computers, they've got cell phones, they've got so much technology stuffed into the cars. And so I don't want that important officer safety to get lost in the snowstorm of information coming towards them.
Information	LE	U	Supervising Field Responder	46-55	31-40	Male	LE-U-029	The information I need is a very clear synopsis of what's going on; including any history or anything else. Like with an incident-- like here a few days ago, I think last Saturday we had a medium size protest and I was incident commander. Other people weren't available, so I took instant command. I do a lot of protests. But the information day of event that I needed is exactly what is our staffing level. I said, "What are commander [Name] expectations with the command staff that were assigned there?" What's the history of the group? That's sort of kind of information that allows you to do kind of a threat assessment. And then you have ongoing information that you're constantly getting as the event goes on.
Information	LE	U	Supervising Field Responder	46-55	31-40	Male	LE-U-029	Yeah. We voice dispatch a lot of stuff, so the dispatchers will put information out. The bicycle units are not subject to dispatch, so they are more doing proactive police work.
Information	LE	U	Field Responder	56-65	31-40	Female	LE-U-031	I can't look at anything historical, and radio won't give me that information. So in a car, you have all that. And a lot of times, you-- well, not a lot of times-- I think now almost every time, officers are-- before they're heading to the call, unless it's a priority one call, which is a really-- what I'd call hot call, they're going to stop and they're going to look.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								They're going to look to see what's happened, whether there's a name associated. They're going to see if we've handled that person before. And that's actually really good information. It's officer safety information.
Information	LE	U	IT Specialist	Not specified	Not specified	Not specified	LE-U-032	[S3] Yep. There's the MDT. I think that's probably their primary tool when they're out on the field and they're going to get their dispatches, they're going to get their messages, notifications from the dispatch center. Any relevant information will come across that.

Information	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Yeah, we got our bulletins, and we have copies of it, they are all posted around the station and stuff. Hm? Yeah, we have our emails. What else do you need?
Information	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Yeah. We also have people, concerned citizens, who have officers' phone numbers. I call them concerned citizens. Other versions of it: snitches or [inaudible] okay, so.
Information	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	... We have them all on buildings around here, and they triangulate, and it comes up on the screen of the police car. It pops up on my cell phone. So the way the deputy chief said that he wanted everybody to have the app on their cell phone. So we're in the process of doing that. It should be done in a couple-- [Name] actually could probably give you more information, because this is an easy app.
Information	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	--to see if I can listen in. Oh, it was a red car, okay. Because by the time everything settles down, then they'll go on all broadcast, "Hey, we're looking for a red car." Well, that takes time. But if I got the information right then and there. Oh, this is awesome. Because I start okay--

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Information	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	And it has the person who called 911 in there, too. So they go-- we get a lot of calls of six guys in a corner, all wearing black clothing, one has a gun. So what do you do, as an officer? I had a group of people with me from the DOJ, conservative and non-conservative, both in the car. And I purposefully want to go to this call. So I told dispatch, "Send me to that call."
Information	LE	U	Field Responder	46-55	21-30	Male	LE-U-010	Yesterday, a [State] cop got killed going to a domestic violence call. So I don't know if he had the prior information ahead of time. Like that house has weapons in it or something like that, or you've been here before. Kind of like, "Let me wait for another officer to show up." So some of that information is useful. Sometimes we get junk in that CAD. I don't care, for instance, the prior calls [City] Mall. There's going to be millions of them, I don't need that on my CAD. It's going to be from everything from a lost wallet to a lost kid to shoplifters to somebody's upset because the prices are too high. I don't think I'll need to filter through any of that. The usual domestic violence, that same call. We get a lot of mental health issues down here so having that CAD information, and you go, "Oh his name's So-and-so. It shows that last time we got the key from the manager, the resident manager. Oh, the manager's room is room 12. I don't have to kick in this door, I just go get the key from the resident manager." Once I kick in that door, now I've got to do a report and notify a supervisor, because we kicked in a door to check on So-and-so who had been doing drugs all night and he needs to go 5150 or he needs to be medically treated. We get a lot of people who leave a hospital and they're supposed to follow up, and so the medical side will say, "Hey, this guy has prior history of diabetes. He's on dialysis, he's on--" gives me a little bit more information, so it's one of those things, "Oh, nobody's here, I can leave." Maybe now I've got prior information that he has all these mental health issues, "Oh, he's all jacked up. He's on 18 different kinds of pills, maybe he's laying in the bathroom, and he can't get up. So maybe I can do another look, let me go beyond a little, you know?" I'm not going to kick his door in because I'd get in trouble

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Information	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	... This is [City] if my people go to jail here I just want to make sure that person is breathing or not. Even if I went in there and I saw a bunch of illegal stuff I can't arrest him on it because I need PC to go in there because now I have to freeze it, get a judge for a warrant and go through all of it. No cop's going to go through that. Obviously, if I see like an AK-47, pounds of weed, and people tied up I'm going, "Hmm, I'm here to check on the well-being of you and you and not you that's tied up right here, okay." I could be a little bit more you know? And that's nice to have the CAD and have all of that priory information.
Information	LE	U	Field Responder	46-55	21-30	Male	LE-U-011	We're very unique though. We have our own 10 codes here--
Information	LE	U	Field Responder	36-45	11-20	Male	LE-U-013	And we have certain parameters for our description. This, this, this, this, this. This, this, this, this, this. And some of the newer officers don't even know that, how to give it properly.
Information	LE	U	Field Responder	46-55	11-20	Male	LE-U-014	So being consistent, people know what they're going to get when they get there, so that the consistency is what people, I think, thrive off of or look for their own stability from where they can go forward in a conversation. If they know what the baseline is, they know where they can go from there, what the rules are kind of going in, so being consistent with that as opposed to-- depending on what your own particular mood is in a day, letting that influence you regardless. There is some sort of that regardless, but being aware that being consistent on how you respond to everybody regardless of the situation, I think, is important.

			Responder					
Information	LE	U	Field Responder	36-45	11-20	Female	LE-U-026	Everything uploaded to social media around time of shooting
Information	LE	U	Field Responder	26-35	6-10	Male	LE-U-023	The other thing we were able to see is-- you can see a snapshot of the picture as it drives by, because the camera catches the plate and the car. And the nice thing about that car was I saw it was missing a hubcap, the front passenger side hubcap. There was damage on the rear side. So from an officer awareness standpoint, even from a searching standpoint, when you're looking at thousands of cars going by, it's nice to know that that hubcap's missing on that car.
Information	LE	U	Field Responder	26-35	6-10	Male	LE-U-023	He went out there. He found this car. He found this car. And what else did he find? Not only did he find the car, he also found that the car had been shot back at. So by us being able to find the car, we were able to find the offender's bullets in that car. So now, we have both sides of the shooting. Normally, we wouldn't have that. Normally, we would have one victim who got shot, and then we wouldn't know what happened. They wouldn't cooperate with us. But now, you have a vehicle that's telling us the whole story. You have shell casings inside that car which shows that someone was shooting from inside the car, and we also have rounds that hit the car which shows that they were being shot back at. So now, we have the evidence [inaudible] can come process the car. We can figure out-- we can trace that bullet back to a gun [inaudible]. That's huge. That would've never happened without this technology. It would've never happened in a million years without this technology. So--
Information	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	--what's been going on. Like today, I took yesterday off and-- another good point, if you're late for roll call and the lieutenant just, "You missed it. So really do you know what happens?" And that happens. And so anything important that he said, you're going to ask him, "I'm sorry I missed your roll call, sir. Could you repeat it for me?" You don't want to seem like an idiot. The computer is pretty good about telling mainly the doc which is headquarters-- really, really violent stuff is usually put on there. That's family members, lost firearms which is every day. So every

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								day, there is a lost firearm. Not on law enforcement.
Information	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	Okay. So like I said, if I want to access a shooting, to see what was a shooting about, I could go on there, pull it up, and figure it all out. Is it going to take me a few minutes? Yes. But me as an officer, I know where to look for this. Other people, no. And there's only a few apps on here, the ShotSpotter, I assume you've been hearing about that.
Information	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	Well, it all depends. What do you feel like doing? I mean, there's problem areas that you could drive by, see what's out there if you want to take protective steps to stopping people. That's always a good thing. But if you're doing that you basically got to call your co-worker and say, "I'm going to try to put a stop on these guys." Or at least let the dispatcher know what you're going to do. I mean, they give you a set of keys and say, "What do you want to do today?"
Information	LE	U	Field Responder	36-45	6-10	Male	LE-U-025	I think the biggest calls for service are the ones that are violent. And certain houses that you know are really bad, when you go there, you know they're bad. Okay. But I don't know if it would be good to know, well, this person who called is a battery victim, or-- you could always do a history on the location.

Information	LE	R	Not specified	46-55	Not specified	Male	LE-R-042	Criminal histories, driving records, vehicle registrations (e.g., boats, planes)
Information	LE	R	Field Responder	46-55	21-30	Male	LE-R-052	In the morning, the only routines that we have are every morning we will send out a brief. We get a pass on from the night lieutenant. If I'm on day shift this week, I had a pass on this morning from the night lieutenant to let us know anything that's going on, major that's taking place, that may take place today, like a major incident, and it may carry over to us. We'll do a debrief and then from there we'll send out the bulletins to the deputies using our computer system. It updates them; they get the same pass on it that I get. And then at the end of the day we do the debrief to the oncoming shift.
Information	LE	R	Field Responder	46-55	21-30	Male	LE-R-052	So what I always tell them, I'll get--if there's something important, I'll listen. If it's something they say, look, just email with that information, that way I can make my notification because they can tell me something, I don't have time. A lot of time you're driving because you're going from Point A to Point B, you don't have time to pull over and jot down like a note or take a recording about everything that's taking place. So me, I'd rather be able to look at it, see it, and then send it off.
Information	LE	R	Field Responder	46-55	21-30	Male	LE-R-052	...But our GPSs are in our car. As soon as they turn the car on, it begins. Actually it's always tracking them because it's programmed into the computer of the car. The internal car computer. So it tells us if they're wearing a seat belt, if they hit the brakes too hard, if they accelerate too hard it's sends out all these notifications
Information	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-053	Social media on both hands whether it's the fire service or the police service, it's a great tool. But it can be a tool that can hurt you. I believe especially, especially an emergency, emergency work, police work and fire department work, that social media as far as us is public service should be a one-way direction. We should only be sending information out. We should be informing the public of what they need to know, in

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								other words we shouldn't be commenting on other people's posts. We shouldn't be allowing people to comment on our posts. The public service aspect of it should be a one-way direction. We should only be sending out valuable information about road closures or anything to update the public. As first responders, we should be more professional than argue with people on social media and put things about our personal lives on social media. We shouldn't be doing that.
Information	LE	R	Field Responder	Over 65	11-20	Male	LE-R-054	Well, of course, the nature of the call, the location of the call, the nature of the call, if there's any weapons involved, if there's--what the life safety issues are of somebody being threatened or somebody's house getting broken into, it's kind of unknown, so you kind of want the information to lead you up to how to respond to that call and what to look for in that call.
Information	LE	U	Field Responder	36-45	11-20	Male	LE-U-055	I think it's kind of, in my view, it may be I'm a little more removed than maybe some of the other people that you'll talk to. Most of my interaction now is through email or text. I'm very little on the radio unless there's a major incident or we're working some large event. From the department side, hmm, we put a lot of emails but not... not critical information. Yeah, if we have a certain call or a certain thing that needs to be done then we're going to do that either via radio or pick up the phone and make a phone call. So I think it's maybe the shift is just mine and not necessarily the trends of what's going on in the department.
Information	LE	U	Field Responder	36-45	11-20	Male	LE-U-055	Yeah. We... we probably don't use our MDTs quite as much as somebody might. [city] whose call volume is super high, you know, we don't generate quite as much radio traffic. So we still do a lot over the radio. But the calls are pushed through CAD, through their, you know, through their MDTs. They're able to run license plates and enter their own paperwork and stuff like that. But you know a lot of our calls take you away from the car so you're still doing a lot of the information through the radio and having communications enter it and then come back and complete your reports.
Information	LE	U	Field	36-45	11-20	Male	LE-U-055	I think it's easy to get the information at least at my level I'm learning

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					about it that the part with information on a--specifically on a game day for us is how do we disseminate and who does it get disseminated to when you're looking at certain things. And so you know I think a lot of times it may end up being a phone call to a supervisor of a section and saying, hey look, we've got this coming up, go get your guys squared away because--you don't always want to put out an all-call over the radio because if an officer is standing next to 25 fans and they hear this is going on, then it creates that panic and you can't get in place to do the things you need to do to make it safe so.
Information	LE	U	Field Responder	36-45	11-20	Male	LE-U-055	--going to talk to them? And then you know I think we've already talked about it but they have the MDTs in the car. So they're getting information and communication through that. They're dispatched via radio so they're getting information through that. And then any face to face interactions that they may have where they're getting information and communication.
Information	LE	U	Field Responder	36-45	11-20	Male	LE-U-055	You know obviously we monitor it both from--we have a department Facebook page that we're pushing information out on and then you know if we have large events or events that may garner some negative attention then we're going to monitor social media to see what's out there and what's being posted on that. We use an app that we purchase and pay for it's a safety app that we push out to our students.
Information	LE	U	Field Responder	36-45	11-20	Male	LE-U-055	So you know as a typical patrol officer they want to know who, what, when, where, and why, you know the typical where am I going, what am I going there for, and who am I looking for when I get there. And I think our--and maybe it's just our officers, but our officers are very demanding of our communications officers on details before they actually get to the scene.
Information	LE	U	Field Responder	36-45	11-20	Male	LE-U-055	... And so we have... when we have events and we have known things, then we can use those to start pulling that information. The piece that we're missing is the day to day... maybe it's not surrounding a large event, what are we missing?

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Information	LE	U	Field Responder	26-35	6-10	Male	LE-U-056	Most of it is radio communication. I stress with my guys, I like to keep the net as clear as possible, I don't like a lot of radio traffic that doesn't need to be there, if it can be sent in an email, or we can talk by phone, or we can meet face-to-face again, we're small, so I can usually--at the office and go find them and meet with them in about five minutes. Important information, emergency information over the radio, I don't need an entire synopsis of what they did back over the radio, it just ties up the radio for an actual emergency.
Information	LE	U	Field Responder	26-35	6-10	Male	LE-U-056	It can be. It's never horrible. My perspective on it, because there are very specific things you would say on the radio when I was in the Marines, versus in law enforcement, the tasks we're doing are vastly different, and so a lot of times, we need to speak more information out. People do--some officers occasionally do have the tendency to ramble a little bit. That's almost day to day, it's just a custom, remind them, hey, try to keep the messages as short as possible. Before I went to Motors, I got this job, we used to have laptops and a couple cars, and we could send messages via that to each other. Which they do now, I believe, they all--pretty much every officer here has been issued a laptop.
Information	LE	U	Field Responder	26-35	6-10	Male	LE-U-056	Starts at Dispatch, then I'll call in to Dispatch, they'll look at the rotation of who is up in the call rotation, they'll call that next person, it usually starts off on alert, headquarters will call whichever officer they're trying to get to, the officer will respond, then the next step would be a--just a basic description, like a--copy, disturbance, or medical emergency here, or something like that, and then once that officer responds, because they know what it is and where it is, the communications will give them more information if they have it, over the radio, while there are officers on the way.
Information	LE	U	Field Responder	36-45	11-20	Male	LE-U-057	Yeah, well make sure they're not lacking any information that they may have, and they may have left out in error. Or just trying to cut corners. I say cut, maybe they had a busy day, and they just didn't think to put it in there. Make sure if they do have that information, hey make sure you put it in your report, you don't leave it out.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Information	LE	U	Field Responder	36-45	11-20	Male	LE-U-057	We do not a lot. NCIC obviously, if we're entering property that's been stolen or wanted persons. Other than that, we don't interact with them that much. Sometimes we'll have them run packets on a suspect or something to see criminal history. But other than that, it's not a lot, not nearly as much as the average patrolman does.
Information	LE	U	Field Responder	36-45	11-20	Male	LE-U-057	Our local fusion center and we have some people in our department. They will monitor searching for keywords around this area to see if anything hits on social media, and it will alert them. Just searching keywords for threats that might be against the community. We'll learn about a suspect, maybe group that they hang out with, friends, tendencies, likes, interests, where they've been, things like that. Also possibly we know one suspect, there may be others that are unidentified yet in the report. They may be friends with them on these social media sites, and they may communicate, so things like that.
Information	LE	U	Field Responder	36-45	11-20	Male	LE-U-057	When I first started, honestly when I first started, we had email, but it was used very rarely. Maybe 5 emails a day you would get, and now it's 56 emails. If you were dealing with your cases, it was never, information was never sent to you in email. Your supervisors didn't tell you what to do in email. I mean it was a lot of face to face, a lot of, maybe we used phones more back then, than what we do today. It's just, that's the main thing.
Information	LE	R	Supervising Field Responder	46-55	21-30	Male	LE-R-059	But you know, certainly we have processes that we follow and that being, you know, generally the guys will come in and they will brief amongst themselves as far as information that the previous shift dealt with again, you know, what type of incidents they dealt with the night before. They will brief the oncoming shift so they are aware of anything that may carry over into that oncoming shift. Once everything is done, we will go out, we will do our patrol car checks, make sure everything is good, jump in your office for the day, and then you know, go out on patrol. But, you know, as far as anything routine that we really do other than those briefings both at the end - excuse me- beginning and end of shift, that's really the true routine for patrol

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Information	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	We use the Motorola 800 MHz system. Every downriver community has their own separate channel. There is a plus and a negative with that, the plus being you can be a little bit more informal on the radio on your own channel, but you kind of lose unless you are scanning them, you kind of lose the aspect of what is going on in the surrounding communities. If your dispatcher is not paying attention to an armed robbery or something that happens in [town], potentially your officers could not even know that it is heading their way or it's happening or suspect vehicle, and for the most part we try to - the two of us working the desk tries to monitor all that stuff and let the officers know that there is something going on in the surrounding city but if they are not specifically scanning, the communication between the downriver departments is minimal.
Information	LE	S	Field Responder	36-45	11-20	Male	LE-S-061	...When 911 comes in to [town], and somebody needs a rescue, I transfer them over to [city]. [city] takes the information and dispatches the fire trucks. So, there is a, you know, give or take 30-second lag, and that is the whole thing is outside of - they got a grant to bring this on, but they want to eliminate the middle man and everything go directly to [city], which, you know, strategic-wise, it's the smart thing to do because for me to pick up here and transfer over there is kind of dumb and up until 6 months ago, they ran a complete different radio system than us; we couldn't even communicate. We had an old 400 MHz radio at the front desk that they were on. They were at 400 MHz up until about 6 months and that is one of the big reasons why I think the guys are so hard pressed to combine with [city] because I mean, up until now, the only [city], as a road officer, I have probably dealt with [city] 3 times in 20 years because we never had any communication with them.
Information	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	Most things are done with our police radios. We can also send messages over the computer if we don't want to call, you know. A lot of the public have police scanners and certain information that may be sensitive for specific crimes you dont want to go out over the airwaves where somebody is going to, you know, immediately post on Facebook

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								or on the internet or call the station in a panic. So we will send that over our private messenger system.
Information	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	It depends. I mean, I would say 90% of it is. We also have more sensitive missions, if you will. You know, if we are going to pick up somebody on a warrant, we will have all the officers meet in the station, go over our game plan, figure out where everyone is going to be, what everyone is going to do. We got a [unintelligible] board at the back, you know, if we have certain things that - really in-depth, things of that nature; we meet with other agencies here who need assistance [unintelligible] come out to look for people before; Department of Corrections, state police, Child Protective Services, so we will meet them here in the station a lot of times, formulate a plan and then go to the location, but then all the communication is done in person, so when we get there, nobody is confused; theoretically, nobody is confused.
Information	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	So just to eliminate the confusion, we can put a drawing; this is the street, this is the house, you know, things like that; that definitely simplifies things.
Information	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	What's going on, why [unintelligible] when I get there. Sometimes it is just an ongoing problem; this is the fourth time we have been here in 2 days, you know, somebody needs to go to jail.
Information	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	Basically, I mean, that is, you know, if there are any weapons involved, they wanna know. Sometimes somebody calls and says, so and so has got a gun, that is obviously going to change your - we approach things cautiously anyways, but you it really stuffs it up, you know; somebody's neighbor calls and says, hey, he is out in the yard with a sniper rifle, well, you know, we are not gonna pull up in front of the house. So.
Information	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	You know, all that stuff and any pertinent information but at the same time, we try and keep the non-essential of the stuff you can figure out once you get their information, you know, to a minimum over the radio instead of tying it up.
Information	LE	S	Field	26-35	6-10	Male	LE-S-062	Because that way it will show up on your computer along with any notes

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Responder					or miscellaneous information, or they can tell you [unintelligible] because like let us say you call 911 for a car accident. They can dispatch me the car accident immediately, [unintelligible] Drive, 2-car injury accident. I am already en route. It might be another minute and a half before he types everything up and puts it on the computer, so once I get there usually that sort of thing, report number, whatever else from there and go from there but you know, not looking for a vague description you know, 2-car accident between a semi-truck and a passenger vehicle, stuff like that you wanna know but you know, you don't wanna the -it's a red Ford Contour with scratches, 82,000 miles, you know, we don't..
Information	LE	S	Field Responder	26-35	6-10	Male	LE-S-062	S1: So now too much information. Just pertinent information. S2: No, no. Essential, yeah.
Information	LE	R	Other Public Safety Personnel	36-45	6-10	Male	LE-R-043	Usually through emails. People will call. We have a system as far as like updates for the parcel and then that will include road and address points where we built a script and once a week we run it and so if the assessor breaks out and plats a new subdivision and records that new subdivision then I get they create new parcel ID numbers and then so there's a script that runs over the weekend that says these parcel ID numbers are not in the GIS layer so that tells me that there's new stuff that they did and then I can go in there and update that and do those updates so yeah and as far as you know other things that need to be updated you know people will send me an email saying this address needs to be updated or this thing text messaging thing needs to be updated or who knows what so yeah.
Information	LE	R	Other Public Safety Personnel	36-45	6-10	Male	LE-R-043	Or a link? Yeah I don't know if we ever did a link. I don't remember a link just because it was like 32 megabytes. It was huge but maybe there's a link. Things I'm still learning to find out but I know like you know he's just coming to me he's like here's your copy and he gave me a DVD and so I had a copy.
Information	LE	R	Other Public	36-45	6-10	Male	LE-R-043	And just kind of manually gave me a copy but yeah I haven't had to distribute anything yet as far as a big plan you know. In the past with like

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Safety Personnel					an IAP or something like that is an action plan sorry we would just email it, use [application] right? The state has The [state] has [application] so we'd post it on there and people could get it off of there or we'd send it out in an email.
Information	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	...So there's that disconnect there between you know are we is that really the role and I might be on a different page there than a lot of people. Also because I own my own business right so it's a different perspective around the efficiencies and just the little things that we do as far as you know having when you stop a vehicle we give dispatch the plate, having the information pop up on our screen you know that's possible on the information that the vehicle is stolen, registration cancelled blah, blah, blah we don't get that. So we walk up to the vehicle in an unknown situation now we've always done that for the last 250 years or however many and we haven't had very many shootings or many issues right so I think until and this gets back to the reactive part I think in law enforcement in general until we get to the point where we are there's a need like a clear cut need I think we limit ourselves on how we view technology and that's difficult at times.
Information	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	So the information that we use the most is going to focus around colonel statutes, some civil statutes all of which we reference the [name] legislature's website form. We do have code books in the car. I find and a lot of guys find that it's faster to use the website than it is to thumb through the code book because it's searchable. You can just type in keywords and it'll pull up.
Information	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	I leave them on speaker phone particularly when we have a barricaded subject or a guy that has made threats. The last thing I want to do is walk to an unknown with a person like that and so that's an easy thing for me to do. I just set the phone on my MDT I close it, I put my phone on speaker, I star 67 them so they don't have my number, I let them know I'm on my way and then when I get close I'm like where's he at? I say he it could be she it has been she. Where are they at? Do they have any weapons? Has anything changed in the last couple of minutes? Have

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								they made any statements? Any threats? Anything like that because all that's playing into my response and when we disconnect from that person once dispatch gets the initial information so if they're dispatching us to a domestic so we're in route.
Information	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	...we go and we get back to kind of one ranger kind of mentality of that we are our own resource. If we need more we got to do it because what the county is able to provide us is limited and so that type of information to me is very valuable and I use it a lot. Other guys don't they're just like whatever it'll be fine nothing's ever happened. So it's different mindsets around that. For me it's really easy to pick up the phone and make that phone call.
Information	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	For sure. So call history is really important to us as well. We don't have the ability to lookup call history as far as repeat events so sometimes and this goes for even the full times guys so we're four on three off and then three on four off and then vacations and everything else so there's times where schedules literally you won't work for two weeks which is great. A lot happens in 2 weeks so you may have a neighbor dispute it's an ongoing issue and you know you're getting sent to a call that you think is a brand new issue, you get there this thing blows up in your face and you're like I wish I would've known what was going on. I wish I would've known what [name] had told them. I wish I would've known what Sergeant [name] told them. I wish I would've known that they were given information to contact an attorney. It's a civil matter so that kind of information on past events (00:33:24) will help us solve the issue quicker and especially where they're trying to manipulate law enforcement on civil issues to see who they can get. Maybe they can get the new guy who doesn't necessarily know and they'll get him to actually write it and give it to the prosecutor. That kind of stuff is helpful.
Information	LE	R	Field Responder	26-35	6-10	Male	LE-R-044	But you know I'm not really sure in some cases how relevant it would be. It's just every once in a while you'll find a nugget that you're like oh I wish I would've known that you know. I wish I would've known they were out on bond. I wish I would've known that they were just arrested last week

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								for this and because it changes their state of mind. If they're out on bond and they don't want to go back to jail that's different than somebody that's getting popped with a DUI for the first time and having access to that type of critical information sooner I don't know how you do it but having access to that type of cutting edge information sooner in my mind is what will make us more effective and safer with the job.
Information	LE	R	Field Responder	26-35	6-10	Female	LE-R-046	Well like I said we're often alone so sometimes there isn't a whole lot of communication. We're monitoring yeah we're monitoring usually we're on our radios and if a call comes through it's on our radio so that's generally how I'm getting information if I need it is through the radio but a lot of times you're just out there you in your car yeah.
Information	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	They truly are. So most of the time they talk by radio and then you have sometimes they say such stuff they really shouldn't say but you let it slide you know it's like the other day we got in a chase and this guy was doing over 120 miles an hour in a Mustang convertible and [name] gets on the radio and says [county]. I don't
Information	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	... Next year we should be in a lot better shape technology wise. One of the things they have is they have the ability with the Eagle Mobile to track the deputies, GPS and track their speeds and all that kind of stuff. I don't like that and I'll tell you why.
Information	LE	R	Supervising Field Responder	36-45	21-30	Male	LE-R-048	... You can look up people's phone numbers, you can look up people's addresses, you can look up photos, you can look up you know arrest history and it makes a huge difference and now you got to go through somebody else to get all that information
Information	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	Q: Okay so we've got both visual data coming in, auditory data coming in from multiple places, visual data as well, narrative data coming in on the texts so data is coming in in a lot of different forms. Who is it coming from? [S2] From our officers, from other agencies.
Information	LE	S	Field Responder	Not specified	Not specified	Male	LE-S-050	[S2] The app has 185 officers on here and how many jurisdictions? Probably 20 and like this car hit the license plate reader. They put it out instantly 185 officers know about it rather than it taking time to go

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								through dispatch or whatever. We would never get that information. It's real time.
Information	LE	U	Field Responder	26-35	6-10	Male	LE-U-051	I suppose who, what, when and where. I think the why and how we'll get later but kind of what's going on? Who do I need to meet and who are they describing? If it's a crime I need to know what this person looks like, where they're going. Some officers and it drives me crazy want too much information from dispatch and expect dispatch to have ESP but I have to know like you have to dispatch me the right location, you have to dispatch me the right type of call, code or signal. I can't go to a fight thinking I'm going to a car unlock and if there is a subject involved you have to describe that person as best you can and if you say to me look, they're not giving me anything I'm fine with that but yeah I think who, what, where, when the why and how we'll figure out later.
Information - Control	LE	S	Not specified	Not specified	Not specified	Male	PS-S-002	... And how interesting would it be that if my body camera did facial recognition as I was walking up to you, and then dispatch got a notification showing that [Name]'s been contacted by police, based on facial recognition of body cameras, four times in the last six months. Here are the incident numbers. Here are the agencies. Here are the associated cases. And you were always a victim versus being a suspect, or you were always a suspect.
Information - Control	LE	S	Not specified	Not specified	Not specified	Male	PS-S-002	... And then what happened when you went back to that house, and you wanted to know what happened at that house? Dispatch would call down to records, somebody from records would go find that folder, open up that folder, tell what happened to dispatch, dispatch would then relay that to you over there.
Information - Control	COMMS	R	Not specified	Not specified	Not specified	Not specified	COMMS-R-019	[S2] ... So, we are that conduit that passes that information.
Information - Control	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	...AT&T was terrible, and because we pushed mobile data, we pushed the call, the screen that comes up in there goes into the terminal in the ambulance, they get to see the call, they see the notes when it pops up. So that's important that they have that connectivity and it's also a Wi-Fi

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								hotspot on each ambulance through that data too. We can also send 12-lead EKGs through that system to the hospitals. So there's a huge...
Information - Control	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	So a 911 call comes in and it goes to the 911 call taker, so what we will do, because they're not EMD and we are, we EFD are all fire calls as well – so they take the call, they grab any information, the address - and then they code it C-fire which is county fire; or they code it EMS and it shifts the cards, and they transfer the caller to us. So they pick the phone up, and now we're on the phone with the caller; we again verify whether we have the right street, and then we EMD or EFD them and dispatch the calls.
Information - Control	COMMS	R	Comms Personnel	46-55	31-40	Male	COMMS-R-020	Yes. So what we've done is we've tied that code in the EMD card, so if it's an E26 which is our code, they might have, and they have the 10 code.
Information - Control	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S2] ...They work pretty closely with the other agencies assisting them basically with any criminal justice information that might be needed or researching or getting them reports or phone numbers or whatever it is they happen to be requesting but they work closely with all of the responders.
Information - Control	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S2] ...With our CAD system you have to have an address and a call type to get a recommend to send a to page out for police or fire so those are the primary pieces of information that they have to have immediately and then from there it's just data collection of you know depending on the call type whether it's clothing descriptions or suspect's names, weapons, children involved, vehicle descriptions, road of travel and if it's an accident it's related to injuries, leakage, Hazmat stuff so they have their with EMD they have their line of questioning.
Information - Control	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S2] Obviously not using type printers anymore or index cards so all of our records management. We moved out of our card files and implemented them into the records management system so that it shared across all the agencies so they have that access to them. You know if they'd come across an individual they can see well okay this guy's been doing this, this and this you know or whatever so that's

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								definitely been useful. Can you think of anything else?
Information - Control	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S2] So the text to 911 comes through your text messages so basically if a call goes out so like if a call goes out they get the call for service, they get the call code description, they get the call for service number, the address, the city and if there's like a business name or something like that so they'll get that.
Information - Control	COMMS	R	Manager	46-55	11-20	Female	COMMS-R-008	[S2] It's almost the same as this so what active 911 does is they can actually say okay I'm going to go to this and show me a route. It doesn't show us that they're in route but it shows the other responders on the app that they're on their way so you kind of get an idea of who is coming to the call.
Information - Control	COMMS	R	Manager	56-65	11-20	Male	COMMS-R-002	There's another recorder that we can go back and get traffic for your, I guess, phone calls and stuff that not everybody has access to that. But the supervisors do because they get requests for that from like the DA. So they go back in, and we just replaced that this year as well.
Information - Control	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	Let's see, well, I talk to the public if they have a complaint, for example. That will immediately come to a supervisor. So I will get their name, phone number, what the gist of the complaint is, and I will forward that information to my boss who will then figure out who it belongs to and distribute it to that chief. So if the incident happened on B shift, then she'll look and say, "Oh, this happened on B shift and Chief so and so was working. I'm sending it to him." So my job is to collect the information, not make any judgments or anything, just thank them for the information and then send it along.
Information - Control	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	Once for the address, and the second time to verify it. So address verification, you have to ask it twice for a cell phone caller. Then they ask for the phone number, and that's usually correct with [inaudible] that comes over. The phone number is usually right. And then we ask their name, not a big deal but if they're struggling or-- it's really not a big deal. Then we move on to we open our protocol, EMS protocol or fire protocol. And then we begin asking them the questions on the protocol.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Information - Control	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	So then the call taker will process the call and then once they get a call type, the call automatically goes to our dispatch pending screen, so the dispatcher-- and it makes a beep, and that lets us know that there's a call for us to dispatch. So the dispatcher opens it up and the supervisor, the dispatch supervisor opens it up, looks at it and makes sure it's the right call type, the remarks match the call type. And then the dispatcher will dispatch it
Information - Control	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	The dispatcher will get a response package recommendation from CAD, and then if it looks good, then they'll hit F12 which dispatches it, which sets off the station alerting in the station and-- yeah.
Information - Control	COMMS	S	Comms Personnel	46-55	21-30	Male	COMMS-S-004	Right. They say, "Hey, is ambulance 841 available?" And they say, "Yep. They're available. Where do you need them?" So we'll give them the information. Then they'll dispatch their unit to come into our county. [name], [name], and [county], we generally use the north mutual aid radio channel for them. So we will call them on the north mutual aid radio channel and they'll call us, "[name] to [name], is Medic 115 available? Or Medic 715 available?". And they'll say, "Yeah. That's correct. They're available." And they'll give us the address right over the radio channel. Right. So we're typing the address in on our-- we call it an II form.
Information - Control	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	I don't know how familiar you are okay so teletype is basically a nationwide network that allows different law enforcement agencies to communicate with each other securely and also enter things like warrants or stolen vehicles, stolen articles stuff like that into a system and that's NCIC and then the [state] version [application]. I don't know if you're familiar with that.
Information - Control	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	Okay so let's say I'll use a domestic because a domestic I think is a pretty good example of a regular call that we take so the most important question that we ask always is the first question we ask is what is the location. We need to know where it is right? Our technology in terms of locating people is just not there. We don't know where you are you know I've used the map as a reference but based off of the cell tower that you're hitting off of I don't know where you are. You could be anywhere

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								you know and that's why we get a lot of calls for different jurisdictions
Information - Control	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	If they don't have a street address or they don't know ask for the closest intersection and then if they don't know the intersection or they don't even know that I'll ask for like a hundred block or something like that just like what street are you on and then I'll ask them for landmarks for a last resort if they really don't know where they are. I don't like using landmarks because there are some areas of the county that I'm really familiar with and some areas that I really know and if you describe something to me I'll know what you're talking about but a lot of that is very subjective and it's based off of my own experience.
Information - Control	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	So anyway so location and then after I collect their location I want to know a brief description of like what's going on so usually I'll say okay well tell me what's going on there you know tell me exactly what happened and you know if there's type of whatever they say you know say like arguing with my boyfriend or you know my girlfriend just hit me or my wife is you know doing whatever I'll enter that information and then I'll get them started. That usually takes maybe 30 to 45 seconds for me to get that call in and depending on the cooperation of the caller, the clarity of the information they're giving me and then I'll go straight into my main officer safety related questions. I'll ask them okay are there any weapons in the house? Yes, no? If there are weapons where are they located? Does anybody have one? Are they guns, knives, what do they have? Has anybody been drinking? Is anybody under the influence of anything? Where are you? Where is this other person? Are you both in the apartment? Is this going on right now? You know did they leave? Okay let me get a description of them. Are they black, white, Asian, Hispanic? What color shirt? Pants? And then I go back around. I do my next descriptions you know how tall are they? How much do they weigh? Heavy, thin, medium build? What color hair? You know and then I'll say you know which way did they leave? Did they leave on foot or in a vehicle? If it's a vehicle I can look up a description. If they went on foot I want to know which direction of travel they went. How long ago did it

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								take them? That sort of stuff.
Information - Control	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	... I know how I want to get a description of a person and we're trained on that and then I've added my own flair to it you know and so once you learn that stuff it becomes a lot easier to process a call even if it is a high stress environment and then also that being said we also work you up to that you know we start you off on phones. You take really basic calls and then you take the non-emergency line and in the non-emergency line you are going to need to use some of those skills you know in a trespassing person or a disorderly subject or something like that. You still need to get a person description but you don't need to get it as high as important as you might need for like a hot call or something like that's really active.
Information - Control	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	There's a lot of emphasis on that and it could be for anything. Could be something simple like teletype where you're entering a warrant and then you put in the wrong information and then that person gets let go because you didn't put in the right information right? So or you could put in the wrong information and the wrong person could get arrested right? So you know you have a situation where somebody is getting stopped and then you get a hit off of this person and then the information in there has something that says for some reason this person is a white female 200 pounds or whatever when in actuality it's an Asian female who is the same descriptors, same similar name and instead it's an Asian female it's one letter right? You put an A or a W and the officer could arrest the person because they're like this is an Asian female fitting that description and they arrest this lady and she's never done anything wrong in her life.
Information - Control	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	I would really like anything related to geo stuff is very helpful. Location is again the most important thing that we always need to find out. You need to know that. We need to know where you are and we need to be able not only do we need to know where you are but we need to be able to guide the responders to that location so when we ask our locations and my 911 calls again I have a little personal script and it's just my own

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								<p>preference but I answer the calls the same way every time I say [County] County 911 where is your emergency? And then sometimes they listen to me and sometimes they don't. If they don't listen to me I'll redirect them to that question okay where are you? You know and then if they do listen to me and they give me an address and you know you say [County] 911 where is your emergency? And you say [Address] and I'll say okay [Address]? I verified it with them they say yes. Okay is that a house, business or an apartment? And if they say it's an apartment. I say okay what apartment number are you in? And then apartment number 810 because sometimes people don't think about that so I need to know what apartment we're going to.</p>
Information - Control	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	<p>Right I'm in apartment 810. Okay and what is the name of the apartment complex? It's you know [apartment] or whatever and then I've got that info and then I go into my next question okay what's going on and they tell me exactly what happened right and that is then you know regardless of what happens after that if we get disconnected now they know exactly where to go so if the numbers aren't really obvious on the because this could be a place they've never been before right so if the medics need to go there and they see you know they don't see the numbers on the building but I've written in [apartment] then they'll be like okay [apartment] and they'll know which unit to go to and I just cut off you know if for whatever reason the phone disconnects like right at that second after I got I don't need it I should call you back and get more information but I can get them started you know.</p>
Information - Control	COMMS	U	Comms Personnel	18-25	5 or less	Male	COMMS-U-006	<p>Yes we should get the call back number as soon as we can. The our ALI/ANI will display the number they're calling from if we get it on a 911 line. If we get it on a trunk if we get it through a transfer that's usually one of my first questions. Is what call back number are you from? Especially if you get a transfer I always try to verify that you know because I have had that before where I've made a mistake where I didn't get that information straightaway and then I wasn't able to call them back but at least I had the location.</p>

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Information - Control	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	... Basically what it is it's an application that you can open up and you can put whatever information you want, your medical information, your husband or wife's information, your kid's information, your pet's information, where you work, what kind of cars you drive, medications you're on anything and everything that you want, you can put your home address, you can put your work address, you can put your typical route that you drive.
Information - Control	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	If we need to give lookouts for a vehicle that we're in pursuit we can get on to that radio channel and blast it out to the area and everybody gets the same information at the same exact time versus making individual phone calls to each jurisdiction. So we do have some of those resources to us to contact each other. We also can call each other on the non-emergency line and things like that but again you're having to verify who you are.
Information - Control	COMMS	U	Manager	26-35	6-10	Female	COMMS-U-007	So the reason I end up at this is actually that our fire department is working with one of the awardee companies. So it ended up trickling down that no one could kind of attend and so they came to me about a week before the conference and said can you go and grab information for us and bring it back and let us know what this company is truly wanting to do and so I've brought back that information from this and so we are working with that group now to pull in their technology so that they can do some trials with us and really see what they're doing.
Information - Control	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	...Every morning I usually do all the warrant stuff. And then I get emailed all the warrant stuff, all the follow-up. I email the prosecutor or the city attorney. I do all the subpoenas. And then I do all the court notices for the officers.
Information - Control	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	...However, we have a CAD system, which is computer-aided dispatch, so I've had people call here and say, "I'm walking down the street. I see smoke coming out of a house." I don't tell them to hang up and call 9-1-1. I just take all the information. I enter it into the computer. It's already on the screen for central, and then I'll just call over there and say, "I just put one in, on such-and-such street. I've got a medical; They need

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								an ambulance," or, "I've got a fire, they need the fire department." Or even, if I get called calls outside the city for traffic, accidents, any of that stuff, I just put it in, and then I call over and say, "Hey, I just put one in for you." Just because it's just as easy, we all look at the same screen, and it's, to me, it's not right to make people repeat all their information, or it someone is in a panic mode, to say, "Hang up and call the sheriff's department," or, "Call 9-1-1." You just get their information and put it in there. And then it's done.
Information - Control	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	Basically, you're just going to make sure that-- anywhere from 8 to 10 minutes-- depending on the call. If it's not a big deal, you're going to keep checking their status. Make sure they're secure and they don't need any backup. Or if they do, you get backup on the way. If they need, like in that instance where [Name] needed a file, so I ran the file and he asked me to save it, so you print it off. I generally will put the complaint number and the time on there so they remember what it was. If it's an accident, they might ask you to put-- so that was driver of vehicle number one, which was brown. And then, again, I put the complaint number and the time. So your job would be-- just make sure everything is in order for the officer. If they have an arrest, I automatically will run a file, run a criminal history, run a driving history. Have that whole packet ready for them when they come in so they go to write the report. And then, when we go to submit the warrant, we've got all that paperwork that goes with the warrant. If it's an accident or an arrest, you would be responsible, excuse me, to get a wrecker. Or if they get to a scene that came in as a non-injury and somebody says, "I'm having chest pains," they'll contact us on the radio, we get ambulance and fire on the way to have that person checked out. If we have a combative person that needs to go to the ER we will call the ER and say, "We're coming in with somebody", you know, same thing with the [crosstalk], anybody that's combative, we would let them know for safety reasons, "We've got somebody coming in, you might need more manpower or some way to strap them down or--" ...And like I said as much information as you can get, you put into that screen and then all the information you get you relate to the officers.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Information - Control	COMMS	R	Comms Personnel	46-55	21-30	Female	COMMS-R-005	I mean, when you, especially not so much-- I mean, I have caller ID, which is nice, but when the sheriff's department takes a 9-1-1 call and we get all the information. We've got their address, we've got their name, we've got their phone number, so we can call them back. And that, that's awesome.
Information - Control	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	We have got a protocol that a list of questions that we're trying to get information about and then you're calling you know that you're calling out and giving deputies that information or fire or whoever needs it and also then sometimes trying to stay on the call if you think that you need to be helping still those people who have called in and that's maybe when things get complicated here is when you're on the phone with people but you've got to be on the phone with the deputies and so you're going back and forth. That can be complicated sometimes.
Information - Control	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	We start out by asking who this is and where they're at. Those are the two pieces of information we really have got to get. Who is this and where are you at? Then we need to know what's going on. Is this an accident? Is this a fire? What's the nature of the call because then we have to send out the appropriate people so that's the main information at the minimum that we need to get. Kind of who is this, where are you and what's wrong? Once we get that we really need to dispatch because that's all they need to get going and because we are such a large area it might take one of our deputies a while to get wherever they're going so we want to get that information out to them and then we might go back to the person then and ask we're going to ask things like is anybody hurt? Is there anything else we need to know? If it's a situation where somebody's called in with a robbery for example we need to know if the robber is still there or if the person is gone. Was there a weapon involved? And again these are really rare situations for us but they do happen occasionally so that's information we're going to ask about. Sometimes we'll get off that call with the person unless you hear that they really need you there or it's the type of call that really means you need to stay on the line with them until somebody gets there. And again

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								we'll have dispatch to either the deputies or fire or EMS sometimes all three depending on what's going on and that location.
Information - Control	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	Oh our responsibility is about getting the information from the person and communicating that to the right people so they can go and help with that situation. That's our responsibility. Sometimes our responsibility I won't say it's really our job responsibility but I think maybe we feel a sense of responsibility to stay on the phone with people and keep them calm and keep them focused. You know if there's been an accident sometimes the person who is calling is the person who is not hurt and they're seeing their loved one in pain and they're then in pain too so part of it is for you to stay calm as a dispatcher in those situations and stay on the phone with those people so we can kind of be the anchor we're the anchor then for those people.
Information - Control	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	No I think I would say we pass on all the information we get. I think our people want to know as much as they can get. Again it's very rare that we're going to have two things going on at once so it's easy enough to take the time to give someone all the information they need so I don't know that we're making decisions about information as much as we're passing information along.
Information - Control	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-009	Sometimes that is true that we get too much information from people and we don't need to pass all of that along to the folks and so we sometimes do leave things out at least in that initial dispatch and then we might call back and give them additional information later but they need that first information to really go in and deal with the call so that's I think sometimes what I would say that it's really it's a people problem more than anything and people giving you the right information when you ask it in ways that are useful.
Information - Control	COMMS	S	Other Public Safety Personnel	36-45	11-20	Male	COMMS-S-001	[S3] But the boards will just be easy ways to put summaries of information, right? So one board will be the fire department status for this particular agency. Another one will be an EMS status, and one will be road status and those kinds of things. So we do that exact same thing but we digitize it in the application, right? So we have all those

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								things, shelter statuses, staffing levels, we've got road statuses, those kinds of things so that at a glance everybody can see the same information at the same time. And as I start adding information everyone else gets to benefit from the information that I'm sharing. One of the things we're priding ourselves on is not making it too complex because if it's too complex, you require too much information, then people are going to be hesitant to actually use the tool. But we've been really successful and just about everybody says it's been an amazing implementation.
Information - Control	COMMS	S	Other Public Safety Personnel	36-45	11-20	Male	COMMS-S-001	[S3] So on a basic level, it's all manual entry. We can pre-supply a lot of information. If we know that these 20 different places are likely to be where we're going to open up a certain kind of shelter, we can pre-populate that and then just say, "Yes, this is the place," when it's go time. But it's all manual entry for the most part. A lot of things will get drop down options to make selections to make it easier. But yeah, somebody will go in and actually enter that information.
Information - Control	COMMS	S	Other Public Safety Personnel	36-45	11-20	Male	COMMS-S-001	[S3] And it's a good question because, operationally speaking, when an incident first happens, we've found that it's better to a let a command and control type scenario work out from the communications perspective. So if those that are in command get together and have a conversation, then they can push that information back out to their respective employees and partners. If the incident is going to be prolonged it's better for us to all figure out a communications plan, and then segment that up by function as opposed to silos of law, fire and EMS. So there's a time factor to when we decide, "Hey, we're going to enter operate communications," or we're just going to let it ride because everybody knows how that operates on a daily basis.
Information - Control	COMMS	S	Other Public Safety Personnel	36-45	11-20	Male	COMMS-S-001	[S3] ...And there's a communication flow that has to happen and it's really challenging. It has to go from your very local jurisdiction up to your operational area, and it has to get processed and synthesized and say, "Okay, what's the scope of this," right? And it's much more detailed information than you would get like, "Hey this building is on fire." Okay?

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								"Let's all run and put it out." Well now you've got to go back and you've got to have building inspector information. You've got to have-- how much time-keeping that's involved? All these different components of information that make that process a lot more complex. And then you have to account for it, right?
Information - Control	COMMS	S	Other Public Safety Personnel	36-45	11-20	Male	COMMS-S-001	[S3] Yeah, so it's interesting, right? So [inaudible] commander may say, "Oh, this fire is going to run this way and there's potential evacuations or whatever." He'll call and say, "Hey, I need a community warning message to go out," and then we get notified that way. Technically, they're supposed to notify our dispatch as well, so dispatch center to dispatch center. So there's just a variety of different ways that things-- information is getting shared. We are working on a project right now to kind of standardize all that through a guide process. And then, working with each dispatch center on what triggers a notification for us, what doesn't. So.
Information - Control	COMMS	S	Other Public Safety Personnel	36-45	11-20	Male	COMMS-S-001	[S3] They're opting in with their cell phones. So if you want a mobile notification or notification to your cell phone you have to opt in to do that.
Information - Control	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	Well I monitor the schedules for the four dispatchers that we have on our 911, in our 911 COMMS center. It's both sheriff and EOC, which is [County]. And it's manned by the both of us. We are cross-trained, so either one of us can run whichever console that we're on. It's just a different pay by different entity. Besides the scheduling, I fill in when we're short. I monitor any training updates that they have to do, so I keep track of all trainings, training schedules, any new training that's out there I look to so we can be updated and with the latest and greatest. Make sure everyone has their technology skills up to par.
Information - Control	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	... And we have to make sure that we get all the pertinent information, such as how many weapons they have, is that person still armed, can you see him, are they irate? If they are, can you put yourself in a different area? That way you can give me the information that I need, and I can

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								get you the help that you need, so we can we can neutralize this subject, make sure that if we can't subdue him easily, then it's just something that just had to happen that way... So when the girl that we was doing the reports with, she gave me the address, and I said oh, yeah that's the house fire... That's a plus, because in the event that they need anything, any information, I can give it you off the top of my head. I know where to go and find that information. And it's not a problem at all.
Information - Control	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	... They want what they want, when they want it, and how they want it. And some people, you can't get them to understand I'm only the dispatcher. I take the message; I relay the message. Now when that officer or when that person that you need that help, that assistance from gets back to you, it's not my fault.
Information - Control	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	...We have different alarm companies that the residents get for their businesses, their residents, that we interact with. And it's basically getting their information and getting the homeowner's information or the business owner information so we can get assistance out there to see if their business or their homes are okay. We also interact with the school systems, making sure everything, if we have to close down due to a hurricane or tornado, we get the superintendent in. What time will you want to do something? What do you want us to put out, because we put out that information. And that in a nutshell is, the councilmen, [inaudible] the communities, the different districts, we have our council members that speak for that area. So if they call in and they need any assistance or they have a resident that's calling them for certain things that's going on, they may call in, and they'll ask what's the latest on this, or did you all send anybody out here? So we give a lot of updates.
Information - Control	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	Mm-hmm. Sheriff, fire. We have the two police departments, which is Lutcher and Gramercy. We dispatch for both. For EMS, we transfer straight to their dispatcher. Now we do assist their dispatcher in getting that information. If they lose the call or if they couldn't hear the caller, and they call back, we already got that information, so we'll in return give it to them and make sure they have the assistance if they need any

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								assistance going in. Then we assist them in doing that also.
Information - Control	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	That's a stressor. That's a big stressor, because if you're busy, and they're on that traffic stop or they're doing something else, and it's one of the officers that, okay well [inaudible] I gave you this information, I need this information back. I understand that, but you have to take into consideration that hey, I was on another call, I was trying to help somebody else. So getting them to understand is a major stress. That's a major stressor.
Information - Control	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	A typical call, a subject calls in. You get their basic information, name, address, and their location. Location is most important. That's the most important. I can get your name at any point in a call. If I don't get your name when my deputies get on scene, they're going to get it, and I can get it from them. So my most important, the most important thing that I always stress during training is location. You can't go wrong if you get the location first. You get the location, and you get what's going on after. So once you have your location and what's going on, you can get that deputy or the fire service or EMS headed that way. I don't have a caller's name at this point. I know it's a female, it's a male. I know there's kids involved. I know the basic. The rest of the information can come afterwards.
Information - Control	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	Making sure that the deputy that's responding or fire service, EMS, whomever that we have responding, gets there and have the direct avenue to get there, the perfect location, have the correct information on, as far as if it's safe to enter or is it safe to go in, and do you need backup.
Information - Control	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	Yes. We try to send out the, you'll get a long story. You shorten it up and give it out in a timely manner, because the more information you get is always helpful. But it's how you put it out over the air.
Information - Control	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	... So in event we are on a call, and we're getting information from that caller, we don't want to accidentally press that, and it goes over the air. So we mostly use the microphones, and we know when we're going to

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								press that and [inaudible] out.
Information - Control	COMMS	R	Manager	36-45	6-10	Female	COMMS-R-010	In the event of our 911 system going down, if it ever, if it has to, normally the last time we ever had to do a rollover was during one of the hurricanes. And it hit a tower, one of the cell towers. We lost our capabilities to receive any calls coming through from AT&T and Boost Mobile, the different cell phone providers. It'll roll over to our neighboring, our sister stations as [City], [City]. And what they'll do is they'll call us and give us that information, what they just got from that call, and we'll give it out like that. So we have a partnering system in the event of that. We have everything in place whereas, okay, we got a problem. Let's call [City], let's do this, and we have our plans.
Information - Control	COMMS	R	Manager	36-45	11-20	Male	COMMS-R-011	... And when it comes down to the communication end of it versus the emergency management side of it, it kind of ties together because when we do have natural or man-made disasters, all of a sudden we're wearing several different hats at one time and having to change gears to do and make sure that we don't overstep our boundaries, if you will, speaking, what's either law enforcement-sensitive and/or dispatch-sensitive versus what's going on in the real world. So we're almost the speed dial call of a lot of people because when's the roads going to open, when the bridges are going to reopen, that type of thing. So I mean it's, and they come to us for a lot of answers that sometimes may take us a little while to get back to them. It's quite interesting.
Information - Control	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	The problem is, where the public wants to know every detail, there's some things it should be a need-to-know basis. Like we had a kid that was investigated at [School] for possibly having mental, thoughts about shooting up school. And everybody wanted his name released, and they're failing to understand this is a child. And look, I understand he's just as capable as an adult, but he's still a child. There's no need for everyone to know his name, to go pounding on his door, and make the situation worse. But you talk to a lot of people in the public. They felt like they should know. Who is this kid, and he made a list. They want to know who was on the list, and those kids were interviewed, but the world

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								doesn't need to know all these juveniles' names. I wouldn't want my child's name put out there. Or that following him for the rest of his life. What if he just had a, he just needed some mental clarity, and ten years down the road, hey, you wanted to shoot up a school ten years ago? No, he's not the same person he was ten years ago.
Information - Control	COMMS	R	Field Responder	18-25	5 or less	Female	COMMS-R-012	Well, the call volume definitely increases, which the problem we have [inaudible] we're answering the same question. Even though like we put our press releases, we've put out, there's numerous ways to inform the public, and like they'd rather just call. Which is fine normally, but if we have an active shooter, we have other things that we're focusing on and getting everybody ready 'cause we know we have to deploy a SWAT team, 'cause we, it starts with this building for any situation.
Information - Control	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	It starts with the people... we of course immediately ask is there an emergency. Because whether you're dialing 7-digit or 911 it could be either/or if it's coming in on. And once they've identified whether it is or isn't then, you know, there's a procedure after that. But a routine call is normally not an emergency per se. It may be an emergency to that caller, it's just not an emergency to the actual police. But they take that information. They figure out what's going on. Where can we send the deputy to, to speak with them? Take down their contact information in the document, who we're speaking to and what's going briefly in the call.
Information - Control	COMMS	R	Comms Personnel	36-45	11-20	Female	COMMS-R-013	We are constantly using technology to help us in using cellphones to locate people that a missing or lost or sometimes unfortunately wanted for a really bad thing. But... not only that our records management system, we had a bank robbery and we had a description of the guy and a description of his vehicle. I immediately went into our record management system which tracks any vehicle we've ever deal with and searched for an older model Chevy Blazer. Came up with 3 or 4 names in the vicinity of the bank that it happened at 'cause we knew it was an amateur, not a professional [Laughing] and anyway. And within 5 minutes we knew who robbed the bank because I pulled up a driver's license pictures and sent it to the detective and said is this him?

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Information - Control	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	Well you just basically just convey the information that the caller gave you and try to remain as calm as you can, speak as clearly as you can so they can understand and just try to do it as quickly as you can.
Information - Control	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	No. We actually give all the information out. There is point where in the initial dispatch we only give like the most important information but after they've been dispatched and they're en route then we'll convey like the other stuff.
Information - Control	COMMS	R	Comms Personnel	26-35	6-10	Female	COMMS-R-014	Well... because there are--like I say there are a lot of instances where we have to look up stuff for our guys because like I say we are the country and some of the addresses don't... aren't easy to find. So [Laughing] we have to try to Google and look up stuff and we've had callers who are in this [County] and they know someone who needs help in another [County] so we have to like Google, you know, information for them so--and we do that a lot.
Information - Control	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	Because you flow better with people that you, you know, that you know and that you--you're comfortable with, you know? You can like if I'm talking to somebody that I know, I know what you're going to want to know. So you're my--if you're my sergeant on my shift and I know well this is how you normally take calls and I know you know it's okay for me to tell you anything then I'll be quicker, you know, to tell you everything I might know, even if it's something that the person didn't tell me but if, you know, I don't relay know you like that then I'm just going to tell you what they told me. Like if I--say for instance we get like a 911 call and the 911 call is from somebody that I had a run-in with personally or something or somebody I know personally.
Information - Control	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	Well I could say, well, this person is a little, you know...? They might get a little aggravated with you or something or they might get a little extra with you. I could tell you that if I kind of know you. And if I don't and I feel like, well, everything I say you going to run back in, you know, try to tell the supervisor or contradict or whatever, I'm not going to worry about telling you that. I'm just going to let you go and figure it out yourself.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Information - Control	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	I'll tell you, you know, everything they told me to get you to the call but I'm not going to tell you anything extra.
Information - Control	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	...our computers never take a break. I guess like they--they just run 24/7. And the passing on, I definitely think that helps because you get to know like what happened on the shift before. So if somebody calls us right back and like well I just talked to y'all, I'm like, no, you didn't talk to me. But, yeah, we'll know what happened because we can look at the shift notes and they can tell us. They've already told us what happened.
Information - Control	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	I think the--I think it's the in--an in house thing. I think it's like first responder type of thing. Like I think it's like either they think like we don't give them enough information or we didn't ask or something like that but it's like how could you not get enough information. Like I understand you're going but there's no way for us to sit there and tell you every little thing. All we can tell you is what we were told. And we have questions that we ask. We know the questions to ask.
Information - Control	COMMS	R	Comms Personnel	26-35	5 or less	Female	COMMS-R-015	Mm-hmm. Yes. Absolutely because... I mean we try to dispatch out as quickly as we can but we try to give the information that's needed of course. So sometimes if they tell me something that I feel like it's kind of irrelevant then I'll leave that out. But most of the--most important thing is the location, what's going on, the safety, if it's 2 people involved, if the people are still there, what the relationship might be to each other, that's the main thing.
Information - Control	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	They're going to talk to a wide range of people. They're going to talk to anywhere from callers having medical emergencies to fire emergencies, to law enforcement. Things that they're going to interact with: deputies, administrators of the sheriff's office, and so forth. They're going to... we don't do emergency medical dispatch. We transfer medical calls to the private ambulance service. So the emergency medical dispatch instructions and pre-arrival instructions and things are given by the private ambulance service. They will talk to firemen, different municipal police departments. We have I believe it's 7 municipal police departments here in the [County]. We dispatch for all of those. And so

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								the dispatchers will talk to those people.
Information - Control	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	It's just a wide range of individuals on a daily basis including surrounding agencies. Giving them updates of calls that may be affecting their area that are on the jurisdictional borders and things like that.
Information - Control	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	We--I guess the way that we view from law enforcement is that our dispatchers are the lifelines. They are the informational resources of these deputies and police officers and firefighters out there. If they need something on that scene, they look to the dispatcher to find that resource for them. And being in a controlled environment it's much easier for us to start looking things up, the resources for them, rather than it is that incident commander in most cases to look it up, look at an iPhone and start Googling something rather than calling dispatch and saying, hey, I need additional manpower, I need hazardous materials, I need the coroner, I need whatever resource, it's much easier for this dispatcher in a controlled environment to get that.
Information - Control	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	Getting the important information from the caller and relaying that information to the responders timely and accurately. Getting it from that caller, no matter what the circumstances are and then relaying it timely and accurately. We don't determine how that responder goes, whether it's lights and sirens or not. They determine that based off the information and that's why it's critical with that information that's given timely and accurately so that the responders can make an appropriate decision on... how they respond and... basically that picture that was painted for them, how do they go and finish dealing with that situation to satisfy the needs of the victim or the caller or whatever it is.
Information - Control	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	Location is number one. We can dispatch. We can do anything else in the world with that call if we have the location. But getting that location is just paramount. We can't do anything if we don't get a location. Finding out what's going on and who's involved. What hazards are there whether it's a police call, law enforcement call, or a fire call, medical call, still finding out what hazards are there that can impact that responder

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								going or the people around that event. And then giving them the basic instructions to help themselves before we arrive.
Information - Control	COMMS	R	Comms Personnel	46-55	21-30	Male	COMMS-R-016	Yes, they do. They make a decision whether that is pertinent information for the event and whether it needs to be passed along. Some do that better than others just honestly. Some make a better decision on that than others. But I think they do a pretty good job of passing along the important information. We do have mobile data terminals, mobile data computers, in the police cars and some of our fire vehicle that they can actually see the information that the telecommunicator, call taker, dispatcher, has received and whether that's important for them to know or whether it was just important for us to document in that particular file card as additional information. And then they have to--the decisions that they have to make are do they run that person NCIC. Do they get a criminal history on that individual because he has warrants out for him?
Information - Control	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	We always have some fun calls. I like dealing with the people. I like dealing with officers. When I can get them all their information, and the call is easy, and it's set up, and we can do the steps that make it successful, that's when it's exhilarating. It's exhilarating when I can catch the perp, when we have someone, that we're behind someone chasing them, or we're dealing with possible bomb threat or something, we're able to take down that individual through protocol, properly, without any things being crossed, that's the most perfect, exhilarating day.
Information - Control	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	And then we go from there, and then at 7:00 we get off, and we give them the rundown of what happened that day. If it's serious, I've got to let them know. During this time, we're also dealing with national crime information files. We have to do a lot with that as far as if somebody stole your phone, and [inaudible] NCIC. If someone gets a hit on it, I have to verify that. That can happen time anytime during our shift. And so if we input someone as like a wanted person, I would really need to relay that to the next shift.
Information - Control	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	I'm making the decision to withhold, if it's minor details, I have to kind of feed it through. If their situation, well I think that they ate lunch today.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								And that's why they're acting weird. Or they ate mushrooms, well that's a little bit different. If they're like a diabetic call, I think that they didn't eat lunch today. Well okay, I guess I could give that out, but does it really matter as long as they're alert? That's something I would give to EMS. Certain calls I would not give out information if it's not necessary. Some things are not necessary.
Information - Control	COMMS	U	Comms Personnel	26-35	6-10	Female	COMMS-U-017	I kind of prefer that even though it's kind of, you're still kind of pushing off information, and they're pushing off what they're given. Sometimes city will not even give us information when you're dealing, 'cause they're dealing with so much. They may not give us all the information when transferring a call. It's not always possible to get that. So it kind of gets frustrating. But most of the time, you are going to get decent information. I have enough to work with.
Information - Control	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	... We also do--usually, you can see these folders up here, we do bike registrations, we do--anything like that, Lieutenant XXXX does the bike registration, we get the information from them, give it to her, and she does that, and they need a record, like if they were involved in a traffic crash, they come in, they fill out the information, we send it over to Records, and then they get what they came in to get. Yeah, I mean, we have a lot of tasks in here, and it's definitely never a dull moment. We always have something going on.
Information - Control	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	Okay, my job during a call is like--is to get the officer there, you know, get all the information, get the officer where they need to be at, and then have the officer tell me information, and the information he gives me, I put into his call. That way, whenever he's done, he goes to write the report, he has all that in writing.
Information - Control	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	It's just--it's basically getting all the basic information, all the pertinent stuff. You know, other things that they're telling me, I may leave out, because it's not pertinent, just get the officer out there, they can give him the rest of the information, so it's not--you know, I mean, if they call me and tell me somebody has a weapon, I'm going to make sure I know what weapon it is, what they have, if they have it on them, and let them

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								know, but if it's--if they're telling me about--they talked to this person and all that, it's not necessarily something that needs to get out right then, and they talk to the person about it.
Information - Control	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	It's very simple. Basically, what we do is like, if we get a fire alarm, see, this is the Celtron [phonetic] right here, and we get fire alarms that come through there, and they'll ring like an alarm through here, so it'll show up where the--whatever--let's say it's the [Team] Stadium, so it'll come up, [Team] Stadium, say the fire alarm is going off. What we do is, usually, me and XXXX are working together, so I'll usually build the call and then get it out to the officer, the next officer in the rotation, and let them know we have a fire alarm at Tiger Stadium, we're going to get Fire en route. Usually, she's calling Fire, and what it does is like, whenever you pull up Tiger Stadium--like, watch.
Information - Control	COMMS	U	Comms Personnel	26-35	5 or less	Female	COMMS-U-018	Most of them do. Most of them do, so sometimes, you know, we'll send them messages, like if it's--especially if we have a BOLO, if something is BOLO'd out, we send them the BOLO, just to make sure that they have it, we'll put all the information that we have in it and send it to them.
Information - Control	EMS	R	Field Responder	26-35	5 or less	Male	EMS-R-002	But I am expected to say things that could help the incoming crews. I got to give them a task, and I got to give them an update on the patients, or where they're going, or what we're dealing with. I mean, I don't have to give this-- paint this beautiful picture, but I need to start painting the picture.
Information - Control	EMS	U	Field Responder	36-45	11-20	Male	EMS-U-017	...instead of spending an hour transporting a patient to the hospital and doing our report at the hospital and everything else, we can just get the patient's information, transfer it over to them, and we go back into service usually in half an hour or less, instead of being out for an hour on this...
Information - Control	EMS	U	Field Responder	26-35	Not specified	Not specified	EMS-U-004	[S3] It really doesn't differ that much because we all work on the same ambulance, and we're all subject to the same communications codes, and the police have what's called a 10-code system that we use as well. The expectation is that all employees on the ambulance have an

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								equivalent level of training for the operations. The medicine differs, of course.
Information - Control	EMS	R	Supervising Field Responder	46-55	11-20	Male	EMS-R-007	[RE: trip reporting] ...some places have ways to transmit like the EKGs. So you take an EKG of a picture of somebody's heart on the ambulance, you can transmit it to the hospital. The agencies where I work, we don't have to do that because we have a relationship with the hospital that they trust that we can interpret it as well as they can interpret it. What we're saying is happening is what is happening. So I haven't worked in an agency where you have to transmit it before. Some places you upload the EKG into the trip report and then I have had that, and other stuff that you upload. And it's mostly to try to protect you...
Information - Control	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-005	Well, our department has paramedics and firefighters on our engine. The ambulance service is a third-party ambulance service. So we do have to communicate with them and then the police, of course. So we do have three separate entities that we'd have to communicate with. To go in order, if it's just the fire department to the fire department, we just would say, "Hey, you from me." So, "Hey, Engine Two from Engine One, this is what we have." For the ambulance, the company, then we call them whatever ambulance-- the call sign they are. Now, we know that when we're dispatched. They'll say. So we would call-- [Name] is the ambulance, say. [Name] from Engine One...
Information - Control	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-005	...Now, we don't traditionally talk directly to the police. There's a switch we have to switch to talk to police. We can get onto their channel and turn, but we have to ask dispatch. We do that when we have standbys for SWAT or whatever. We'll switch to their channel and then we'll listen. And we can hear the police request entry, and then, "Okay. We'll go in." And a lot of times, there's a minute or two delay before the fire dispatch will tell us that we can go in, whereas if we're just listening to that police channel...
Information - Control	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-005	...Now, when we communicate with the ambulance, as far as I know-- because they don't use the same communication program, computer program, that we use. So they don't get dispatch notes. They only get

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								what they hear on the air. Right. And so there can be information lost based on that. But dispatch airs all our notes. They talk it out loud and we can read with them. We see exactly what they're going to do. But the ambulance providers don't know that. They only hear the notes.
Information - Control	EMS	S	Field Responder	26-35	11-20	Male	EMS-S-005	...So many of us on calls, if we have a unique situation, sometimes we will take a picture with our own personal phone and send it to our chief's personal phone so he can look at it, because the department doesn't issue the rigs smart phones. Only a flip phone, and then a separate digital camera. So we can't make it all work. So having an updated tablet or an updated cell phone for the unit would be very helpful.
Information - Control	EMS	S	Field Responder	46-55	Not specified	Male	EMS-S-006	[RE: wildland ream response] Through the dispatch. Through the [City] dispatch center. So the [State] State Forest Service made a request for X amount of resources, and that went to the [City] dispatch, which is the dispatch center for our wildland team. And we were able to assemble a crew that met their needs. And so we went to the [City] dispatch, which was in communication with the [State] State Forest Service.
Information - Control	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	[RE: getting call information from dispatch] We have what's called the laptop or the MDT... So that information gets sent to us. I believe it's through WiFi or through the airwaves, I'm not sure [laughter]. So yeah, it gets sent out to us and it tells us, the time that gets dispatched, the kind of incident, any special remarks, any special things that we should be aware of. It tells us what other companies are going to be coming with us, the nature of the call, and sometimes if police will be coming with us, they'll let us know there would be police with us on the run.
Information - Control	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	Just recently in the last couple of months, we've been told that if we do get a subway call we have to get a firetruck or an engine truck, a company with us, for line of communication. So it will be the ambulance, and then it will be the company of the firetruck in the subway station because we have one fireman up at the engine, and then we'll have a channel called fire, and we'll be able to communicate through a fire line. It's a short-distance channel. We're able to communicate. So kind of like telephone, we'll have one channel to the fire station and to the fire

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								channel, and then back to the firemen that's up on top who can communicate to the alarm office, kind of like that. And that's just recently in the last few months we've been told to. If we get a fire call or a medical call in the subway, we have to get a fire truck with us, which is great.
Information - Control	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	So, what I do, when I get dispatched a call on my MDT, I looked at the time, the location, the incident. I'll look at if it's male, female, conscious and breathing. I look at most important information and that information will be there. The alarm office will have remarks on there depending on the caller. They also put on there, which is great, I'm glad they do that, it's called the [local PD} hashtag number. I know how to retrieve that number through my MDT. Down at the bottom, you're able to type in to send information. I'll type in that [local PD] number out to the alarm office and somehow, some way, it comes back to me with what the first 911 call was. What the call is from the call taker...
Information - Control	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	...So, say if I'm calling 911, call taker comes on, "What is your emergency?" They're typing this in already. Me, as a paramedic, through the [local PD] number, I'm looking that information up. So I'll send that code number to the alarm office and that call taker information that they printed will come back to me on my MDT and it tells you everything that person on that 911 has stated. Not everybody knows how to do that.
Information - Control	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	[RE: retrieving call taker info] I mean it's a learning thing. I learned that in the field. I learned that in the field. It's all just asking questions, like "How do you do this? How do you do that?" So, and then it tells me everything. The person's complaining of this, and this, and this, and that. Or the offender's still on the scene. It has much more information on there. And I already know that, already going into the scene.
Information - Control	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	I know a lot that goes on at the [dispatch center] and they're very busy and they get a lot of calls. I can just imagine them sitting there and get all these calls, and I understand the call taker, they're trying to get all this information. But I think the information they give us is limited because I think it's just a lot of work. They tell us what we need to know. We have

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								an injured victim, he's conscious. We'll send you another company, the basic information. I know if it's a critical call, if it's a battery and the offender's still there, they'll let us know. They'll let us know what we need to know. Because it's so busy in there. I just know it's just so busy in there.
Information - Control	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	[RE: dispatch] Any piece of information for me. Even if it's a stubbed toe, they'll give us the basic information, but I'll look it up. And sometimes it will be in there. How did the person stub his toe? He fell down the stairs and stubbed his toe. All we got was stubbed toe. They didn't tell us he fell down 10 flights of stairs and stubbed his toe.
Information - Control	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	[RE: preferred mode for getting detailed dispatch info] MDT's good. That's efficient enough for me. There's another way too. If we're at the firehouse, and we're waiting for the call, there's the alarm terminal, another computer, and it alerts us by a bell. And the computer system, a female voice will come on, "[company], we have a call, person down." It tells us the address, and that's pretty much about it. At the terminal, at the area where the computer is at, it's called the-- brain fart. It's a printed ticket. A paper copy comes out. It'll tell us the company, the time, basic information, the address. That's pretty much about it. And I always take that ticket with me.
Information - Control	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	[RE: dispatch printed ticket] They haven't been notified. You have a thousand people in the [high rise]: visitors, tourists, people that live there. And there's security. And someone who actually is living in the [high rise] called for shortness of breath, and security may not know because they're dealing with the tourists and whatnot. So at least I have that printed ticket here. We're going to go to room 4502, they're complaining of shortness of breath. And that ticket tells us also how many stairs there is. It tells us exit points, entry points.
Information - Control	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	[RE: communication issues] Well, one big thing is when you have multiple companies trying to talk at the same time to the dispatcher because there is only two EMS. You got EMS [city], and EMS [city]... So you have two dispatchers for EMS. So you could have a big incidence up

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								north where there's six ambulances and they're all trying to talk at the same time. And dispatch will say, "Okay. Hold on, guys." He'll triage via, he'll "Let me see what's going on first, okay? [Company], go ahead with your message. Okay. Now [company], go ahead with your message." So he has to triage that over them all.
Information - Control	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	when it's summertime, it's so busy. Dispatch is trying to send ambulances and send them here, send them there, and we're telling them, "Okay, we're on the scene. We're leaving the scene." We have all these ambulances just telling dispatch. So with me, when we're leaving the hospital on our MDT on the ambulance, I'll hit returning to base on the MDT. And I'll look to see if it registered. So there's two icons. When I hit the button, it'll say, "Okay. [company]'s returning." I'm going to look at the other icon to see if dispatch acknowledged that. If they acknowledged that, then it will say return. If they don't acknowledge that, it won't say return. And I'll look. And I'll look to see. And I'll hit return on the button again. Return. It'll say return on my company, and if I see if it's not acknowledging by [dispatch], then I think the system may be down.
Information - Control	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	[RE: using MDT to communicate with dispatch] ...that's something where I think everybody should be trained on too. You need to look at your computer. If I know that it's really busy on it, there's a lot of communication over the radio, and it's something simple where I'm going to have to tell dispatch, "I'm on the scene." and there's a lot of other important stuff going on, I'm going to hit on the scene in my MDT. If it says the alarm office acknowledged my on the scene, I'm not going to tell them I'm on the scene, because they have other important things. If it's quiet I'm going to say, "Okay. [company]'s on the scene." "Okay, [company]. You're on the scene." But if it's really busy out and okay, "Take it to the gunshot. Take it to this. Take it to the fire." I'll hit on the scene from my stubbed toe and I want to make sure the alarm office has acknowledged me. Okay, they acknowledged me. They know I'm here. I'm not even going to bother because they got other important issues relaying over the radio.

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
Information - Control	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	[RE: using radio to communicate with dispatch] We're supposed to use it all the time. There's a memo out there, there's an order out there that we've got to tell them. We have to tell them we're on the scene. We're facing northbound, [company]'s on the scene. I think it's a personal thing. It's my personal thing. I do follow the orders if it's nothing really busy going on. I will say, "[company] northbound. We're on the scene." and I want to make sure they acknowledge. But if it's so busy out there, that's my personal thing. I'm going to make sure I'm going to hit that button. Did they acknowledge? Okay, they acknowledged me. If I'm in the call, whatever, radio traffic has subsided, "Hey. We're on the scene." "Okay. I got you on the scene." Cool. It's a safety thing too, because they're monitoring us. They want to make sure that we're safe. That we're on the scene. And also too, they want to make sure that we've made it to our patient. So they want us to say over the radio. Tell us we're on the scene. But there's only one channel. There's only one EMS channel.
Information - Control	EMS	U	Field Responder	36-45	6-10	Male	EMS-U-012	Our cardiac monitors. We have Bluetooth modems, where we're able to communicate to the doctor at the hospital if we want him to see real time of our patient's cardiac rhythm. Say, "Hey doctor, can you look at this second-degree heart block? I'm going to send this out to you right now." So in my cardiac modem, I'll put in buttons, and I'll go scroll to the hospital, and I'll hit send, and that picture of the EKG gets to the doctor. It's pretty cool. I think that's cool. And it's real time. He'll get it right then in a matter of seconds. I think that's great.
Information - Control	EMS	U	Other Public Safety Personnel	46-55	21-30	Female	EMS-U-009	We do. Not so much as on the radio end of it. Yes, I do. I deal with [State] Department of Public Health, the [County] Department of Public Health, and I'm involved in the [Hands?] program where it's a hospital-bed-assignment program. Where I get notified if there's a hospital somewhere in [State] that is-- like one of these hospitals had to evacuate due to the water, so they let me know. They contact us and find out how many beds are available in [City]. So we do have to communicate.
Information - Control	EMS	U	Other	46-55	21-30	Female	EMS-	It does. We can download our runs. Cardiac arrest runs immediately get

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
			Public Safety Personnel				U-009	sent to the-- we can forward the strip right to the hospital. We call from the inside of the hospital on our telemetry radio calling the hospital to let them know what we have. And the computers, of course, keep and download every time you turn it on. On the heart monitor, I mean. Everything is saved and downloaded.
Information - Control	EMS	U	Other Public Safety Personnel	46-55	21-30	Female	EMS-U-009	... He's responsible for all of our MRU, mobile reporting unit data, and what people can ask for. He gets calls from the morgue in the middle of the night, the police. I mean, he's got everything. All the information we put on these run sheets, he has. Yeah. So I think that's scary to them too.
Information - Control	EMS	U	Field Responder	26-35	6-10	Male	EMS-U-013	Yeah, it's just us communicating through the dispatch if they call us on the radio or something like that, see if we're available, see where we're at, wherever like that.
Information - Control	EMS	U	Field Responder	26-35	6-10	Male	EMS-U-013	We don't really communicate with [City]PD. But when we get on scene and if there's a fire company before us, then we do communicate with them to see if we need to bring anything to them, if they're going to bring the patient out to us or whatever. We do communicate with them.
Information - Control	EMS	U	Field Responder	26-35	6-10	Male	EMS-U-013	Yeah, most of the runs will tell you if the person's conscious, if he's breathing-- he or she is breathing. That kind of information does come across if it's available, so it just really depends on what the call taker receives, I guess.
Information - Control	EMS	U	Field Responder	26-35	6-10	Male	EMS-U-013	Yeah, it'll-- certain, like you said, nature of the incident, so we'll know. I mean, it'll show on the computer. It'll tell us if-- what other fire companies or anything like that is being dispatched with us or-- it will show that. But we don't know anything about-- we have to talk on the radio to find out if police are invited, or are going to the scene, are they on scene, something like that, so--
Information - Control	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	You know if we're busy we have calls if you mean radio communication. What we do is first thing in the morning at 8 a.m. our dispatch will send over a test tone and just basically tell us good morning, we respond back so we know the radios are working. They do that every morning and then when we get an actual call we'll get a loud tone there in our

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								bunk area or throughout the station and then dispatch will give us information, dispatch information ... And then of course we let them know that we've heard them and either clarify information if we couldn't understand them..
Information - Control	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	We have a cardiac monitor in our truck. That's really where it ends as far as patient care goes and that some of them have the capability of sending if we do an EKG or 12 lead of their heart that we can send that directly to the hospital while we're in route.
Information - Control	EMS	R	Field Responder	36-45	5 or less	Female	EMS-R-019	There are. You know us being human. Dispatch will misinterpret what a patient said and relay incorrect information to us. We may they may relay the right information but we don't hear it right whether it's because we've got the sirens going or we may not be paying attention whatever it may be so human error of course plays a big role picking up and then I think sometimes again that human error just not asking for enough information as well. So part of it is our own fault and what we do and don't do but the better radio system and I think that I think that in general dispatch people that work in EMS all of us as a group could be trained better as far as how to use the things that we do have like the radios.
Information - Control	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	because you have to guess in a way-- "911, what's your emergency?" "My house is on fire," and you get there and it's a trash can, well we don't need seven units. Everybody else go home except for one. "Hey what's your problem?" "Hey, I see a little bit of smoke," we send a smoke investigation unit for smoke investigation, and suddenly it's a big fire. "Hey, we need a bunch of more folks."
Information - Control	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	...And so the battalion chiefs all get together at 10:30. They look at how many people are on vacation, sick, or training, and we staff our battalions and we talk on the radio, basically an open-talk channel like a-- when you hit it, everybody else is listening to your conversation or what you're saying and we pick people from a list, as a group, to fill all the spots. And so a radio helps us do that, that is, it doesn't have to be encrypted, it can be open. It's not a big deal. We also send out our orders

Code - Subcode	Discipline	Area	Role	Age	Experience	Gender	Transcript ID	Quote
								about, "I have these stations, these people, this movement." And we've created a system on Outlook which is a meeting notice that every station saves, this recurring notice, it's a blank template, and then we go in. And I think every BC does this now where it's, "Here's who's coming to work, who shows off, and here's any special--" like today I've got some people training. Somebody's training at 2:00, somebody's training at 3:00, somebody's training in the morning, and so my whole team reads that daily order email or meeting notice, and then they have their marching orders. And of course, they can call me...So we have the radio that we all get on one channel, say channel one, and we're all listening to that channel. So when the first person gets there, they tell us what they have. "It's a fire. Here's how big it is. Here's what I'm doing."
Information - Control	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	I know-- like, "Tell me what conditions are inside." And if they said, "Well, it's smokey and there's fire." Well, that's okay. What's better is if it's brown, heat-driven smoke, under pressure. The fire is 25% of the structure. I'll say, "Hey, I want a more thorough update, Engine One, fire attack. I want you to tell me." And again, if something went wrong, then I would know in that group, "Hey, Engine Two and this other Rescue 14, Engine One personnel are in trouble. "Are you'll in their location?"
Information - Control	FF	U	Supervising Field Responder	46-55	21-30	Male	FF-U-001	...I want to know how hot the conditions are inside. And so please give me a CAN report about, not just the smoke and what you see; the color, the velocity, the density, but the heat issue and how much of the house is involved.
Information - Control	FF	U	Field Responder	46-55	21-30	Male	FF-U-002	I need to know how big or small it is. I need to know where it's going. I need to know how many people I'm going to have to solve my problem. And then, I go from there. So it's a matter of scope, how big or small is the incident, and what do I have--
Information - Control	FF	U	Field Responder	46-55	21-30	Male	FF-U-002	That's what dispatch-- that's where they send me where I'm going to and everything they know about what's happening and everything my department knows about the building and so on and so on.
Information - Control	FF	U	Field	36-45	11-20	Male	FF-U-003	Some things we do in our crew that I think is really good is if we go to a

			Responder					medical call and say, "This lady lives alone where she's bedridden," we call dispatch and they put it in our files as a note on the call and it comes up on the MDC. I forget where it comes up at, but it tells us where they sleep. So they sleep in the bedroom in the Alpha Delta corner of the house, you know what I'm saying, Alpha Delta?
